(a) Every application review of classification or for Micronaire determination under § 27.62 or § 27.63 shall be filed with the Marketing Services Office serving the location at which the cotton is stored. The application shall in each case be in the hands of such Marketing Services Office within the time specified in § 27.62 or § 27.63 for applying for review: *Provided*, That any Marketing Services Office may designate any officer of the Cotton Division or a representative of an exchange inspection agency located at another point to receive applications, and in such cases the applications shall be in the hands of the persons so designated within the time specified. Any person making such application shall, upon call of the Marketing Services Office or person with whom such application was filed under this section, surrender the cotton class certificates covering the cotton involved.

* * * * *

31. Section 27.66 would be revised to read as follows:

§ 27.66 Dismissal of application for review.

Any application for review may be dismissed whenever it shall be found by the Area Director or the Director that it was filed without good cause or for dilatory purposes.

32. Section 27.67 would be revised to read as follows:

§ 27.67 Use of new samples in reviews and Micronaire determinations.

Unless the use of new samples shall be necessary in the judgment of the Area Director, a review classification pursuant to §§ 27.61 to 27.72, or a Micronaire determination pursuant to § 27.14, § 27.62 or § 27.63, shall be made by reference to the samples, if any, of the cotton involved in the possession of the Marketing Services Office: but if the use of new samples is deemed necessary by the Area Director, or if there are no samples of the cotton in the possession of the Marketing Services Office, or if the samples of the cotton have been in the possession of the Marketing Services Office for more than one year, the person requesting the review classification or Micronaire determination shall cause new samples to be drawn for the purpose and submitted to the Marketing Services Office in accordance with this subpart.

33. Section 27.69 would be revised to read as follows:

§ 27.69 Classification review; notations on certificate.

When a review of classification is made after the issuance of a cotton class certificate, the results of the review classification, the date of issuance of the review classification results, and the signature of the Head, Grading Section shall be entered on the cotton class certificate. Thereupon the certificate shall be returned to the person who requested the review.

34. Section 27.73 would be revised to read as follows:

§ 27.73 Supervision of transfers of cotton.

Whenever the owner of any cotton inspected and sampled for classification pursuant to this subpart and for which the owner holds valid cotton class certificates desires to transfer such cotton to a different delivery point, or to a different warehouse at the same delivery point, for the purpose of having it made available for delivery upon a basis grade contract, such transfer shall be effected under the supervision of an exchange inspection agency or a supervisor of cotton inspection.

35. Section 27.81 would be revised to read as follows:

§ 27.81 Fees; certificates.

For each new certificate issued in substitution for a prior certificate at the request of the holder thereof, for the purposes of business convenience, or when made necessary by the transfer of the cotton under the supervison of an exchange inspection agency as provided in § 27.73, the person making the request shall pay a fee of 45 cents for each certificate issued.

36. Section 27.89 would be revised to read as follows:

§ 27.89 Expenses; inspection; sampling.

Expense of inspection and sampling, the preparation of the samples and the delivery of such samples in accordance with § 27.24, shall be borne by the party requesting the classification of the cotton involved. When a review of classification or a Micronaire determination is requested and samples of the cotton involved are not in possession of a Marketing Services Office, the expense of inspection, sampling, preparation of samples, and delivery of the samples to the Marketing Services Office shall be borne by the party requesting the service.

37. Section 27.90 would be revised to read as follows:

§ 27.90 Bills for payment of fees and expenses.

The Cotton Division shall deliver bills to all persons from whom payment for fees or expenses on account of services under this subpart shall be due. Such bills shall be rendered as soon as practicable after the last day of each month for the amounts due and unpaid on such day. When necessary, in the discretion of the Area Director or the Director, any bill may be rendered at an earlier date for any fees and expenses then due by the person to whom such bill shall be rendered. Payment of any such bill shall be made as soon as possible after the rendition thereof, but in any event not later than 2 weeks after such rendition.

38. Section 27.91 would be revised to read as follows:

§ 27.91 Advance deposit may be required.

If requested by the Area Director with whom the classification request is required to be filed or by the Director, the person from whom any payment under this subpart may become due shall make an advance deposit to cover such payment in such amount as may be necessary in the judgment of the official requesting the same.

39. Section 27.98 would be amended by revising paragraph (a) to read as follows. (The introductory paragraph is shown for the reader's convenience.)

§ 27.98 Responsibilities and duties of the Cotton Division.

The Cotton Division is responsible for the accuracy of price quotations in each bona fide spot market. In carrying out this responsibility the Cotton Division will perform the following duties and functions:

(a) The Cotton Division will assign an employee in each market to collect, analyze, and present periodically to the quotation committee pertinent information on the prices and values of spot cotton in the market to supplement information collected and available to the committee. The employee will attend each scheduled meeting of the committee and present these findings and recommendations on quotations.

* * * * *

40. Section 27.102 would be revised to read as follows:

§ 27.102 Administration.

The details of the method of carrying out the provisions of this subpart in each bona fide spot market shall be subject to

S-A09052 0005(00)06-MAY-83-13:03:51)

the approval of the Director or shall be prescribed by the Director.

Dated: May 3, 1983.

William T. Manley,

Duputy Administrator, Marketing Program Operations.

BILLING CODE 3410-02-M

7 CFR Part 29

Allocation of Tobacco Inspection Services; Eligibility for Price Support

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: the regulations under the Tobacco Inspection Act governing designated tobacco auction markets are hereby proposed to be amended to: (1) Terminate designations for eight tobacco markets that have been inactive for two or more seasons; (2) delete from the listing of designated markets the four Maryland tobacco markets for which producers, in a 1982 referendum, voted against mandatory, federal grading, and (3) to delete repetitious, statutory language which has no effect on the substance of the regulations.

DATE: Comments are due on or before July 8, 1983.

FOR FURTHER INFORMATION CONTACT: Lioniel S. Edwards, director, Tobacco Division, Agricultural Marketing Service, U.S. Department of Agriculture, Room 502 Annex Building, Washington, D.C. 20250 (202) 447–2567.

SUPPLEMENTARY INFORMATION: Section 29.73 of the regulations under the Tobacco Inspection Act (7 CFR 29.73) provides that the designation of a tobacco auction market "shall terminate automatically at the end of any two consecutive marketing seasons during which a designated market does not conduct any sales of tobacco at auction."

According to Department records, no auctions have been conducted at the following listed markets and, in view of the long periods in which no sales have taken place at these locations, their designation as tobacco auction markets is hereby proposed to be terminated:

Market	Date designated	Years inactive
Martinsville, VA.	June 26, 1942 (7 FR 4611)	2
Ellerbe, NC	Aug 25,1949 (14FR 5364)	4
Fayetteville, NC.	June 17, 1947 (12 FR 4015)	4
Lamar, SC	May 28,1951 (16 FR 5108)	4
Pearson, GA	May 13, 1955 (20 FR 3251)	4
Quitman, GA	Aug. 28, 1945 (10 FR 11104)	5
Sylvester, GA	June 21,1950 (15 FR 3969)	5
Swainsboro, Ga.	July 6, 1956 (21d FR 4998)	7

All Maryland tobacco auction markets were designated May 17, 1946, (13 FR 2579). The Department conducted a referendum February 8–12, 1982, to determine if Maryland producers favored termination of the tobacco auction markets in that State. By a vote of 1263 to 242, Maryland producers favored the termination of the designations, thus eliminating the requirement for mandatory, federal grading of the Maryland tobacco crop in the 1982 and succeeding seasons. In view of this determination, the designations of tobacco auction markets in the following locations were terminated: Hughesville, LaPlata, Upper Marlboro, and Waldorf, Maryland. The department proposes to delete these markets from the designations listed under § 29.8001 of the regulations.

The Department proposes to delete provisions of section 29.8001 (7 CFR § 29.8001) which quote verbatim from sections 2 and 5 of the Tobacco Inspection Act. The quotation is deemed unnecessary as repetitious of statutory language contained in the Tobacco inspection Act of 1935, as amended. This change has no effect on the substance of the regulations. Also, the Department proposes to delete the words appearing in parentheses immediately following the table in Section 29.8001 and to insert in its stead: (1) The authority for the regulations and (2) the source of the amendments thereto.

The proposed rule has been reviewed under USDA procedures established to implement Executive Order 12291 and the Secretary's Memorandum 1512–1 and has been determined to be a "nonmajor" rule because it does not meet any of the criteria established for major rules under the executive order. Initial review of the regulations contained in 7 CFR Part 29, for need, currency, clarity, and effectiveness has been completed.

Additionally, in conformance with the provisions of Pub. L. 96–354, Regulatory Flexibility Act, full consideration has been given to the potential economic impact upon small business. Tobacco warehousemen and producers fall within the confines of "small business" as defined in the Regulatory Flexibility Act. A number of firms which are affected by these proposed regulations do not meet the definition of small business either because of their individual size or because of their dominant position in one or more marketing areas. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will have no significant economic impact upon all entities, small or large, and will in no way affect the normal competition in the market place.

All persons who desire to submit written data, views, or arguments for consideration in connection with this proposal may file the same with Lioniel S. Edwards, Director, Tobacco Division, Agricultural Marketing Service, U.S. Department of Agriculture, Room 502 Annex Building, Washington, D.C., 20250, not later than 60 days after publication in the **Federal Register.**

All written submissions made pursuant to this notice will be made available for public inspection at the above location during regular business hours (7 CFR 1.27(b)).

List of Subjects in 7 CFR Part 29

Administrative practices and procedure, Tobacco.

PART 29—TOBACCO INSPECTION

Accordingly, the Department hereby proposes to amend the regulations under the Tobacco Inspection Act contained in 7 CFR Part 29, Subpart D, as follows:

1. Amend § 29.8001 by inserting immediately after the heading "Subpart D—Orders of Designation of Tobacco Markets," the following:

Authority: Sec. 14, 49 Stat. 734, as amended; 7 U.S.C. 511m. [New]

Source: 1 FR 649, June 23, 1936; 14 FR 465, February 3, 1949; 24 FR 2776, April 10, 1959; 35 FR 6107, April 15, 1970; 39 FR 36957, October 16, 1974; and 48 FR 10291, March 11, 1983, unless otherwise noted. [New]

2. Amend § 29.8001 by removing the first, second, and third paragraphs therefrom and replace with the following:

§ 29.8001 Designation of tobacco markets.

Following is a listing of officially designated tobacco markets:

* * * * *

3. Amend the table contained in § 29.8001, entitled "Designated Tobacco Markets" as follows:

(a) Item (t) is amended by removing the words "Martinsville, Va." from the column entitled Auction markets.

(b) Item (w) is removed in its entirety.

(c) Items (x), (y), and (z) are relettered (w), (x), and (y), respectively, to maintain alphabetical sequence.

(d) Items (aa) and (bb) are removed in their entirety.

(e) Item (cc) is relettered (z), and items (dd), (ee), (ff), and (gg) are relettered (aa), (bb), (cc), (dd), respectively, to maintain alphabetical sequence.

(f) Item (hh) is removed in its entirety.

(g) Item (ii) is relettered (ee) to maintain alphabetical sequence.

(h) Item (jj) is amended by removing the word "Georgia" from the column entitled Territory and the words "Sylvester, Ga." from the column entitled Auction markets. Further, (jj) is relettered (ff) to maintain alphabetical sequence.

(i) Item (kk) is amended by removing the words "Scottsville, Ky." from the column entitled Auction markets. Further, item (kk) is relettered (gg) to maintain alphabetical sequence.

(j) Items (ll) and (mm) are relettered (hh) and (ii), respectively, to maintain alphabetical sequence.

(k) Item (nn) is removed in its entirety.

(l) Items (oo), (pp), and (qq) are relettered (jj), (kk), and (ll), respectively, to maintain alphabetical sequence.

(m) Item (rr) is amended by removing the words "and Pearson" from the column entitled Auction markets. Further, (rr) is relettered (mm) to maintain alphabetical sequence.

(n) Item (ss) is relettered (nn) to maintain alphabetical sequence.

(o) Item (tt) is amended by removing the words, "Swainsboro, Ga.," from the column entitled Auction markets. Item (tt) is relettered (oo) to maintain alphabetical sequence.

(p) Items (uu) and (vv) are relettered (pp) and (qq), respectively, to maintain alphabetical sequence.

(q) Item (ww) is amended to add the words "March 11, 1983" to the column entitled Order of designation and to add the words 48 FR 10291 to the column entitled Citation. Item (ww) is relettered (rr) to maintain alphabetical sequence.

4. Remove the two paragraphs immediately following the table in § 29.8001.

For purposes of clarity, the table has been set out from item (w):

* * * * *

BILLING CODE 3410-02-M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 20

Reports of Theft or Loss of Licensed Material

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission is considering amending its regulations concerned with reports of theft or loss of licensed material. The proposed amendment would modify that part of the regulation which permits licensee judgment in the reporting of loss or theft of licensed material, with a requirement that the licensee report all licensed material (in a quantity greater than the minumum specified in the amended regulation) lost, stolen or missing for more than 30 days after its absence becomes known to the licensee. Modification of this judgmental condition will result in the reporting of all significant losses or thefts and will provide assurance that adequate radiological safety evaluation, for the purpose of protecting the public, are made by the NRC as well as the licensee in investigating the circumstances surrounding any loss or theft of licensed material.

DATES: Comments should be submitted on or before June 23, 1983. Comments received after this date will be considered if it is practicable to do so, but assurance of consideration cannot be given except as to comments received on or before that date.

ADDRESSES: Submit written comments on the proposal and/or the supporting value/impact statement to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch. Single copies of the value/impact statement may be obtained on request from the contact identified below. Copies of the value/impact statement and of comments received by the Commission may be examined in the Commission's Public Document Room at 1717 H Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Donald O. Nellis, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 443–5825.

SUPPLEMENTARY INFORMATION:

Background

On November 12, 1980, the Radiation Safety Officer on an NRC licensee notified the Nuclear Regulatory Commision of the loss or theft of a package of licensed material. The package, containing 10 12.5-millicurie

VOL
48
ISS
90
MY
9
1983
UMI

cesium-137 sealed sources, was placed in the transportation system to be shipped to South Korea in February 1979. In September 1979, the licensee was notified that the package had not been received. It did not, however, report the loss or theft to the Nuclear Regulatory Commission, in accordance with 10 CFR 20.402, until November 1980 because it believed that the unopened package was somewhere within the transportation sytem and did not constitute a significant hazard to person in unrestricted areas.

The Cs-137 sources were contained in a sealed lead-pipe shield, held in a plywood frame in the center of a Department of Transportation Specification 7A package. Radiation levels from the package were reported to be 1.8 mR/hr (millirem/hour) at 3 feet and 16 mR/hr on contact.

Assuming that the package had indeed been opened, radiation levels of 48 mR/hr at 3 feet, 436 mR/hr at 1 foot, and 1742 mR/hr at 6 inches would have been present. These radiation levels are considerably in excess of the level specified for unrestricted areas in § 20.105.

The Nuclear Regulatory Commission considers that inexcusable delays in reporting missing material such as described above, could, under plausible circumstances, constitute significant hazards to persons engaged in the transportation industry and to the public in general. The staff recognizes that currently 10 CFR 20.402 due to its judgmental language does not require a report if a licensee believes that a loss or theft does not constitute a substantial hazard in unrestricted areas. A Notice of Violation was issued to the licensee in this case because of its failure to exercise reasonable judgment. However, the NRC staff thinks that the existing regulations should be amended to require licensees to apply a common standard to the reporting of lost or stolen licensed material. This approach is in keeping with a recent Commission policy statement concerning the responsibility of licensees, published in the **Federal Register** of July 20, 1982 (47 FR 31462). The Commission, therefore, is proposing to amend § 20.402 to modify the judgmental language which allows the licensee to decide whether or not to report a loss or theft of licensed material. In order to reduce the number of reports required under the amended version of § 20.402, the Commission has decided that only losses or thefts of licensed material in quantities greater than 10 times the quantities specified in Appendix C of Part 20 need be reported. The bases for this judgment are § 20.303(b)(2) which permits licensees to discharge into sanitary sewage systems 10 times the quantities specified in Appendix C of Part 20, and § 32.19(a) which permits the sale or transfer of up to 10 exempt quantities (as set forth in § 30.71, Schedule B) in a single transaction.

Proposed Action

The NRC is proposing to amend § 20.402 to modify the judgmental part of the present regulations so that all licensed material (in a quantity greater than the minimum specified in the amended regulation) missing for more than 30 days will be reported without regard to the hazard involved to persons in unrestricted areas.

Paperwork Reduction Act Statement

In NRC regulations, there are a number of requirements for the reporting of situations where specified materials are lost, stolen or missing. These requirements already achieve the goals of the proposed § 20.402 for these materials and situations. Accordingly, the proposed amendment provides that a licensee who files a report of material lost, stolen or missing under one of these requirements need not file a report under the proposed amendment. A list of the pertinent regulations is found in paragraph (d) of the amended regulatory text.

The proposed rule will be submitted to the Office of Management and Budget for clearance of the reporting requirements that may be appropriate under the Paperwork Reduction Act [Pub. L. 96–511]. The SF–83 "Request for Clearance," Supporting Statement, and related documentation submitted to OMB will be placed in the NRC Public Document Room at 1717 H Street NW., Washington, D.C. 20555. The material will be available for inspection and copying for a fee.

Regulatory Flexibility Certification

On the basis of information available to it, the NRC, in accordance with the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b), hereby certifies that this rule will not, if promulgated, have a significant economic impact on a substantial number of small entities.

There are approximately 8,000 NRC fuel cycle and materials licensees of which approximately one half or 4,000 qualify as small entities and consist for the most part of hospitals or medical facilities. The present reporting requirements under § 20.402 result in approximately 25 reports annually (from all 8,000 licensees) which require licensees to devote an average of 3 hours for each report or a total of 75 staff hours annually. The proposed amendment could result in 30 to 35 additional reports annually for a total increase of roughly 100 licensee staff hours spread out among the 8,000 licensees. The Commission will welcome any comments regarding this Regulatory Flexibility Certification.

List of Subjects in 10 CFR Part 20

Byproduct material, Licensed material, Nuclear materials, Nuclear power plants and reactors, Occupational safety and health, Packaging and containers, Penalty, Radiation protection, Reporting requirements, Special nuclear material, Source material, Waste treatment and disposal.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 553, notice is hereby given that the NRC is proposing to adopt the following amendments to 10 CFR Part 20.

PART 20—STANDARDS FOR PROTECTION AGAINST RADIATION

1. The authority citation for Part 20 is revised to read as follows: **Authority:** Secs. 53, 63, 65, 81, 103, 104, 161, 68 Stat. 930, 933, 935, 936, 937, 948, as amended (42 U.S.C. 2073, 2093, 2095, 2111, 2133, 2134, 2201); secs. 201, as amended, 202, 206, 68 Stat. 1242, as amended, 1244, 1246 (42 U.S.C. 5841, 5842, 5846).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273), §§ 20.101, 20.102, 20.103(a), (b), and (f), 20.104(a) and (b), 20.105(b), 20.106(a), 20.201, 20.202(a), 20.205, 20.207, 20.301, 20.303, 20.304 and 29.305 are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b)); and §§ 20.102, 20.103(c), 20.401–20.407, 20.408(b), and 20.409 are issued under sec 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

2. Section 20.402 is amended as follows:

a. Paragraphs (a) and (b) are revised.

b. New paragraphs (c) and (d) are added.

c. Existing paragraphs (c) and (d) are redesignated (e) and (f), respectively.

§ 20.402 Reports of theft or loss of licensed material.

(a) Each licensee shall report by telephone to the Regional Administrator of the appropriate Nuclear Regulatory Commission Regional Administrator of the appropriate Nuclear Regulatory Commission Regional Office listed in Appendix D of this part:

(1) Immediately after its occurrence becomes known to the licensee, any lost, stolen or missing licensed material in such quantities and under such circumstances that it appears to the licensee that a substantial hazard may result to persons in unrestricted areas; or

(2) Within 30 days after the occurrence of any lost, stolen or missing licensed material becomes known to the licensee, all licensed material (in a quantity greater than 10 times the quantity specified in Appendix C of this part) which is still missing at this time unless the material has already been reported under paragraph (a) (1) of the section.

(b) Each licensee who is required to make a report pursuant to paragraph (a) of this section shall, within 30 days after making the telephone report required under paragraph (a), make a report in writing to the appropriate NRC Regional Office listed in Appendix D with copies to the Director of Inspection and Enforcement, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, setting forth the following information:

• • • • •

(c) Lost or missing licensed material, for the purpose of this section, means any licensed material whose location is unaccounted for. It includes such material which has been shipped but has not reached its destination and whose location cannot be readily traced in the transportation system.

(d) A duplicate report is not required if the licensee is required to submit a report pursuant to §§ 30.55(c), 40.64(c), 50.72, 70.52, 73.27(b), 73.67(e)(3)(vi), 73.67(g)(3)(iii), 73.71 or 150.19(c) of this chapter.

• • • • •

Dated at Bethesda, Maryland this 14th day of February 1983.

For the Nuclear Regulatory Commission.

William J. Dircks,

Executive Director for Operations

10 CFR Parts 20 and 150

Transuranic Waste Disposal; Withdrawal of Proposed Rule

AGENCY: Nuclear Regulatory Commission.

ACTION: Withdrawal of proposed rule.

SUMMARY: The Commission is withdrawing two notices of proposed rulemaking published in the **Federal Register** on September 12, 1974 (39 FR 32921 and 32922), in which the Atomic Energy Commission (the predecessor of the NRC) proposed to restrict the disposal of transuranic waste by shallow land burial. On July 24, 1981, the Commission published in the **Federal Register** (46 FR 38081) a notice of proposed rulemaking which would add a new 10 CFR Part 61, "Licensing Requirements for the Land Disposal of Radioactive Waste" to its regulations. The 1974 proposed amendments were included within the scope of the Part 61 proposed rule. Part 61 has now been issued as a final rule. Therefore, the Commission is withdrawing the earlier 1974 notices of proposed rulemaking.

DATE: Effective May 9, 1983.

FOR FURTHER INFORMATION CONTACT: L. B. Higginbotham, chief, Low-Level Waste Licensing Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Telephone (301) 427–4433.

SUPPLEMENTARY INFORMATION: On September 12, 1974, the Commission published proposed amendments to 10 CFR Parts 20 and 150 (39 FR 32921 and 32922) to restrict the disposal, by burial in soil, of waste containing transuranium elements. The proposed rules would have amended Part 20 to prohibit the disposal of waste containing transuranic elements and Part 150 to reassert the Commission's authority over disposal of transuranic containiment wastes in Agreement States.

After publication of the proposed rules, the Commission started a program to analyze the requirements for disposal of transuranic and other radionuclides contained in waste and to establish a basis for any concentration limits that might be established for the near surface or shallow land disposal of waste. A **Federal Register** notice concerning the program was published August 18, 1978 (43 FR 36722). On July 24, 1981, the Commission published for public comment a notice of proposed rulemaking to add a new Part 61, "Licensing Requirements for the Land Disposal of Radioactive Waste" to the Commission's regulations. Part 61 was issued as a final rule on December 27, 1982 (47 FR 57446–57482).

Tables 1 and 2 and Part 61 establish specific concentration limits for transuranic and other radionuclides that would be acceptable for routine disposal by near surface land burial. Part 61 thus incorporates the narrower scope of the earlier proposed rulemaking on transuranic disposal.

Waste containing radionuclides in concentrations greater than the limits established in Part 61 would not be acceptable for disposal near surface without specific Commission review and approval. Such approval would be based on an evaluation of the specific characteristics of the waste, disposal site, and the method of disposal, and a finding that there is reasonable assurance that the Part 61 Subpart C performance objectives are met. The Commission plans to examine alternative disposal methods and requirements for disposal of these wastes.

The Commission hereby withdraws the notices of proposed rulemaking published September 12, 1974 (39 FR 32921 and 32922).

Dated at Bethesda, Maryland, this 26th day of April 1983.

For the U.S. Nuclear Regulatory Commission.

William J. Dircks,

Executive Director for Operations.

BILLING CODE 7590–01–M

FEDERAL RESERVE SYSTEM

12 CFR Part 205

[Reg. E; Doc. No. R–0465]

Electronic Fund Transfers; Intent To Make Determination of Effect on Massachusetts Law

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice of intent to make preemption determination.

SUMMARY: The Board is publishing notice of its intent to make a determination as to whether the Massachusetts law on electronic fund transfers is inconsistent with and preempted by the Electronic Fund Transfer Act and Regulation E.

DATE: Comments must be received on or before July 11, 1983.

ADDRESS: Comments should be mailed to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, or delivered to Room B–2223, 20th and Constitution Avenue NW., Washington, D.C., between 8:45 a.m. and 5:15 p.m. Comments may be inspected in Room B–1122 between 8:45 a.m. and 5:15 p.m.

FOR FURTHER INFORMATION CONTACT: John C. Wood, Senior Attorney, or Richard S. Garabedian, Staff Attorney, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, at (202) 452–2412 or (202) 452–3667.

SUPPLEMENTARY INFORMATION: (1) *General.* Section 919 of the Electronic Fund Transfer Act (15 U.S.C. 1693 *et seq.*), as implemented by Regulation E

VOL 48 ISS 90 MY 9 1983 UMI

(12 CFR 205.12), authorizes the Board to determine whether any inconsistency exists between the Federal Act and State law. If the State law is inconsistent with the Federal Act, it will be preempted to the extent of any inconsistency. However, an inconsistent State law that is more protective of the consumer may not be preempted. The Board has been asked to make a preemption determination with respect to the Massachusetts statute (M.G.L.A. c. 167B § 1 *et seq.*) and regulation (209 CMR 31.00) on electronic fund transfers. This proposed preemption determination is issued under authority delegated to the Director of the Division of Consumer and Community Affairs, as set forth in the Board's Rules Regarding Delegation of Authority (12 CFR 265.2(h)(4)).

(2) *Analysis for preemption.* Proposed preemption determinations under the Electronic Fund Transfer Act and Regulation E are based on a section-by-section analysis of the State and Federal statutes and regulations. After consideration of any inconsistencies between each requirement of a given State section and the corresponding requirement in the Federal law, the section is viewed as a whole to determine whether the inconsistencies are such as to require preemption of the section. A comparison of each group of related sections is also made. The statutory language in § 919, which refers to inconsistencies in "provisions" of Federal and State statutes, supports this type of analysis. This approach also avoids the formation of the very complex hybrid rules that would result from preemption of individual requirements within each section of State law.

(3) *Discussion.* The Board has reviewed the Massachusetts electronic fund transfer law in light of the above analysis and proposes to preempt the State section on error resolution and the related disclosure provisions. The Board proposes to preempt these sections because on the whole they are inconsistent with the Federal error resolution procedures and are not more protective.

The proposed preemption will apply to § 17 of both the State statute (M.G.L.A. c. 167B § 17) and the regulation (209 CMR 31.17). It will also apply to § 8(a)(9) of the statute, to the extent that it requires a disclosure of the State error resolution procedures to be included on the initial disclosure statement; § 8(1)(b) of the regulation, to the extent that it requires a disclosure of error resolution procedures; and Appendices 2A and 2B to the regulation, which contain model forms for the State error resolution disclosures.

Other Massachusetts provisions are not proposed for preemption because the sections are the same as the Federal law, address areas not covered by the Federal law, or are more protective even though an inconsistency exists. For example, the State sections on liability for unauthorized transfers and on change in terms notification are inconsistent with the applicable Federal sections, but are on the whole more protective.

Differences between the Federal and State provisions on error resolution include:

- The State law fails to provide for an additional error notification period following a request for additional information, clarification or documentation as provided in § 205.11(b)(1)(i)(B) of Regulation E.
- The State law requires the error to be resolved within 10 calendar days, in contrast to 10 business days under § 205.11(c)(1), with a 45-day alternative procedure. It permits a financial institution to require written confirmation of an oral error notice within that 10-calendar-day period, with provisional recrediting required only if the written confirmation is received within 10 calendar days, in contrast to the 10-business-day period in § 205.11(b)(2).
- In the case of the alternative 45-day error resolution procedure, State law fails to require financial institutions to honor items drawn on the account after the redebiting of a provisionally recredited amount, as provided in § 205.11(f)(2).
- If an error did occur, State law does not require the refunding of any fees or charges imposed as a result of the error, as does § 205.11(e)(1).
- The State regulation provides additional error resolution rules for debits initiated by a third party through an automated clearing house. However, the regulation appears to give financial institutions up to 30 days to provisionally recredit, as contrasted to the 10-business-day requirement in § 205.11(c)(2)(i).

(4) *Comment requested.* Interested persons are invited to submit comments regarding the proposed determination. After the close of the comment period and analysis of the comments received, notice of final action on the proposal will be published in the **Federal Register.**

Board of Governors of the Federal Reserve System, May 3, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

---

12 CFR Part 226

[Reg. Z; Doc. No. R-0486]

Truth in Lending; Intent To Make Determinations of Effect on State Laws; Mississippi, New Jersey, Oklahoma, and South Carolina

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice of intent to make preeemption determinations.

SUMMARY: The Board is publishing for comment proposed determinations as to whether certain provisions in the laws of Mississippi, New Jersey, Oklahoma, and South Carolina are inconsistent with the Truth in Lending Act or Regulation Z and therefore preempted. Any determinations that provisions are preempted, which would trigger the prohibition against giving such preempted disclosures, will have an effective date of October 1, 1984, although creditors will have the option of complying from the date of the Board's determination.

This notice also includes a discussion of the procedures that the Board follows upon receipt of a request for a determination and a statement of the principles used in making preemption determinations.

DATE: Comments must be received on or before July 11, 1983.

ADDRESS: Comments should be mailed to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, or delivered to Room B-2223, 20th and Constitution Avenue, N.W., Washington, D.C., between 8:45 a.m. and 5:15 p.m. Comments may be inspected in Room B-1122 between 8:45 a.m. and 5:15 p.m.

FOR FURTHER INFORMATION CONTACT: Rugenia Silver or Gerald Hurst, Staff Attorneys, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Wahington, D.C. 20551, at (202) 452-2412 or 452-3667.

SUPPLEMENTARY INFORMATION: (1) *General.* The Board has received four requests for determinations as to whether provisions of certain laws in Mississippi, New Jersey, Oklahoma, and South Carolina are inconsistent with the Truth in Lending Act and Regulation Z, and therefore preempted. Section 111(a)(1) of the Truth in Lending Act authorizes the Board to determine whether any inconsistency exists between chapters 1, 2, and 3 of the federal act or regulation and any state law relating to the disclosure of information in connection with consumer credit transactions. These proposed preemption determinations are issued under authority delegated to the Director of the Division of Consumer and Community Affairs, as set forth in the Board's Rules Regarding Delegation of Authority (12 CFR 265.2(h)(2); 48 FR 4454, February 1, 1983).

The procedures for requesting a determination and the general procedures followed in making a determination are contained in Appendix A to 12 CFR Part 226. In addition, in order to obtain information and comment from interested parties as early as possible in the course of making determinations, the Board: (1) Forwards copies of requests for determinations to the attorneys general of the states involved and to the Federal Reserve Banks in whose districts the states are located, shortly after receipt of the requests, and (2) sends copies of the proposed determinations and final determinations directly to the requesting party, the state attorney general, and the Federal Reserve Bank.

(2) *Principles followed in preemption analysis.* In determining whether a state law is inconsistent with the federal provisions, § 226.28(a)(1) of Regulation Z, which implements § 111 of the act, provides that state requirements are inconsistent with the federal provisions if the state law requires a creditor to make disclosures or take actions that contradict the federal law. A state law is contradictory, and therefore preempted, if it significantly impedes the operation of the federal law or interferes with the purposes of the federal statute. Two examples of contradictory state laws are included in § 226.28(a)(1). They are: (1) A law that requires the use of the same term for a different amount or a different meaning than the federal law, or (2) a law that requires the use of a different term than the federal term to describe the same item.

In previous preemption determinations (48 FR 4454, February 1, 1983) the Board developed the following principles that were applied in making the current proposed determinations:

- For purposes of making preemption determinations, state law is deemed to require the use of specific terminology in the state disclosures if the statute uses certain terminology in the disclosure provision.

- A state disclosure does not "describe the same item," under § 226.28(a)(1), if it is not the functional equivalent of a federal disclosure.
- Preemption occurs only in those transactions in which an actual inconsistency exists between the state law and the federal law.
- A state law is not inconsistent merely because it requires more information than federal law or requires disclosure in transactions where federal law requires none.

In general, preemption determinations will be limited to those provisions of state law identified in the request for a determination. At the Board's discretion, however, other state provisions that may be affected by the federal law will also be addressed.

(3) *Effect of preemption determination.* If the Board determines that a state-required disclosure is inconsistent with the federal law, the state law is preempted to the extent of the inconsistency. Creditors in that state may not make disclosures using the inconsistent term or form, even on a separate document from the federal disclosures. Preemption determinations have an effective date of the October 1 that follows the determination by at least 6 months, as required by section 105(d) of the act. It is expected that these proposed determinations, if adopted, will have an effective date of October 1, 1984, although creditors could begin complying with the determinations before that time.

A determination on provisions in the law of one state will have no effect on the validity of similar provisions in other states.

(4) *Discussion of specific requests and proposed derterminations.* In response to four requests, the Board has reviewed provisions in the laws of Mississippi, New Jersey, Oklahoma, and South Carolina. (The requests are available for public inspection and copying, subject to the Board's Rules Regarding Availability of Information (12 CFR Part 261).) The proposed determinations regarding the state laws at issue, together with the reasons for the proposals, are set forth below.

Mississippi. An attorney representing a financial institution has requested a determination of whether a provision of the Mississippi Motor Vehicle Sales Finance Law is preempted by the federal act and regulation. Section 63-19-31(2)(g) of that statute requires that a buyer receive a copy of the retail installment contract disclosing, among other information, the amount of the finance charge. Section 75-17-1(9) of Mississippi law defines "finance charge" as:

> • • • the amount or rate paid or payable, directly or indirectly, by a debtor • • • incident to or as a condition of the extension of credit • • • provided, however, that • • • insurance premiums • • • shall not be included in the finance charge • • •.

In contrast, section 106 and § 226.4 of the federal act and regulation, respectively, define "finance charge" to include certain insurance premiums in all cases, and exclude others only if specified conditions are met by the creditor. Because of its treatment of insurance premiums, Mississippi law may, in certain transactions, require the disclosure of a finance charge, using that term, which differs in amount from the finance charge calculated and disclosed under federal law for the same transactions. Thus, the Board believes that § 63-19-31(2)(g) of the Mississippi Motor Vehicle Sales Finance Law is preempted in those cases in which the term "finance charge" would be used under state law to describe a different amount than the finance charge disclosed under federal law. While this determination would prevent a creditor from showing the state-mandated finance charge in those cases, it would not affect the amount or types of charges that the creditor may collect under state law.

New Jersey. An attorney has requested a determination of whether a New Jersey law relating to the use of agents in mortgage transactions is inconsistent with and therefore preempted by the Truth in Lending Act and Regulation Z. Under § 46:6-1 of New Jersey Statutes Annotated, a consumer may empower an agent to act on his or her behalf in completing a mortgage transaction. The actions which the agent is authorized to take may include attending the closing, and signing and receiving documents such as the note, mortgage, Truth in Lending disclosures and notice of the right of rescission.

Regulation Z requires that disclosures and notice of the right of rescission, if applicable, be given to the "consumer" in the transaction. However, the regulation does not prohibit the creditor from giving this material to an agent acting on behalf of the consumer under a valid state agency law. For this reason, the Board believes that the New Jersey law permitting the use of an agent for receipt of loan documents, including the Truth in Lending disclosures and rescission notices, is not preempted by the Truth in Lending Act and Regulation Z, because creditors may comply with the federal act and regulation by

VOL 48 ISS 90 MY 9 1983 UMI

providing the required disclosures and notices to an agent for the consumer.

Oklahoma. The state of Oklahoma has requested a determination that the credit disclosures required by the Oklahoma Pawn Shop Act (59 Oklahoma Statutes §§ 1501 to 1513) are not preempted by the federal Truth in Lending Act. (Although certain transactions in Oklahoma are exempt from chapter 2 of the Truth in Lending Act, that exemption does not extend to pawnshop transactions.) Specifically, the state seeks a determination that the following required Oklahoma disclosures are not preempted by the federal law:

- The requirement that the pawnbroker-creditor disclose the "total of payments" even though a pawn transaction involves a single payment. (Rules of the Administrator § 150.5(g)).
- The requirement that the pawnbroker-creditor disclose the "name and address of the customer and the customer's description or the distinctive number from [the] customer's driver's license or military identification." (Rules of the Administrator § 150.5(k)).
- The requirement that the following be disclosed: "A statement to the effect that the customer is not obligated to redeem the pledged goods, and that the pledged goods may be forfeited to the pawnbroker thirty (30) days after the specified maturity date, provided that the pledged goods may be redeemed by the customer within thirty (30) days following the maturity date of the pawn transaction by payment of the originally agreed redemption price and the payment of an additional pawn finance charge equal to one-thirtieth (1/30) of the original monthly pawn finance charge for each day following the original maturity date including the day on which the pledged goods are finally redeemed." (Rules of the Administrator § 150.5(n)).
- The requirement that a renewal of the pawn transaction with no change in the original terms be treated as a refinancing requiring full new disclosures. (Rules of the Administrator § 150.6).

Since footnote 44 of Regulation Z allows creditors to disclose the "total of payments" in single payment obligations at their discretion, a state requirement making the "total of payments" disclosure mandatory in a single payment transaction does not interfere with the federal scheme and, therefore, should not be preempted. In connection with this disclosure, the Board notes that the finance charge, which is reflected in the total of payments, is defined in the Oklahoma Rules in a more abbreviated manner than in § 226.4 of Regulation Z. For example, the enumerated types of finance charges in § 226.4(b)(2) through (9) are not reflected in the state finance charge definition. It appears, however, that the finance charge computed under state law is always identical to the federal finance charge because Oklahoma pawnshop creditors may not impose any of the charges listed in § 226.4(b)(2) through (9). On this basis, the Board believes that the state disclosures of the finance charge and total of payments do not contradict federal law and therefore are not preempted.

The customer identification requirement (§ 150.5(k)) and the forfeiture clause disclosure requirement (§ 150.5(n)) of the Oklahoma Rules are unrelated to any required federal disclosure. Under § 150.4 of the Oklahoma Rules, both of these disclosures must appear separate from the other required disclosures. Because these provisions merely provide additional information and do not contradict any federal disclosure, the Board believes that the customer identification and the forfeiture clause requirement are not preempted by the federal law.

The Oklahoma Rules (§ 150.8) define "refinancing" in much the same manner as § 226.20(a) of Regulation Z in that a refinancing occurs when an existing obligation is satisfied and replaced by a new obligation undertaken by the same consumer. It appears, however, that, as a matter of state law, Oklahoma provides that a renewal or consolidation of a pawn transaction must be treated as a new transaction requiring full redisclosure. This may result in pawnshop creditors having to give new disclosures where not required to do so by federal law. The Board believes that the state requirement does not interfere with the federal scheme and is therefore, not preempted since such additional information is not prohibited by the federal law.

South Carolina. A bank has requested a determination of whether a provision of South Carolina law is inconsistent with and therefore preempted by the Truth in Lending Act. Under § 37-10-102(c) of the South Carolina Code Annotated, a consumer loan secured by real estate must be accompanied by a notice of any due-on-sale clause contained in the loan documents. Where the creditor is authorized to accelerate the note in the event of a transfer of the property, the law provides that:

> • • • the creditor shall include in all disclosure statements required by the Federal Truth-in-Lending Act to be provided to the debtor the following statement, which shall be either in capital letters or underlined: Assumption Notice—The debt secured hereby is subject to call in full or the terms thereof being modified in the event the real estate securing the debt is sold, conveyed or otherwise transferred.

The required disclosure is somewhat similar to the statement of the creditor's assumption policy required in residential mortgage transactions by § 226.16(q) of Regulation Z. It differs from the federal provision, however in that it calls for a more detailed statement than is contemplated by the federal law and may be required in transactions other than residential mortgage transactions.

On its face, the South Carolina law appears to require the inclusion of a nonfederal disclosure within the Federal Truth in Lending disclosure statement, in violation of § 226.17(a) of Regulation Z, which requires that all federal disclosures be segregated from other material. However, the South Carolina Department of Consumer Affairs, which administers the state provision, has indicated that the required statement may appear on the contract apart from the segregated federal disclosures, and that it will issue a formal interpretation reflecting that position. Thus, creditors in South Carolina may comply with the state law without violating the segregation requirements of the federal statute and regulation. In addition, while the due-on-sale notice is not substantially similar to the disclosure required by § 226.16(q), it does not contradict or conflict with that disclosure but merely provides additional information. On this basis, the Board believes that § 37-10-102(c) of South Carolina law is not inconsistent with the federal act and regulation and therefore is not preempted.

(5) *Comment requested.* Interested persons are invited to submit comments regarding the proposed determinations. After the close of the comment period and analysis of the comments received, notice of final action on the proposals will be published in the **Federal Register.**

Board of Governors of the Federal Reserve System, May 3, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 83-NM-34-AD]

Airworthiness Directives; AMI Industries, Inc. Seat Models 716 and 865

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making (NPRM).

SUMMARY: This notice proposes a new Airworthiness Directive (AD) that would require installation of seat frame braces on certain crew seats. This proposed AD is required to preclude seat failure which could result in injuries under forward loading conditions less than those required by TSO-C39.

DATES: Comments must be received on or before June 24, 1983. Compliance schedule: Within 90 days from the effective date of this AD, unless already accomplished.

ADDRESSES: The applicable service information may be obtained from: AMI Industries, Inc., P.O. Box 370, Colorado Springs, Colorado 80901. This information also may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington or Denver Aircraft Certification Field Office, 10455 East 25th Avenues, Suite 307, Aurora, Colorado. Send comments on the proposal in duplicate to: Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Rules Docket No. 83-NM-34-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

FOR FURTHER INFORMATION CONTACT: Woodford R. Boyce Aerospace Engineer, Denver Aircraft Certification Field Office, FAA, Northwest Mountain Region, 10455 East 25th Avenue, Suite 307, Aurora, Colorado 80010; telephone (303) 340-5304.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the AD Docket Number, and be submitted in duplicate to the address specified above. All comments received on or before the closing date for comments specified above will be considered by the Administrator before action is taken on the proposed amendment. The proposal contained in this notice may be changed in light of the comments received. All comments received will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMS

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket 83-NM-34-AD, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

Discussion: There has been an occurrence in which the crew seats manufactured by AMI Industries failed during a survivable emergency landing in which occupants were injured. Additionally, TSO tests have been conducted verifying failure of the seat frame assembly at loads below the 9g. forward requirement. Investigation revealed that the seat frame assemblies were inadequately heat treated. This condition, if uncorrected, could contribute to additional occupant injury.

The crew seats initially were acquired by Beech Aircraft Corp. for installation on Model 18 series and Model 65/90 series airplanes, but may be installed in other airplanes.

Since this condition is likely to exist in other seats of the same type design, an AD is being proposed that would require installation of the seat frame braces on all applicable AMI crew seat Models 716 and 865 in accordance with AMI Service Bulletin No. 25-10-865-01. Accomplishment of this modification will correct the unsafe condition and retain the TSO authorization.

The costs that would be associated with this proposed AD are estimated to be $140 for each of 1,000 units in service. The total is estimated at $140,000. For these reasons, the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. Few small entities within the meaning of the Regulatory Flexibility Act would be affected.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, the FAA proposes to amend Section 39.13 of Part 39 of the Federal Aviation Regulation [14 CFR 39.13) by adding the following new Airworthiness Directive:

AMI Industries, Inc.: Applies to AMI crew seats Model 716-1, -2, -11, -12, -21 and -22 and Model 865-1 through -9 and -11 typically found on but not limited to Beech Aircraft Corp., Model 18 Series and Model 65/90 series airplanes certificated in all categories.

Compliance required within 90 days after the effective date of this AD unless previously accomplished.

To prevent the possible failure of these crew seats reinforce the crew seat frame assembly P/N 865J10005-1 by installation of AMI Industries, Inc. seat frame brace kit P/N 865K90000-1 in accordance with AMI Industries, Inc. Service Bulletin No. 25-10-865-01, dated January 31, 1983.

An alternate means of compliance which provides an equivalent level of safety may be used when approved by the Manager, Denver Aircraft Certification Field Office, FAA, Northwest Mountain Region.

(Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85)

Note.—For the reasons discussed earlier in the preamble: The FAA has determined that this document: (1) Involves a proposed regulation which is not μmajor under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that his proposed rule if promulgated, will not have a significant economic impact on a substantial number of small entities since it involves few small entities. A regulatory evaluation has been prepared and has been placed in the public docket.

Issued in Seattle, Washington on April 29, 1983.

Leroy A. Keith,

Acting Director, Northwest Mountain Region.

A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket No. 83–NM–30–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion: Subsequent to the issuance of the U.S. type certificate for the Avions Marcel Dassault-Breguet Aviation Model Falcon 10 airplane, it was found that the exterior emergency lighting system did not provide the illumination at the overwing emergency exits required by FAR 25.812(f). The purpose of this requirement is to assure that sufficient lighting is provided for safe and rapid evacuation from the aircraft. Therefore, the manufacturer was required to correct this noncompliance item and provide a modification kit for the aircraft which have already been delivered. The corrective action consists of the installation of an additional light unit at each overwing exit. A certification test was conducted with the additional light installed and it was verified that the required illumination exists with dual lights. Avions Marcel Dassault-Breguet Aviation Service Bullentin No. F10–33–033 contains instructions for obtaining the modification kit and accomplishing the modification/installation.

Since these conditions exist on airplanes of this model registered in the United States, an AD is proposed that would require installation of an additional exterior emergency light at the overwing emergency exits on Avions Marcel Dassault-Breguet Aviation Model Falcon 10 airplanes.

It is estimated that 130 U.S. registered airplanes would be affected by this AD, that it would take approximately 45 manhours per airplane to accomplish the required actions, and that the average labor cost would be $35 per manhour. Modification parts are estimated at $100 per airplane. Based on these figures, the total cost impact of this AD to U.S. operators would be $217,750. For these reasons, the proposed rule is not considered to be a major rule under the criteria of Executive Order 12291. Few small entities within the meaning of the Regulatory Flexibility Act would be affected.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend Section 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive:

Avions Marcel Dassault-Breguet Aviation: Applies to all Model Falcon 10 airplanes equipped with one Vibrachoc light, P/N 5006810100, at the L.H. and R.H. overwing emergency exit, certificated in all categories. Compliance required as indicated, unless already accomplished.

1. Within the next 250 hours time in service or 180 days, whichever occurs first after the effective date of this AD, install a second light in accordance with Avions Marcel Dassault-Breguet Aviation Service Bulletin No. F10–33–003, dated November 12, 1981.

2. Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

3. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65).

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this document: (1) Involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a signficant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. A regulatory evaluation has been prepared and has been placed in the public docket.

Issued in Seattle, Washington on April 27, 1983.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

14 CFR Part 71

[Airspace Docket No. 83–ANM–3]

Proposed Transition Area; Fort Morgan, Colorado

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish a 700 foot transition area to provide controlled airspace for aircraft executing new NDB instrument approach procedures to Fort Morgan Municipal Airport, Fort Morgan, Colorado. The intended effect of this action is to ensure segregation of aircraft using the new approach procedures in instrument weather conditions and other aircraft operating in visual weather conditions.

DATE: Comments must be received before June 9, 1983.

ADDRESS: Send comments to: Manager, Airspace & Procedures Branch, ANM–530, Federal Aviation Administration, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

The official docket may be examined in the Regional Counsel Office, and the informal docket may be examined in the Airspace & Procedures Office, at the same address.

FOR FURTHER INFORMATION CONTACT: Ted Melland, Airspace & Procedures Specialist, ANM–533. The telephone number is (206) 433–1640.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made; "Comments to Airspace Docket No. 83–ANM–3." The postcard will be date/time stamped and returned to the commenter. All communications received before June 9, 1983, will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination by interested persons.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking by submitting a request to the Airspace & Procedures Office at the address previously listed. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2, which describes the application procedure.

The Proposal

The FAA is considering an amendment to 71.161 of Part 71 of Federal Aviation Regulations (14 CFR Part 71) because development of NDB approach procedures requires a transition area 700 feet above ground level to contain the new procedures within controlled airspace.

List of Subjects in 14 CFR Part 71

Transition areas, Aviation safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.161 of Part 71 of Federal Aviation Regulations (14 CFR Part 71) by establishing the following transition area:

Fort Morgan Colorado (New)

That airspace extending upward from 700 feet above the surface within a 10.5 mile radius of the Fort Morgan Municipal Airport (Latitude 40°20'00" N, Longitude 103°48'16" W); and 9.5 miles southwest to 5.5 miles northeast of the 333 true bearing (322 magnetic bearing) extending 18 miles northwest of the airport; and 9.5 miles southwest to 5.5 miles northeast of the 151 true bearing (140 magnetic bearing) extending 19 miles southeast of the airport.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a); (Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); (Sec. 11.65 of the Federal Aviation Regulations (14 CFR 11.65))

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (14 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Seattle, Washington on April 25, 1983.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

14 CFR Part 71

[Airspace Docket No. 83–ANM–1]

Proposed Alteration of Transition Area, Butte, Montana

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action establishes a 700 foot transition area at Butte, Montana. Amendment 3 to the LOC/DME Rwy 15, Standard Instrument Approach Procedure (SIAP), relocated the final approach fix to provide a lower visibility requirement on the approach. This transition area will provide controlled airspace from 700 feet above the surface to encompass a 10 nautical mile procedure turn area based on the new final approach fix.

DATE: Comments must be received on or before June 9, 1983.

ADDRESS: Send comments on the proposal to: Manager, Airspace and Procedures Branch, ANM–530, Federal Aviation Administration, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

The official docket may be examined in the Regional Counsel Office and an informal docket may be examined in the Airspace and Procedures Branch at the same address.

FOR FURTHER INFORMATION CONTACT: Kathy Paul, Airspace Technician, ANM–535. The telephone number is (206) 433–1640.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83–ANM–1." The postcard will be date/time stamped and returned to the commenter. All communications received before June 9, 1983, will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination by interested persons.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking by submitting a request to the Airspace & Procedures Office at the address previously listed. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2, which describes the application procedure.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish a 700 foot transition area located at Butte, Montana. This proposal is necessary to provide controlled airspace for aircraft executing the LOC/DME Runway 15 approach.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

15 CFR Part 939

Extension of Comment Period for La Parguera National Marine Sanctuary and the Draft Environmental Impact Statement

AGENCY: National Oceanic and Atmospheric Administration (NOAA) Department of Commerce.

ACTION: Proposed rule and DEIS, extension of comment period.

SUMMARY: On March 4, 1983 the availability notice for the Draft Environmental Impact Statement (DEIS) for a proposed national marine sanctuary off La Parguera, Puerto Rico was announced (FR Vol 48, No. 44, 9365) and NOAA concurrently published proposed regulations for the proposed sanctuary (FR Vol 48, No. 44, 9366). The comment period for both was scheduled to end May 2, 1983. However, because of requests from a number of interested individuals, NOAA is extending the comment period until June 2, 1983.

DATE: Commets due on or before June 2, 1983.

ADDRESS: Send comments to Dr. Nancy Foster, Chief, Sanctuary Programs Division, Office of Ocean and Coastal Resource Management, National Ocean Service, NOAA, 3300 Whitehaven Street, NW., Washington, D.C. 20235.

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket 9145]

General Motors Corp.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require a Detroit, Mich. motor vehicle manufacturer, among other things, to provide all interested persons with service bulletins (Product Service Publications) and indexes which describe both current and potential problems and update repair procedures. GM would also be required to advertise the existence, availability and benefits of these publications in national magazines and through direct-mail notices. The indexes will list each service bulletin, provide ordering information, and contain plain language summaries of certain bulletins. Additionally, GM would be required to establish a nationwide arbitration program for car owners with unsatisfied complaints about engine or transmission failures.

DATE: Comments must be received on or before July 8, 1983.

ADDRESS: Comments should be directed to: FTC/S, Office of the Secretary, Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT: Barbara E. Arnold, Acting Director, 4R. Cleveland Regional Office, Federal Trade Commission, Suite 500—Mall Bldg., 118 St. Clair Ave., Cleveland, OH 44114, (216) 522–4207.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 3.25(f) of the Commission's Rules of Practice (16 CFR 3.25(f)), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

List of Subjects in 16 CFR Part 13

Motor vehicles, Trade practices.

United States of America Before Federal Trade Commission

In the matter of General Motors Corporation, a corporation; Agrement containing consent order to cease and desist.

The Agreement herein, by and between General Motors Corporation. a corporation, hereinafter sometimes referred to as respondent, by its duly authorized officer, and its attorneys, and counsel for the Federal Trade Commission, is entered into in accordance with the Commission's Rule governing consent order procedures. In accordance therewith the parties hereby agree that:

1. Respondent General Motors Corporation is a corporation organized, existing, and doing business under and by virtue of the laws of the State of Delaware, with its office and principal place of business located at 3044 West Grand Boulevard, in the City of Detroit, State of Michigan.

2. Respondent has been served with a copy of the Complaint issued by the Federal Trade Commission charging it with violation of Section 5 of the Federal Trade Commission Act, 15 U.S.C. 45 (1980), and has filed an answer to said Complaint denying said charges. General Motors denies the acts and practices alleged in paragraphs 5 through 10 of the Complaint, and continues to deny that such acts and practices violate Section 5 of the Federal Trade Commission Act.

3. Respondent admits all the jurisdictional facts set forth in the Commission's complaint in this proceeding.

4. Respondent waives: (a) any further procedural steps;

(b) the requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) all rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

5. This Agreement shall not become part of the public record of the proceeding unless and until it is accepted by the Commission. If this Agreement is accepted by the Commission, it will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this Agreement and so notify the respondent, in which event it will take such action as it may consider appropriate, or issue and serve its decision, in disposition of the proceeding.

6. This Agreement is for settlement purposes only and does not constitute an admission by respondent that the law has been violated as alleged in the said copy of the Complaint issued by the Commission.

7. This Agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 3.25(f) of the Commission's Rules, the Commission may, without further notice to respondent: (1) issue its decision containing the following Order to Cease and Desist in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the Order to Cease and Desist shall have the same force and effect and may be altered, modified, or set aside in the same manner and within the same time provided by statute for other orders. The Order shall become final upon service. Delivery by the U.S. Postal Service of the decision containing the agreed-to Order to respondent's address as stated in this Agreement shall constitute service. Respondent waives any right it may have to any other manner of service. The Complaint may be used in construing the terms of the Order, and no agreement, understanding, representation , or interpretation not contained in the Order or the Agreement may be used to vary or contradict the terms of the order.

8. Respondent has read the Complaint and the Order contemplated hereby. It understands that once the Order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the Order. Respondent further understands that it may be liable for civil penalties in the amount provided by law for each violation of the Order after it becomes final.

Order

Definitions

For the purposes of this Order, the following definitions shall apply:

A. "General Motors"—General Motors Corporation, and its successors, assigns, officers representatives, agents, and employees, acting directly or through any corporation, subsidiary, division, or other device.

B. "Vehicle"—A General Motors passenger car or light truck with a gross vehicle weight rating no greater than 10,000 pounds.

C. "Specified Components"—The following components manufactured through the date the Commission accepts the agreement pursuant to Section 3.25(f) of the Commission's Rules of Practice:

(1) THM 200 automatic transmissions;

(2) camshafts or lifters in 305 or 350 cubic-inch-displacement ("CID") gasoline engines produced in plants operated by General Motors Chevrolet Division since 1974;

(3) fuel injection pumps or fuel injectors in 350 CID diesel engines produced inplants operated by General Motors Oldsmobile Division.

D. "Dealer"—Any person, partnership, firm, or corporation which, pursuant to a Dealer Sales and Service Agreement with General Motors, purchases or receives on consignment from General Motors vehicles for resale or lease to the public, including persons, partnerships, firms, or corporations owned or operated by General Motors.

E. "Product Service Publication" ("PSP" or "Bulletin")—A document or an article in a document issued from time to time by General Motors car or truck divisions to their dealers or to dealers' employees, which describes or recommends:

(1) diagnostic, repair, or maintenance procedures;

(2) additional parts or upgraded or different replacement parts;

(3) non-repair information regarding the use and care of vehicles.

Examples of PSPs are: "Dealer Service Technical Bulletins," "Dealer Technical Bulletins;" and some articles in "Service Guild," "Service News," and "Dealer Service Information Bulletins," depending on the practice of the division issuing the PSP. The term "PSPs" includes other documents bearing different titles, but which are substantially the same in content and purpose. If a document (such as "Service News" and "Service Guild") contains several articles, any one of which describes unrelated diagnostic, repair, or maintenance procedures, then each such article shall be considered to be an individual PSP. PSPs do not include shop service manuals or parts manuals.

F. "Product Condition"—The condition of a vehicle that gives rise to any repair, maintenance, or diagnostic procedures, or that gives rise to the use of additional parts, described in PSPs.

G. "PSP Index"—A document, clear and comprehensible to prospective purchasers and vehicle owners, which has entries for all PSPs published each model year by the applicable General Motors car to truck divisions.

(1) For each entry in the PSP Index, the following information will be readily understandable:

(a) the particular model(s) and model year(s) to which the entry applies or potentially applies;

(b) the subject of the PSP;

(c) the major component or system of components to which the PSP relates;

(d) the identifying number of the PSP to which the entry relates; and

(e) how to obtain that PSP from General Motors and its dealers.

(2) The PSP Index shall contain PSP Explanatory Information, subject to the provisions of paragraph D(2) of section I, and the PSP Explanatory Information shall be appropriately referenced in the PSP Index entry, when any of the following criteria is met:

(a) the PSP describes repair, maintenance, or diagnostic procedures not previously specifically covered in the applicable shop service manual, either (i) where the cost of such procedures to a customer is reasonably expected to exceed the reference cost, or (ii) where the procedures are intended and designed to prevent future repair or replacement costs reasonably expected to exceed the reference cost; or

(b) the PSP describes revisions to repair, maintenance, or diagnostic procedures in the existing shop service manual where the revisions are intended and designed either (i) to prevent future repair or replacement costs reasonably expected to exceed the reference cost, or (ii) to reduce such costs by an amount reasonably expected to exceed the reference cost; or

(c) the PSP describes modified (including additional, different, or upgraded) parts recommendations.

VOL 48 ISS 90 MY 9 1983 UMI

where the modification is intended and designed either (i) to prevent future repair or replacement costs reasonably expected to exceed the reference cost, or (ii) to reduce such costs by an amount reasonably expected to exceed the reference cost; or

(d) the PSP describes (i) information revising or updating owner's manuals or maintenance schedules or (ii) non-repair information regarding the use and care of vehicles by vehicle owners and operators.

H. "PSP Explanatory Information"—Information related to a particular PSP, that includes all of the following items as applicable:

(1) a description of the product condition and the engine size and transmission type (automatic or manual);

(2) a description of the major symptoms indicating the product condition;

(3) the steps or possible steps that can be taken to minimize or avoid the product condition;

(4) a statement that upgraded or different parts are called for to correct the product condition, if such is the case; if no such parts are involved, a statement that the repair or maintenance procedure discussed in the PSP has to be repeated if such is the case;

(5) a statement of the immediate and long-range performance consequences; and if avoidance of repair costs is a reason for undertaking the procedure, a statement of the estimated repair costs if known, or, if not known, a characterization of the costs of not performing the procedures in a timely manner;

(6) where available, the estimated labor time and an estimated range of retail labor rates, as well as a list of the major parts required to correct the product condition;

(7) a description of the underlying PSP(s) sufficient to permit an interested person to identify and order the PSP(s) from General Motors; and

(8) a disclosure of the primary benefit(s) of this information, if the PSP contains information not related to a product condition, such as some PSPs meeting the criteria set forth in paragraph G(2)(d) of this Definition section.

Provided, however, that for PSPs relating to use and care information or to product conditions about which General Motors notifies all affected owners directly and in writing, the owner letter may be used in lieu of PSP Explanatory information.

I. "Costs"—

1. "Reference cost" in paragraph G(2) of this Definition section means one hundred fifty dollars ($150), adjusted in the month when this Order is served and, annually thereafter, by a ratio, the numerator of which is the most recently published quarterly "Implicit Price Deflator" for the Gross National Product (IPD), and the denominator of which is the IPD for the last quarter of 1982, adjustments to be rounded to the nearest dollar. IPDs used in these annual adjustments shall have been computed using the same base year.

2. "Cost(s)" other than "reference cost" in paragraph G(2) of this Definition section shall be calculated by adding the suggested retail price for parts which are or may be required and the applicable national average dealer warranty labor rate charges multiplied by the time required to effectuate the repair, replacement, diagnosis or maintenance as determined by the labor time guide for the applicable General Motors division.

J. "Third-party Arbitration Program"—The program by which General Motors, through an impartial third-party administrator, permits any individual vehicle owner in the United States to submit an unresolved complaint for resolution by mediation, and, if mediation efforts fail, by arbitration administered by the third-party administrator.

K. "Powertrain Components"—

(1) *Gasoline and diesel engines.* Cylinder blocks and heads, and all internal parts, including camshafts and lifters, manifolds, timing gears, timing gear chains or belts and covers, flywheels, harmonic balancers, valve covers, oil pans, oil pumps, engine mounts, seals and gaskets, water pumps and fuel pumps, and diesel injection pumps; also, turbocharger housings and internal parts, turbocharger valves, seals and gaskets.

(2) *Transmissions.* Cases and all internal parts, torque converters, vacuum modulators, seals and gaskets, and transmission mounts; also, transfer cases and all internal parts, seals and gaskets.

L. "Background Statements"—Those statements included in the Special Implementing Provisions to the General Motors Zone Handbook For Third-Party Arbitration (Attachment B to this Order), title "Background Statement THM 200 Transmissions," "Background Statement Diesel Fuel Injection Systems," and "Background Statement Camshafts and Lifters."

I

It is ordered that respondent General Motors, its successors, assigns, officers, representatives, agents, and employees, acting directly or through any corporation, subsidiary, division, or other device (elsewhere in the Order, "respondent" or "General Motors"), in connection with the advertising, offering for sale, sale, or distribution of any vehicle in or affecting commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

A. By January 1984, or by the date of service of this Order, whichever is later, failing to prepare and issue PSP Indexes for the 1982 and 1983 model years, and thereafter failing to prepare and issue PSP Indexes for each model year.

B. Beginning with the 1984 model year, failing to disclose for each model year, in a clear and conspicuous manner, in each vehicle owner manual (where it shall be itemized in the Table of Contents) published by General Motors for each of its vehicle lines:

(1) The following statement—

Updated Service Information You Can Obtain

(Division) regularly sends its dealers useful service bulletins about (Division) products. (Division) monitors product performance in the field. We then prepare bulletins for servicing our products better. Now, you can get these bulletins, too.

Bulletins cover various subjects. Some pertain to the proper use and care of your car (truck). Some describe costly repairs. Others describe inexpensive repairs which, if done timely, with the latest parts, may avoid future costly repairs. Some bulletins tell a mechanic how to repair a new or unexpected condition. Others describe a quicker way to fix your car (truck). They can help a mechanic service your car (truck) better.

Most bulletins apply to conditions affecting a small number of cars (trucks). Your (Division) dealer or a qualified mechanic may have to determine if a specific bulletin applies to your car (truck).

You can subscribe to all (Division) bulletins. This way you'll get them as they come out. You can wait a while and get an index to the bulletins. The index summarizes some of the more important bulletins. You can also get individual bulletins. However, you'll need the index to identify them.

(2) The above statement shall in addition provide at least the following information in clear and comprehensible language—

(a) Concerning indexes—

(i) Indexes list each PSP, provide ordering information for individual PSPs, and are cumulatively updated quarterly for each model year.

(ii) Indexes contain plain-language highlights and summaries of PSPs describing costly repairs, designed to prevent costly repairs, or containing owner use and care information.

(iii) They are free for model years 1982–1985; if there is a charger thereafter, it shall be credited against any charge for PSPs ordered.

(iv) Most PSPs applicable to a new car will be listed in the last quarter's index for that car's model year. Some may also appear in indexes for the next model year; and a few many appear in subsequent years.

(v) When consumers order any index, they will receive the latest applicable index for the model year of their car unless they request an index for a different model year.

(b) Concerning PSPs—

(i) The cost of individual PSPs, if any, and how to order them.

(c) Concerning subscriptions—

(i) The cost of subscriptions and how to order them.

(ii) The subscriber is entitled to all PSPs published by a division during a model year.

(d) Concerning ordering—

(i) An ordering coupon to obtain a properly identified index, PSP, or subscription.

(ii) The toll-free telephone number described in paragraph C of section II.

(iii) A statement that informs owners that they can inspect copies of the indexes and individual PSPs at a participating dealership.

(3) The following statement, which shall be made in conjunction with the statement described above, but which shall not precede disclosure of the information described in paragraphs B(2)(a)(i) and B(2)(a)(ii)—

These bulletins are meant for mechanics. They are NOT meant for the do-it-yourselfer. Mechanics have the equipment, tools, safety instructions, and know-how to do a job quickly and safely.

C. Beginning with the 1984 model year, failing to disclose, for each model year, in a clear and conspicuous manner in the principal point-of-sale catalog published by General Motors for each of its vehicle lines the following statement:

A Word About Updated Service Information

(Division) regularly sends its dealers useful service bulletins about (Division) products. (Division) monitors product performance in the field. We then prepare bulletins for servicing our products better. Now you can get these bulletins, too. Ask your dealer. To get ordering information, call toll-free ———.

D. Failing to mail, or cause to be mailed, upon written request accompanied by any applicable fee specified in section II, any of the following:

(1) Information describing PSPs, PSP Indexes, and PSP subscriptions, as well as how to obtain each;

(2) The most current PSP Index for the particular General Motors vehicle division and model year identified in the request, provided that the PSP Explanatory Information in the PSP Index may be limited to the particular vehicle make, model and model year identified in the request; or

(3) In accordance with the terms of paragraph A of section II, any specifically identified PSPs, or a subscription to all PSPs for a current model year.

Provided that, General Motors need not make available a PSP or PSP Index issued in a model year four (4) or more years prior to the model year in which the request is received.

E. Failing to mail, or cause to be mailed, upon oral request received pursuant to a toll-free telephone procedure of the kind described in paragraph C of section II. information describing (1) PSPs, (2) PSP Indexes, and (3) PSP subscriptions, as well as ordering materials or coupons which can be used to order each.

F. Failing to furnish each dealer with each PSP and all PSP Indexes, and with binders, containers, index tabs, or other materials which enhance the accessibility of such materials at each dealership. General Motors need only furnish each dealer with the PSPs and PSP Indexes related to the vehicles manufactured by the division(s) represented by that dealership.

G. Beginning with the 1984 model year, and once in each 6-month period thereafter, failing to recommend and urge, in writing, that each dealer:

(1) Place the display posters, referenced in paragraph B of section II, in conspicuous and accessible locations within the dealers' showrooms, service waiting areas, service payment areas or parts departments, and request replacement posters from General Motors, as needed;

(2) Provide to requestors, in a form which may be retained, the PSP Index for a particular vehicle, make, model, and model year, and provide specifically identified PSPs and information how to order subscriptions to all PSPs for a particular model year, free or on reasonable terms; and

(3) Provide members of the public with ready access to the PSPs and PSP Indexes furnished to those dealers.

H. Failing to include detailed information regarding General Motors third-party arbitration program described in section IV, and the PSP program described in this section, in ongoing training programs and training materials for dealers on subjects related to service and customer relations, beginning not later than one hundred and eighty (180) days after service of this Order and continuing for the duration of this Order.

I. Failing to continue General Motors program of issuing PSPs in a manner comparable to the program as it existed during the period 1976 through 1981. Such program shall continue to take into account criteria for issuing PSPs such as frequency, repair, cost, and significance of product conditions.

J. Failing to prepare and issue an entry in the PSP Index for each PSP issued, and to include such entry in an updated PSP Index. PSP Indexes must be cumulatively updated quarterly for each model year, and must include no less than all PSP index entries for all PSPs issued between the start of the model year and one month prior to the update, provided that there must be one PSP Index for each model year that includes an entry for every PSP issued in that model year. The updated PSP Indexes must be forwarded to dealers and be available from General Motors within four months after issuance to dealers of any PSP which was not included in a prior Index.

It is further ordered that:

A. Beginning with the 1984 model year, General Motors shall implement a program whereby each person may obtain specified PSP Indexes, individual PSPs, or yearly subscriptions to all PSPs issued for a particular General Motors division in a model year. Subject to the limitations of this section, General Motors may, at its option, impose a reasonable charge. Any charge for a PSP Index must be credited toward the initial purchase of PSPs themselves. The maximum charges shall be as follows:

(1) For PSP Indexes ordered in

(a) Model years prior to 1986, no charge;

(b) Model years 1986 through 1988, a charge not to exceed two dollars ($2.00) per any PSP Index;

(c) Model years 1989 and thereafter, a charge not to exceed three dollars ($3.00) per any PSP Index.

(2) For individual PSPs ordered in

(a) Model years prior to 1986, a charge not to exceed three dollars ($3.00) for the first PSP requested in each order and one dollar ($1.00) for each additional PSP requested in that order;

(b) Model years 1986 and thereafter, a charge not to exceed four dollars ($4.00) for the first PSP requested in each order

VOL
48
ISS
90
MY
9
1983
UMI

and two dollars ($2.00) for each additional PSP requested in that order.

(3) For PSP subscriptions for a given model year, a charge not to exceed reasonable cost or equal to the charge (if any) to dealers.

B. In the 1986 model year, General Motors shall furnish to each of its dealers three display posters at least 24" x 36" in size promoting the existence, availability, and benefits of General Motors PSPs and PSP Indexes. Thereafter, General Motors shall furnish additional copies of these posters upon request by any dealer.

C. Within thirty (30) days after the date of service of this Order, General Motors shall establish and maintain a toll-free telephone system designed to accommodate the volume of telephone calls which result from the disclosures made pursuant to this Order. Said system shall provide that, after obtaining the caller's name and address, the person receiving the call shall cause to be mailed to the caller the materials described in paragraph E of section I or paragraph E of section IV as appropriate. If the materials described in paragraph E of section I are to be sent, General Motors shall instruct the person receiving the call to state that the caller's dealer may have PSPs and PSP Indexes available for the caller's convenience.

III

It is further ordered that:

A. At least four (4) times in the 1984 model year and two (2) times in each model year thereafter, General Motors shall place and cause to be disseminated four-color, full-page advertisements in national magazines. Each time such advertisements are placed, the magazines must have a combined total non-duplicated readership (i.e., "net reach") of at least seventy-five million (75,000,000) adults, as measured or verified by an outside organization generally recognized as competent and experienced in this field and used by General Motors or its advertising agencies for other advertising research. The demographic characteristics for the combined readership of the magazines selected for such advertisements must be generally representative of the demographic characteristics of the population of owners and potential purchasers of General Motors vehicles. Such advertisements may be tied into existing advertising themes, but most be devoted exclusively to explaining and promoting the existence, availability and benefits of PSPs and PSP Indexes. In addition, such advertisements must disclose that PSP Indexes are free, if such is the case; must prominently show the toll-free telephone number required by paragraph C of section II; and must include an order form to obtain PSP Indexes.

B. At least two (2) times in the 1984 model year, two (2) times in the 1985 model year, and three (3) times in each model year thereafter, General Motors shall place and cause to be disseminated full-page advertisements in national magazines. Each time such advertisements are placed, the magazines must have a combined total non-duplicated readership (i.e., "net reach") of at least seventy-five million (75,000,000) adults as measured or verified by an outside organization generally recognzed as competent and experienced in this field and used by General Motors or its advertising agencies for other advertising research. The demographic characteristics for the combined total readership of the magazines selected for such advertisements must be generally representative of the demographic characteristics of the population of owners and potential purchasers of General Motors vehicles. Such advertisements must contain a principal message devoted to explaining and promoting the existence, availability, and benefits of General Motors third-party arbitration program provided for in sections IV and V, and must conspicuously disclose the toll-free number required by paragraph C of section II. Each advertisement placed after the date of execution of this Order and before the date of service of this Order, if such advertisements meet all the requirements of this paragraph but for the fact that the advertisements were placed prior to the date of service of this Order, shall reduce on a one-for-one basis the requirement to place advertisements during the last three (3) years of the duration of this Order.

C. (1) Prior to the placement of the first advertisement required by paragraph A, and prior to the placement of any subsequent advertisements differing substantially in content or format from that first advertisement, General Motors shall conduct copy testing of such advertisement(s). The copy testing shall be based on monadic interviews (such as the "mall intercept" procedure) of subjects screened and selected so as to be representative of owners of General Motors vehicles purchased new, and shall be designed and implemented in accordance with General Motors usual procedures for such testing under the direction of an outside research organization or consultant generally recognized as competent and experienced in this field and used by General Motors for other advertising research. Said organization or consultant shall submit to General Motors a report on the effectiveness of the tested advertisement, and said advertisement shall meet General Motors obligations under this section if said report concludes that the advertisement, measured in relation to advertisements for comparable automotive product information, effectively communicates:

(a) That General Motors makes information available to consumers, for 1982 and subsequent model years, which describes or recommends diagnostic, repair, or maintenance procedures for product conditions, or contains information about the use and care of vehicles; and

(b) How consumers can obtain PSP subscriptions and PSP Indexes.

Unless otherwise specified by this Order, the testing of advertisements described in this paragraph shall adhere to the standards set forth in "PACT: Positioning Advertising Copy Testing (A Consensus Credo representing the views of leading American Advertising Agencies)," dated January 1982.

(2) Prior to the placement of the first advertisement required by paragraph B, and prior to the placement of any subsequent advertisements differing substantially in content from that first advertisement, General Motors shall conduct, or cause to be conducted, copy testing of said advertisement(s) using a population representative of owners and potential purchasers of General Motors vehicles, and employing a so-called "Group-Depth Interview" or "Focus Group" method of copy testing, designed and implemented in accordance with General Motors usual procedures for such research under the direction of an outside research organization or consultant generally recognized as competent and experienced in this field and used by General Motors for other advertising research. Said organization or consultant shall submit to General Motors a report on the effectiveness of the tested advertisement(s), and the advertisement(s) shall meet General Motors obligations under this paragraph if, on the basis of said report and applying criteria customarily applied to General Motors service advertising or advertising for comparable complaint resolution programs, the advertisement(s) effectively communicates:

(a) That General Motors is offering to submit complaints concerning its vehicles to a third-party arbiter; and

(b) How consumers can obtain information about the third-party arbitration program.

D. Beginning with the 1984 model year, in any proprietary magazine sent by General Motors vehicle divisions to a primary target audience of division vehicle owners, General Motors shall annually include a full-page advertisement containing the disclosure statements set forth in paragraph B of section I, or the substantial equivalents thereof, concerning the same information.

IV

It is further ordered that:

A. General Motors shall implement a nationwide third-party arbitration program to settle complaints of individual owners relating to powertrain components.

B. Such third-party arbitration program shall be binding on General Motors, but nonbinding on consumers unless a consumer elects to accept an arbitration award.

C. Such third-party arbitration program shall be conducted in accordance with (1) the Uniform Rules for Arbitration published by the Better Business Bureau; (2) the Zone Handbook for Third-Party Arbitration (Attachment A to this Order), as modified by the special implementing provisions (Attachment B to this Order); and (3) the General Motors Consumer Arbitration Handbook (Attachment C to this Order). The special implementing provisions (Attachment B to this Order) shall not be modified without prior Commission approval insofar as the provisions apply to arbitration involving specified components. For two years after date of service of this Order, such third-party arbitration program shall be conducted at no charge to the consumer by General Motors or the third-party arbitrator. Thereafter, no charge shall be imposed on consumers by General Motors or the third-party arbitrator that exceeds charges specified in the Uniform Rules of Arbitration published by the Better Business Bureau. The General Motors Consumer Arbitration Handbook (Attachment C to this Order) shall effectively communicate that if a consumer accepts an arbitration award, the consumer cannot seek reimbursement from General Motors for the same problem through the use of other legal proceedings.

D. Such third-party arbitration program shall be fully operational in the cities identified in Attachment D no later than sixty (60) days after the date of service of this Order, and thereafter expanded as demands on the program may require to resolve consumer complaints expeditiously. The expansion shall be designed and implemented so that owners who elect to arbitrate complaints about specified components can obtain their arbitration hearing within sixty (60) days of their election (exclusive of periods of delay attributable to the consumer) unless extraordinary circumstances justify a longer period in individual instances.

E. General Motors shall mail or cause to be mailed, either upon written request or oral request received pursuant to a toll-free telephone procedure of the kind described in paragraph C of section II, a handbook explaining the details of General Motors third-party arbitration program (Attachment C to this Order).

F. General Motors shall include in a letter to each dealer, once in each 6-month period, a clear and conspicuous reminder to dealers regarding disclosure of the availability of General Motors third-party arbitration program.

V

It is further ordered that:

A. Within sixty (60) days after the date of service of this Order, General Motors shall contact, by first-class mail, each attorney general's office (or such other office as may be appropriate) of the fifty states and the District of Columbia, and shall:

(1) Provide each such office with a copy of this Order.

(2) Describe General Motors third-party arbitration program.

(3) Describe the PSPs and PSP Indexes and explain how consumers can obtain them.

(4) Inform each such office that General Motors will, if the appropriate office wishes, notify by first-class mail each person who has complained to that office about a specified component, and that General Motors will provide that person with:

(a) Information about the availability of General Motors third-party arbitration program;

(b) One or more of the appropriate Background Statements when any specified component has been identified; and

(c) Information about PSPs and PSP indexes and how to obtain them.

(5) Request that each such office provide General Motors with (a) a copy of each complaint concerning a specified component; or, at the option of that office, (b) the owner's name and address, and the identity of the specified component or components.

(6) Inform each such office that General Motors will also send, by first-class mail, a notice to any person who has complained to any other state or local law enforcement or consumer affairs office about a specified component, and urge such office to encourage state and local law enforcement or consumer affairs offices to forward to General Motors either copies of such complaints, or, at the option of the forwarding office, a list of the names, addresses and the identity of the specified component or components.

B. Within sixty (60) days after receipt of any complaint or the complainant's name and address, from any office solicited pursuant to paragraph A of section V, or any complaint concerning a specified component or the complainant's name and address from the Federal Trade Commission, General Motors shall send to that complaintant, by first-class mail:

(1) One or more of the appropriate Background Statements when any specified component has been identified;

(2) A statement which clearly and conspicuously discloses information about the availablity of General Motors third-party arbitration program, including the statements contained in Attachment E;

(3) A statement which clearly and conspicuously discloses information about the availability of PSPs and PSP Indexes.

C. Within sixty (60) days after the date of service of this Order, General Motors shall send by first-class mail to any person who has an open or unsatisfactorily resovled complaint and who, prior to the date of service of this Order, had notified General Motors about a specified component, and whose name and address have been retained by General Motors, the information contained in paragraphs B(1), (2), and (3) above.

D. Within thirty (30) days of service of this Order, General Motors shall provide to appropriate General Motors employees, including employees at the zone offices and headquarters of the car and truck divisions who have responsibility for receiving and responding to consumer complaints, written instruction stating that all consumers who identify a specified component in any oral or written complaint received after the date of service of this Order must be sent, by first-class mail, a letter providing the information contained in paragraphs B (1), (2), and (3) above.

E. General Motors shall obtain, maintain, and retain for a period of four (4) years from the date of service of this Order, the following records for specified components:

(1) The results of each mediation pursuant to the procedure described in section IV including the terms of any settlement and, where available, the

VOL 48 ISS 90 MY 9 1983 UMI

terms of any proposed settlement of a complaint;

(2) Copies of each arbitration decision, including, where available, the reasons for the decision; and

(3) Documents showing all requests for arbitration made by vehicle owners, the dates of such requests, and the dates of all arbitration hearings.

VI

It is further ordered that sections I, II, III, IV and V of this Order shall expire eight (8) years after the date of service of this Order; *provided*, that if at any time during which said sections remain in effect, the Commission issues a final trade regulation rule imposing obligations on the automobile industry comparable to those imposed under any such section(s), such section(s) shall terminate upon the effective date of such rule, and, in such event, General Motors shall advise the Commission of its intention to rely upon any such rule as having terminated and superseded such section(s) of this Order thirty (30) days in advance of reliance thereon; *provided further*, that if at any time during which such section(s) remain in effect, the Commission issues a final guide under Sections 1.5 and 1.6 of the Commission's Rules of Practice imposing obligations on the automobile industry comparable to those imposed under any such section(s), then the Commission shall, upon General Motors motion or upon the Commission's own motion, reopen this proceeding within one hundred twenty (120) days of such motion, and, within a reasonable time thereafter, vacate any such section(s) of this Order, unless the Commission finds that such action is not required by changed conditions of law or fact or is not in the public interest; and *provided further*, that nothing herein shall preclude General Motors at any time from moving the Commission to alter, modify, or set aside this Order under the Commission's Rules of Practice.

VII

It is further ordered that:

A. General Motors shall, within sixty (60) days after the date of service of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this Order.

B. General Motors shall, with one hundred twenty (120) days after the implementation of the PSP program pursuant to section I of this Order, file with the Commission a report, in writing, setting forth in detail the manner and form in which General Motors has complied with this Order.

C. During the time that sections I, II, III, IV and V remain in effect, General Motors shall retain and transmit to the Commission upon reasonable request:

(1) A copy of each PSP Index required by paragraphs A and J of section I, and a copy of each PSP;

(2) Copy-test results of advertisements disseminated pursuant to section III; and

(3) A copy of each poster furnished to dealers pursuant to paragraph B of section II.

D. Once during the term of this Order, General Motors shall file with the Commission a report, in writing, setting forth in good faith its best estimates of:

(1) The costs and benefits, to General Motors and to the public, of the obligations imposed by this Order; and

(2) The extent to which dealers have displayed posters furnished to them pursuant to paragraph B of section II and have provided access to PSPs and PSP Indexes furnished by General Motors as required by paragraphs A and J of section I.

Said report shall be filed within six (6) months of General Motors receipt of a request therefor from the Commission or its staff, and shall cover the period from the date of service of this Order until the date of said request. General Motors shall make available for inspection upon reasonable notice by authorized representatives of the Federal Trade Commission, all underlying documents and data relating to the "cost and benefits" portion of said report and used in the preparation of said report. If copies of any such materials are requested by Commission representatives, General Motors may, at its option, either make such materials available to such representatives for copying purposes, or provide copies at either (a) rates the Commission charges for copies of materials released pursuant to the Freedom of Information Act, or (b) General Motors costs, whichever is lower.

E. General Motors shall retain records relative to the manner and form of its continuing compliance with sections I, II, III, IV and V for a period of three (3) years, and make said records available for inspection upon reasonable notice by authorized representatives of the Federal Trade Commission. If copies of any such records are requested by such representatives, General Motors may, at its option, either make such records available for copying purposes or provide copies at either (a) rates the Commission charges for copies of records released pursuant to the Freedom of Information Act, or (b) General Motors costs, whichever is lower.

F. During the time that sections I, II, III, IV and V remain in effect, General Motors shall notify the Commission prior to any change in General Motors corporate structure, such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation which may affect compliance obligations arising out of this Order.

It is further ordered that the provisions of this Order shall be limited in their application to the United States.

BILLING CODE 6750-01-M

INTRODUCTION

For the past few years, the National Football League has wrestled with the subject of providing some form of appeal on official judgment decisions in close calls. To this date, the experts are saying that football is a sport and the breaks and calls will average out over the course of a game or season. To question the official's judgment, they say, would create havoc on the field. No one has disputed the fact that some calls, although sound in judgment at the time, are in fact incorrect when viewed from a different angle. Our position in Consumer Relations is not totally unlike the situation in this country's favorite spectator sport. The consumer expects and is now more than ever demanding avenues of appeal on decisions that do not appear to the consumer to be fair or in keeping with what he or she feels is General Motors obligation. Unlike football, vehicle ownership and maintenance is not a sport and our consumer handling cannot be averaged over the course of the season.

General Motors and the Better Business Bureau have developed a program for third party arbitration. You are possibly aware that the Magnuson-Moss Act recommends an arbitration system. Some very interesting results have been obtained from our pilot test and while we resist considering any consumer contact on a win or loss basis, we feel that the additional time that has been spent by the dealers and divisional personnel has made winners of us all. During the period of the arbitration tests to date, consumer complaints reaching the divisional central offices have either declined more sharply than the divisional average or have bucked the trend and decreased while the divisional average increased. Obviously, the consumer's need for an avenue of appeal has been answered.

Attachment A—General Motors Zone Handbook for Third-Party Arbitration

Customer Service

ZONE HANDBOOK
FOR THIRD PARTY ARBITRATION

This "Zone Handbook For Third-Party Arbitration" shall be supplemented to include the provisions of Attachment B to the "Agreement Containing Consent Order to Cease and Desist" (FTC Docket No. 9145) herein shall be deleted or modified as necessary to conform this handbook with the requirements of the Consent Order.

UMI 1983 MAY 9 VOL 48 ISS 90

TWENTY QUESTIONS (AND ANSWERS) ABOUT CONSUMER ARBITRATION

BBB

THE COUNCIL OF BETTER BUSINESS BUREAUS, INC.
1150 17TH STREET, N.W. WASHINGTON, D.C. 20036

1
What is consumer arbitration?

Consumer arbitration is a simple and economical procedure whereby a businessman and his customer may submit their dispute to an impartial third party for resolution. Arbitration is an alternative to lengthy, costly court action, but it is available only when all other means of settling the disagreement, such as mediation by a Better Business Bureau, have failed. BBBs will not arbitrate criminal violations, damages which go beyond the actual service or product involved, and issues that may not be arbitrated under the law.

2
How does consumer arbitration work?

When all informal attempts to resolve a customer's complaint have been futile, the BBB may suggest arbitration, or one of the parties may initiate a request for arbitration. If both the business and the customer agree, the Bureau will take the administrative steps necessary for arbitration.

3
Who will actually perform the arbitration?

The Bureau maintains a pool of volunteer arbitrators chosen from all segments of the community. Members of this pool will serve as Arbitrators. A list of possible Arbitrators, plus biographical sketches, will be sent to both Parties to the arbitration. Each party will cross off names of those considered unacceptable and assign a priority to those remaining. The preference of the Parties will determine who is chosen to arbitrate, and no Arbitrator will be selected if rejected by either Party. For some low-cost disputes utilizing a preselected arbitration panel, the Parties may object to individual members of the panel if there is reason to believe they will not act impartially.

4
What if the Parties cannot agree on who shall arbitrate?

If no Arbitrator is acceptable to both Parties, each will select one Arbitrator who then will select a third who shall serve as chairman. When there are three arbitrators, the majority shall decide all questions.

5
Are the Arbitrators impartial?

Nobody can ensure the impartiality of any person, but the process of arbitration is time-tested to assure optimum impartiality. The Arbitrators are not paid for their efforts. They perform their duties as a public service. Not only will each Party receive a biographical sketch of each Arbitrator, but all Arbitrators are required to disclose, as a condition of accepting appointment, any financial, commercial, professional, social or familial relationships with any of the Parties or their counsel. Although the BBB receives the bulk of its funding from local businesses, the arbitration process is conducted independent of the BBB, which has only an administrative role.

6
Would the Customer or Business be better off going to court?

In many areas, courts suffer from over-loaded dockets, and there is delay in resolving any dispute. Arbitration is a speedy procedure. It can be instituted in a short period of time, with most hearings usually lasting no more than an hour. Going to court may require hiring an attorney, but anyone can represent himself in arbitration. One may be represented by a lawyer in an arbitration proceeding, but the non-legal, informal nature of such a proceeding usually makes a lawyer unnecessary. Most important, an arbitration proceeding gives a better forum than most small claims courts. It is a private matter with no onlookers (unless the Parties permit it), a judge chosen by the Parties, and a flexible process throughout.

7
What does arbitration cost?

The administrative costs of arbitration, including inspection and technical witnesses, will be borne by the Better Business Bureau, although in some cases a refundable performance bond will be required to insure the presence of the Parties. The costs of other witnesses, attorneys' fees, and a transcript or recording of the proceedings, if desired, will be borne by the Party requesting same.

8
Where and when will the arbitration be held?

The arbitration hearing will be held at a time and place convenient to the Parties and Arbitrator, such as an evening or weekend. Often the BBB maintains a room that is appropriate for conducting arbitration hearings. Hearings have been conducted at the site of a home improvement job and in a garage where an auto repair issue was in dispute.

9
What is an inspection and why should an inspection be advantageous?

An inspection is an added feature of arbitration whereby the repair job, construction site, product or service is actually seen and evaluated by the Arbitrator, usually with both Parties present. This procedure is particularly suited to disputes involving the quality of workmanship and is not usually available in court.

10
What if the subject matter of the dispute is highly technical?

For disputes requiring technical expertise beyond the capacity of the Arbitrator, an expert witness is called in to the inspection or hearing, or the product is submitted to an independent testing laboratory. In such cases, the normal and reasonable costs will be borne by the BBB.

11
Once the arbitration agreement is signed and returned, can either Party back out?

Under most state laws, an agreement to arbitrate is binding on both parties, with either party given the right to compel the other by filing in court action to go through with the arbitration. However, it is the policy of the BBB to encourage the performance of voluntary agreements to arbitrate and to conduct its arbitration program as a community service. The emphasis is placed on the voluntariness of the proceedings.

12
What if the dispute is settled after the arbitration agreement is signed, but before the Award is rendered?

A fundamental purpose for establishing a consumer arbitration program is to resolve disputes. Thus, if the Parties settle their case before an Award is rendered, even if a hearing has been held, the arbitration process is suspended. Upon written notice signed by each party that an agreement has been reached the proceedings are terminated. In a typical program, it is not unusual for the parties to settle their case after they have agreed to arbitrate.

13
What is the nature of an arbitration hearing?

The arbitration hearing is conducted in an informal manner with each party given full opportunity to present his arguments and evidence. All Parties and witnesses are sworn to tell the truth by the Arbitrator who may, in most states, administer oaths. The Arbitrator, too, is often sworn in prior to the hearing, often by a Notary Public. Parties are encouraged to limit their proofs to reliable and relevant materials. Where possible, original copies of contracts and other documents should be brought along, together with eye-witnesses, if any. Cross-examination of witnesses will be permitted. Although the atmosphere is informal, decorum and proper courtesy are required at all times. The hearings are not restricted as to time, and the Parties are encouraged to tell their full story without necessary repetition.

14
Who can attend the hearing?

Only those persons having a direct interest in the controversy may attend a hearing, although the Parties may agree to allow the presence of others. Arbitration is a private proceeding, unlike a court hearing.

15
Can the Parties contact the Arbitrator outside the hearing?

No communication between the Parties and the Arbitrator is allowed except at the hearing or inspection. All other communication regarding the case must be directed to the BBB, which will transmit it to an Arbitrator and the other Party. This rule is to ensure that no Party attempts to persuade or influence an Arbitrator without the knowledge of the other party.

16
What is an Award?

An Award is the decision of the Arbitrator. Unlike most small claims court decisions, it is in writing and it disposes of all issues in a manner to achieve a final wrap-up of the dispute. A "split award" is one that decides in part for and against both Parties.

17
How is an arbitration Award enforced?

In most states, an arbitration Award is enforced by the court. This means that a written Award, signed by the Arbitrator, may be taken to court and enforced as if it were a judgment or order of the court, all without a rehearing of the case.

18
May an Award be attacked in court?

In rare circumstances, an Award may be subject to successful attack in court. To set aside an Award one must show that it was procured by corruption, fraud, misconduct, or gross partiality on the part of the Arbitrator. If an Award goes beyond the issues in dispute, it may be set aside also.

19
Can an Award be modified or corrected without going to court?

Yes. When the Arbitrator deems it necessary, an Award may be corrected or modified where there was an evident miscalculation or mistake of fact not learned until after the Award was initially rendered.

20
Are there any advantages for businesses to include arbitration clauses in their contracts?

Numerous businesses have arbitration clauses in their customer contracts and many other businesses have precommitted themselves to arbitration if they or the BBB cannot resolve a dispute. Contractors have found, for example, that an arbitration clause in their home improvement contract is a good selling tool. Many businesses want to advertise their participation in a BBB program, and they may not do so unless they are precommitted to arbitration. Also, reports given to the public by the BBB will indicate which businesses are precommitted to arbitration.

NATIONAL PROGRAM OF CONSUMER ARBITRATION THROUGH THE BETTER BUSINESS BUREAUS

UNIFORM RULES FOR BETTER BUSINESS BUREAU ARBITRATION

1 Definitions

A **"Arbitration"** is a legal process in which two or more persons agree to let an impartial person finally decide their dispute.

B **"You,"** as used in these rules, means one of the parties involved in the dispute being arbitrated.

C **"BBB"** means the Better Business Bureau which is administering the arbitration.

D **"Arbitrator"** refers to the individual or panel selected to conduct the arbitration and make a final decision in the dispute.

E **"Disputes"** which may be arbitrated under these rules include any disagreements between a business and its customer relating to a transaction in the marketplace. These disputes do not include alleged criminal violations or matters which may not be arbitrated under the law. Unless you otherwise agree, these disputes also will not include claims that go beyond the actual price of the product or service involved such as loss of wages, mental anguish, personal injuries, punitive damages or consequential damages relating to the sale or service transaction. A decision as to whether your dispute or any part of your dispute is arbitrable under these rules or is one within the scope of your agreement to arbitrate rests solely with the BBB.

2 Application of These Rules

These rules apply to any dispute which you agree to arbitrate through the BBB. You must accept these rules when you sign an agreement to arbitrate; however, the BBB will not arbitrate your dispute until its normal complaint handling procedures have been exhausted.

3 The State Law

The law of the state where your dispute is arbitrated shall apply.

4 Beginning Arbitration

If the BBB's efforts to resolve your dispute have been exhausted, the BBB may suggest arbitration to you, or you may request the BBB to start an arbitration, or you may already have signed a prior agreement with the BBB to arbitrate a dispute that cannot be resolved by other means. The BBB will prepare an arbitration agreement stating the issues to be arbitrated for you and the other parties to the dispute to sign. If you agree with the issues to be arbitrated under this agreement, you should sign the agreement and return it to the BBB within five days of receiving it unless the BBB gives you additional time. If you disagree with the issues as stated in the agreement, let the BBB know and it will try to resolve any conflicts. Your failure to return the arbitration agreement within five days will be considered a rejection of arbitration. Exception: If you have signed a prior agreement to arbitrate with the BBB, your failure to mail the agreement in five days will be considered an acceptance of the stated issues. When the BBB has received the agreement from all parties to a dispute it will begin the arbitration process.

5 Selecting Your Arbitrator

The BBB will maintain a pool of volunteers, who reflect, to the extent possible, the total community. The Arbitrator will be selected from this pool in the following manner:

A. The Single Arbitrator

The BBB will provide you and the other parties with an identical list of five Arbitrators chosen from the volunteer pool, together with brief biographies of each. After receiving this list you will have five days to cross off any name considered unacceptable and to assign priorities (#1, #2, #3, etc.) to those remaining. If you do not mail the list in five days, the BBB will assume all names are satisfactory to you. The BBB will select the Arbitrator on the basis of the highest priority common choice of the parties and availability. If no Arbitrator on the list is acceptable to all the parties, the BBB normally will send out a new list.

B. Three-Person Panel

At the option of the BBB or where the state law requires, a panel of three Arbitrators may decide your dispute. The selection process is the same as above, except your first choice, if available, and the first choice of any other party will pick a third Arbitrator who has not been rejected by you. The person so selected will chair the hearing, and the decision in your dispute will be by a majority vote of the panel. If your first choice is the same person chosen first by the other parties, that individual will chair the panel and the second or third choices of the parties will constitute the other two panel members.

C. Alternate Procedures

When state law permits, variations of these selection procedures may be used by the BBB; however, any alternate procedure must give you a choice of the Arbitrator.

6 Facilities and Costs of Arbitration

The BBB will provide or arrange for facilities to hold your arbitration hearing and it will maintain all of your arbitration records. If you want a record of proceedings or if you bring your own lawyer or witnesses, you are responsible for these costs.

7 Communicating with the Arbitrator

You may not have any direct communication with the Arbitrator about your dispute unless all other parties are present or have given written permission for you to do so. Any communications for the Arbitrator must be sent through the BBB, which will relay them to the Arbitrator with copies to the other parties to the dispute. Except for your notice of hearing or inspection, all BBB communications to you will be by regular mail or by other reasonable means, subject to state law requirements.

8 The Arbitrator's Appointment and Oath

The BBB will send the Arbitrator a notice of appointment, together with a copy of your agreement, these rules, and any other appropriate material relating to your dispute. The Arbitrator must sign a special oath and give this to the BBB together with a disclosure of relationships with any parties to the dispute.

9 Disqualifying Arbitrators; Filling Vacancies

Before signing the oath pledging to make a fair decision in your dispute, the Arbitrator must disclose any financial, competitive, professional, family or social relationship, however remote, with you or any other party to your dispute. If the relationship is such that a fair decision cannot be made, the Arbitrator will refuse to serve. All other disclosures should be given by the Arbitrator to the BBB which will let you know about them and give you an opportunity to accept or reject the Arbitrator, depending on how you believe the disclosure might affect the Arbitrator's decision. The BBB, too, may reject an Arbitrator on the basis of such disclosures. If the Arbitrator is rejected, the selection process described in Rule 5 will be repeated.

10 Representation by a Lawyer

In an arbitration hearing you may argue your own case or have someone represent you. If your representative is a lawyer, you must give the lawyer's name and address to the BBB at least seven days before the hearing so the BBB can inform other parties in the dispute and give them an opportunity to get a lawyer if they wish.

11 Inspection

Before the hearing, either you or the Arbitrator may request an inspection of the product or service involved in the dispute. The Arbitrator will have the final decision on whether or not to conduct an inspection. If the Arbitrator decides an inspection is desirable, the BBB will be informed and a notice of inspection will be sent to you at least seven days in advance by certified mail (return receipt requested) or by other methods permitted under state law. If you or your representative cannot attend, you will be given an opportunity to comment on any of the observations made at the inspection.

UMI 1983 MAY 9 90 ISS 90 48 4 VOL

12 Experts

At the request of the Arbitrator, the BBB will make every effort to obtain a neutral volunteer expert to inspect the product or service at issue in your dispute. At the BBB's option, the expert's findings will be presented in writing or in person at your arbitration hearing. At the hearing, you will have an opportunity to evaluate and comment on the qualifications of the expert and any findings made by the expert.

13 Hearing Dates; Notice of Hearing

When the Arbitrator has agreed to serve, the BBB will set a time and place for your conference and that of the Arbitrator. Notice of your hearing will be sent to you at least seven days in advance by the BBB by certified mail (return receipt requested) or by other methods approved by state law. If you object to the time or place stated in your notice, contact the BBB immediately and let them know. If you do not object, or if you come to the hearing, your acceptance of the notice will be assumed.

14 Waiver of Oral Hearing

If you decide not to appear personally or to be represented by someone else at your hearing, you may send the BBB a written statement of your case together with any written evidence you may have. Or the BBB, at its option, may make other arrangements to have your statement and evidence presented. In any arbitration where you do not appear personally, the Arbitrator will set deadlines for you to send to the BBB your written statement and any evidence. The Arbitrator's final decision will be made within ten days of this deadline.

15 Attendance at Hearings

Unless you otherwise agree in writing, only those with a direct interest in your dispute, including your lawyer and witnesses, may attend the hearing. The Arbitrator has the option of either permitting your witnesses to be present for the entire hearing or to appear only for their testimony.

16 Absence of a Party

If you fail to come to a hearing after accepting notice, the Arbitrator may decide to hold the hearing in your absence. Your absence does not mean the Arbitrator will automatically decide against you. The Arbitrator may, however, give you the right to present your statement and any evidence in writing within a set time.

17 Transcript of Hearing

If you pay all costs, the BBB will arrange to make a transcript of the hearing; however, the other parties and the Arbitrator must be given access to this transcript. At the request of the Arbitrator and at no cost to you, the BBB may record the proceedings and provide a tape to the Arbitrator to assist in making a decision.

18 Interpreters

If you need an interpreter for your arbitration and cannot provide your own, contact the BBB and it will make every effort to find a volunteer interpreter. You would be responsible for interpreter fees, if any.

19 Oaths

The Arbitrator will sign a special notarized oath before your hearing. You and your witnesses may be placed under oath at the hearing, except in instances where this procedure is not required by the BBB and state law.

20 Hearing Procedures

The Arbitrator will decide on the order and procedures for you to present your side of the dispute. You will be given an opportunity to make a personal presentation of your case, as well as present any witnesses and evidence in support of your case. You also may question the other parties, their witnesses and their evidence. After everyone has given their presentation, you will be given an opportunity to make a closing statement. When the Arbitrator is satisfied that all testimony and evidence have been presented, your hearing will be closed.

21 Admission of Evidence

You may give your presentation and evidence in an arbitration hearing without being restricted by the usual rules of evidence, and the Arbitrator will decide how relevant or meaningful it is in making a final decision. The Arbitrator may restrict your presentation if it is repetitious or not related to the dispute.

22 Incomplete Hearings

If the Arbitrator considers it necessary for a fair decision, new or additional hearings may be scheduled in your dispute. After your hearing has been closed by the Arbitrator, you may request that it be reopened to consider matters not raised at the original hearing, if the Arbitrator has not yet made a decision. Your request must be sent to the BBB, and copies will be sent to any other parties. The Arbitrator will make the final decision on whether to reopen the hearing or not.

23 Subpoena Powers; Depositions

If you have a reason to believe the other side will not bring to the hearing certain witnesses or evidence which you consider important to a full and fair consideration of your dispute, you may send the BBB a request that the Arbitrator subpoena or direct the bringing of such witnesses or evidence. If the Arbitrator agrees with your request, such a subpoena or directive will be sent according to state law. Where state law permits, the Arbitrator may also authorize the taking of depositions, by which you may ask questions of other parties' witnesses who cannot attend the hearing; however, you must pay for the cost of such depositions.

24 Affidavits

The Arbitrator also may permit written statements, made under oath and notarized, instead of oral statements.

25 Waiver of Rules

If you believe that any part of these rules has not been followed, you must object in writing to the BBB before the Arbitrator makes a final decision, or your objection will not be considered.

26 Change of Time

You and any other parties to your dispute may agree to change any period of time stated in these rules.

27 The Decision

A. **Time.** The Arbitrator must write a final decision no later than ten days after your hearing is closed and the BBB may request this time to be reduced in some cases. If you have been asked to furnish or wish additional materials relating to your dispute, the Arbitrator will set a time for these materials to be sent to the BBB and a final decision will be made ten days after they are received. The BBB will send you a copy of this decision by certified mail or by other means permitted by state law.

B. **Scope.** The Arbitrator may make any decision, which the Arbitrator deems to be fair and equitable within the scope of your agreement to arbitrate, provided state law does not prohibit all or part of that decision.

C. **Modifying the Decision.** If you believe the final decision is impossible to perform, or that it contains a mistake of fact or miscalculation, or that it is otherwise imperfect in form, you should notify the BBB in writing. The BBB will share your observation with the other parties and forward it, together with their views, to the Arbitrator who may accept it in whole or in part or reject it altogether.

D. **Settlement.** If you and the other parties voluntarily decide to settle your dispute before the hearing, the settlement will end your dispute and no hearing will be held. If your voluntary settlement occurs during the hearing, you may ask the Arbitrator to reflect the settlement in the final decision. If your settlement occurs after the hearing but before the Arbitrator's final decision, be sure to notify the BBB at once.

E. **Form and Filing.** The Arbitrator will make the final decision in writing and it will be notarized before the BBB duplicates it and sends a copy to you and any other party. If state law so requires, the BBB will also assist you in filing a copy of the decision with the proper court if you wish. The Arbitrator and the BBB will not make any public disclosure of the decision unless you and all other parties agree in writing.

28 Interpretation of Rules

The Arbitrator will interpret these rules and your agreement to arbitrate on all matters relating to the powers and duties of the Arbitrator. On all other questions about these rules, the BBB will make the final decision.

MEETING FOLLOW-UP

The General Motors Third Party Arbitration Program's effectiveness can be substantially enhanced by obtaining the dealer's pledge to arbitrate complaints arising out of retail transactions. The pledge to arbitrate would apply to any disagreement between the dealer and his customer regarding the sale or rental of any product or service.

Much of the success or failure of the program will depend on the degree of participation by dealers.

Accordingly, attached is a suggested letter which your zone manager may wish to adapt for a follow-up meeting with your business management contact dealers.

SUGGESTED LETTER

Dealer:

We have now officially begun the Third Party Arbitration Program in the [CITY] area.

I would just like to reiterate my personal commitment to having this program be a sincere demonstration of (Division's) intention that every customer should be treated fairly and that he shall be convinced that he has been treated fairly.

Accordingly, I will appreciate it if you will make certain that all of your customer contact people are aware of the details of the program. They should make certain that the zone office is made aware of any serious difference of opinion with a customer, and that we have the opportunity to try to resolve it with your help. The customer should not be discouraged from using the mechanism because that would defeat its purpose. I repeat, however, in the best interest of all concerned, and especially in the retention of owner goodwill, the best way to resolve any dispute is among ourselves at the earliest possible moment.

I am hopeful that many dealers will agree to pledge to arbitration as General Motors has. This would greatly strengthen the program. However, other dealers may decide to consider arbitration of dealer/customer disputes on a case-by-case basis, and I again encourage you to carefully consider any case which may be brought to your attention by the Better Business Bureau or even to volunteer this resolution mechanism to the customer when it is apparent that a serious difference of opinion exists.

A key part of the Arbitration Program is the selection of a specific individual at each dealership who will have the authority to react responsibly to consumers or Better Business Bureau personnel on consumer complaints. If you have not selected an individual to assume these duties, I encourage you to do so and advise the Better Business Bureau of the name and telephone number of your selection as soon as possible.

If everyone involved enters into this program in the spirit in which it is intended, I am convinced it can be a very positive forward step in our relations with our customers.

Zone Manager

UMI 1983 MAY 9 ISSUE 90 VOL 48

PLEDGE TO ARBITRATE

This company is pledged to arbitrate through the Better Business Bureau all disputes, except as limited in this agreement, involving us and our customers, provided that we have first had an opportunity to resolve any such dispute; however, we will not consider ourselves bound to arbitrate unless all reasonable efforts to resolve the matter informally by the Bureau have proved unsuccessful and all other necessary parties have agreed to arbitrate.

Our pledge applies to any disagreement between us and our customers regarding the sale or rental of any of our products or services. Our pledge does not extend to disputes alleging criminal violations and demands for damages for personal injuries or other claims which go beyond the cost of the product or service involved, as well as to disputes which may not be arbitrated under the law.

This pledge applies to all disputes received by the Better Business Bureau while it is in effect and to disputes received within thirty days of our written notice to discontinue our pledge to arbitrate.

Our principal contact for the Better Business Bureau for purposes of handling any customer dispute is _____ telephone _____

and our alternate contact is _____

Past experience has shown that the Arbitration Program is improved with an open line of communication between the Better Business Bureau and zone personnel. In an effort to obtain the best possible working relationship, zone management is requested to establish periodic meetings with Better Business Bureau personnel in their area. Initially, these meetings should be held monthly, and as frequently as necessary after the lines of communication are firmly established.

For all dissatisfied closings of Consumer Relations cases which are within the parameters of this program, the consumer should be advised in writing of the Arbitration option. The suggested letter contained in this handbook should be used for that notification (See "Consumer Letter" Section).

BETTER BUSINESS BUREAU
REPORTS & PROCEDURES

In order for General Motors to assess the effectiveness of the Arbitration Program, the results of the mediation and arbitration proceedings need to be tabulated uniformly so as to be useful and meaningful to various levels of management.

We have tried to develop a simple uniform reporting system which is to be used by all of the Bureaus.

Attached are three pages labeled (A), (B), and (C).

Pages (A) and (B) are instructions which should be reviewed carefully by each individual involved in the program. Page (B) provides instructions and it outlines the common format to be used in showing the status of General Motors arbitration cases. Page (C) is the monthly update of the General Motors arbitration cases.

At the end of each month, Page (C) and a detailed "Status of General Motors Arbitration Cases Report" using the format outlined on (B) is to be mailed to the Director of Consumer Relations, 8-151, General Motors Building, Detroit, Michigan, with copies to the General Motors divisional zone offices.

Zone Reports & Procedures

It is our intention to keep the procedures for Arbitration as simple as possible, and to minimize additional record keeping for the zone offices. Obviously, however, we must have certain records to determine the effectiveness of the program and its cost.

ARBITRATION—AWARD REPORTING

The Award Report (sample provided) is to be completed immediately upon receipt of an Arbitration Award. One copy is to be forwarded directly to the Divisional Central Office, Consumer Relations Department, and an additional copy forwarded directly to the General Motors Corporation, Consumer Relations Section (Attention: The Administrator of Third Party Arbitration).

The Award Report is a summary of the complaint and should be a brief concise synopsis of:

A) The owner's complaint and demands.
B) The Division's position and offer, if any.
C) The arbitrator's Decision and Award.

Attached to this report should be a copy of the Award and Finding of Facts, a copy of the owner's complaint, and any zone correspondence and write-ups.

—SAMPLE—

DATE: 2–15–80
OWNER: John S. Customer, 6064 Berkley Drive, Somewhere, MN
COMPLAINT: Owner alleges auto-transmission failure was result of manufacturing defect in valve body.
DIVISION POSITION: Zone claims vehicle beyond time and mileage limitations of New Vehicle Warranty and repairs not performed by franchised dealer.
HEARING DATE: 2–20–80
ARBITRATOR: John Q. Arbitrator, Attorney at Law
LOCATION: Minneapolis
DIVISION: CHEVROLET
PRODUCT YEAR: 1976
MODEL: Caprice
MILEAGE: 48,621
DELIVERY DATE: 11–21–75
DEMAND: Reimburse $681.00 for transmission repairs performed by independent transmission shop.
DIVISION OFFER: Division offered $268.99 "parts only" adjustment for owner "goodwill."
DECISION: The arbitrator ruled in favor of the Division.
AWARD TO CUSTOMER (Check one)
☐ No Award
☑ Award Equal to Divisional Offer
☐ Award Greater Than Divisional Offer

ARBITRATION—ZONE GUIDE

Please adhere strictly to the following procedures so that we may have accurate information concerning the impact of the Arbitration Program and the number of cases which reach the Better Business Bureau.

• Make a write-up sheet on every call or letter where the customer indicates his contact is a result of knowledge of the Arbitration Program. Existing zone complaint forms or other detailed complaint forms will suffice, but the top of the form should be clearly marked to identify it as having resulted from the Arbitration Program.

The form must contain the owner's name, address, and telephone number, details of the nature of the complaint, the complete action taken, and how it was concluded (either satisfied or dissatisfied).

• A separate and complete history file on all "Arbitration Program" cases should be maintained for whatever analyses may be desired.

• If the complaint is closed dissatisfied, and falls within the criteria of the Arbitration Program, the zone will write the owner a letter (sample provided). The letter offers the owner the option of arbitration if he desires to pursue the matter through the Better Business Bureau. If the final decision is given verbally to the customer, his options should be fully explained to him following the language and intent of the sample letter.

Judgment will be used in the mailing of this letter, but in general it should be used in any instance where the customer's complaint had any real substance to it; it should be used in any case of the type where a customer might consider litigation; and it should be used in any type of complaint where an owner might write to a legislator or a consumer agency. The letter need not be used in instances of minor disagreements, or where a partial adjustment has been agreed upon with the owner.

• When a customer is advised of the arbitration option, the zone should provide the local Better Business Bureau Office with a copy of the letter to the owner along with an explanation of the zone's position on the matter. This procedure should be periodically reviewed with the Better Business Bureau to determine its advisability. Bureau notification may be discontinued if it is ineffective or causing an undue burden on the Better Business Bureau Staff. The transmittal to the Bureau should include any pertinent zone write-up sheets and a full explanation of the zone's position. NOTE: It is imperative that the Better Business Bureau be provided sufficient detail of the zone's position so that they may adequately represent that position to the customer. This represents the zone's best and last opportunity to convince the customer of the strength of the zone's position, and permit the customer to evaluate the likelihood of his prevailing in an arbitration procedure.

It is the sincere intent of Divisional and Corporate management that the broadest possible interpretation be placed on the Arbitration guidelines, and that owners shall be advised by the zones of the availability of arbitration if the customer obviously is dissatisfied with the decision on his complaint.

It is also the intent of the program that owners shall be advised of the arbitration option even if he has not voluntarily raised the question of arbitration.

Obviously, every effort will be made to resolve every complaint satisfactorily and, in any event, the division's position should be stated so clearly and completely that the customer will be fully aware of our valid reasons for rejecting his claim.

ARBITRATION—GUIDE

Dealer and Customer Contract Personnel

This area has been selected for Third Party Arbitration which may prove vitally important to the future course of General Motors Consumer Relations. It is essential that the integrity of this program be maintained or the credibility of General Motors will suffer a more severe blow than any goodwill which might come from the program.

The people charged with the responsibility for contacting dealers and, especially customers, will be the most important factor in the success or failure of the program. Accordingly, it seemed appropriate to publish these guidelines for you.

LIMITATIONS ON ARBITRATION

This program will handle any complaint, regardless of the referral source, about any covered General Motors vehicle owned by a person residing in the area or involving a General Motors dealer located in the area. For the purpose of this program, the amount to be arbitrated may not exceed the amount of the sales or service transaction(s) that is (are) the subject of the dispute without the express approval of the General Motors Division.

GMC agrees to enter binding arbitration pursuant to BBB rules: 1) in all disputes arising out of written warranties on vehicles manufactured by GM, and 2) in all disputes involving issues of alleged manufacturer's responsibility on any GM vehicle. GM will encourage its dealers to arbitrate, but will not consider itself committed to arbitrate those disputes based only on dealer sales practices or consumer-pay services. However, in all other disputes in which GM's dealer or the vehicle owner asserts responsibility by the manufacturer, GM agrees to review these cases carefully and apply the broadest possible criteria for agreeing to arbitrate on a case-by-case basis.

It is especially important that no customer be drawn into a dispute between the zone and the dealer as to whose responsibility a problem may be, particularly if it involves a comeback on warranty work for which the division has previously paid the dealer. In any such instance, if a problem still exists, it is still the clear-cut obligation of the division. The customer must be taken care of with no discussion with him. If this requires the use of the facilities of another dealership, the fact remains that we have the obligation to the customer.

In the event of the allegation of fraud, or of a violation of law, or of a class action, or of a product liability involving personal injury or property damage, it should be explained to the customer (if he mentions arbitration) that the classifications are not eligible for arbitration.

If a customer expresses a desire to take a case to arbitration, do not attempt to discourage him except through your sincerest efforts at a prompt and satisfactory resolution of the complaint. If you feel you have exhausted every effort in this report, remember that only the zone manager has the authority to sign a dissatisfied closing. His knowledge of the complaint and his agreement with the action is all the more important in view of the arbitration program. Also, any cases which you are unable to satisfy on casual contacts with the customer at dealerships, should also be considered to be called to the zone manager's attention. These cases, too, may be eligible for arbitration.

CONSUMER LETTER

Attached is a sample of a letter to be used to advise of the Arbitration Program where a customer is not satisfied with the decision rendered by the zone office or representative and otherwise fits the parameters of the program.

If you are concluding a case with a customer, and you know he is dissatisfied, you should consider suggesting a third-party opinion to him. This is the essence of a third-party mechanism.

In that event, the diplomatic tone of voice and manner of the offer are of critical importance. If and when such an occasion arises, in a friendly manner we should express a sincere regret that we have been unable to come to a mutually satisfactory resolution of the complaint. Point out that we feel very sincerely that our position is a correct one, but he obviously feels the same about his position. Accordingly, and in the interest of making certain he has been treated fairly, we are willing to have an objective decision rendered by an unbiased third party. Point out that in addition to the normal options which a customer always has, the Better Business Bureau has agreed to mediate and, if necessary, arrange for arbitration of such disputes. Suggest that the customer can contact the Better Business Bureau if he wishes to pursue the matter. In every instance, the Better Business Bureau must be advised in accordance with the zone office procedural guidelines which have been issued.

For your guidance, the arbitration process should be offered in any instance where the complaint has any real substance to it; it should be offered in any case of the type where a customer might consider litigation; and it should be offered in any type of complaint where an owner might write to a legislator or a consumer agency. The offer would not be suggested in instances of minor disagreements, or where a partial adjustment has been agreed upon with the owner.

To reiterate, the success or failure, and therefore the credibility of the Corporation and your Division, will depend upon how this program is administered at the customer contact level. We know we can count on you to do your part.

Thank you.

PROPOSED CUSTOMER LETTER

(USE IN ANY CASE WHERE CUSTOMER HAS BEEN DENIED A CLAIM AND HAS NOT ACCEPTED A COMPROMISE OFFER.)

DEAR _____ _____

WE ARE SORRY THAT YOU HAVE CONTINUED TO BE DISSATISFIED WITH THE DECISION THAT WAS MADE CONCERNING YOUR _____.

WE KNOW THAT YOU ARE SINCERE IN THE POSITION YOU HAVE TAKEN, AND WE HOPE THAT YOU CAN ALSO UNDERSTAND OUR POINT OF VIEW AS IT RELATES TO THE MANUFACTURER'S OBLIGATION AND WE BELIEVE WE MADE A CORRECT DECISION IN YOUR CASE.

AS YOU PERHAPS KNOW, GENERAL MOTORS, THROUGH THE LOCAL BETTER BUSINESS BUREAU, PROVIDES A SERVICE OF VOLUNTARY MEDIATION/ARBITRATION FOR CONSUMER COMPLAINT DISAGREEMENTS. GENERAL MOTORS HAS COMMITTED ITSELF TO ACCEPT AND ABIDE BY DECISIONS MADE IN THIS ARBITRATION PROCESS.

THIS SERVICE IS AVAILABLE TO YOU IF YOU DESIRE IT. THERE IS NO FEE FOR THE CUSTOMER WHO WISHES TO HAVE A CLAIM CONSIDERED, AND THE MEDIATION AND ARBITRATION PROCESS IS NOT A LONG ONE.

IF YOU CARE TO AVAIL YOURSELF OF THIS SERVICE, CALL OR WRITE (NAME), AT THE (AREA) BETTER BUSINESS BUREAU OFFICE, (ADDRESS-PHONE NUMBER), YOU WILL BE FURNISHED WITH FULL DETAILS OF THE PROGRAM.

VERY TRULY YOURS,

(THE ZONE MAY ELECT TO FORWARD A COPY TO BBB WITH A SHORT STATEMENT OF THE NATURE OF THE COMPLAINT AND THE DIVISION'S POSITION, AFTER CONFERRING WITH BBB.)

Quotes—Observations

Following are some quotes from the various divisions and an impartial observer of the arbitration process. "The binding arbitration process in the Minneapolis Zone has given the consumer in the test area a better opportunity to get personal attention to his automotive grievance. In the many cases where arbitration was discussed as an available process, the complaint was concluded satisfactorily."

"In addition to the zone's report, we feel that the test indicates that although the owners have not always benefited financially, they are appreciative of the opportunity to be heard and have their complaints investigated in detail and reviewed by a third party."

"The last area I want to discuss is the attitude of the company as it was evidenced at this particular hearing.

Two instances come to mind which should adequately serve as illustrations. First, the company representatives failed to provide specific evidence requested by the arbitrator in advance of the hearing. Substitutions of other evidence were made, with no explanation of why they were made.

This action, in itself, was enough to give me the impression that the company had a rather condescending attitude toward this customer, this case, and this arbitrator. This attitude was confirmed at the hearing, in my opinion, when the arbitrator asked about this and was given an insufficient answer.

The second instance also occurred during the hearing. The company's representatives had prepared a file of their evidence and an outline of their testimony. Attractively packaged copies of this file were conspicuously handed to the arbitrator and the BBB observers, but not to the customer. "Evidentiary packages" such as this are useful, and are appreciated by the BBB staff as well as the arbitrators. Not providing a copy to the customer is, however, not only impolite, but hints again at an unwillingness to play fair. These packages typically contain nothing more than the bare outlines of the case, and I can see no reason to withhold this information from the customer. My point is underscored by the fact that when customer-complainants have prepared such files they have invariably given a copy to the company, as well as the arbitrator and the BBB.

In conclusion, this was a case the company should probably not have lost. In a similar case involving a different division, the company did in fact win; that is, the customer received no award on similar facts, and asking for similar relief. A variety of factors influence the arbitrator, however, and in this case, it appears that most of those factors influenced him in the customer's favor. While my observations and comments are highly subjective, I think they are accurate and may illustrate some of the possible reasons for the result in this case."

PREPARE—PREPARE—PREPARE

Make sure you have all of the information on the situation in question.

Don't take anything for granted. For example, if you previously inspected the car and found it beautiful, but the customer is now complaining again about the paint, don't rely on that earlier inspection. One of our divisions did that in Minneapolis and was absolutely shocked when they got to the hearing and, in the company of the arbitrator, made an inspection which they should have made when they were first advised of the complaint by the Better Business Bureau. The paint had deteriorated badly, and the arbitrator ordered a paint job so extensive that it cost the division over $1,500 to comply. If they hadn't been complacent, they might have corrected the paint to the customer's satisfaction far less expensively.

Don't rely on the dealer's word concerning the service history. Get out there and examine the dealer's records and documents yourself. Further, if the customer makes a statement concerning the service history which is not in agreement with what you have found in the dealer's records, ask the customer for the additional documentation because, you should tell him, this will help you to evaluate the problem and do everything you can to help him. He may well have some documentation that is not in the dealer's records.

Both of the above comments are designed to help you prevent walking into any surprises at the arbitration hearing.

But strike a balance. You must be careful in going into an arbitration hearing that you don't overwhelm everybody with factory expertise, documentation, and jargon.

Be liberal in your interpretation of the parameters of the program. You do have the opportunity to examine the proposed issues to be brought up at the hearing. At that time you can point out any areas which are beyond our parameters, if you so wish, and have an understanding that those particular issues are not subject to arbitration. Again,

VOL 48 ISS 90 MY 9 1983 UMI

however, don't be too hard to get along with in that regard.

One final word: Whatever the decision, no matter how wrong you may think it is, accept it graciously. Conclude every hearing on the friendliest posible basis. Indicate to the customer that regardless of the decision, we still value him or her as a customer.

As stated earlier, don't hesitate to bring the dealer or a dealer representative to the hearing if you think it will help the arbitrator to evaluate the situation properly. Bring with you whatever backup documents or information may be appropriate. Be sure to bring copies for everyone who will be invovled in the hearing. Don't overwhelm them with technical material, such as shop manuals, and so on. But bring simple, clear, informational things that will help everyone to decide the issues fairly.

We urge you to keep a record of the time you spend on these cases. It will be important in our overall evaluation of the program.

We will ask each zone for a monthly report on the activity. A copy of the report form will be given to you, along with instructions for completing it. It is very simple and will require a minimal amount of your time.

As soon as you know that a case is probably going to arbitration, send a copy directly to the consumer relations manager at your home office and a copy to the director, GM consumer relations.

General motors will agree to arbitrate any instance of a dispute with a customer with respect to the application, administration, or interpretation of our new vehicle warranty. We will also cover disputes or questions concerning alleged manufacturer's responsibility of GM vehicles beyond the new vehicle warranty period; however, this in no way alters our standard new vehicle warranty.

General Motors will not be committed to arbitrate complaints arising out of retail transactions between the dealer and his customer.

Let's take an example where someone has gone to an independent shop and had work performed and then asks us to pay the bill. Undoubtedly the car will have been beyond warranty or the customer would have gone to an authorized dealership, as required under the warranty. Since customers are aware that they must present their cars to an authorized dealer for warranty service, they would certainly expect to follow that same procedure if they expect any kind of consideration after the warranty expired. We did not have an opportunity to determine whether or not we actually had responsibility in this case. We didn't know the extent of our responsibility, if there was any at all. We never try to evade our responsibility, but before someone asks us to assume that responsibility we do ask the opportunity to evaluate it. I'm sure you can think of even better approaches, but above all, be logical, be friendly, and be very sincere in indicating that our only desire is to be helpful and to be fair.

Don't talk down to anybody. Don't be condescending.

Be just as friendly and human and helpful as it is possible to be. Remember, the arbitrator is human, just as is the customer.

Do's and Don'ts

DO NOT USE THE ARBITRATOR'S FIRST NAME, THIS GIVES THE CUSTOMER THE IMPRESSION THAT HE HAS ENTERED A "KANGAROO COURT."

IF THE ARBITRATOR ASKS FOR SOME INFORMATION IN ADVANCE, GIVE IT TO HIM UNHESITATINGLY. REMEMBER, HE IS MERELY TRYING TO COME TO A FAIR DECISION. IF, FOR EXAMPLE, HE ASKS WHAT A CAR IS WORTH (SUCH AS WHERE THE CUSTOMER HAS ASKED FOR A REPURCHASE OF THE CAR) DO YOUR BEST TO PROVIDE HIM WITH THE BEST CURRENT WHOLESALE AND RETAIL PRICES. ONE OF OUR DIVISIONS MADE THE MISTAKE OF GIVING THE ARBITRATOR THE LOWEST WHOLESALE PRICE IN RESPONSE TO SUCH A REQUEST. AND THAT, AMONG SEVERAL OTHER ITEMS, PROBABLY HELPED INFLUENCE THE ARBITRATOR TO A VERY ADVERSE DECISION FOR THE DIVISION.

IF YOU HAVE INSPECTED THE CAR AND ROAD TESTED IT, AND IF YOU ARE SATISFIED THAT THE CAR WOULD BE ACCEPTABLE TO ANY REASONABLE PERSON, URGE VERY STRONGLY THAT YOU WOULD LIKE THE ARBITRATOR TO LOOK AT THE CAR, IF IT'S A PAINT OR APPEARANCE COMPLAINT. IF IT'S A PERFORMANCE COMPLAINT OF ANY KIND, STRONGLY INVITE THE ARBITRATOR TO GO FOR A RIDE IN THE CAR ON THE GROUNDS THAT THIS IS REALLY THE ONLY WAY FOR ALL OF US TO HAVE A CLEAR UNDERSTANDING AS TO WHETHER OR NOT THE CAR IS ACCEPTABLE.

IF YOU KNOW THERE ARE SOME SHORTCOMINGS, BE PERFECTLY HONEST ABOUT THEM; BUT VERY CANDIDLY DESCRIBE PRECISELY WHAT YOU ARE WILLING TO DO TO HELP RESOLVE THE MATTER, OR DESCRIBE VERY FULLY WHY YOU ARE NOT PREPARED TO DO ANYTHING IF YOU FEEL THE PROBLEM IS ENTIRELY THE CUSTOMER'S RESPONSIBILITY.

DO'S AND DON'TS OF THE ARBITRATION PROCESS

DO'S

1) Be prepared. Keep your cool.

2) Be a good listener to plaintiff and arbitrator. Take notes.

3) When asked to present our case, be brief and concise as to our position.

4) Be sure you have a warranty folder and Owner's Manual.

5) Be sure that you ask owner if he has received a warranty folder and understands it.

6) When the owner is complaining of a paint or appearance item, be sure arbitrator is willing to inspect the vehicle with the owner.

7) Water leak—take the car through a car wash.

8) Driveability case—have the owner drive it with the arbitrator and a divisional representative.

9) Gas mileage—prior to arbitration, make sure that a gas-per-mile test has been performed with the dealer personnel and the owner. Also, make sure that a report has been made out and the owner verifies this.

10) Independent repairs—if no opportunity has beeen made for a divisional inspection of the vehicle, bring up the fact that under the terms of the warranty, the division should have been able to make an inspection.

11) If owner claims he properly maintained vehicle, ask owner to provide proof of such maintenance.

12) It is important that the full service file be available and reviewed by zone.

13) Establish position on any adjustment based on complete knowledge of probable cause of failure.

14) Prepare case carefully to prevent surprises during the hearing. Customers are usually well prepared.

15) Establish a rapport with customer prior to the hearing so that the best possible feelings can be realized after conclusion of the hearing—win or lose.

16) Be positive, friendly, and confident about your case and the position you have taken.

17) If appropriate, the service manager of each dealership involved should attend the hearing.

18) Discuss each case eligible for arbitration with other member(s) of zone staff in order to get different viewpoints.

19) Do contemplate any possible objections and have answers ready.

20) Do be factual and concise in your presentation.

21) Do be sure the issues of the arbitration are clearly stated in the agreement. These issues are all the arbitrator is empowered to act upon.

22) Do contact the dealer in arbitration if the complaint on the vehicle is relative to poor dealer workmanship.

23) Reinspect all complaint vehicles immediately before the arbitration day.

24) Be sure to persuade the customer you are sincerely interested in solving his service problem.

25) If customer has a bonafide service problem, clear it up without going to arbitration.

26) Ask the customer early in the handling for his/her experiences with the vehicle including copies of repair orders, etc.

27) Include the consumer in the results of evaluations, tests, and inspections performed.

18) Provide copies of evidence or supporting material to all parties involved in an arbitration hearing, including the customer.

29) Evaluate your position from the viewpoint of the consumer and other observers

30) Provide exactly the material, answers, or information requested by the arbitrator or provide a complete explanation for all diversions from those requests.

31) Provide alternate solutions to the problem—as many as possible.

32) Provide all available support for the specific areas of contradiction.

33) Offer demonstrations to support your position.

34) Try to resolve the difference, not to "win the case."

DON'TS

1) Don't appear to be angry.

2) Don't argue with owner or arbitrator.

3) Don't interrupt owner on arbitrator when either is talking.

4) Don't get caught with doubtful issues (appearance or performance problems).

5) Don't be doubtful, uncertain, or tentative.

6) Don't leave doubt in anyone's mind on technical questions that must be understood in layman's language.

7) Don't hurry your presentation or introduce key facts until appropriate time.

8) Don't let a case get to arbitration unless you are 100 percent sure that all possible steps have been taken to satisfy the customer. Remember, these arbitrators know nothing of the automobile business other than what they have read, heard, or experienced.

9) Don't try to overpower the hearing with unnecessary personnel.

10) Don't leave any questions or complaints by the owner unanswered.

11) Don't let your customer think you are not sincerely interested in handling his service problem even when you are taking it to arbitration.

12) Don't go to arbitration unprepared.

13) Don't assume that one arbitration finding sets a precedent.

14) Don't assume a position that would reflect insincerity or the attitude that we are absolute.

15) Don't assume that everyone knows the facts that we take for granted.

16) Don't forget that the intent and reason for arbitration is consumer satisfaction.

17) Don't think of the arbitration process as a win-lose proposition.

18) Don't assume a position based on someone else's opinion.

Attachment B—Special Implementing Provisions To Be Included in General Motors Zone Handbook for Third-Party Arbitration

1. Zone Handbook, Page 8, *et seq.*

SPECIAL GENERAL MOTORS PROVISIONS

• A dissatisfied customer with a complaint claiming General Motors responsbility for defects, problems, failures or malfunctions relating to powertrain components must be advised of the arbitration option even if the customer has not raised the question of arbitration or has not contacted the Customer Services Representative for the vehicle's division.

• The notice *must* be in writing (see example letter at page —).

• Powertrain components, for purposes of arbitration, are:

1. *Gasoline and diesel engines.* Cylinder blocks and heads, and all internal parts, including camshafts and lifters, manifolds, timing gears, timing gear chains or belts and covers, flywheels, harmonic balance, valve covers, oil pans, oil pumps, engine mounts, seals and gaskets, water pumps and fuel pumps, and diesel injection pumps; also, turbocharger housing and internal parts, turbocharger valves, seals and gaskets.

2. *Transmissions.* Cases and all internal parts, torque converters, vacuum modulators, seals and gaskets, and transmission mounts; also, transfer cases and all internal parts, seals and gaskets.

• If the customer complaint may involve, or if the customer states that the complaint involves one or more of the following components manufactured (through the date the Commission accepts this agreement pursuant to Section 3.25(f) of the Commission's Rules of Practice): (1) THM 200 automatic transmissions; (2) camshafts or lifters in 305 or 350 cubic-inch-displacement ("CID") gasoline engines produced in plants operated by General Motors Chevrolet Division since 1974; or (3) fuel injection pumps or fuel injectors in 350 CID diesel engines produced in plants operated by General Motors Oldsmobile Division, the following special provisions must be followed:

—The General Motors Arbitration Program is ordinarily limited to owners who still possess the General Motors car which had a mechanical problem or failure. However, when the complaint involves one of the components identified in this paragraph, customers must be given the opportunity to arbitrate their disputes even if they no longer possess the car.

—Under typical Better Business Bureau procedures, the BBB usually gives the General Motors zone representative an opportunity to cross off unacceptable names from the list of possible arbitrators. If the appropriate zone representative has knowledge that any of the arbitrators have heard three or more disputes involving any of the components identified in this paragraph, the zone representative must cross off such arbitrators names from the list.

—At the time the customer elects to arbitrate, the Zone must provide the customer with one or more (as appropriate) of the following Background Statements:

BACKGROUND STATEMENT

THM 200 TRANSMISSIONS

NOTICE TO OWNERS: You may wish to provide this Background Statement to the Arbitrator at the time of your hearing.

This arbitration case may involve an owner's complaint about a General Motors THM 200 transmission. As part of the settlement of their dispute involving THM 200 Transmissions, General Motors and the Federal Trade Commission have prepared this information sheet to provide arbitrators with potentially useful background facts about THM 200 transmissions. Some of these facts may not be widely known.

2. *Transmissions.* Cases and all internal parts, torque converters, vacuum modulators, seals and gaskets, and transmission mounts; also, transfer cases and all internal parts, seals and gaskets.

• If the customer complaint may involve, or if the customer states that the complaint involves one or more of the following components manufactured (through the date the Commission accepts this agreement pursuant to Section 3.25(f) of the Commission's Rules of Practice): (1) THM 200 automatic transmissions; (2) camshafts or lifters in 305 or 350 cubic-inch-displacement ("CID") gasoline engines produced in plants operated by General Motors Chevrolet Division since 1974; or (3) fuel injection pumps or fuel injectors in 350 CID diesel engines produced in plants operated by General Motors Oldsmobile Division, the following special provisions must be followed:

—The General Motors Arbitration Program is ordinarily limited to owners who still possess the General Motors car which had a mechanical problem or failure. However, when the complaint involves one of the components identified in this paragraph, customers must be given the opportunity to arbitrate their disputes even if they no longer possess the car.

—Under typical Better Business Bureau procedures, the BBB usually gives the General Motors zone representative an opportunity to cross off unacceptable names from the list of possible arbitrators. If the appropriate zone representative has knowledge that any of the arbitrators have heard

Arbitration is appropriate to resolve complaints about THM 200 transmissions because, while some complaints are similar, each case is by its nature individual and must be resolved on its own merits.

To assist arbitrators who may be considering an owner's complaint about a THM 200 transmission, General Motors and the Federal Trade Commission are providing the following compilation of facts. These may or may not be relevant to the dispute in a particular case.

1. Automatic transmissions are complex devices comprised of hundreds of inter-related parts—THM 200 models have over 600 parts. An automatic transmission transmits and multiplies the turning force of the engine in order to drive the vehicle. It automatically changes gears for the driver at different speeds and under different conditions.

2. Transmissions designated "THM 200" comprise one series of automatic transmissions from a broad line of General Motors automatic transmissions. Each series, including the THM 200 series, has a number of different models, and each model is specifically designed for a particular vehicle, engine, and drive axle match-up.

3. The THM 200 series has been used in a wide variety of different car lines since the 1976 model year. It has only been used in rear-wheel-drive vehicles. One way to determine whether a particular vehicle is equipped with a THM 200 transmission is to examine the transmission oil pan. The word "metric" appears on the oil pans of vehicles equipped with the THM 200.

4. Development of the THM 200 series began in the early 1970's. By late 1973, prototypes were undergoing vehicle testing in 5,200-pound cars with 350-cubic-inch V8 engines. Careful and thorough testing of the THM 200 series continued not just until the time of its introduction midway through the 1976 model year, but, in line with General Motor's usual practice, continued thereafter and continues today.

5. THM 200 transmissions are mass-produced. Where a product is being mass-produced, it is possible that from time to time a particular item may be completed and yet

contain a defect in material or workmanship. Recognizing this fact about mass production, General Motors provides a limited warranty with each new General Motors vehicle sold by one of its dealers. The warranty generally covers any repair and needed adjustments to correct defects in material and workmanship within the warranty period. However, complaints may occur after the warranty. A manufacturer's warranty is not necessarily the limit of the manufacturer's responsibility, and need not control the outcome of arbitration.

8. Normally, it is reasonable to expect General Motors automatic transmissions to provide reliable, dependable service beyond the warranty period. Many transmissions do not require replacement during the life of the car.

7. Failures in THM 200 transmissions can occur for several reasons. These failures can be related to defects in material or workmanship which do not evidence themselves during the manufacturer's warranty period. They can also be related to individual driving habits or improper maintenance. The manufacturer spells out in the owner's manual proper maintenance procedures, and discloses driving habits which should be avoided. The owner's manual for each model car can differ. To determine the proper maintenance procedures or driving habits, you must look at the specific manual or maintenance schedule for the vehicle which is the subject of this arbitration.

BACKGROUND STATEMENT

CAMSHAFTS AND LIFTERS

NOTICE TO OWNERS: You may wish to provide this Background Statement to the Arbitrator at the time of your hearing.

This arbitration case may involve a complaint about the camshaft and/or lifters in a General Motors 305 or 350 CID gasoline engine produced in plants operated by the Chevrolet Division since 1974. As part of the settlement of their dispute involving camshafts and lifters in these engines, General Motors and the Federal Trade Commission have prepared this information sheet to provide potentially useful background facts. Some of these facts may not be widely known.

Arbitration is appropriate to resolve complaints about camshafts and lifters because, while some complaints are similar, each case is by its nature individual and must be resolved on its own merits.

To assist arbitrators who may be considering an owner's complaint about camshafts and lifters in these 305 or 350 CID engines, General Motors and the Federal Trade Commission are providing the following compilation of facts. These may or may not be relevant to the dispute in a particular case.

1. In a four-cycle internal combustion engine, the camshaft and accompanying lifters (sixteen in an eight-cylinder engine) mechanically operate a series of valves which allow a gasoline and air mixture to enter, and exhaust gases to be forced out of, the engine cyclinders.

2. Since 1974, these 305 and 350 CID gasoline engines have been used in a wide variety of different General Motors car and truck lines and models.

3. These engines are mass-produced. When a product is mass-produced, it is possible that from time to time a particular item may be completed and yet contain a defect in material or workmanship. Recognizing this fact about mass production, General Motors provided a limited warranty with each new General Motors vehicle sold by one of its dealers. The warranty generally covers any repair and needed adjustments to correct defects in materials and workmanship within the warranty period. However, complaints may occur after the warranty. A manufacturer's warranty is not necessarily the limit of the manufacturer's responsibility, and need not control the outcome of arbitration.

4. It is reasonable to expect camshafts and lifters in these engines to provide reliable, dependable service beyond the warranty period; they can and often do last for many years. However, in order to maintain the life of camshafts and lifters and to prevent excessive wear, they must be properly lubricated at all times; the engine oil must be maintained at the proper level; the oil and filter must be changed in accordance with the owner's manual and maintenance schedule recommendations; and the proper engine oil must be used.

5. One important part of choosing oil for lubrication is to use oil of the categories or ratings recommended by the manufacturer in the owner's manual and maintenance schedule. Oils have various categories or ratings. Oils for gasoline engines are designated SA, SB, SC, SD, SE, or SF. Oils for diesel engines are designated CA, CB, CC, or CD. An oil can be assigned more than one category if it will work in more than one kind of engine—for example, "SE/CD" or "SF/CD." These are called "multi-purpose" oils.

6. Some, but not all, "multi-purpose" oils produced prior to the 1981 model year may have provided inadequate wear protection for some gasoline engines, including these 305 and 350 CID engines. This may have caused excessive wear of camshafts or lifters, even if the owners followed the recommendations in their owner's manuals. For the most part, these "multi-purpose" oils were available only in bulk quantities sold in drums; however, some were also available in quart-size cans from a small number of service stations and retail outlets. Most service stations offered only oils with satisfactory lubrication characteristics.

7. General Motors was aware of this problem and throughout the mid- and late 1970's tried to persuade oil companies to reformulate these oils in order to eliminate excessive wear problems. These efforts succeeded in numerous cases. However, not all of the oils which had been causing problems were reformulated, and some owners continued to experience excessive camshaft/lifter wear using these oils. General Motors therefore changed the owner's manuals in the late 1980 model year to tell owners to avoid certain categories of "multi-purpose" oils that might cause excessive wear. By the 1981 model year, with the introduction of the SF oil category, the "multi-purpose" oils that had caused excessive wear were no longer produced.

Background Statement

Diesel Fuel Injection Systems

NOTICE TO OWNERS: You may wish to provide this Background Statement to the Arbitrator at the time of your hearing.

This arbitration case may involve an owner's complaint about the fuel injection system in a 350 CID diesel engine produced in a plant operated by the Oldsmobile Division. As part of the settlement of their dispute involving these engines, General Motors and the Federal Trade Commission have prepared this information sheet to provide potentially useful background facts. Some of these facts may not be widely known.

Arbitration is appropriate to resolve complaints about diesel fuel injection systems because, while some complaints are similar, each case is by its nature individual and must be resolved on its own merits.

To assist arbitrators who may be considering an owner's complaint about the fuel injection system in 350 diesel engines, General Motors and the Federal Trade Commission are providing the following compilation of facts. These may or may not be relevant to the dispute in a particular case.

1. In diesel engines, fuel is injected directly into the cylinders instead of being first mixed with air in a carburetor as it is in many gasoline engines. Diesel engines use a high-pressure fuel injection pump to inject fuel through nozzles called "injectors." The fuel injection system injects controlled amounts of fuel into the engine's cylinders.

2. Beginning in the 1978 model year, this diesel engine has been used in a wide variety of different General Motors car lines and models.

3. Development of the 350 diesel engine began in the early 1970's. Like many complex automotive products, 350 diesel engines have undergone a number of product improvements and changes throughout its use.

4. These 350 diesel engines are mass-produced. When a product is mass-produced it is possible that from time to time a particular item may be completed and yet contain a defect in material or workmanship. Recognizing this fact about mass production, General Motors provides a limited warranty with each new General Motors vehicle sold by one of its dealers. The warranty generally covers any repair and needed adjustments to correct defects in material and workmanship within the warranty period. However, complaints may occur after the warranty period. A manufacturer's warranty is not necessarily the limit of the manufacturer's responsibility, and need not control the outcome of the arbitration.

5. Excessive amounts of water contamination can damage the fuel injection pump and fuel injectors. For this reason, diesel fuel systems usually are designed to reduce the likelihood of engine damage caused by water contamination. The 350 diesel engine was originally designed to avoid this risk unless more than 1 to 2 gallons of water (depending on the shape of the fuel tank on the various vehicle models) was present in the fuel tank.

6. In 1979, General Motors became aware that some owners were unknowingly purchasing water-contaminated diesel fuel which caused problems with the fuel injection systems in certain 350 diesel engines. By August 1979, General Motors had determined that deterioration of the governor weight retainer ring, a part of the diesel fuel injection pump, could occur in some diesel engines.

7. In July 1980, General Motors offered to make repairs without charge, needed as a result of deterioration of governor weight retainer rings up to 5 years or 50,000 miles, whichever occurred first, and offered reimbursement for past repairs due to water contamination (owners were informed that they could make claims for reimbursement until October 1, 1980). To protect against water contamination, General Motors offered to install a water detector kit for $50.00, the price charged to purchasers of new vehicles equipped with the detector. This detector indicates to the driver when there is an excessive amount of water in the fuel tank. It includes several additional features. It increased the water separation capacity of the fuel system to about 4 to 7 gallons and also made it easier to remove water from the fuel tank. General Motors sent letters to owners explaining the steps it was taking. However, as with any such mailing, some owners may not have received this letter.

8. It is the customer's option whether the arbitration decision is to be based on written, in-person, or telephone submissions. General Motors may appear only in the manner selected by the customer. When in-person submissions are made, General Motors may be represented by no more than two (2) persons, not counting non-party witnesses. Arbitration may also be conducted by conference telephone calls (at General Motors expense), if the consumer elects.

2. *Zone Handbook, Page 19*

- A dissatisfied owner with a complaint involving one or more "powertrain components" must be advised of the arbitration option even if he has not raised the question of arbitration. The advice in these cases must be by letter (sample provided). See Page B-1 through B-8 (Addendum to Page 8) for more detailed discussion.

3. *Zone Handbook, Page 23*

- It must be offered in cases where powertrain components are involved. See page B-1 (Addendum to Page 8).

COUNCIL OF BETTER BUSINESS BUREAUS, INC.
THE INTERNATIONAL ASSOCIATION OF BETTER BUSINESS BUREAUS

As the owner of a General Motors car, your continued satisfaction and goodwill are important to us. So, in the event of any problem with the sales transaction or the operation of your vehicle, a simple three-step procedure has been established to aid in resolving misunderstandings.

STEP ONE —

Discuss your problem with your dealership's management — the Sales or Service Manager, the owner of the dealership or the General Manager.

STEP TWO —

If your problem remains unresolved, contact the Customer Services Department of your vehicle's nearest Zone Office (found in your Owner's Manual) and provide them with the necessary information. They in return will furnish you with their recommendations.

STEP THREE —

If all else fails, contact the Customer Services Representative for your vehicle's division (found in your Owner's Manual). In Canada, contact the Customer Service Representative, General Motors of Canada Limited, Oshawa, Ontario, L1J 5Z6, *Telephone:* 416-644-6624.

If, in your opinion, your problem has still not been resolved, there is an additional step, explained later in this booklet, called Third Party Arbitration which can be pursued.

The BBB National Consumer Arbitration Program

Since its National Consumer Arbitration Program was announced in 1972, Better Business Bureaus have instituted this process in more than 100 major metropolitan areas. Thousands of disputes each year are being arbitrated and more than 5,000 community volunteers serve as arbitrators.

Business has recognized the worth of this dispute resolution system. Large numbers of small and large businesses are pledging to arbitrate consumer disputes through the BBB system. The automotive industry and the construction industry – both involved in disputes that entail large sums of money – are more involved in the process than most, but virtually all types of marketplace disputes are being arbitrated by the BBB's.

Government is also recognizing the value of this private sector mechanism for dealing with issues which can best be resolved in a fast, fair and flexible process like BBB arbitration. Increasingly the Federal Trade Commission, state attorneys general, as well as local district attorneys and judges, are writing BBB arbitration into consent orders or are referring disputes on a case-by-case basis to the BBB.

Of course, none of this would be possible without an ever increasing pool of community volunteers to serve as arbitrators. We applaud these citizens for their public service.

Warren E. Burger, Chief Justice of the United States Supreme Court, put programs like BBB arbitration into perspective when he said:

"The notion that most people want black-robed judges, well dressed lawyers and fine paneled courtrooms as the setting to resolve their dispute is not correct. People with problems, like people with pains, want relief, and they want it as quickly and inexpensively as possible.

"The harsh truth is that if we do not devise substitutes for the courtroom processes, and do not do it rather quickly, we may well be on our way to a society overrun by lawyers...brigades of judges in numbers never before contemplated."

VOL 48 ISS 90 MAY 9 1983 UMI

WHAT IS CONSUMER ARBITRATION?

Arbitration is a legal process in which two or more people agree to permit a third person to make a final decision in a dispute between them.

Consumer arbitration is a procedure set up by Better Business Bureaus to settle consumer-business disputes informally, privately and fingly. If all efforts to resolve complaints about products or services fail the Better Business Bureau may offer the legally binding process to the business and its customer. When both **voluntarily** agree to arbitrate the dispute, the BBB will ask them to sign a contract which permits a community volunteer, acceptable to the business and the customer, to conduct a fact-finding hearing and make a final decision in the matter.

The basic principles of BBB arbitration -

- Strictly **voluntary**
- Used only when **all informal efforts** to resolve disputes **have failed**
- A **broad-based pool of trained volunteer arbitrators** from the local community
- Arbitrators chosen by a **mutual selection** process
- Private hearings with **confidential** results
- Hearings held at **convenience of all**
- Informal procedures with **no formal rules** of evidence so everyone can present his own case
- Availability of product or on-site inspection or a technical **expert if necessary**
- **Consistent with state law**

WHAT ARE THE STEPS IN BBB ARBITRATION?

THE COMPLAINT

First, the customer should complain to the business. Only if this fails to satisfy should the customer come to the Better Business Bureau.

THE MEDIATION STAGE

The BBB will get the facts as seen by the customer and then seek the business response to the complaint. If informal efforts to mediate the dispute fail, arbitration is offered.

AGREEMENT TO ARBITRATE

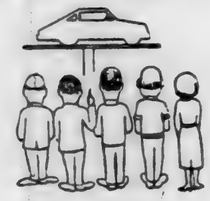
The business and its customer sign an agreement that describes the issues being disputed. They then become the "parties" to arbitration.

CHOOSING AN ARBITRATOR

Although state law and BBB policies offer various means of choosing arbitrators, normally the parties are given a list of five trained community volunteers together with a brief biography of each. They are asked to cross off any unacceptable arbitrator and to indicate their priorities ("1," "2," "3," etc.) for the remaining names. The highest overlapping priority choice of all parties usually becomes the arbitrator.

INSPECTIONS AND EXPERTS

If necessary, an inspection of the product or service performed will be conducted by the arbitrator, and the BBB will attempt to provide technical expertise if needed by the arbitrator.



THE HEARING

Informal proceedings are conducted by the arbitrator. Parties may be represented, bring witnesses and give any supporting evidence.

THE DECISION

After hearing all the facts, the arbitrator has ten days to make a written decision. This decision may not go beyond the limits of the original issues stated in the arbitration agreement. It may require action by one or more parties. It may require the payment of money. It may reject the customer's complaint completely, or it may be a "split" decision which recognizes a part of the customer's claim (and a part of the company's claim).

WHEN IS ARBITRATION OFFERED?

If all mediation efforts fail to settle a dispute the BBB may offer arbitration, or one of the parties may initiate a request for arbitration. Many businesses have pledged in advance to arbitrate any dispute which cannot be otherwise resolved, and the decision to arbitrate then becomes their customer's choice.

While the great majority of consumer-business disputes may be resolved by arbitration, it is important to note that some issues lie outside the scope of the arbitration program. Generally, these include claims that go beyond the actual value of the product or service in dispute, such as a demand for consequential or punitive damages by the consumer. For example, an arbitrator may hear a case involving the premature failure of an automobile's transmission. If, however, that failure caused the driver to miss a plane connection, which in turn prevented his completing an important deal, a demand for such losses could only be dealt with in a court of law.

Other issues which cannot be arbitrated include personal injury and property damage claims, allegations of fraud or other violations of criminal law, and any other issue which may not be arbitrated under state law.

WHEN IS IT BETTER TO GO TO COURT?

Certainly, when the issue involves alleged punitive or consequential damages that would not be arbitrated by the BBB, the customer may find a court the only alternative. Also, the customer who seeks to set a precedent for other consumers is better off in a court of record because an arbitration resolves only the issues in the case at hand and establishes no precedent at all. And certain federal or state laws passed to help the consumer make a claim could be more advantageous.

Balanced against these considerations are the disadvantages inherent in many courts: overcrowded dockets could result in delays, attorneys may be required, strict rules of evidence may be applied, and the dispute will be aired in public. Arbitration is usually faster. It does not require (although it permits) attorney representation. It has no formal rules of evidence, and it is conducted in private.

WHO ARE THE ARBITRATORS?

Thousands of volunteers from all walks of life serve the BBB as arbitrators. They include professionals, educators, retirees, lawyers, housewives, and others. Most of these volunteers have gone through a special training program. Arbitrators are not paid for their

VOL 48 ISS 90 MAY 9 1983 UMI

services: they perform their duties as a public service and are not employed by the BBB. All arbitrators are required to disclose, as a condition of hearing a case, any financial, commercial, professional, social or familial relationship – no matter how remote – with any of the parties or their counsel.

HOW IS THE ARBITRATOR CHOSEN?

A list of five possible arbitrators, with brief biographies of each, is sent to the parties. Each party may cross off any person considered unacceptable and assign a priority to those remaining. The highest common priority choice of the parties usually will be the arbitrator and no person rejected by either party will serve. In some cases the Bureau may take the first choice of each party, with these two persons choosing a third from the pool of volunteer arbitrators. This third person will then chair the panel of three and a decision will be by majority vote. Because of state law requirements or Bureau policy in some areas the selection method may vary somewhat, but in all areas the parties are given a choice of arbitrators.

WHAT DOES ARBITRATION COST?

The administrative costs of arbitration are underwritten by the Better Business Bureau, which is supported by the business community. The parties must pay for their own witnesses and attorney's fees, if any. If any one wants a transcript of the proceedings, this too must be paid by the requesting party.

WHEN AND WHERE WILL THE ARBITRATION BE HELD?

Whenever possible an arbitration hearing is held at a time and place convenient to the parties and the arbitrator. Arbitrations have been held at various times and places, including the job site in dispute and in private homes.

WHAT IS A "TYPICAL" ARBITRATION?

Of course, there is no such thing as a "typical" arbitration, just as it is impossible to locate the "average" man. But here's an actual arbitration case that shows many elements of the arbitration process:

The dispute began in the driveway of the consumer's home when the consumer noticed a flat left rear tire on her year-old domestic compact car. After jacking up the rear of the car with the factory-supplied bumper jack, she removed the flat tire and prepared to replace it with the spare. At this point, however, the tab on the jack that fit into the bumper slot broke off and the car fell, causing considerable damage to the bumper.

The field representative for the manufacturer met the consumer at the dealership and inspected the damage. He found no evidence that either the bumper or the jack had been defective and concluded that the car must have moved, causing stress on the jack. He, therefore, denied the owner's claim.

After mediation by the BBB failed to break the impasse, arbitration was offered. Both parties agreed to arbitrate and a hearing was scheduled.

At the hearing the consumer described the events leading to the incident, stressing that she had read on the printed instruction inside the car's trunk. The field representative agreed that she had used the jack properly but, quoting from an owner's manual, contended that her failure to chock the wheels as stated in the manual caused the car to move and the subsequent damage to occur. The consumer countered that the printed instruction in the trunk did not include chocking the wheels, so she had not done so.

The arbitrator then suggested that they take a look at the instructions in question. The hearing moved from the BBB office to the parking lot. The arbitrator opened the trunk and read the instructions. Finding no instructions to chock the wheels, he found in the consumer's favor and awarded her the requested remedy: a new bumper installed by the dealer and a new jack, the costs to be borne by the manufacturer.

This was a relatively easy case. The field representative's problem was that he relied on the most recent owner's manual and assumed (incorrectly) that the instructions had not changed between model years. Had he not made this assumption, there would have been no arbitration. But the dispute did exist and was resolved by arbitration. The ability of an arbitrator, as opposed to a judge, to simply "go out and look at the car" was instrumental in arriving at a clear and fair decision.

WHEN ARE INSPECTIONS AND EXPERTS INVOLVED?

Sometimes to get a full understanding of the facts, especially where the quality of workmanship is at issue, the arbitrator must actually see the product or work involved. Both parties may be present for any inspection and both parties have a right to bring their own experts if they wish. The BBB has identified volunteer experts in the community to serve as technical advisers to arbitrators. Should the arbitrator request such an expert, the Bureau will seek to obtain one who has no relationship with any party and is not a potential competitor of the business involved in the arbitration.

HOW DO YOU PREPARE FOR AN ARBITRATION?

If you have agreed to enter into a binding arbitration agreement through the BBB, in effect you have chosen this process instead of going to court.

First, you will receive by mail an arbitration agreement form to sign and return to the BBB. Read it carefully to be sure it accurately describes what the dispute is and what you are seeking in the way of a decision from the arbitrator. If you think it is not accurate, call the BBB and ask to have the agreement changed. Sign it only when you agree with it, because it is a legal document.

At the same time you may receive a list of five arbitrators with brief biographical sketches. Cross off any names that seem totally unacceptable and assign your priority to those remaining on the list. (This selection process may vary somewhat depending on state law and Bureau policies.)

Return the agreement and your arbitrator choices to the BBB, along with an indication of the most convenient times for you to attend a hearing or the times when you will not be available.

The BBB will tell you when and where the hearing is to be held. You have a right to be represented by a lawyer, but the BBB should be told as soon as possible if you plan to be represented so the other side can be notified of this fact. Of course, you have the right to represent yourself or even have a non-lawyer act as your spokesman.

At no time may you or your representative contact the arbitrator without the other party being present. All correspondence relating to the arbitration must be directed through the BBB, which will forward all information and make sure the other side gets copies when necessary.

The actual hearing is an informal session without rigid rules of evidence, and it is designed to ensure that everyone gets the fullest opportunity to describe his side of a dispute. You have the opportunity to attend the hearing or to submit your case in writing if time or distance prevents your attendance. Some Bureaus have also set up systems by which disputes can be arbitrated over the telephone.

Most people, however, find that it is in their interest to come to the hearing if possible. If you do, you should prepare an outline of your argument to help you in your presentation. That way you won't forget important points in your favor.

After you state the facts as you see them, the other side has a right to ask you questions. You have the same right. The arbitrator is trained to ask questions, too, if there still are some uncertain areas to be covered for a full understanding of the dispute.

Prepare a list of questions you want to ask the other side before you come to the hearing. And add to your list any new questions that occur when you hear what their statement is.

After each side has presented its case, be prepared to give a summary of your position. Describe the weak points in the other side's case, deal with any questions that have not otherwise been answered, and tell the arbitrator exactly what kind of decision you want and why.

Remember that the sole purpose of the hearing is to allow the arbitrator to gather and sort out the facts and thus make a fair decision. You should be prepared to prove that your position is right and that your opponent's is wrong. But a friendly, sincere approach works best. You are there because you and the other side have a disagreement, but keep that disagreement factual and within the bounds of normal courtesy and conventional language. Bombarding an arbitrator with technical jargon will not be productive, nor is rudeness, arguing with the arbitrator, or belittling your opponent. Put yourself in the arbitrator's position–a lay person whose only purpose in volunteering is to help you resolve your dispute–and use your own common sense about how to proceed.

Here is a checklist to help you prepare your case:

1. Bring to the hearing all available written information relating to your dispute. Bring original documents, if possible. Also **bring copies for the arbitrator and the other party.**
   - _____ sales receipt/invoice; purchase date, price, etc.
   - _____ warranty/guarantee
   - _____ contracts/service records; terms, obligations, etc.
   - _____ proof of payment/payment contracts
   - _____ correspondence between customer and business
   - _____ appropriate advertisements, if any; sales, special offers, etc.
   - _____ delivery receipt; condition at time of delivery/installation
2. List witnesses to transaction, sales/service persons involved, installation person, etc.
   - _____ You are responsible for your witnesses' submission of information, either written or in person.
   - _____ Keep your witnesses informed of the scheduled proceedings.
3. List in chronological sequence actions taken to resolve this dispute.

TO THE CUSTOMER:

Can you clearly state what the problem is, and why you think the company is responsible? _____

WHAT HAPPENS AFTER THE ARBITRATOR MAKES A DECISION?

In the initial agreement to arbitrate each party has given an a bitrator the right to make a final decision in the dispute. The parti may, of course, settle their own dispute at any time—after they hav signed the agreement, during the hearing, or before the decision i given by the arbitrator.

But once the decision is made by the arbitrator, the parties are legally bound to follow it. In virtually all cases the parties comply with the arbitrator's decision. If necessary, the "winner" may take the award to an appropriate court and have it enforced as if it were a judgment or order of the court—without a rehearing of the case. In rare cases, either party may petition the Bureau to request the arbitrator to modify or clarify the final decision if it contains errors of fact or is unclear. This is done by making a written request to the BBB which, if it finds the request to have some merit, will make a copy for the other party to respond to and then send it to the arbitrator. The arbitrator's response to such a request is final.

Attachment E

The General Motors Consumer Arbitration Program is ordinarily limited to owners who still possess the General Motors car which had a mechanical problem or failure. If your complaint involves one or more of the following components manufactured [through the date the Commission accepts this Consent Agreement pursuant to Section 3.25(f) of the Federal Trade Commission's Rules of Practice]: a model THM 200 transmission failure, a camshaft failure in a 305 or 350 cubic-inch-displacement V–8 gasoline engine produced in a plant operated by General Motors Chevrolet Division since 1974, or a failure in the fuel injection pump in a 350 cubic-inch-displacement diesel engine produced in a plant operated by General Motors Oldsmobile Division, General Motors is extending eligibility to you for the General Motors Arbitration Program even if you no longer have the General Motors car which had the problem.

A handbook is available that tells you more about the procedures and other eligibility rules for the Arbitration Program. This free handbook is available by calling toll-free 800– , or by writing:

General Motors Corporation

Please save this letter. If you decide to arbitrate, this letter is important to show your eligibility.

ANALYSIS OF PROPOSED CONSENT ORDER—TO AID PUBLIC COMMENT

[Docket No. 9145]

General Motors Corporation

The Federal Trade Commission has tentatively accepted an Agreement to a proposed Consent Order from General Motors Corporation.

The proposed Consent Order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the Agreement and the comments received, and will decide whether it should withdraw from the Agreement or make final the Agreement's proposed Order.

The Complaint in this matter alleges that General Motors knew or should have known about certain serious problems or defects in its cars, but failed to disclose the existence of these problems or defects. The Complaint further alleges that General Motors knew or should have known how to avoid or alleviate these problems or defects and failed to disclose this information to the public. These practices, the Complaint alleges, are unfair and deceptive.

CONTENTS OF THE ORDER

The proposed Order between General Motors and the Federal Trade Commission covers four basic areas:

(1) General Motors will provide interested parties with all Product Service Publications ("PSPs"). This information can help car owners, car buyers, or mechanics.

(2) General Motors will provide descriptive Indexes of the PSPs. These Indexes will allow interested parties to order those PSPs most important to them. The Indexes will also contain plainlanguage Explanatory Information relating to those PSPs which either describe expensive repairs and how to avoid expensive repairs or provide information about how consumers should care for their cars.

(3) General Motors will establish a nationwide arbitration program for car owners with unsatisfied complaints about failures in the engine or transmission in any General Motors car.

(4) General Motors will provide advertising and direct-mail notice of the availability of the Product Service Publications and the arbitration program.

Product Service Publications

After a car model is available to the public, General Motors car divisions continue to gather information regarding the performance and operation of that model. Sometimes this information leads the General Motors car divisions to issue bulletins on a one-time basis or newsletter articles on a monthly basis. The car divisions assign a variety of different titles to this information. For the purposes of the Consent Order, these documents are called "Product Service Publications" ("PSPs"). These PSPs outline problems or potential problems and ways of dealing with them. Sometimes they simply describe new, easier, or more effective repair procedures. Sometimes these bulletins describe how to diagnose or avoid certain problems. Other bulletins may update Owner's Manuals or Maintenance Schedules to provide information about how to care for particular cars. Each division may issue as many as two hundred fifty (250) PSPs each year. Previously, General Motors car divisions distributed PSPs only to its dealers.

Indexes and Explanatory Information

Under the proposed Order, General Motors will make available to the public all PSPs that are designed for the care and service of the car. To help people identify PSPs of particular interest, general Motors will also provide descriptive Indexes. And, for the more important PSPs describing expensive repairs or use and care information updating Owner's Manuals or Maintenance Schedules, the Indexes will include a non-technical explanation of these PSPs and the car problem the PSP was designed to meet.

General Motors may decide to charge for some of this information. PSP Indexes will be free until at least the 1986 model year. If General Motors decides to change for individual PSP's or PSP Indexes, these fees will be nominal.

Arbitration

Owners sometimes experience car failures for which they believe General Motors is responsible, and many of these failures can occur after the warranty expires. Under the proposed Order, General Motors must conduct an arbitration program to allow people to resolve complaints against General Motors. Under the arbitration program, which will operate in at least thirty-nine (39) specified cities, owners may contact the Better Business Bureau to arrange for an arbitration hearing if they have an unsatisfied complaint about an engine or transmission problem in a General Motors car (Appendix A lists the 39 specified cities). This program relies on impartial, trained, third-party, volunteer arbitrators. Currently, there is no charge for this arbitration, and it is not necessary for an owner to hire a lawyer.

The arbitration is binding on General Motors, but non-binding on consumers unless a consumer elects to accept the arbitration award. This means that if the Better Business Bureau's volunteer arbitrator rules against General Motors, General Motors must obey the ruling. On the other hand, if the arbitrator awards the consumer nothing or something less than what the consumer feels is fair, the consumer is free to reject the award and initiate a lawsuit or pursue other private remedies against General Motors.

For current and prior owners of General Motors cars equipped with certain specified components, the proposed Order requires General Motors to give Background Statements to those owners who select arbitration. Owners may find information in the Background Statements which may be

VOL
48
ISS
90
MAY
9
1983
UMI

helpful in their arbitration. The Background Statements apply to General Motors cars equipped with the following specified components:

- THM 200 transmission—an automatic transmission that is installed in many General Motors rear-wheel-drive car lines.
- Camshafts and lifters in Chevrolet 305 CID (5.0 liter) and 350 CID (5.7 liter) V-8 engines.
- Fuel injection pumps and fuel injectors in Oldsmobile 350 CID (5.7 liter) diesel engines.

If one of these specified components in a General Motors car fails, the owner will have the ability to go to the Better Business Bureau in one of the 39 cities, request arbitration, and present the arbitrator with the applicable Background Statement, along with any other evidence supporting the owner's claim.

Advertising and Direct Mail

General Motors will send direct-mail notices, appropriate Background Statements, and information about the arbitration and PSP programs to all consumers who complained to General Motors, to the Federal Trade Commission or to state or local law enforcement or consumer affairs offices about a failure in a specified component. Under the proposed Order, General Motors will set up a nationwide toll-free telephone line to take inquiries about PSPs, PSP Indexes, and arbitration. The information may also be obtained by writing to General Motors.

General Motors dealers will have copies of the PSPs and PSP Indexes available to read at the dealerships, and can provide copies to consumers who request them.

The PSPs and PSP Indexes will be promoted in a number of ways. General Motors will place full-page advertisements in national magazines—four advertisements during the first year of the Order, and two in each succeeding year—promoting the PSP program. Dealers will also be provided with showroom posters promoting the program. Owner's manuals, point-of-sale brochures, and letters to certain owners of General Motors cars (with the components specified above) will also spell out and explain what information is available and how it can be obtained.

Some General Motors advertising will contain messages promoting the availability and use of arbitration. These messages will also appear in national magazines—two times during the first year of the Order, and three times every year thereafter.

The advertising for PSP's and arbitration is designed to reach at least 75 million readers.

EFFECTS OF THE ORDER

These programs should benefit General Motors car owners and buyers immediately, and ultimately all consumers, in the following ways:

—Owners can use the PSPs and Explanatory Information to better maintain their cars or to minimize future repair costs.
—Buyers can now avail themselve of the PSPs relating to the particular cars they are considering. This should lead to more informed purchase decisions.
—Independent auto mechanics will now be able to enjoy some of the same technical information previously available only to dealers. Both the mechanics and General Motors car owners should benefit from lower repair costs and more effective repairs.
—Arbitration will be an effective mechanism to help avoid legal time and expense by having disputes heard by an impartial third party

The purpose of this analysis is to facilitate public comment on the proposed Order, and it is not intended to constitute an official interpertation of the Agreement and proposed Order to modify in any way their terms.

Appendix—Minimum Cities Where the Arbitration Program Will be Established

1. Minneapolis/St. Paul, Minnesota
2. Buffalo, New York
3. San Francisco, California
4. Des Moines, Iowa
5. Philadelphia, Pennsylvania
6. Milwaukee, Wisconsin
7. Denver, Colorado
8. Louisville, Kentucky
9. Charlotte, North Carolina
10. Memphis, Tennessee
11. Portland, Oregon
12. Boston, Massachusetts
13. Detroit, Michigan
14. Washington, D.C.
15. Houston, Texas
16. Dallas/Fort Worth, Texas
17. New Orleans, Louisiana
18. Albuquerque, New Mexico
19. Phoenix, Arizona
20. Los Angeles, California
21. Reno, Nevada
22. Salt Lake City, Utah
23. Seattle, Washington
24. Omaha, Nabraska
25. Pittsburgh, Pennsylvania
26. Cleveland, Ohio
27. Indianapolis, Indiana
28. Wichita, Kansas
29. St. Louis, Missouri
30. New York, New York
31. Oklahoma City, Oklahoma
32. Birmingham, Alabama
33. Miami, Florida
34. Atlanta, Georgia
35. Jackson, Mississippi
36. Little Rock, Arkansas
37. Chicago, Illinois
38. Honolulu, Hawaii
39. Boise, Idaho

The Order requires that General Motors must expand the arbitration program as demand requires in order to expeditiously resolve consumer complaints. For those General Motors car owners who do not live near these metropolitan areas, they can consider arbitration by telephone and/or by mail.

Emily H. Rock,

Secretary.

Separate Statement of Commissioner David A. Clanton Concerning Consent Agreement With General Motors Corporation in Docket No. 9145

The Commission today has voted to settle its litigation with General Motors by provisionally accepting a proposed consent order. I appreciate the effort that went into negotiating that settlement, and recongnize that it has a number of attractive features. However, I must reluctantly dissent from the Commission's decision.

The essence of the Commission's complaint in this case was that GM knew of certain mechanical problems that had developed with its automobiles, and refused to tell consumers even though that information would have been worth more to consumers than it would have cost to disclose. These are only allegations, of course, and their truth was to have been decided in a full trial on the merits. We do not have all the evidence before us at this point. However, I believe (as I did when we issued the complaint) that we have reason to believe that these charges would be borne out at trial. Presumably, my fellow Commissioners share that belief—Otherwise, the proper course would have been to dismiss the case entirely, or to return it for further investigation and pre-trial discovery.

My difficulty is with the remedy we are accepting as the proper form of relief for these alleged violations. The proposed consent has many features that may be of considerable value prospectively, including the system for making product service publications available to the consuming public. The requirement ordering GM to arbitrate *all* disputes involving the powertrain can also be viewed as a prospective benefit. In pursuing these benefits, however, we may have lost sight of the alleged violations we originally set out to remedy. I am concerned that this remedy does too little to address those specific violations, and as a consequence bears too little relation to the theory of the Commission's case.

This is particularly true of the arbitration provisions. As noted above, the proposed consent requires GM to arbitrate all powertrain disputes, even for problems where there is no reason to believe that GM may have violated the FTC Act. This is in part due to GM's understandable reluctance to discriminate among its customers by offering arbitration for some problems but not for others. However, one effect of this expanded coverage is to blur the focus of the redress mechanism, making it much less targeted. The order deliberately avoids setting forth any standards on which the arbitrators might base their decisions. In effect, it shifts from a theory of narrowly-focused liability for those mechanical problems which should have been disclosed and were not; to a remedy which offers potential liability for *all* mechanical problems, but only to the extent that a lay arbitrator decides that liability would be appropriate.

I recognize that arbitration has many attractions as a basis for settlement. This is particularly true in a case such as this one, where there may be individual issues of fact about the appropriate measure of repair costs, or whether any given failure was due to improper consumer maintenance rather than to a manufacturing problem. Thus, my objection is not so much to arbitration *per se* as to the somewhat unfocused nature of the arbitration that the Commission is ordering here.

The settlement does not attempt to focus the arbitration by supplying consumers with "Background Statements" which they may (if they wish) give to the arbitrator. These statements are critical, for they represent the only communication from the Commission to the arbitrator, and the only vehicle by which we might influence the standard that will effectively be applied. My fear, however, is that they may be too much of a compromise, and offer too little assistance to consumers, to provide very much focus. The statement dealing with the THM–200 transmission, for example, begins with several paragraphs describing the complexity of transmissions and the care that GM took in manufacturing and testing them. The statements of the most value to consumers—for example, that the terms of the warranty should not necessarily control the outcome of the arbitration—are buried much later in the Statement. Nothing at all is said about the Commission's theory of the case; *i.e.*, that the FTC had reason to believe that these transmissions failed sufficiently often that GM should have told consumers so before they made their purchase. In short, nothing is said to focus the arbitrator's attention on the issues that we at the Commission believed were crucial in deciding whether liability should attach.

Thus, my concern is that this remedy may convert this case from one designed to impose liability for failures to make the proper disclosures, to one that imposes liability on the basis of some unknown and unfocused standard. I hope that my colleagues in the majority are correct, and that these fears will prove unfounded. In the meantime, I would welcome any comments from the public on this aspect of the proposed settlement.

Separate Statement of Commissioner Pertschuk Concerning Consent Agreement With General Motors in Docket No. 9145

April 26, 1983.

In my belief, based on the evidence in hand, General Motors violated the law by knowingly refusing to disclose several costly defects in cars that it sold to hundreds or thousands or millions of consumers over the past several years. GM's unwillingness to divulge this information may have caused unwitting purchasers hundreds of millions of dollars in total damages from repeated breakdowns and expensive repairs, not to mention the time and aggravation involved.

Today the Commission has provisionally accepted a consent agreement which settles the charges it brought against GM in 1980. The deal requires GM to give aggrieved owners an opportunity to resolve their disputes with GM through individual arbitration. In addition it requires GM to make its internal product service publications (PSPs), which describe problems with its cars, publicly available for eight years. After that, the order would expire.

The settlement does provide some benefits, and I encourage all consumers to take full advantage of the arbitration (and PSP) programs which will be available. After all, if consumers don't actively exercise their rights under this order they can't receive any compensation under it.

Still, despite these benefits, I do not believe that *individual* case-by-case arbitration, where each consumer must *prove* a right to redress, provides a strong enough solution for the substantial injury suffered here by classes of commonly-situated consumers. Only direct, automatic refunds to consumers, which is the redress remedy the Commission has always used before in its cases involving systematic car defects, can do that. I therefore voted to send the case back to trial rather than to accept the consent agreement in its present form.

Consumers have suffered severe economic headaches from the GM cars in question. The alleged defect in the THM 200 transmission caused individual repair bills of $400–$500 and total damages in the hundreds of millions of dollars. It appears to have failed at an abnormally high and alarmingly greater rate than the THM 350 transmission it replaced (normally, many GM transmissions never require replacement for the entire life of the car). In suing GM, the Commission alleged that GM knew about this dramatically higher failure rate but never told consumers about it.

Serious camshaft breakdowns in GM's 305 and 350 CID gas engines, another of the alleged problems, caused individual damages of around $400 a repair and total damages in the tens of millions of dollars. With proper maintenance and lubrication, camshafts normally should last the life of the car, yet thousands wore out early here at least partly as a result of faulty oil use recommendation by GM in its owner's manuals.

Water contamination resulting from an alleged defect in the fuel injection pumps and fuels injectors of GM's diesel engine cars caused $300–500 in individual repairs and total damages in the million of dollars. These losses have been somewhat offset, however, by GM's subsequent implementation of a partial fix for the defect and voluntary reimbursement of costs to some owners.

The Commission's choice of remedy for the enormous potential consumer injury in this case was severely limited by GM's absolute refusal to agree to any direct redress program in settlement negotiations. In so refusing GM knew, of course, that it would take years for the Commission to win redress for consumers through litigation, a problem which GM greatly exacerbated by "stonewalling" our staff's discovery demands. By these tactics, GM seized the upper hand and gave the Commission this unsatisfying choice: settlement now with case-by-case arbitration of damage claims in lieu of direct redress, or protracted litigation delaying years more any final award of direct refunds for consumers.

The Commission's trial team in this matter—one of its finest, incidentally—recommended settlement by arbitration as the *less unattractive* of the two alternatives, e.g., the most immediate means practically available for getting money into injured consumers' pockets. This was a powerful appeal, one that I was quite drawn to during the Commission's deliberations. In the final analysis, though, I was unpersuaded for the following reasons.

First, the agreement does not by itself *create* an opportunity for consumer redress here; that already exists in GM's voluntary nationwide arbitration program in cooperation with the Better Business Bureau. At most, through certain valuable improvements it would add to the BBB program, such as making the arbitration non-binding and publicizing it more widely, the agreement would only enlarge, to some unknowable degree, the consumer's opportunity for recovery.

Second, and more fundamental, are the conceptual problems that I have with arbitration as a remedy for generic products defects. While informal dispute resolution mechanisms, including arbitration, may be a wonderfully practical and efficient innovation for resolving individual legal disputes, *case-by-case* arbitration is a flawed remedy for substantial consumer injury in this type of case, in which there is proof of *systematic* defects *common* to an entire class of similarly-situated consumers. The highly individual nature or arbitration places an unfair burden here on consumers who, under the Commission's legal theory, are entitled to full redress of damages from GM without inquiry into the facts and circumstances of each particular case.

The inherent variability of case-by-case arbitration raises a host of troublesome questions. How many consumers will event bother to seek restitution, especially when many may have already experienced the discouragement of failing to get adequate redress from the dealer and GM zone representative? Will those who do try recover all or most of their damages in informal mediation with the dealer, the stage at which the great majority of disputes will likely be resolved? If they obtain only partial recovery will they persevere to aribtration or just stop, frustrated by the process and headaches involved? If they call it quits, will they have gotten justice? Of those who go to arbitration, how many will win—only half, as is usually the case, or almost all, as *should* be the case under the Commission's legal theory? Can the typical lay arbitrator knowledgeably apply the relevant legal theory, ruling in favor of the consumer unless GM can prove that consumer abuse, not the design defect, was the likelier cause?

In a word, can this arbitration remedy rise above a system that is designed only for resolution of *individually different* disputes and which in some ways resembles a game of chance, to become the rough equivalent of a program of direct automatic redress for the common injuries suffered by consumers here? As much as I want to believe otherwise, and as much as I respect our staff's judgment to the contrary, I am afraid that arbitration could substitute "random redress" for the automatic restitution to which these consumers are entitled under the Commission's theory of liability.

Our staff believes the "Background Statements" on the three alleged defects, which GM has agreed to give consumers, will help to reduce the inherent randomness of the arbitration process. This is impossible to know. The arbitrator certainly is not bound to heed the information provided, but is free to apply his or her own individual sense of right. Nevertheless, the staff strongly believes these statements, as negotiated, will tend to help the consumer.

VOL 48 ISS 90 MY 9 1983 UMI

First, the staff believes the novel presence of a fact sheet, which explicitly alludes to the "settlement of a dispute" between GM and the FTC, will suggest to the arbitrator possible culpability on the part of GM. Second, they believe the statement in the fact sheet that the "warranty is not necessarily the limit of the manfuacturer's responsibility, and need not control the outcome of arbitration," will help dispel the view of arbitrators (around 50 percent in CRO's arbitrator interviews) that in fact the warranty is controlling. Third, they believe each of the fact sheets is suggestive enough of a problem that was GM's fault, not the consumer's, to give both the consumer and the arbitrator enough information to work with in support of the consumer's claim.

I hope the staff is right, but there are reasons to be doubtful. The fact sheets are the result of extremely tenacious bargaining with GM, *and look it.* They are hardly a model of clarity, obscuring even the statements most helpful to the consumer.[1] To GM's further advantage, they state up front the reality that each arbitration case is, in fact, "individual" in nature (which is diametrically opposite to the Commission's theory of liability), and exclude the likelihood, or even the possibility, of a systematic design or performance defect. In short, they are neutral, deliberately muddled (by GM) statements of the problems and the issues, suitable at most only for case-by-case resolution of individual complaints. They don't come close to reflecting our defect theory of common recovery in the case.

Still, despite my reservations about the agreement, I want to see the arbitration program succeed in the sense that it fairly awards all consumers who were unfairly injured by GM's failure to disclose alleged defects.

Indeed, I could have enthusiastically supported the program if it had more clearly reflected the following underlying principles of the Commission's case against GM:

- Systematic defects, such as the ones alleged here, sometimes do not come to light until after the warranty period.
- It is normally reasonable for consumers to expect cars to provide reliable, dependable service well beyond the warranty period.
- The FTC had evidence the failure rates of the components here were abnormally high, that GM knew this but never told consumers about it.
- The consumer should win an award equal to his or her out-of-pocket repair costs, unless in the particular individual case GM can prove the problem was the consumer's fault, as judged by clear instructions for proper driving or maintenance that may appear in the owner's manual.

Whether these principles will be reflected in individual arbitration hearings under the negotiated terms of the arbitration program is perhaps the central question about this consent agreement that commentors should address during the public comment proceeding.

Separate Statement of Commissioner Patricia P. Bailey Concerning Consent Agreement With General Motors Corporation, Docket No. 9145

I have, with some reservations, voted to provisionally accept the consent agreement negotiated by the Commission's Cleveland Regional Office staff with the General Motors Corporation (GM). Any settlement is, by its very nature, an imperfect compromise of the important issues (and injury) at stake in any lawsuit. This one—negotiated to bring an end to one of the most massive and complex cases the Commission has ever brought—is no exception. Nevertheless, I am persuaded by the evidence now before us that it represents a fair and equitable, if not complete, resolution of the debate between the Commission and GM concerning what went wrong with the THM 200 transmissions, camshafts and diesels in various models of GM cars.

The settlement offers the Commission the fastest and indeed the only feasible way to redress the injury suffered by many GM owners. Our sole alternative is continued litigation which would take until at least the end of the decade to resolve. By that time, injured GM owners, some of whom bought their cars as far back as 1974, will have given up, disappeared, or lost the records needed to document their claims. The money they lost, even if it could be recovered, would have eroded substantially in actual value. Given the choice between the Pyrrhic victory of possibly winning the case sometime in the 1990's and obtaining some immediate relief now, I elected what seemed to be the more valuable option from those consumers' perspective.

It is easy for any enforcement agency to become absorbed in the vindication of important legal principals. But we have at least an equal responsibility to the public whom we are charged to protect—even at the cost of striking a compromise of their interests in order to obtain any redress of their grievances at all. In choosing this settlement over protracted litigation, I do not suggest for a moment that it represents the optimal resolution of the Commission's case against GM. Rather, I believe that it represents the only practical alternative for the consumers the Commission must first and foremost represent.

The Commission alleged in its 1980 complaint that the three components of the cars in question were subject to an "abnormal number of failures" or, in plain English, were defective. The Commission further alleged that at some time after the cars were sold, GM knew or should have known the three components were defective but continued selling the cars without telling consumers about those problems. Such practices are deceptive and violate the Federal Trade Commission Act. While I believed then and continue to believe that these basic complaint allegations are very likely true, the task of proving them at trial would be enormously complicated.

Ultimately, the staff decided to pursue GM's basic settlement offer of arbitration of consumer complaints for three reasons: first, the trial of the case had not yet begun after over two years of pre-trial skirmishing and it appeared the litigation would drag on for years. Second, the case involved colorable claims by GM that some of the failures of the three components may have been caused not by any mechanical defect but rather by consumer misuse. (For example, camshafts may have failed when consumers neglected recommended oil changes for long periods of time.) Third, the potential magnitude of the redress class, partnered with the issue of consumer abuse, made arbitration a practical compromise which hopefully will result in compensation for those who were innocently injured.

The arbitration program required by the consent agreement affords several important protections to consumers: for the life of the order (eight years), GM will be under a legal obligation to provide arbitration to all consumers experiencing engine and transmission problems; consumers will be provided with fact sheets, which may be submitted to the arbitrator, concerning the three allegedly defective components and which indicate specifically that the warranty is not the limit of GM's liability in any given case; they will have the option of requesting an in-person hearing before an arbitrator, who will travel to their location at GM's expense if consumers so elect; and the arbitrations will be non-binding on consumers. Past experience indicates that at least 85 percent of all grievances are resolved voluntarily by the company before they reach the final arbitration phase and that most consumers leave this interim mediation phase either satisfied or committed to pursue final arbitration. Of the 15 percent who pursue their claims to artibration, almost 60 percent obtain an award larger than that offered in the mediation phase. The strengthening of arbitration remedies afforded by the order should encourage additional voluntary resolution of disputes by GM.

Finally, the arbitration program will be conducted under the auspices of the Better Business Bureau (BBB). The Commission has had experience with other BBB programs, particularly the self-regulatory program in the advertising industry, and we have confidence in the basic integrity of that organization and its ability to handle this kind of process.

Nonetheless, the arbitration program contained in the consent agreement is experimental and, if the agreement is approved finally by the Commission, we will be monitoring its results very carefully. As far as I am concerned, no precedent will be set by this remedial approach until and unless the Commission is satisfied that it has worked well and effectively for all concerned. GM and the BBB have an opportunity here to justify not only the Commission's effort to give arbitration an opportunity to work but also consumers' continued confidence in GM products.

For the future, the settlement requires the public disclosure of systematic problems on a level unprecedented in the American automobile industry. Previously, this information was only available to GM dealers and rarely reached car owners and independent mechanics. Combined with the requirements contained in the Commission's 1980 consent agreement with the Ford Motor Company, this settlement will accomplish the simultaneous disclosure of product reliability information by the two largest domestic automakers. These disclosures, if utilized by consumers and consumer media, could change the basis on which cars are marketed in this country and should also prove helpful in future arbitrations of consumer disputes.

[1] In the transmission fact sheet, for example, the above warranty statement is buried at the bottom of the 5th paragraph, toward the end of the sheet. In the camshaft fact sheet, the statement that there could have been excessive wear "even if the owners followed the recommendations in the owner's manual," and that GM was aware of this problem, appear in the last paragraphs of the sheet.

Separate Statement of Commissioner George W. Douglas Concerning Consent Agreement With General Motors in Docket No. 9145

By its action today the Commission has settled a long, complex case that was initiated in 1978, and, if it were to be pursued through litigation, could easily last as long as ten more years before resolution.

The consent agreement signed by General Motors and the FTC staff provides several substantial benefits to consumers which are not now available and which would not likely be forthcoming from litigation, even if the Commission won every appeal on every portion of the complaint. First, injured consumers, some of whom purchased their vehicles as far back as 1975–1976, will receive redress via mediation and arbitration *now*, through an unbiased Better Business Bureau arbitration program.

Second, and of potentially greater importance in terms of benefits to prospective automobile purchasers, the settlement calls for General Motors to provide detailed disclosures of maintenance, repair, and use and care information by making its Product Service Publications available to consumers for the first time. (Litigation, by contrast, would at best result only in an order calling for GM to cease and desist from failing to disclose material defects.)

In view of the immediate and significant benefits that the consent order provides consumers, the alternative course—a protracted legal battle with a highly uncertain outcome—is decidedly inferior. Indeed, to pursue direct redress through litigation would mean that consumers would likely, in the event that the Commission did prevail, receive no compensation at all until the end of the decade, and possibly not until 1993 or later. This raises the serious question as to how many injured owners will have exhibited the necessary patience and foresight in maintaining documentation of their losses caused by one of the defects involved. Truly, the pursuit of litigation in this matter would provide a compelling textbook example of the aphorism that "justice delayed is justice denied."

An even more disturbing aspect of continuing litigation is that the ultimate outcome is highly dubious and made particularly uncertain by the fact that the Commission has to win two separate court cases (and associated appeals) in order for redress to be granted.

Clearly, for the Commission to pursue litigation in this matter would not be in the best interests of consumers deserving of redress. Indeed, taking the greater certainty of immediate compensation through mediation and arbitration into account, the amount of total redress to consumers through arbitration is, by my estimates, likely to exceed the expected redress through litigation by sixfold. In summary, the Commission wisely fulfilled its responsibility to consumers in eschewing the quixotic quest preferred by Commissioner Pertschuk, which in all likelihood would have had the result of enriching a large number of lawyers at the expense of injured consumers.

Questions for Public Comment Presented by Commissioner Pertschuk

1. Generally speaking, is the remedy of arbitration—in which the issues of whether a product defect exists and whether the manufacturer should be held responsible for it are adjudicated on a case-by-case basis—an appropriate response to allegations of a common undisclosed product defect causing injury to a class of similarly-situated consumers? Please explain. In what circumstances might case-by-case arbitration be a more appropriate remedy than direct automatic redress for responding to consumer injury resulting from undisclosed product defects?

2. Generally speaking, what are the advantages and disadvantages to consumers of the Better Business Bureau's voluntary arbitration program, which would be utilized under this consent agreement?

a. Through 1982 reportedly, around 3400 cases had proceeded through arbitration in the GM/BBB program since its inception in 1978. Has the BBB program demonstrated the organization and capacity to handle efficiently and fairly the increased load of thousands of arbitration cases that could result from this consent agreement? Please explain.

b. What has been the experience of consumers in GM's current arbitration program in obtaining compensation for failures occurring after the expiration of the written warranty? To what extent currently does GM raise the expiration of the written warranty in the arbitration hearing or their written submissions to the arbitrator?

c. Have consumers who have gone through GM's arbitration program found that they were overmatched—that GM through it expertise, resources, or influence, had a significant advantage in the arbitrition proceedings? Please explain.

d. The GM BBB arbitration program incorporated in this consent agreement can be described as a mediation/arbitration program, in which the consumer and GM first must try to settle on their own, as opposed to a straight arbitration program in which complainants have immediate access to arbitration without the intermediate mechanism urging mediation. Under this program, reportedly over 80% of all disputes are closed in the mandatory mediation phase and never go to arbitration. In the context of this settlement with GM, is a mediation/arbitration program appropriate? Or should the program only offer straight arbitration or at least the clear option (rather than requirement) to mediate or proceed straight to arbitration? Please explain.

3. What impact is the consent agreement's provision for *non-binding* arbitration likely to have?

a. Will it increase consumers' willingness to arbitrate, knowing that they will not be bound by the decision if they are unsatisfied with it?

b. What effect if any will it have on GM's incentive to resolve disputes to consumers' satisfaction in the mediation phase preceding arbitration? For example, since an unsatisfactory arbitration judgment would be non-ninding on the consumer, leaving the consumer free to seek recovery through other means such as private class actions, will GM have a substantially greater incentive to satisfy the consumer at the pre-arbitration mediation stage? Please explain.

4. What impact if any will the "Background Statements" on the alleged defects, which GM has agreed to provide consumers, have on the arbitration hearings? Are these statements as written adequate for the purpose of providing useful information to the consumer and appropriate guidance to the arbitrator? If they are not adequate, how could they be modifed to be substantially more useful? Please explain.

5. What impact if any will the consent agreement, specifically its provisions for arbitration of outstanding disputes, have on the various class action and state attorney's general lawsuits that have been filed against GM alleging one or more of the same defects involved in the Commission's case? Specifically, will it make it harder or easier for deserving consumers to get direct redress from GM through those actions? Please explain.

6. What effect if any do you believe the GM Product Service Publication (PSP) disclosure provisions of the consent agreement will have as a means of implementing GM's duty under the order to disclose known problems with its cars to consumers?

a. Do you believe the PSPs, in the manner of dissemination and format provided, will be reasonably accessible to consumers?

b. Do you believe the PSPs will provide the kind of information that will be reasonably understandable and useful to consumers?

c. Do you believe the requirement for GM to make its PSPs available to the public should expire after eight years, as provided in the consent order? Please explain.

7. If you believe the arbitration and/or PSP disclosure provisions of the consent agreement are seriously deficient in any way, how would you modify them to make them more acceptable? Please explain.

8. Do you believe either the arbitration or PSP disclosure provisions of the consent agreement, standing alone, are an adequate basis for accepting the consent agreement? Rejecting it? Please explain. If you do not believe one or the other of these provisions is an adequate basis alone for accepting the agreement, do you nevertheless believe that the combined benefits of the arbitration and PSP provisions warrant acceptance of the agreement? Please explain.

Question for Public Comment Presented by Commissioner Patricia P. Bailey

In responding to the questions posed by Commissioner Pertschuk, commenters should at all times bear in mind that the alternative to the mediation/arbitration program

VOL
48
ISS
90
MY
9
1983
UMI

required by this consent agreement is to return the case to litigation, which could not be completed for several years, perhaps by the end of this decade. Even then, if the Commission were to prevail, a second lawsuit would have to be undertaken to obtain redress for affected consumers. Would those who purchased any of the allegedly defective cars beginning in 1974 be better served if the commission pursued that uncertain and lengthy course or by the immediate initiation of the process mandated by this consent agreement?

Commissioner George W. Douglas' Separate Analysis of Arbitration Provisions for Aid in Public Comment

In fashioning their responses during the 60-day public comment period, some commentators may find considerable value in a concise analysis of how the provisionally accepted consent order modifies General Motors' current, voluntary arbitration program. Specifically, the negotiated settlement provides seven improvements in General Motors' existing arbitration program.

First, whereas the arbitrator's decision in the current program is binding on the consumer (except in two states), the negotiated settlement requires that although the arbitrator's decision would still bind General Motors, it would not bind the consumer, who would be eligible to participate in private/state/class action lawsuits if not satisfied with the arbitrated settlement.

Second, under the terms of General Motors' existing arbitration program, only current vehicle owners are eligible. The negotiated settlement, however, specifies that injured consumers will be eligible to participate in the arbitration program and receive redress regardless of whether or not they still own the problem vehicles.

Third, the current General Motors program is offered in 39 cities, and injured consumers must participate in person, implying an extreme hardship on owners living far away from one of those cities. Under the terms of the negotiated settlement, *all* injured consumers in the United States will be able to participate, without incurring any extra costs, regardless of where they live. *At the injured consumers* option, arbitration will be conducted by mail, by telephone, or in person, at General Motors' expense.

Fourth, General Motors' current arbitration program is "experimental" and can be terminated at any time. The negotiated settlement requires that General Motors continue the program for eight years and expand it as necessary.

Fifth, whereas the existing program does not furnish *any* background information for the arbitrator's use, the negotiated settlement provides background information statements to be used by consumers experiencing any of the three defects listed in the complaint. Significantly, the background statements point out that the written warranty is not controlling.

Sixth, General Motors has provided only limited disclosure of its existing arbitration program, typically informing only owners of vehicles less than three years old or with under 36 000 miles about the program. Under the terms of the settlement, General Motors would have to take certain steps to ensure widespread disclosure. Direct mail notice will be given to all injured owners who have complained to the Federal Trade Commission, to a state attorney general, or to General Motors after 1978. General Motors will also be required to conduct extensive advertising of the program and to provide a toll free number for information.

Seventh, the negotiated settlement calls for General Motors to provide arbitration within sixty days (under penalty of fine) from the date of first contact about the program by a consumer. The provisions in the current program do not require General Motors to act by any specific time.

In addition to the improvements listed above, the negotiated settlement also provides that General Motors, if so directed by the Commission must conduct an analysis of the costs and benefits brought forth by the settlement for the purposes of making further improvements in this or other following consent orders involving redress or arbitration.

BILLING CODE 6750-01-M

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1201

Withdrawal of Proposed Testing Program and Certification Requirements for Architectural Glazing Materials

AGENCY: Consumer Product Safety Commission.

ACTION: Withdrawal of proposed rule.

SUMMARY: The Consumer Product Safety Commission is withdrawing a proposed rule to establish a reasonable testing program and certification requirements for products subject to the Commission's safety standard for architectural glazing materials. The proposal is being withdrawn because it would be economically burdensome to consumers and the industry and it would not significantly affect the safety of the products.

FOR FURTHER INFORMATION CONTACT: Wade Anderson, Directorate for Compliance and Administrative Litigation, Consumer Product Safety Commission, Washington, D.C. 20207; telephone (301) 492-6400.

SUPPLEMENTARY INFORMATION: In 1977 the Commission issued a safety standard applicable to glazing materials used or intended for use in specified applications. 16 CFR Part 1201. On December 16, 1977 the Commission published for public comment a proposed rule, under the authority of 15 U.S.C. 2063, 2065, and 2076(e), containing (1) requirements for sampling and testing of architectural glazing materials subject to the safety standard, to support certification of compliance with the standard; (2) requirements for the form and content of a certificate of compliance stating that the architectural glazing materials are subject to and comply with the standard; (3) requirements for temporary labeling of the architectural glazing materials; and (4) requirements for maintenance of records relating to the production, sampling, testing, certification, and distribution of the architectural glazing materials. 42 FR 63586 (Dec. 16, 1977).

During early 1978 the Commission received 29 written public comments on the proposed requirements and heard oral presentations at a public hearing on March 1, 1978. These comments, mostly from representatives of the industry, generally asserted that the proposed requirements were (a) unreasonable due to their cost and to the recordkeeping requirements, (b) unnecessary to assure that the public would be protected from unreasonable risks associated with noncomplying glazing materials, and (c) unfair since foreign manufacturers were not included within the requirements. More specifically, industry estimated that costs to the consumer from the requirements would be from $7 to $12 million (1978 dollars), with an additional cost to the industry for recordkeeping of one or two million dollars annually.

A July 1978 report, prepared under contract for the Commission, concluded that the costs of the proposed requirements would be passed on to consumers with normal mark-up and would total from $9.8 to $17 million (1978 dollars). In addition, this report by A.T. Kearney, Inc. found that the requirements could impose signifícant adverse impacts on small businesses and on domestic producers.

The Commission's engineering staff believes that a mandatory reasonable testing program, such as the one proposed in 1977, would have only a marginal effect (if any) in decreasing the incidence of certified glazing material that is in fact noncomplying. The enforcement staff has estimated that resources expended to enforce a certification rule for glazing materials would likely include 16 staff months during the first year of enforcement and eight staff months during each year after that.

In the absence of any specific certification rule for architectural glazing materials subject to 16 CFR Part 1201, manufacturers and private labelers of such products must nevertheless comply with section 14(a) of the Consumer Product Safety Act, 15 U.S.C. 2063(a). Under this statutory provision, manfacturers and private labelers must issue certifcates certifying that their products conform to the Commission's standard on architectural glazing materials. The certificates must (1) accompany the products or otherwise be furnished to distributors and retailers, (2) be based on a test of each product or on a reasonable testing program, (3) state the name of the manufacturer or private labeler, and (4) include the date and place of manufacture. These requirements have applied since the safety standard on architectural glazing materials has been in effect, and they will continue to apply now that the proposed certification rule is being withdrawn. The Commission believes that the existence of these statutory requirements makes unnecessary any more specific certification rule for architectural glazing materials.

Conclusion

Based on all information now availabe to the Commission, the likely costs of a certification rule for architectural glazing materials to consumers, to the industry, and to the government would not be justified by any potential increase in protection to the public. Therefore, the Commission hereby withdraws the testing program and certification requirements that were proposed on December 16, 1977.

Dated: May 2, 1983.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 914

Permanent State Regulatory Program of Indiana

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is announcing procedures for the public comment period and for a public hearing on the substantive adequacy of a program amendment submitted by Indiana to satisfy certain conditions imposed by the Secretary of the Interior on the approval of the Indiana State Program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA).

The amendment consists of a set of modifications to Indiana's surface and underground coal mining regulations and is intended, in part, to satisfy two specific conditions of the Secretary's approval. The amendment also consists of other changes to the Indiana rules which are not related to the conditions of approval.

This document sets forth the times and locations that the Indiana program and proposed amendment are available for public inspection, the comment period during which interested persons may submit written comments on the proposed amendment (IN-0323), and information pertinent to the public hearing.

DATE: Written comments relating to Indiana's proposed modification of its program not received on or before 4:00 p.m. on June 8, 1983, will not necessarily be considered in the Secretary's decision on whether the proposed program amendment satisfies the above conditions.

If requested, a public hearing will be held on June 3, 1983, beginning at 10:00 a.m. at the location shown below under "**ADDRESSES.**"

ADDRESSES: Written comments should be mailed or hand-delivered to: Mr. Richard D. McNabb, Director, Indianapolis Field Office, Office of Surface Mining Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana 46204. Telephone: (317) 269-2600.

If a public hearing is held, its location will be at: OSM Indianapolis Field Office, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana. Telephone: (317) 269-2600.

FOR FURTHER INFORMATION CONTACT: Mr. Richard D. McNabb, Director, Indianapolis Field Office, Office of Surface Mining Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana 46204. Telephone: (317) 269-2600.

SUPPLEMENTARY INFORMATION:

I. Public Comment Procedures

Availability of Copies

Copies of the Indiana program, the proposed amendment, and a listing of any scheduled public meeting and all written comments received in response to this notice will be available for review at the OSM offices and the Office of the State Regulatory Authority listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays.

Office of Surface Mining Reclamation and Enforcement, Room 5315, 1100 L Street, NW., Washington, D.C. 20240.

Office of Surface Mining Reclamation and Enforcement, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana.

Indiana Department of Natural Resources, 608 State Office Building, Indianapolis, Indiana 46204.

Written Comments

Written comments should be specific, pertain only to the issues proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under "DATES" or a locations other than Indianapolis, Indiana will not necessarily be considered and included in the Administrative Record for the final rulemaking.

Public Hearing

Persons wishing to comment at the public hearing should contact the person listed under "FOR FURTHER INFORMATION CONTACT" by the close of business three working days before the date of the hearing. If no one requests to comment at the public hearing, the hearing will not be held.

If only one person requests to comment, a public meeting, rather than a public hearing may be held and the results of the meeting included in the Administrative Record.

Filing of a written statement at the time of the hearing is requested and will greatly assist the transcriber. Submission of written statements in advance of the hearing will allow OSM officials to prepare appropriate questions.

The public hearing will continue on the specified date until all person scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and wish to do so will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment, have been heard.

Public Meeting

Persons wishing to meet with OSM representatives to discuss the proposed amendment may request a meeting at the OSM office listed in "**ADDRESSES**" by contacting the person listed under "**FOR FURTHER INFORMATION CONTACT.**"

All such meetings are open to the public and, if possible, notices of meetings will be posted in advance in the Administrative Record. A written summary of each public meeting will be

VOL
48
ISS
90
MAY
9
1983
UMI

made a part of the Administrative Record.

II. Background on Conditional Approval

Under 30 CFR 727.13(j), the Secretary may conditionally approve a State permanent reglatory program which contains minor deficiencies where the deficiencies are of such a size and nature as to render no part of the program incomplete, the State is actively proceeding with the steps to correct the deficiencies, and the State agrees to correct the deficiencies according to a schedule set in the notice of conditional approval.

III. Background on the Indiana State Program

Information regarding the general background on the Indiana State Program, including the Secretary's Findings, the disposition of comments and detailed explantion of the conditions of approval of the Indiana program can be found in the July 26, 1982, **Federal Register** (47 FR 32071–32106).

At the time of the Secretary's conditional approval, Indiana agreed to meet nine minor conditions, many of which contained several parts. Most of the conditions and their parts have been removed through the approval of amendments to the Indiana program. For additional information on the prior removal of conditions, see the December 17, 1982, **Federal Register** at 47 FR 56493, and the March 4, 1983, **Federal Register** at 48 FR 9248.

The remaining conditions on the Indiana program are as follows:

Condition (a)(2) requires Indiana to require the design criteria for stream channel diverdsions as require by 30 CFR 816.44 and 817.44

Condition (b)(3) requires Iniana to require that each permit application contain a list of all other licenses and permits needed by the applicant to conduct the proposed surface or underground mining activities indication all the information requird by 30 CFR 782.19.

The deadline for Indiana to address these conditions is July 1, 1983. Both of these conditions are proposed to be addressed by the Indiana modifications being announced in this notice.

Two other conditions, (g)(1) and (h), require legislative actions and are scheduled to be met by September 30, 1983.

IV. Discussion of the Proposed Amendment

On April 19, 1983, OSM received a set of regulation amendments from the Indiana Department of Natural Resources intended to meet conditions (a)(2) and (b)(3). See IN–0323. Indiana has proposed changes to its rules at 310 IAC 12–5–19 and 12–5–85 to meet condition (a)(2), and at 12–3–63 to meet condition (b)(3).

In addition, Indiana has proposed changes to other State rules that are unrelated to the conditions. These rules are:

310 IAC 12–1–3, 12–3–12, 12–3–39, 12–3–76, 13–3–112, 12–3–118, 12–4–3, 12–4–4, 12–4–7, 12–4–17, 12–5–36, 12–5–41, 12–5–71.5, 12–5–101, 12—5–105, 12–5–139.5, 12–6–1, 12–6–4, 12–6–5, 12–6–6.5, 12–6–9, 12–6–15, and 12–6–16.

Thus, the Secretary requests comments on the substantive adequacy of the proposed amendment to satisfy the conditions listed above and on the substantive adequacy of the proposed changes to the other Indiana rules.

Procedural Matters

1. *Compliance with the National Enviromental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

BILLING CODE 4310–05–M

30 CFR Part 925

Public Comment Procedures and Opportunity for Public Hearing on Modified Portions of the Missouri Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is announcing procedures for the public comment period and for requesting a public hearing on the substantive adequacy of certain program amendments submitted by the State of Missouri as modifications to the Missouri permanent regulatory program (hereinafter referred to as the Missouri program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendments submitted include statutory and regulatory changes to the performance bond requirements of the Missouri program.

This notice sets forth the times and locations that the Missouri program and proposed amendments are available for public inspection, the comment period during which interested persons may submit written comments on the proposed program elements, and the procedures that will be followed for the public hearing.

DATES: Written comments must be received on or before 4:00 p.m., June 8, 1983 to be considered in the decision on whether to approve or disapprove the proposed program amendments.

A public hearing on the proposed modifications will be held only if requested. If no one requests a public hearing, none will be held. If only one person requests a public hearing, a public meeting, rather than a public hearing may be held, and the results of the meeting included in the Administrative Record. If a hearing is requested and scheduled, a notice announcing the time and location of the hearing will be published in the **Federal Register**. Requests for a public should be directed to Richard Rieke at the address and phone number listed below by 4:00 p.m., May 24, 1983.

ADDRESSES: Written comments and requests for a hearing should be sent to: Mr. Richard Rieke, Field Office Director, Kansas City Field Office, Office of Surface Mining, Scarritt Building, 818 Grand Avenue, Kansas City, Missouri 64106; Telephone: (816) 374–3920.

Copies of the Missouri program, the proposed modifications to the program, a listing of any scheduled public meetings and all written comments

received in response to the notice will be available for public review at the OSM Field Office listed above and at the OSM Headquarters Office and the Office of State regulatory authority listed below, during normal business hours Monday through Friday, excluding holidays.

Office of Surface Mining, Room 5315, 1100 L Street, NW., Washington, D.C. 20240

Missouri Department of Natural Resources, Land Reclamation Commission, 1026 D Northeast Drive, Jefferson City, Missouri 65102

FOR FURTHER INFORMATION CONTACT: Mr. Richard Rieke, Field Office Director, Kansas City Field Office, Office of Surface Mining, Scarritt Building, 818 Grand Avenue, Kansas City, Missouri 64106; Telephone: (816) 374–3920.

SUPPLEMENTARY INFORMATION: The Missouri program was approved on November 21, 1980 (45 FR 77017–77028). The approval was conditioned on the correction of 23 minor deficiencies, which were included in three conditions, (a), (b), and (c). Condition (a) consisted of (a)(1) through (a)(21). The Secretary removed the first six elements of condition (a)(1), conditions (a)(2) through (a)(21), and conditions (b) and (c) on May 11, 1982 (47 FR 20116–20119). The Secretary removed the last element of condition (a)(1) on January 17, 1983 (48 FR 1956). Information pertinent to the general background, revisions, modifications, and amendments to the permanent program submission, as well as the Secretary's findings, the disposition of comments, and a detailed explanation of the conditions of approval of the Missouri program can be found in the November 21, 1980 **Federal Register** (45 FR 77017).

On April 13, 1983, Missouri submitted a proposed program amendment (Administrative Record No. MO–253), consisting of enacted legislation (Senate Bill 737) and promulgated regulations to amend the performance bond provisions of the Missouri program.

The proposed program amendments create and implement a coal mine land reclamation fund to be used to complete reclamation after the proceeds from any applicable performance bond have been exhausted. All permittees are required to pay an assessment to the fund based on the tonnage of coal sold or otherwise disposed of.

The full text of the proposed program amendments submitted by Missouri on April 13, 1983, is available for public inspection at the addresses listed above. The Director now seeks public comment on the adequacy of the proposed amendments. If approved, the amendment will become part of the Missouri program.

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act.* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7 and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather it would ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

BILLING CODE 4310–05–M

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 211

Emergency Fire Suppression Assistance

AGENCY: Forest Service, USDA.

ACTION: Proposed rule.

SUMMARY: The proposed regulation sets forth the circumstances under which the Forest Service may commit resources to help suppress fires on adjacent lands when a reciprocal agreement with other fire organizations does not exist, and when the Forest Service may provide these services free, and when reimbursement to the Forest Service is required. This proposed regulation is necessary to implement provisions of the Reciprocal Fire Protection Act, 42 U.S.C. 1856b, governing emergency situations where there are no reciprocal agreements between the Forest Service and other fire organizations.

DATE: Comments on this proposed regulation must be received by July 8, 1983.

ADDRESS: Comments may be mailed to: R. Max Peterson, Chief (3100), USDA Forest Service, P.O. Box 2417, Washington, DC 20013.

FOR FURTHER INFORMATION CONTACT: Francis Russ, Staff Assistant, Cooperative Fire Protection Staff, Telephone (703) 235–8023.

SUPPLEMENTARY INFORMATION: 42 U.S.C 1856a authorizes agency heads who are responsible for providing fire protection for property of the United States to enter into reciprocal agreements with other fire organizations to provide mutual fire protection assistance. In the absence of such reciprocal agreements, 42 U.S.C. 1856a authorizes agency heads to render emergency assistance, with or without reimbursement, in fire suppression and in preserving life and property from fire. This emergency assistance may only be extended when determined by regulation to be in the best interest of the United States.

Under the proposed rule, where Forest Service prescribed fires escape onto lands not administered by the Forest Service, the Forest Service may, on a non-reimbursable basis, commit resources to suppress these fires. When requested, the Forest Service may commit resources on a reimbursable basis to suppress other fires in the vicinity of Forest Service fire protection facilities and to preserve life and property from fire.

This action has been reviewed pursuant to Executive Order 12291. It has been determined that this action is not a major rule and does not require a regulatory impact analysis. The rule will have no impact on the economy and will result in no increase in cost or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions. The proposed rule will have no effect on competition, employment, investment productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

It also has been determined that this action does not require a regulatory

VOL 48 ISS 90 MAY 9 1983 UMI

flexibility analysis under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), because the action will not have a significant economic impact on a substantial number of small entities since it imposes no direct or indirect cost on small entities; it imposes no paperwork or recordkeeping requirements on small entities; it does not affect the competitive position of small entities in relation to large entities; and it does not affect cash flow, liquidity, or ability to remain in the market for small entities.

List of Subjects in 36 CFR Part 211

Administrative practices and procedure, Fire prevention, Intergovernmental relations, National forests, Public lands—permits.

Therefore, for the reasons set forth in the preamble, Part 211 of Title 36 of the Code of Federal Regulations is amended as follows:

PART 211—ADMINISTRATION

Subpart A—Cooperation with Private and State Agencies

1. Revise the table of contents by adding § 211.5 to read as follows:

Sec.

• • • • •

211.5 Emergency Fire Suppression Assistance.

2. The authority citation for Part 211 Subpart A, reads as follows:

Authority: 69 Stat. 67, as amended, 42 U.S.C. 1856b; 30 Stat. 35, as amended, Sec. 1, 33 Stat. 628; 16 U.S.C. 472, 551.

3. Add § 211.5 to read as follows:

§ 211.5 Emergency Fire Suppression Assistance.

In the absence of a written reciprocal agreements with any fire organization or in situations outside the scope of an agreement, the Forest Service is authorized to render emergency assistance in suppressing fires and in preserving life and property from the threat of fire within the vicinity of Forest Service fire protection facilities under the following conditions:

(a) If a Forest Service prescribed fire escapes onto lands not administered by the Forest Service, the Forest Service may commit personnel, materials, and equipment without reimbursement or consideration of the fire's continuing threat to National Forest System lands or resources.

(b) When requested, the Forest Service may commit personnel, materials, and equipment on a reimbursable basis on lands not administered by the Forest Service without regard to the fire's threat to National Forest System lands or resources.

Douglas W. MacCleery,

Deputy Assistant Secretary for Natural Resources and Environment.

April 8, 1983.

BILLING CODE 3410-11-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-1-FRL 2292-8]

Approval and Promulgation of Implementation Plans; Massachusetts; New Source Review Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is today proposing to approve a revision to the Massachusetts State Implementation Plan (SIP) which incorporates into the Massachusetts SIP preconstruction review requirements for major new sources locating in nonattainment areas where the air quality is worse than levels set to protect public health and welfare. These new Massachusetts regulations meet the Clean Air Act requirements for review of new sources and modifications in nonattainment areas.

DATE: Comments must be received on or before June 8, 1983.

ADDRESS: Comments may be mailed to Harley F. Laing, Director, Air Management Division, Room 2312, JFK Federal Bldg., Boston, MA 02203. Copies of the submittal and EPA's evaluation are available for public inspection during normal business hours at the Environmental Protection Agency, Room 2111, JFK Federal Bldg., Boston, MA 02203 and the Massachusetts Department of Environmental Quality Engineering, Division of Air Quality Control, One Winter Steet, Boston, Massachusetts 02108.

FOR FURTHER INFORMATION CONTACT: Margaret McDonough, State Air Programs Branch, EPA, Region I, Room 2111, JFK Federal Building, Boston, Massachusetts 02203, (617) 223–5130.

SUPPLEMENTARY INFORMATION:

Background

Major new or modified sources locating in areas designated nonattainment with respect to National Ambient Air Quality Standards under Section 107 of the Clean Air Act are required to meet the condtions set forth in Sections 172 and 173 of the Clean Air Act and in 40 CFR 51.18. The present Massachusetts SIP for review of such sources was approved on January 10, 1980 (45 FR 2036) and September 10, 1980 (45 FR 59579).

EPA revised the requirements for new source review in nonattainment areas on May 13, 1980 (45 FR 31307) and August 7, 1980 (45 FR 52741) and required states to revise their SIPs to include these changes.

State Submittal

In response, the Commissioner of the Massachusetts Department of Environmental Quality Engineering (DEQE) submitted on May 27, 1982 and September 9, 1982 a request for a SIP revision which included:

1. 310 CMR, Appendix A, "Emission Offsets and Nonattainment Review,"
2. Revisions and additions to 310 CMR 7.00, "General Definitions,"
3. A revised Regulation 310 CMR 7.02(b)(5), "Plan Approval and Emission Limitations," which states that major sources locating in a nonattainment area will not be granted approval to construct unless they meet the requirements of 310 CMR, Appendix A, and
4. A revised Regulation 310 CMR 7.02(b)(6) "Plan Approval and Emission Limitations," which states that emissions from sources subject to the requirements of Appendix A must be consistent with reasonable further progress.

EPA Evaluation

EPA has completed a "Technical Support Document" which is available for public review (see "**ADDRESSES**"). The Technical Support Document discusses the Massachusetts submittal and compares it to the federal new source review requirements. Except as noted below, EPA has concluded that the Massachusetts submittal meets EPA requirements.

Plantwide vs. Dual Definition of Source. On October 14, 1981 (46 FR 50766) EPA made further changes to the new source review requirements which states were allowed, but not required, to adopt. In this rulemaking EPA redefined source as an entire plant rather than as both an entire plant *and* as an identifiable piece of process equipment (the "dual" definition) and removed the definition of reconstruction. The effect of these changes was to reduce the number of sources subject to review. The plantwide definition requires that only sources with a net plantwide emissions increase comply with new source review regulations. An emissions increase at a single piece of process equipment would not be subject to review under nonattainment regulations if emissions were reduced by an equivalent amount at another piece of process equipment. Under the plantwide definition of source, reconstruction would apply only to entire plants which are rebuilt. Since few, if any, such reconstructions are anticipated, EPA determined there was no reason to retain this definition.

The DEQE choose to adopt the more recent plantwide definition. On August 17, 1982, however, the U.S. Court of Appeals for the Washington, D.C. Circuit issued an opinion in *Natural Resources Defense Council* v. *Gorsuch*, 685 F.2d 718 (D.C. Circuit, 1982) which, if finalized, will vacate EPA's October 14, 1981 final rulemaking. EPA, therefore, cannot approve the definition of "source" or the supporting definition of "building, structure, facility or installation," as submitted by the DEQE. EPA is proposing to take no action on these definitions insofar as they are used for the review of new sources in nonattainment areas. EPA is proposing to approve these definitions for use elsewhere in the SIP.

We are also taking no action on a provision of Appendix A which would apply only in conjunction with a plantwide definition of source. Paragraph 4(b) of Appendix A requires the installation of reasonably available control technology (RACT) at a modification when there is no increase in total emissions plantwide. That is, a source could reduce emissions elsewhere at its plant to avoid new source review but could not avoid RACT.

The current Massachusetts SIP requires new sources locating in a nonattainment area to follow the requirements of the Emission Offset Interpretative Ruling (EOIR) of January 16, 1979 (44 FR 3274) which contains a dual definition of "source" and a definition of "reconstruction." These definitions and accompanying supporting definitions ("facility" and "fixed capital cost") will remain in effect with respect to review of new sources in nonattainment areas.

Emission Reduction Credit for Source Shutdowns and Production Curtailment

Pursuant to 40 CFR 51.18(j)(3)(ii)(c), source shutdowns and curtailments in production or operating hours occurring prior to the date the new source application is filed may not be used for emission offset credit unless the shutdown or curtailment occurred after August 7, 1977 or one year prior to the date of permit application, whichever is earlier, and the proposed new source is a replacement for the shutdown or curtailment credit. DEQE's regulation, 310 CMF Appendix A, Paragraph 5(q), states only that credit for emissions reductions occurring before July 1, 1979 will not be granted unless credit was applied for in writing before that date.

Because DEQE's regulation does not limit emission credit for prior shutdowns or curtailments to replacement facilities it does not fully meet EPA requirements. Therefore, we cannot approve Appendix A, Paragraph 5(q) which addresses shutdown credits. EPA is now preparing a proposed regulation to implement the settlement agreement reached in *Chemical Manufacturers Association (CMA) v. EPA*, No. 79–1112 (D.C. Circuit February 22, 1982). The regulation will propose to remove the replacement unit restriction on shutdown and production curtailment emission credits. If EPA should finalize the regulation then the DEQE submittal would be approvable. However, until that time, the Federal laws require States plans to restrict the use of shutdown or production curtailment credits to replacement units in nonattainment areas. Therefore, EPA is taking no action at this time on 310 CMR, Appendix A, Paragraph 5(q). At the time the rulemaking effort pursuant to the CMA settlement is resolved, EPA will determine whether the DEQE provision is approvable. The current Massachusetts SIP, the EOIR, meets the requirements of 40 CFR 51.18(j)(3)(ii)(c). Therefore, 40 CFR Appendix S, Emission Offset Interpretative Ruling, Paragraph IV(c)(3) which requires that emission reduction credits from source shutdowns or curtailments in production or operating hours may only be used for replacement facilities, will remain in effect.

Proposed Action

EPA is proposing approval of:

1. The addition of 310 CMR, Appendix A, "Emission Offsets and Nonattainment Review," to the Massachusetts SIP.
2. Revisions to 310 CMR 7.00 "General Definitions" with the exception of the definitions of "source" and "building, structure, facility or installation," insofar as they apply to 310 CMR, Appendix A.
3. A revision to 310 CMR 7.02(b)(5) which states that major sources locating in a nonattainment area must meet the requirements of 310 CMR, Appendix A, "Emission Offsets and Nonattainment Review," with the exceptions noted below.

Exceptions:

(a) The definitions of "source", "facility", "construction" and "fixed capital cost" now in the Massachusetts SIP will remain in effect.

(b) The provision limiting the use of emissions reduction credit resulting from source shutdowns or curtailments in production or operating hours, 40 CFR Appendix S, Emission Offset Interpretative Ruling, Paragraph IV(c)(3), will remain in effect.

4. A revision to 310 CMR 7.02(b)(6) which replaces the reference to the EOIR with a reference to 310 CMR, Appendix A.

EPA is proposing to take no action on:

1. The definitions of "source" and "building, structure, facility or installation" found at 310 CMR 7.00, "General Definitions," insofar as these definitions apply to the review of new sources in nonattainment areas.
2. Paragraph 4 of Appendix A which requires the installation of RACT at modifications at sources in nonattainment areas where there is no overall increase in emissions.
3. Paragraph 5(q) of Appendix A which pertains to source shutdowns and production curtailments.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

Under Executive Order 12291, today's action is not "Major". It has been submitted to the Office of Management and Budget for review.

The Administrator's decision to approve or disapprove the plan revision will be based on whether it meets the requirements of Sections 110(a)(2)(A)–(K) and 110(a)(3) of the Clean Air Act, as amended, and EPA regulations in 40 CFR Part 51. This revision is being proposed pursuant to Sections 110(a) and 301(a) of the Clean Air Act, as amended (42 U.S.C. 7410(a) and 7601(a)).

DEPARTMENT OF THE INTERIOR

Office of the Secretary

41 CFR Part 114-50

Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970; Acquisition for Federal and Federally-Assisted Programs

AGENCY: Office of the Secretary, Interior.

ACTION: Notice of Proposed Model Regulations and Request for Comments.

SUMMARY: The Department of Transportation (DOT) at the request of the Office of Management and Budget, published in the **Federal Register** on April 14, 1983, 48 FR 16198, a notice of proposed rulemaking (NPRM) under the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (Uniform Act). This proposed DOT rule, developed by an interagency working group, is intended to eventually serve as a model for regulations to be issued by all other Federal agencies with programs covered by the Uniform Act. Those agencies will be requested by OMB to review their existing regulations and to revise them to be substantially identical to the final DOT regulations.

State and local agencies and individuals affected by programs of the Department of the Interior may wish to review and comment on the proposed regulation within the prescribed period. Appropriate DOT officials will be available to respond to any questions which may arise on this matter. To the extent possible, it is intended that all major issues be resolved through the DOT NPRM and that subsequent rules of this agency will adhere closely to the DOT model. Copies of comments sent to DOT may also be sent to this Department to the Chief, Division of Real Property Management.

DATE: Comments must be received by the Department of Transportation on or before May 31, 1983.

ADDRESSES: Comments should be submitted to Docket Clerk, OST Docket No. 79, Department of Transportation, 400 7th Street, S.W., Room 10241, Washington, D.C. 20590. Copies of comments may also be submitted to Department of the Interior, Office of Acquisition and Property Management, Division of Real Property, 18th and C Streets, N.W., Room 5513, Washington, D.C. 20240.

June 21—Ramada Inn, Homesteader Room, Mullowney Lane and I-90, Billings, Montana

Hilton Inn, 1901 University Boulevard, NE., Albuquerque, New Mexico

June 22—Civic and Convention Center, Yuma, Arizona

June 23—Bend-LaPine Schools Administrative Center, Room 310, 520 NW. Wall Street, Bend, Oregon

College Theatre, College of Sequoia, Mooney Boulevard, Visalia, California

June 24—Franklin County PUD Building, 1411 West Clark, Pasco, Washington

Oral statements will be limited to 10 minutes. Speakers will not be permitted to trade their time to obtain a longer oral presentation; however, the hearings officer may allow any person additional time after all other comments have been heard. Speakers will be scheduled according to the time preference mentioned in their letter or telephone request, whenever possible. Any scheduled speaker not present when called will lose his or her privilege in the scheduled order, but will be recalled after all the scheduled speakers have been heard. Speaker requests will be scheduled up to 2 working days preceding the hearings and any subsequent request will be handled on a first-come-first-served basis following the scheduled presentations.

Individuals or organizations wishing to speak at the hearings or who desire additional information should contact the appropriate office listed below:

Hearing: Pasco, Washington, Boise, Idaho, and Bend, Oregon.

Contact: Regional Director, Pacific-Northwest Region, Bureau of Reclamation, 550 West Fort Street, Box 043, Boise, Idaho 83724, (208) 334-1938.

Hearing: Los Banos, Willows, and Visalia, California.

Contact: Regional Director, Mid-Pacific Region, Bureau of Reclamation, Federal Office Building, 280 Cottage Way, Sacramento, California 95825, (916) 484-4680.

Hearing: Yuma, Arizona.

BILLING CODE 4310-09-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6485]

National Flood Insurance Program; Proposed Flood Elevation Determinations; Massachusetts; Correction

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule; correction.

SUMMARY: This document corrects a Notice of Proposed Determinations of base (100-year) flood elevations previously published at 48 FR 4686 on February 2, 1983. This correction notice provides a more accurate representation of the Flood Insurance Study and Flood Insurance Rate Map for the Town of Otis, Berkshire County, Massachusetts.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, National Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287-0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the correction to the Notice of Proposed Determinations of base (100-year) flood elevations for selected locations in the Town of Otis, Berkshire County, Massachusetts, previously published at 48 FR 4686 on February 2, 1983, in acccordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under Section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 10 and 157

[Docket No. CGD 77-064]

Licensing of Pilots; Manning of Vessels—Pilots

AGENCY: Coast Guard, DOT.

ACTION: Notice of public hearings: reopening and extension of comment period.

SUMMARY: On January 27, 1983, the Coast Guard published a Supplemental Notice of Proposed Rulemaking regarding the licensing of pilots (48 FR 3912). At that time the Coast Guard stated that no public hearings were planned, but that they may be held if written request for hearings were received and it was determined that the opportunity to make oral presentation would aid the rulemaking process. The Coast Guard, based upon numerous written requests, has determined that hearings are desirable. As a result of the decision to hold public hearings, the comment period is reopened.

DATES: The Coast Guard will hold public hearings on June 8, 1983, June 14, 1983, and June 29, 1983. All hearings will begin at 10 a.m. and end at 4 p.m.. Comments must be received by July 15, 1983.

ADDRESSES: Comments should be submitted to the Commandant (GCMC/44), (CGD 82–085), U.S. Coast Guard Headquarters, Washington, D.C. 20593. Comments may be delivered and will be available for inspection at the Marine Safety Council, Room 4402, U.S. Coast Guard Headquarters, 2100 Second Street, SW, Washington, D.C. 20593, phone (202) 426–1477, between the hours of 7:00 a.m. and 5:00 p.m., Monday through Friday except holidays.

Public hearings will be held at the following locations:

(1) June 8, 1983, Base Theater, U.S. Naval Air Station, Belle Chase, Louisiana
(2) June 14, 1983, Ship Model Room, Seamen's Church Institute, 15 State Street, New York, New York
(3) June 29, 1983, Second Floor Assembly Hall, Soldiers' and Sailors' Memorial Building, 1315 Chestnut Street, St. Louis, Missouri.

Attendance is open to the public. Persons wishing to present oral statements at the hearings should notify the Executive Secretary no later than the day before the hearing.

FOR FURTHER INFORMATION CONTACT: Captain C. M. Holland, Executive Secretary, Marine Safety Council (G-CMC/44), U.S. Coast Guard Headquarters, 2100 Second Street, S.W., Washington, D.C. 20593, (202) 426–1477.

Dated: May 2, 1983.

Clyde T. Lusk, Jr.,

Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

BILLING CODE 4910-14-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Ch. I

[CC Docket No. 83-427; FCC 83-176]

Access to Telecommunications Equipment by the Hearing Impaired and Other Disabled Persons

AGENCY: Federal Communications Commission

ACTION: Proposed rule

SUMMARY: The Commission adopts Notice of Proposed Rulemaking designed to implement the Telecommunications for the Disabled Act of 1982, Pub. L. 97–410. The Notice of Proposed Rulemaking solicits comments from interested parties with respect to the following issues: (1) How reasonable access to telephone service by the hearing impaired may be ensured: (2) what classes of essential telephones should be made hearing-aid compatible: (3) what technical standards should be adopted to implement the Act; (4) how labeling as to the hearing-aid compatibility of telephone equipment may be accomplished; and (5) what types of specialized customer premises equipment (CPE) for the disabled may be offered by carriers under tariff and be the subject of a state commission-sponsored program to subsidize such specialized CPE is subsidized through regulated service revenues.

DATES: Comments due by June 15, 1983. Replies due by July 15, 1983

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Gregory J. Vogt, Enforcement Division, Common Carrier Bureau, Federal Communications Commission, Washington, D.C. 20554. Telephone No. (202) 632–4890.

Notice of Proposed Rulemaking

In the matter of access to telecommunications equipment by the hearing impaired and other disabled persons; CC Docket No. 83–427.

Adopted: April 27, 1983.
Released: May 4, 1983.

By the Commission: Commissioner Jones absent.

1. On January 3, 1982, the President signed into law the Telecommunications for the Disabled Act of 1982, Pub. L. 97–410 (Disabled Act).[1] *See* Appendix A for relevant text. The Act is designed to promote access to telephone service by the hearing impaired. It is also designed to enable telephone companies to accommodate the needs of persons who by reason of a speech, hearing, sight or mobility impairment require the use of specialized customer premises equipment (CPE) to access communications services. The Act directs this Commission to "complete rulemaking actions required by this section and issue specific and detailed rules and regulations resulting therefrom within one year after the date of enactment of the Telecommunications for the Disabled Act of 1982." Disabled Act, § 610(f). This Notice of Proposed Rulemaking is intended to comply with the provisions of the Act.

2. Notice is hereby given that the Commission will amend, modify or create additional provisions in Part 68 and other appropriate sections of the rules to carry out Congress' purpose. Comments are solicited on the issues indicated below. Based upon these comments we will promulgate final rules necessary to implement the provisions of the Disabled Act. In particular, we will issue final rules to ensure that the hearing impaired have available reasonable access to telephone service. We shall require that essential telephones be made hearing/aid compatible. In addition, the Commission will adopt or approve technical standards necessary to enforce the Act as well as establish labeling requirements on equipment packaging to inform consumers of the hearing aid compatibility of telephones. Moreover, Congress has mandated that we issue rules to permit common carriers to offer specialized CPE needed by disabled persons.[2]

I. Background

3. A significant minority of the population of the United States suffers from different degrees of hearing, sight, speech or mobility impairment. Congress stated that

> Hearing impairments affect a large number of Americans in all age groups. The [Committee] has determined that 10.6 million citizens have sufficiently impaired hearing to require the use of a hearing aid. Four hundred thousand are totally deaf, while twice that number cannot understand any speech that is not amplified to a level that is medically dangerous. One of the most frustrating aspects of hearing impairment and deafness is the inability to use telecommunications media on which modern life has grown so dependent. Persons with normal hearing may be unable fully to appreciate the pervasiveness of the telephone booth in commercial transactions and personal contacts. The inability to use this instrument, except through an interpreter, is not only a practical disability but a constant source of dependency and personal frustration. Conversely, the ability independently to use the telephone may enable persons with other severe handicaps—such as paralysis or blindness—to lead self-sufficient lives in regular contact with society. The Committee believes that making the benefits of the technological revolution in telecommunications available to all

[1] The Act encompased House substitute language for the language of S. 2355, which would have amended the Communications Act of 1934 to provide reasonable access to telephone service by the hearing impaired. *See* S. Rep. No. 97–503, 97th Cong., 2d Sess. (1982). The Senate language was sufficiently different from the House version to make the Senate Report of little use in interpreting the Disabled Act. There was no Conference Report.

[2] We intend the term "CPE" to be synonymous with the term "terminal equipment" which is used in the Disabled Act. By a separate order decided today in CC Docket 78–50, *Telecommunications Services for the Deaf and Hearing Impaired*, FCC 83–177 (adopted April 27, 1983) (Docket 78–50 Order), we terminate a proceeding which explored and provided a national forum for views on various issues related to the telecommunications needs of the deaf and hearing impaired. Although the major focus of that Notice of Inquiry proceeding concerned the adequacy of terminal equipment utilized by those with total hearing losses, additional questions regarding other types of telephone service as well as the compatibility of telephones to hearing aids were also raised. As stated in that order, several of the issues, which are addressed in the Disabled Act, will be considered in the current proceeding, based upon updated information requested in this Notice of Proposed Rulemaking. Other issues raised in that Notice of Inquiry are resolved in the Docket 78–50 Order.

VOL 48 ISS 90 MY 9 1983 UMI

Americans, including those with disabilities, should be a priority of our national telecommunications policy.

House Report No. 97–888, 97th Cong., 2d Sess., at 4–5 (1982) (House Report).

4. The specialized CPE needed by disabled persons is often more expensive than equipment needed by nondisabled persons, and some is so expensive as to be unaffordable for most disabled persons without some form of financial assistance. In enacting the Disabled Act, Congress made the determination that a competitive environment may not always be the most effective means for assuring the availability of specialized equipment for the disabled. The House Report stated:

> The detariffing of terminal equipment will cause competition to drive prices to costs and will effectively prevent the State commissions from regulating the price and other terms under which the consumer obtains terminal equipment. The Committee believes that, as applied to disabled persons, such a policy could lead to substantial price increases and reductions in the access to the nationwide network which persons with disabilities currently enjoy. It is the purpose of this legislation to increase the access of the physically impaired to new technologies and not allow the level of service currently available to deteriorate.

Id. at 13.

5. The Telecommunications for the Disabled Act of 1982 modified the Commission's decision in Computer II.[1] Computer II required, among other things, that all CPE be offered on a detariffed basis. The Act creates an exception to Computer II for telephone companies' provision of specialized CPE needed by disabled persons to communicate. Disabled Act, § 610(g). In response to the requirements of the Act, and in response to two waiver petitions, one filed by AT&T and one filed by the Organization for the Use of the Telephone, we granted a waiver of the Computer II requirements in order that no disruption in service to disabled persons or telephone companies would occur before we could implement the Disabled Act. *See American Telephone & Telegraph Co.*, FCC 82–580 (released January 25, 1983) *(Disabled Waiver Order).*

The waiver permits, but does not require, telephone companies to offer under tariff specialized CPE needed by disabled persons and permits the Bell Operating Companies (BOCs) to offer such equipment without forming a separate subsidiary.

6. The Act goes farther with respect to the communications needs of the hearing impaired, the largest group of disabled persons. The Act requires that we issue regulations that will ensure reasonable access by the hearing impaired to "telephone service." The legislative history of the Act defines telephone service to include specialized CPE and transmission service. House Report at 8. In addition, the Act requires that we make all "essential telephones" compatible with hearing-aids which have telephone switches. *See* para. 19, *infra.* The enforcement of those regulations must be delegated to state public utility commissions once they adopt these regulations. Therefore, Congress has determined that in its nationwide scheme for promoting access to the telephone network by the hearing impaired, states should play an integral role in implementing the Act through enforcing regulations adopted by this Commission. To effectuate these provisions, the Commission is also required to adopt or approve technical standards to assure hearing-aid compatibility of telephones. Although we will be the primary enforcers of the technical standards to be adopted pursuant to the Act under our Part 68 registration program, as a practical matter, state commissions will also play a significant role in enforcing those technical standards due to their responsibilities to implement the hearing-aid compatibility provisions of the Act. Further, the Commission is to adopt labeling requirements to inform consumers whether CPE they may purchase is hearing-aid compatible.

II. Issues on Which Comments Are Sought

7. The provisions of the Act which should be addressed in this rulemaking proceeding fall into five major categories: (1) ensuring reasonable access by the hearing impaired to telephone service, (2) making essential telephones hearing-aid compatible, (3) adopting technical standards necessary to implement the policies covered in the first two issues outlined above, (4) establishing labeling requirements for the packaging of hearing-aid compatible equipment, and (5) providing specialized CPE needed by disabled persons to communicate.

8. Interested parties are invited to propose specific language for rules to be adopted by this Commission pursuant to the Disabled Act. Two general issues affect all rules contemplated by the legislation. First, any rules or regulations issued must be framed with consideration given to the costs and benefits implicated by particular rules. Disabled Act, § 610(e). Thus, commenting parties should address the quantitative and qualitative costs and benefits to be expected from the implementation of any particular proposal which telephone users in general, including those who have hearing or other impairments, will incur. Second, any regulations should encourage the use of currently available technology and not discourage or impair the development of improved technology. Comments should consider this goal. *Id.*

A. Access to Telephone Service by the Hearing Impaired

9. The Disabled Act is intended in part to implement an important aspect of this Commission's general obligation "to make available, so far as possible, to all the people of the United States a rapid, efficient, Nation-wide, and world-wide wire and radio communication service with adequate facilities at reasonable charges. . . ." 47 U.S.C. 151. Subsection (a) requires the Commission to adopt regulations to ensure reasonable access to telephone service by the hearing impaired. The House Report reads:

> This subsection directs the attention of the Commission to the special problems of persons with impaired hearing. The mandate of the Commission to ensure reasonable access to telephone service is limited to regulations and technical standards that ensure the availability of terminal equipment and transmission service for persons with impaired hearing and that govern the use of such equipment and its interconnection with telephone services for the transmission of voice or data.

House Report at 8. "Telephone service" potentially includes not only CPE provided for individual, rather than public, use and access to telephone lines, but also other incidental services, including operator and directory assistance, recorded message services, information services and the like.

10. Incidental transmission services are potentially included within the definition of "telephone service." In particular, information services with respect to the types of CPE or components of CPE which are needed for a hearing impaired individual to access the network may be included. For instance, AT&T has established Telecommunications Centers for Disabled Customers in various locations throughout the country which serve as information centers to inform customers of the types of equipment needed for them to effectively access telephone lines. *See* Petition for Waiver filed by American Telephone and Telegraph Co., October 22, 1982.

11. Deaf individuals may also require other specialized transmission services, such as TTY activated operator and directory assistance services, and other dial-up services incidental to transmission services. Currently, AT&T operates centers providing business office and directory assistance services for deaf TTY users. Access to AT&T's operator assistance services is provided through a nationwide toll free number, (800) 855–1155, equally available for use by both Bell customers and customers of independent telephone companies. Commenting parties are encouraged to address the issue of whether these services should be expanded to include other types of services and to other carriers. Comments are solicited as to those incidental transmission services which should be included within the definition of "telephone service." Commenting parties should describe the services to be included and the extent to which they are already available from carriers or otherwise.

12. At first glance, the inclusion of access to specialized terminal equipment contained in subsection (a) potentially overlaps with the provisions of subsection (b), which mandates that the Commission require all "essential" telephones to be made hearing-aid compatible. The legislative history states that the Commission may not generally designate residential telphones as "essential" telphones. *See* paras. 20, 21, *infra.* Thus, we conclude that the provisions of subsection (a) relating to reasonable access to telephone service apply to terminal equipment provided for private use and does not apply to telephones provided for public use.

13. Subsection (a) grants this Commission the discretion as to how to ensure reasonable access to the CPE necessary to access communications service. Persons with less than total hearing loss may require special hearing-aids containing "telephone switches" to use otherwise available voice communications services. *See* para. 19, *infra.* A second, often less desirable alternative to hearing-aid compatible telephones is CPE with an amplified hearing handset, which can produce sufficient volume to permit persons who are hearing impaired but do not have hearing aids to use the telephone. Amplified hearing handsets can be attached to many models of telephone sets to enable the hearing impaired to hear more effectively. Amplified hearing handsets, however, do not reduce hearing-aid feed back or minimize background noise.

14. We solicit comments with respect to how this Commission should ensure reasonable availability of specialized terminal equipment. One way to provide such access would be to require carriers to provide either a hearing-aid compatible telphone or a telephone with an amplified hearing handset upon request. An alternative would be for this Commission to require carriers to make available devices which can be installed on or in a telephone to make that CPE hearing aid compatible. Commenting parties are urged to suggest other methods to implement reasonable access to specialized CPE.

15. The Act contemplates that this Commission should not impose on manufacturers the responsibility of complying with the legislation. House Report at 11. The responsibility to comply could be provided in a variety of ways. One way of making equipment available is pursuant to section 610(g) of the Disabled Act by which carriers can tariff specialized CPE needed by the disabled, including the hearing impaired, and by which state public utility commissions may establish programs whereby the costs of such a specialized CPE can be financed through funds received from rates for communications services. Alternatively, we might prohibit any equipment from being registered in the future under part 68 of our Rules unless it is hearing-aid compatible. Another option would require a carrier to provide hearing-aid compatible CPE and amplified hearing handsets upon customer request. Still another possibility would be to require carriers only to inform customers where specialized CPE may be obtained. Interested parties should provide comments concerning whether the rules to be adopted should provide flexibility to states as to how reasonable access should be ensured.

16. For the severely hearing impaired, or those who are totally deaf, visual output telecommunications devices for the deaf (TDDs or TTYs) can be employed to permit direct communications with other TDDs. Most have a "soft" display which uses light emitting diodes and are connected to the telephone network through the use of an acoustic coupler or registered data coupler. Several manufacturers offer TDDs under various arrangements, some through local telephone companies. In addition, personal computer terminals may be useful to permit the deaf to communicate.

17. Commenting parties should describe how the provision of TTYs for the deaf should be treated. Should one of the foregoing approaches be used for TTYs or is some other alternative necessary? One aspect of promoting access by the deaf to telephone service concerns the compatibility of TDDs and TTYs with other services for the hearing imparied. As described in the Docket 78–50 Order, older TTYs employed the five bit Baudot code with a half duplex modem while most of the newer devices, as well as personal computer terminals, utilize the eight bit ASCII format with a full duplex modem. Some of the newer TDDs contain a switch which enables those terminals to communicate with either Baudot or ASCII devices. Commenting parties should address whether there is any action this Commission should take in implementing the Disabled Act to rectify any incompatibility problems between Baudot and ASCII devices. Compatibility would primarily be accomplished through dual capability devices capable of communicating in both ASCII and Baudot formats.

18. Any rules which we adopt pursuant to subsection (a) must be framed with a concern for the costs incurred and benefits achieved by the rules. In order to evaulate the costs and benefits we must have data as to what carriers and manufacturers presently do for the hearing impaired. We request that carriers and manufacturers describe the ways in which they presently accommodate the needs of the hearing impaired and, particularly, state the percentage of CPE which is presently hearing-aid compatible or which is equipped with amplified hearing handsets. In addition, carriers and manufacturers should state the percentage of telephones that are hearing-aid compatible which are presently being provided or which will be provided in the future. Other interested parties are encouraged to comment on present and future carrier or manufacturer accommodations to the communications needs of the hearing impaired.

B. Essential Telephones

19. Section 610(b) of the Act provides that the Commission shall require that "essential" telephones contain internal means for effective use with hearing aids. Congress noted:

> Most hearing aids have a built-in telephone pickup, or "telecoil," which is activated by a switch on the hearing aid. When this switch is placed in the "telephone" position, the microphone is turned off and the hearing aid can be used at full volume without feedback and with minimal background noise. Unless this type of hearing aid becomes

[1] Amendment of Section 64.702 of the Commission's Rules and Regulations (Second Computer Inquiry), 77 FCC 2d 384 (1980) (Final Decision), *reconsideration*, 84 FCC 2d 50 (1980), *further reconsideration*, 88 FCC 2d 512 (1981), *aff'd sub nom.* CCIA v. FCC, 693 F.2d 1962 (D.C. Cir. 1982), *petition for cert. filed*, 51 U.S.L.W. 3014, 3615 (U.S. February 9, 10, 1983) (Nos. 82–1331, 82–1332).

1983
UMI

technologically obsolete at some future time and disappears from popular use, it will be considered "specially designed for telephone use." Currently, these hearing aids are activated by the strong magnetic field generated by some 90 percent of all telephone receivers, such as the Western Electric 500 set.

The legislation focuses on those "essential telephones" to which the hearing impaired must have access if they are to function effectively in modern society. Companies are free to manufacture and to market non-compatible telephones, and businesses and consumers may purchase these instruments for use by persons who do not have hearing impairments.

House Report at 8–9. The Act contemplates that the Commission's rules implementing this subsection will preempt inconsistent state requirements. *Id.* at 10. In order to achieve the purposes of the Act in this regard the Commission is required to define the meaning of "essential" telephones. *Id.* at 8–10. The Act defines three classes of essential telephones: (1) coin-operated telephones; (2) telephones provided for emergency use; and (3) other telephones frequently needed by persons with hearing aids.

20. The legislative history describes these categories of essential telephones as follows:

"Coin-Operated Telephones"

The term "coin-operated telephone" includes any telephone which is operated with coins, whether it is located on public property or in a "semipublic" location (such as a drug store, gas station, or private club). Since significant electrical power is required to accept coins, compatibility is now economical and should continue to be so in the future. Although the requirement that coin-operated telephones be retrofitted is universal in application, the overwhelming majority of coin phones are already hearing-aid compatible.

"Telephones Provided for Emergency Use"

The definition that the rulemaking adopts for "telephones provided for emergency use" must enumerate the types of locations in which access to a telephone may save persons from serious bodily injury, theft, or a life-threatening situation. The Committee intends that the term be defined to include voice-carrying devices in elevators, mineshafts, and other places where a person with impaired hearing might be isolated in an emergency. The term must also include telephones specifically installed to alert the police, fire department, or other emegency authorities; typically such a telephone cannot reach other persons on the network. Finally, the Commission should prescribe specific guidelines for telephones provided to avoid life-threatening situations in hospitals and other situations in which persons with impaired hearing may be confined.

"Telephones Frequently Needed by Persons With Impaired Hearing"

The third group of essential telephones to be defined by rule, those "frequently needed by persons with impaired hearing," must be hearing-aid compatible, but the legislation specifically prohibits the Commission from requiring equipment installed prior to the effective date of the Act to be retrofitted. This class includes any telephone that a carrier makes available for public use that is not either coin-operated or provided for emergency use. For example, after the date of enactment, new "Charge-a-Call" phones (or at least a reasonable number at each location) must be compatible with hearing aids unless they are in the proximity of compatible phones providing the same range of service. The Committee intends that the Commission employ a common-sense approach: if a usable pay phone is nearby and readily available, the incompatible instrument is not "needed by the hearing impaired."

The Committee further intends that the Commission include essential telephones operated by persons other than carriers in this category after a detailed examination of the costs involved and of the benefits that the hearing-impaired and those with whom they communicate will realize. The definitions must be specific and provide detailed guidance as to the locations where such telephones must be available.

* * * * *

Places of Business.—In the absence of extraordinary costs of implementation, persons with impaired hearing should be confident that they can effectively use any telephone made generally available to invitees in a place of business or in a public building, including phones restricted to local calling areas or to internal extensions.

Workplaces.—The Committee is also concerned that inability to use telephones should not impair the productivity of persons using a hearing aid in their place of work. An employee with impaired hearing should have access to at least one compatible telephone unless his duties would not involve the use of such a telephone if it were available. Regulations must be sufficiently specific to enable employers to comply without undue risk of an unexpectedly adverse interpretation in a subsequent proceeding for compliance.

Hotels and Motels.—The Committee observes that current law allows the Commission directly to regulate the offering of telephone service by hotel and motel owners. See *Ambassador, Inc. v. United States*, 325 U.S. 317 (1944). The legislation does not, however, impose costly requirements on these businesses. As an alternative to providing compatible telephones in every room, a hotel may set aside a reasonable number of rooms (under a formula that the regulations will specify) for the hearing impaired. Alternatively, the hotel owner may maintain a supply of compatible instruments and install them at the request of a guest who uses a hearing aid. * * *

House Report at 9–10.

21. It appears that residential telephones cannot be defined as "essential." Congress has stated that

"Under no circumstances may the Commission designate as an essential telephone any residential telephone or any other telephone if all persons who would normally use it do not have hearing impairments."

Id. at 9. Comments from telephone companies and other interested parties are solicited as to the extent various classes of essential telephones are already hearing-aid compatible.

22. In addition, comments on the classes of equipment to be designated essential are solicited. Proposed definitions should specify the places and types of telephones to be included for each class of essential telephone and, as required with other provisions of the Act, an evaluation of the costs and benefits of the inclusion of particular locations within such definitions. Special attention should be directed to the timetable and means by which implementation of any proposed rules should be achieved.

C. Technical Standards

23. As indicated, the Act envisions that the Commission will establish or approve technical standards for compatibility between hearing aids and telephones. These standards would consist primarily of a definition relating to the magnetic field emanating from telephone handsets. The legislative history to the Act states that

The Committee chose not to specify that telephones necessarily use this method, known as "inductive coupling," in order to encourage any new technology which is at least equal to the quality of use that inductive coupling currently provides. [4] A telephone that couples inductively (without the use of a portable adapter) would, however, satisfy this requirement to provide internal means for effective use with hearing aids specially designed for telephone use. [5] Subsection (b)

[4] Although the additional costs of making telephones that are compatible with hearing aids are not now signifiant, it is possible that improvement in the network—such as a reduction in power levels—may increase this differential in costs.

[5] Persons with impaired hearing have complained that external adapters are too bulky to carry conveniently, draw attention to an apparent disability that has been overcome in all other situations, are susceptible to loss and damage, and require replacement of batteries after 90 hours of use (potentially at an inconvenient time). Western Electric has announced plans to introduce a newly designed adapter that will mitigate some of these inconveniences.

does not require telephones to include internal amplifers; these devices, which are available in some public telephones, enhance use of the telephone by some persons with impaired hearing, whether or not their hearing aids are specially designed for telephone use.

House Report at 8. The Report continued:

The Committee intends the Commission to rely on the development of standards by industry, but this section also gives the Commission authority to set such standards in the absence of industry agreement or in the event consumers establish that the standard fails to provide satisfactory results.

The Committee does not intend technical standards to freeze technology by specifying a permissible design and excluding potentially superior alternatives. . . .

The Committee intends that any standard established by the Commission (or developed by industry and approved by the Commission) should be nationally uniform, and that States be preempted from establishing conflicting technical standards. With the exception of this subsection and subsection (b), nothing in the legislation changes the division of jurisdictional responsibility between the Commission and the State commissions or in any other way diminishes the rights and authorities of the States as they existed on the date of enactment.

Id. at 11 (footnote omitted). Within these general guidelines we solicit proposed technical standards for hearing-aid compatible telephones.

24. The Commission has received a letter from the Electronic Industries Association (EIA) stating that its members are actively working on an industry-wide standard for telephone handset compatibility with hearing aids. Letter from EIA to Chief, Common Carrier Bureau, dated January 11, 1983. The EIA has requested that this technical issue be separated from other issues in this rulemaking so that its study group can continue its work outside the rulemaking process with Commission staff participation. We believe that the rulemaking process offers the best means by which all rules related to hearing-aid standards, including technical compatibility, can be developed. Accordingly, all interested persons and groups, including EIA, should submit proposed technical standards within the time frame and procedures established in this Notice.

25. In previous rulemakings involving technical issues we have found it useful to convene informal meetings of industry representatives and other interested persons under the aegis of the Commission, for the purpose of discussing and achieving agreement on the technical issues involved. *See, e.g., Common Carrier Interconnection Rules, Notice of Proposed Rulemaking*, 72 FCC 2d 330 (1979), *First Report and Order*, 76 FCC 2d 246 (1980). We believe that because the bulk of regulatory responsibility in relation to technical standards involves engineering matters that can in large measure be resolved by discussion in a group forum, this procedure would also be useful here. In addition, given that any rules required by the Disabled Act must be adopted by the end of 1983, those meetings should prove more expeditious than other procedural alternatives. Accordingly, we delegate to the Chief, Common Carrier Bureau authority to convene, conduct, participate in and schedule meetings of interested persons and groups in order to specify and resolve technical issues necessary to recommend to the Commission a proposed hearing-aid compatibility standard. [6] Reasonable notice of any public meeting shall be provided by Bureau Order. On the basis of the data provided at these meetings and other materials presented in the comments, the Commission will determine the appropriate standards that can best achieve the mandates of the Act.

D. Labeling

26. The Act also provides that the Commission establish requirements for the labeling of packaging for CPE offered for sale or lease to inform consumers whether such equipment is hearing-aid compatible. Disabled Act, § 610(d). The legislative history provides:

Subsection (d) directs the Commission to develop requirements for packaging materials that explain, in a clear understandable manner, whether and how persons with impaired hearing may use such equipment effectively. Although the legislation does not specifically require manufacturers to label telephone equipment, the Committee observes that it would be desirable for persons using hearing aids to be able to identify noncompatible telephones whenever traveling outside their homes.

Id. at 12. Interested parties should make recommendations as to the specific content of such labeling and whether hearing-aid compatibility data should be provided with all telephones, only certain telephones, or even for certain registered equipment other that telephones.

27. In addition, although not required by the Disabled Act, comments are solicited with respect to whether labeling placed directly on CPE should reflect whether a particular piece of equipment is hearing-aid compatible. One way in which such labeling could be accomplished would be to place a letter, such as an "H", in a standard conspicuous location on all compatible devices. Commenting parties are requested to propose alternatives, and to identify the costs involved in labeling such equipment.

E. Specialized CPE for Disabled Persons

28. In addition to requiring that the Commission take steps to ensure access to telephone service and essential telephones for the hearing impaired, the Disabled Act creates an exception to our Computer II decisions by permitting carriers to provide specialized CPE needed by persons whose speech, vision, hearing or mobility is impaired. The statute also permits state public utility commissions to allow carriers to recover the reasonable and prudent costs of providing such equipment in the tariff rates for communications services. Disabled Act, § 610(g).

29. The Act's scheme of promoting access to specialized CPE by disabled persons was described by Congress as follows:

Reliance on the private sector to provide access to telecommunications is particularly appropriate in times of fiscal austerity and contraction of government. Ensuring the availability of specialized equipment may enable handicapped individuals to support themselves, and in many cases to avoid institutionalization. The Committee is particularly interested in promoting devices that enable the elderly and the disabled safely to lead independent self-supporting lives. For the paralyzed veterans, "hands-off" telephone equipment may mean the difference between being able to live at home and work in an office or leading a life of constant surveillance in a hospital. Recently, radio devices have been developed that alert a patients' doctor if he fails to signal periodically that he is not in need of medical assistance. The Telecommunications for the Disabled Act allows these various devices to be offered at affordable rates, whether or not a patient is institutionalized, thereby reducing hospital costs and encouraging more economic treatment of the physically impaired as outpatients.

House Report at 5.

30. There now exist a variety of programs, mostly at the state level, which promote access to telecommunications equipment by those with impaired sight, hearing, speech or mobility. For instance, a California statute orders its state public utility commission to design a program to require telephone companies to provide a deaf TTY/TDD at a cost not to exceed the basic exchange rate. *See Calif. Pub. Util. Code* § 2831. New York and Michigan have similar statutes. In addition, certain telephone companies have voluntarily provided CPE for the disabled at the customer's request. In

[6] To permit any necessary judicial review of these meetings, minutes will be taken and placed in the public file.

VOL
48
ISS
90
MY
9
1983
UMI

some states, subsidies to manufacturers of equipment needed by the disabled are provided so that the cost of such equipment may be reduced.

31. As mentioned previously, pursuant to this legislation and on an interim basis, we waived the Computer II rules to permit telephone companies to provide under tariff specialized CPE needed by disabled persons to communicate. *Disabled Waiver Order*, para. 18. In addition, the BOCs were permitted to offer such equipment without first establishing a separate subsidiary for providing CPE. We did not decide the question of whether the states could, consistent with the legislation, require carriers to offer specialized equipment under tariff. *Id.* at paras. 18–19.

32. Neither the Act nor the legislative history specifically defines the term "specialized terminal equipment needed by" disabled persons. The House Report stated

> Examples make clear the limited scope of the statutory exception. Speakerphones may be vital to a person with impaired mobility; to a businessman they are a mere convenience. This subsection would only authorize a subsidy directed exclusively at the disabled. In the case of equipment for non-voice communications by the disabled, the State commission could extend a subsidy to non-handicapped persons who require such equipment regularly to communicate with the disabled.

House Report at 13. During the debates concerning the Act, the House sponsor to the bill stated that this Commission had the discretion to define "specialized CPE." 128 Cong. Rec. H9484 (Daily Ed., December 13, 1982) (comments of Rep. Wirth). For interim purposes, we defined that term in the *Disabled Waiver Order*, to include "CPE which has as at least one of its important purposes specialized application enabling disabled persons to communicate." *Disabled Waiver Order*, para. 15. We also included "special assemblies" which comprise special configurations of CPE necessary to meet the telecommunications needs of a disabled customer. Nevertheless, we stated that the term "specialized equipment" did not include basic equipment, such as push button telephones or telephones with lighted dials which may be incidentally useful to disabled persons in communicating over the nationwide telephone system. *Id.* Interested parties are invited to submit comments on the definition of the term, "specialized terminal equipment," as used in the Act. Should the definition contained in the *Disabled Waiver Order* be used? Should the term be restricted to equipment which is specifically designed for use by disabled persons?

33. The statutory language apparently leaves to the carrier the initial decision whether or not to tariff specialized equipment for the disabled. Although the legislation is silent on the question, the legislative history of the Disabled Act makes clear that "the Commission cannot interfere with the State's decision to tariff such equipment and to allow the recovery of reasonable and prudent costs not charged directly to the user in tariffs for regulated services." 128 Cong. Rec. H9484 (Daily Ed., December 13, 1982) (remarks of Rep. Wirth). Therefore, in our view, the Disabled Act contemplates that this Commission should leave to carriers and State commissions the decision whether or not specialized equipment will be tariffed, although this Commission will determine what specialized equipment falls within the meaning of the statute.

34. In developing such a program, however,

> The State commission may allow only reasonable and prudent costs to be included in any tariff. The Committee intends that any excessive costs resulting from discriminatory procurement practices would not be considered reasonable and prudent. To allow recovery in excess of reasonable and prudent costs would severely distort the nationwide market for terminal equipment.

House Report at 14.

35. In addition, the House Report to the Disabled Act states that "[i]n light of the record of voluntary cooperation by the industry, the Committee found it unnecessary specifically to address the possibility of a 'recalcitrant carrier' that might decline to participate in a program of subsidized offerings sanctioned by the State commission. * * * These matters may be considered, if necessary, in formulating the required modifications to *Computer II*." House Report at 14. Because the Disabled Act contemplates that State commissions shall for the most part enforce the regulations issued pursuant to the Act, *see* Disabled Act, § 610(h), we believe that State commissions should determine, in a manner which is consistent with their state statutes and the Disabled Act, whether to require a carrier to participate in a program of subsidized equipment offerings.

III. Regulatory Flexibility Act Initial Analysis

36. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 601, *et seq.*, the Commission issues the following regulatory flexibility initial analysis:

A. Reason for Action

37. This Notice of Proposed Rulemaking was prompted by the Telecommunications for the Disabled Act of 1982, Pub. L. 97–140 (to be published at 47 U.S.C. 610). Through this proceeding, the Commission seeks to comply with the congressional purposes contained in that legislation.

B. Objective

38. The purpose of this Notice of Proposed Rulemaking is to initiate a rulemaking and seek public comment on the method by which this Commission can assure reasonable access to telephone service by the hearing impaired and to establish regulations for making essential telephones compatible with hearing aids designed for telephone use. This rulemaking would also establish or adopt technical and labeling standards for hearing-aid compatible telephones. In addition, this rulemaking would define the circumstances under which specialized equipment needed by the hearing impaired and other disabled persons may be provided pursuant to state public utility commission regulations.

C. Legal Basis

39. The legal authority for seeking comment on these policies is sections 1 and 4(i) of the Communications Act of 1934, as amended (47 U.S.C. 151, 154(i)) and the Telecommunications for the Disabled Act of 1982, Pub. L. 97–410 (to be published at 47 U.S.C. 610).

D. Description, Potential Impact and Number of Small Entities Affected

40. The primary impact of the rules which would be issued pursuant to this Notice of Proposed Rulemaking would be on the nation's telephone companies, 935 of which have annual operating revenues of under one million dollars. One of the purposes of this rulemaking is to discover the dollar impact which could potentially befall all telephone companies, including those which are small entities. Nevertheless, normally the types of costs which would be incurred under the rules required by the legislation are recoverable by telephone companies in the amounts paid by ratepayers for communications services. Thus, the potential impact on these small entities should be slight. Furthermore, small manufacturers of equipment or component parts of equipment which enable disabled persons to more effectively communicate over the nationwide telephone network may be affected by the rules which are adopted. The extent of such an effect and whether the rules will be beneficial or adverse to those small manufacturers will not be known until comments are received in this proceeding.

E. Recording, Recordkeeping and Other Compliance Requirements

41. The rules to be issued pursuant to this proceeding should not increase to any measurable degree recordkeeping or other reporting requirements of small entities over and above that which is presently required. Telephone companies will have to comply with the rules issued pursuant to this rulemaking proceeding.

F. Federal Rules Which Overlap, Duplicate or Conflict With These Rules

42. The only Federal rule which may overlap or conflict with the rules is contained in a Commission *Memorandum Opinion and Order*, FCC 82–580 (released January 25, 1983). That order will be superseded and amended by the rules which are issued pursuant to this rulemaking proceeding.

G. Any Significant Alternatives Minimizing Impact on Small Entities and Consistent With Stated Objectives

43. Any alternatives which minimize the impact on small entities and which would remain consistent with stated objectives will be considered during the course of this rulemaking proceeding.

H. Comments Are Solicited

44. Written public comments are requested on the Initial Regulatory Flexibility Analysis. These comments must be filed in accordance with the same filing deadlines set for comments on the balance of the Notice of Proposed Rulemaking, but they must have a separate and distinct heading designating them as responses to the regulatory flexibility analysis. The Secretary shall send a copy of this Notice to the Chief Counsel for Advocacy of the Small Business Administration in accordance with section 603(a) of the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.*).

IV. Procedure

45. For purposes of this nonrestricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a Notice of Proposed Rulemaking until the time a Public Notice is issued stating a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments and pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff that addresses the merits of the proceedings. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. *See generally*, 47 CFR 1.1231.

46. Pursuant to applicable procedures set forth in section 1.415 of the Commission's rules, interested parties may file comments by June 15, 1983, and reply comments by July 15, 1983. All relevant and timely comments and reply comments will be considered by the Commission before further action in this proceeding is taken.

47. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a written summary indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order. In accordance with the provision of section 1.419 of the Commission's rules, an original and five copies of all comments, replies or other documents filed in this proceeding shall be furnished to the Commission. Participants filing the required copies who also desire that each Commissioner receive a personal copy of the comments may file an additional six copies. Members of the general public who wish to express their interest by participating informally in this proceeding may do so by submitting one copy of their comments, without regard to form, provided that Common Carrier Docket No. 83—is specified in the heading. Such informal participants who desire that responsible members of the staff receive a personal copy may file an additional five copies. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room (Room 239) at 1919 M Street, N.W., Washington, D.C. Further information concerning this proceeding may be obtained from Greg Vogt, (202) 632–4890.

V. Ordering Clauses

48. Accordingly, it is hereby ordered, pursuant to sections 4(i), 4(j) of the Communications Act of 1934, as amended (47 U.S.C. 154(i) and 154(j)), and pursuant to the Telecommunications for the Disabled Act of 1982, Pub. L. 97–410 (to be published at 47 U.S.C. 610), that a rulemaking proceeding is hereby instituted in the above-captioned matter.

49. It is further ordered, pursuant to sections 4(i), 4(j) and 5(d) of the Communications Act of 1934, as amended (47 U.S.C. 154(i), (j) and 155(d)), with respect to the establishment of technical standards discussed herein, that the Chief, Common Carrier Bureau is hereby delegated authority to: (1) By order convene such meetings as may be necessary for the conduct of this proceeding; (2) direct any such meetings; (3) schedule a formal pleading cycle; and (4) issue such further orders as may be necessary for the conduct of this proceeding. To the extent necessary to allow Commission staff to attend and participate in these meetings, Subpart H of Part 1 of the Commission's rules, 47 CFR 1.1201, *et seq.*, is hereby waived.

50. It is further ordered, that pursuant to 47 U.S.C. 154(i), 154(j), and 5 U.S.C. 553, notice is hereby given of proposed rule changes in Part 68 of the Commission's Rules and Regulations, 47 CFR 68.1 *et seq.*, § 64.702 (47 CFR 64.702) and other relevant sections of the Rules in accordance with the discussion and deliniation of issues set forth herein.

51. It is further ordered that the Secretary shall cause this Notice of Proposed Rulemaking to be published in the Federal Register.

52. It is further ordered that the Secretary shall send a copy of this Notice of Proposed Rulemaking to the

VOL 48 ISS 90 MY 9 1983 UMI

Counsel for Advocacy of the Small Business Administration in accordance with Section 603(a) of the Regulatory Flexibility Act (5 U.S.C. 601, *et seq.* (1980)).

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix A

Note.—Appendix A will not appear in the CFR.

The Telecommunications for the Disabled Act of 1982, Pub. L. 97–410, 97th Cong., 2d Sess. (to be published at 47 U.S.C. 610), provides in relevant part:

BILLING CODE 6712-01-M

Sec.2. The Congress finds that --

(1) all persons should have available the best telephone service which is technologically and economically feasible;

(2) currently available technology is capable of providing telephone service to some individuals who, because of hearing impairments, require telephone reception by means of hearing aids with induction coils, or other inductive receptors;

(3) the lack of technical standards ensuring compatibility between hearing aids and telephones has prevented receipt of the best telephone service which is technologically and economically feasible; and

(4) adoption of technical standards is required in order to ensure compatibility between telephones and hearing aids, thereby accommodating the needs of individuals with hearing impairments.

Sec. 3 "Telephone Service for the Disabled"

SEC. 610(a). The Commission shall establish such regulations as are necessary to ensure reasonable access to telephone service by persons with impaired hearing.

(b) The Commission shall require that essential telephones provide internal means for effective use with hearing aids that are specially designed for telephone use. For purposes of this subsection, the term "essential telephones" means only coin-operated telephones, telephones provided for emergency use, and other telephones frequently needed for use by persons using such hearing aids.

(c) The Commission shall establish or approve such technical standards as are required to enforce this section.

(d) The Commission shall establish such requirements for the labeling of packaging materials for equipment as are needed to provide adequate information to consumers on the compatiblity between telephones and hearing aids.

(e) In any rulemaking to implement the provisions of this section, the Commission shall specifically consider the costs and benefits to all telephone users, including persons with and without hearing impairments. The Commission shall ensure that regulations adopted to implement this section encourage the use of currently available technology and do not discourage or impair the development of improved technology.

(f) The Commission shall complete rulemaking actions required by this section and issue specific and detailed rules and regulations resulting therefrom within one year after the date of enactment [of] the Telecommunications for the Disabled Act of 1982. Thereafter the Commission shall periodically review such rules and regulations. Except for coin-operated telephones and telephones provided for emergency use, the Commission may not require the retrofitting of equipment to achieve the purposes of this section.

(g) Any common carrier or connecting carrier may provide specialized terminal equipment needed by persons whose hearing, speech, vision, or mobility is impaired. The State commission may allow the carrier to recover in its tariffs for regulated service reasonable and prudent costs not charged directly to users of such equipment.

(h) The Commission shall delegate to each State commission the authority to enforce within such State compliance with the specific regulations that the Commission issues under subsections (a) and (b), conditioned upon the adoption and enforcement of such regulations by the State commission.

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR 100–179 (Ch. I)

[Docket No. HM–188]

Transportation of Hazardous Materials Between Canada and the United States; Correction

AGENCY: Department of Transportation (DOT).

ACTION: Advance notice of proposed rulemaking and notice of public hearing; correction.

SUMMARY: This document corrects the Advance Notice (48 FR 20255, May 5, 1983) relating to the Materials Transportation Bureau's (MTB) request for public comments relative to any future action it should take concerning the provisions of § 173.8 of the Department's Hazardous Materials Regulations (HMR). This section allows, with certain exceptions, shipments of hazardous materials to be transported by railroad into or through the United States in conformance with the regulations of the Canadian Transport Commission (CTC). MTB will consider oral comments at a public hearing as well as written comments. Commenters may also address matters related to proposed requirements of Canada's Ministry of Transport (Transport Canada) even though such comments would only be relevant to § 173.8 if they are adopted as final requirements under Canada's Transportation of Dangerous Goods Act at a future date. The date of the hearing was given as June 2, 1983; however, no closing date was given for written comments. Written comments must be received by the Dockets Branch of MTB on or before June 29, 1983.

DATE: Hearing date: June 2, 1983, beginning at 9:30 a.m.

Written comments: Submit written comments to Dockets Branch, Materials Transportation Bureau, U.S. Department of Transportation, Washington, D.C. 20590, on or before June 29, 1983. Comments should identify the docket and be submitted in five copies. The Dockets Branch is located in room 8426 of the Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

ADDRESS: The Hearing will be held in room 2230, Nassif Building, DOT Headquarters, 400 Seventh Street, SW., Washington, D.C.

BILLING CODE 4910-60-M

INTERSTATE COMMERCE COMMISSION

49 CFR Parts 1309 and 1310

[Ex Parte No. MC–169]

Expansion of Zone of Reasonableness for Motor Common Carriers of Property and Freight Forwarders

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Motor Carrier Act of 1980 permits motor common carriers of property and freight forwarders to reduce or increase rates within a 10 percent zone of rate freedom without investigation, suspension, revision, or revocation on the grounds that the changed rate is unreasonable because it is too high or too low. The Commission can increase the zone by up to five percentage points during any one-year period if it finds that there is sufficient actual and potential competition to regulate rates and that carriers or freight forwarders, shippers, and the public will benefit from increased rate flexibility. The Commission proposes to exercise its authority to expand the present zone from 10 percent to 15 percent. The Commission also proposes to streamline its tariff filing requirements governing rates and charges filed pursuant to zone of rate freedom authority. Adoption of these proposals will require revision of the rules established by the Commission in Docket No. 37416, *Identification of Rates Filed Under Zone of Rate Freedom By Motor Common Carriers of Property and Freight Forwarders* (not printed), decided July 15, 1980, which set forth the manner in which carriers must notify the Commission when they wish to have rates considered under the zone.

DATE: Comments are due on June 8, 1983.

ADDRESS: Send comments (original and 15 copies) to: Ex Parte No. MC–169, Rm. 2139, Interstate Commerce Commission, Office of Proceedings, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:

Leonard L. Arnaiz, (202) 275–7831, or Howell I. Sporn, (202) 275–7691

SUPPLEMENTARY INFORMATION: Section 10708 of Title 49, United States Code, was amended by the Motor Carrier Act of 1980 [1] (MCA) by adding a "Zone of Rate Freedom for Motor Common Carriers of Property and Freight Forwarders" (ZORF). The ZORF provides individual motor carriers and freight forwarders with greater freedom to establish rates free from regulatory interference. Filings under ZORF can reduce or increase rates by 10 percent without Commission interference with the proposed rate on the basis that it is too high or too low[2]

Congress did not intend that the ZORF be fixed, but rather, that it reflect changes in the competitive character of the industry. Therefore, paragraph (2) of the new subsection provides for adjustment in the ZORF as follows:

(2) The Commission, by rule, may increase the percentages specified in paragraph (1)(B) of this subsection for any group of motor common carriers of property or freight forwarders if it finds that—

(A) There is sufficient actual and potential competition to regulate rates; and

(B) There are benefits to (i) carriers or freight forwarders, (ii) shippers, and (iii) the public from further rate flexibility; except that the Commission may not increase such percentages by more than 5 percentage points during any one-year period.

It is clear that there has been a significant increase in the level of competition in the motor carrier industry since passage of the MCA warranting the exercise of our authority to adjust the zone.

[1] Pub. L. No. 96–296, 94 Stat. 793.

[2] Subsection (d)(1) reads as follows:

(d)(1) Notwithstanding any other provision of this title, the Commission may not investigate, suspend, revise, or revoke any rate proposed by a motor common carrier of property or freight forwarder on the grounds that such rate is unreasonable on the basis that it is too high or too low if—

(A) The carrier notifies the Commission that it wishes to have the rate considered pursuant to this subsection; and

(B) The aggregate of increases and decreases in any such rate is not more than 10 percent above the rate in effect one year prior to the effective date of the proposed rate, nor more than 10 percent below the lesser of the rate in effect on July 1, 1980 (or, in the case of any rate which a carrier first establishes after July 1, 1980, for a service not provided by such carrier on such date, such rate on the date such rate first becomes effective), or the rate in effect one year prior to the effective date of the proposed rate.

The ZORF was created with the expectation that other provisions of the MCA, particularly the relaxed motor carrier entry standards and removal of certain restrictions on motor carrier operations, would generate sufficient competition to guarantee effective and efficient regulation of rates through the working of the marketplace instead of by the Commission. It was anticipated that as the competitive character of the industry changed, carriers would require a means to respond to new market demands free of government interference.[3] Therefore, the ZORF itself is designed both to foster competition, and to permit rate flexibility where it is justified by, and is in response to, existing competition.

At present, there is vigorous price competition in the trucking industry. With capital resources already committed to the marketplace, and with a temporarily declining traffic base to support those resources, competition for available traffic has increased sharply. Moreover, in the present economic climate, the regulatory reform brought about by the MCA has further intensified competition.

Therefore, consistent with Congress' intent that carriers be permitted maximum price flexibility for the purpose of furthering competition, we propose to expand the zone of rate freedom for motor carriers of property and freight forwarders from 10 percent to 15 percent. It appears that there is sufficient actual and potential competition within the industry to regulate rates fairly and efficiently. We are confident that the presence of competition will discourage carriers from abusing the greater rate freedom we propose to authorize. In addition, the increased rate flexibility will not only permit carriers greater freedom to set rates in response to market demands free of government regulation, but will also benefit shippers and the public by encouraging a broader array of prices and services tailored to their needs.

We tentatively conclude that the statute does not authorize us to propose cumulative increases in the ZORF boundaries, that is, to add the 5 percentage point increase that we did not authorize in 1981 and 1982 to the increase we now propose, thereby expanding the zone to 25 percent. While we are of the opinion that such an increase would meet the substantive criteria of section 10708 (the presence of sufficient competition, and benefits to carriers, forwarders, shippers, and the public), the statutory limitation of 5 percentage points a year appears to preclude cumulative expansion. We will, however, consider comments on this issue, as well as on our 5 percent expansion proposal.

The proposed 15 percent zone is also in accordance with 49 U.S.C. 10708(d)(3)(B), which became effective two years after enactment of the MCA. That provision provides for adjustment in the zone to reflect changes in the economy due to inflation or deflation. Specifically, it states that the zone . . . "shall be increased or decreased, as the case may be, by the percentage change in the Producers Price Index, as published by the Department of Labor, that has occurred during the one-year period prior to the effective date of the proposed rate."

In addition to proposing to change the size of the zone, we also propose to simplify our regulations governing the filing of tariffs under the zone of rate freedom. The changes we propose are generally similar to the regulations adopted for motor passenger carrier ZORF filings in Docket No. 38900, *Identification of Rates Filed Under Zone of Rate Freedom by Motor Carriers of Passengers.*

Specifically, we propose to eliminate the requirement that not only the letter of transmittal, but also the title page of a ZORF tariff and every other page of a tariff containing a ZORF rate, contain an "appropriate statement" to the effect that the carrier wishes to have the tariff matter considered pursuant to 49 U.S.C. 10708. The proposed regulations require such a statement to be contained only in the letter of transmittal.

Further, we propose to modify the requirement that the letter of transmittal identify the specific page or item where the "comparison rate" (the rate in effect one year prior to the filing date or on or after July 1, 1980, as appropriate) could be found. Instead, the proposed regulations do not require such identification in the letter of transmittal, but state that if the ZORF rate is protested, then the carrier's reply to the protest must contain the identification.

We seek comment on these procedural changes, as well as on the proposal to change the size of the zone.

Energy and Environmental Considerations

This action does not appear to affect significantly the quality of the human environment or conservation of energy resources.

Regulatory Flexibility Analysis

This action will not have a significant economic impact on a substantial number of small entities. To the extent the proposals would affect small entities, the effects would be largely positive, since the new rules give carriers of property and freight forwarders additional flexibility in responding to market demands and simplify requirements for tariff filing. Any effect on small shippers would also be positive since they too would benefit from the carriers' ability to be more responsive to their needs and may benefit as well from simplified tariffs and the reduced carrier costs in filing them.

The index terms (1) for 49 CFR Part 1309 are as follows: freight, freight forwarders, motor carriers, and moving of household goods, and (2) for 49 CFR Part 1310 are as follows: exports, freight, imports, intermodal transportation, maritime carriers, and motor carriers.

(49 U.S.C. 10321, and 10708(d)(2), and 5 U.S.C. 553)

Decided: April 20, 1983.

By the Commission, Chairman Taylor, Vice Chairman Sterrett, Commissioners Andre and Gradison.

Agatha L. Mergenovich,

Secretary.

Appendix

PART 1309—[AMENDED]

Title 49 Parts 1309 and 1310 are proposed to be amended as follows:

1. Paragraph (a) of § 1309.8 would be removed.

2. Paragraph (b) of § 1309.8 would be redesignated as paragraph (a), and in the newly redesignated paragraph (a) paragraphs (2), (3), and (6) would be revised and paragraph (4) would be removed and reserved as follows:

§ 1309.8 Zone of rate freedom.

(a) *Letters of transmittal.*

* * * * *

(2) If the application of the proposed rate, charge, or provisions would result in an increase in charges, the letter shall state that the proposed increase in the aggregate is not more than 15 percent [4] above that in effect 1 year prior to the effective date of the proposed increase.

(3) If the application of the proposed rate, charge, or provision would result in a reduction in charges, the letter shall state that the proposed reduction in the aggregate shall be no more than 15 percent [4] below the lesser of that in effect on July 1, 1980 (or the date, if after July 1, 1980, on which a rate, charge, or provision first became effective for a

[3] H. Rept. 96–1069, 96th Cong., 2d Sess. 25 (1980).

[4] This percentage shall be increased or decreased, as the case may be, by the percentage change in the Producers Price Index, as published by the Department of Labor that has occured during the one-year period prior to the effective date of the proposed rate. 49 U.S.C. 10708(d)(3)(B).

service not provided by the freight forwarder on July 1, 1980), or that in effect 1 year prior to the effective date of the proposed reduction.

(4) [Reserved]

* * * * *

(6) The freight forwarder will also be required in the letter to certify that the rates or provisions do not exceed the amount allowed by Section 10708(d)(3) (A or B); and that the rates or provisions fall within the 15 percent [1] zone; also, if the rate is more than 15 percent [1] above the rate in effect one year earlier, to include in the statement whether the proposed rate has been subject to general rate increases during the previous year, what percent increase was taken, the bureaus which published the increase, and the effective date.

* * * * *

3. A new paragraph (b) would be added to § 1309.8 to read as follows:

* * * * *

(b) The letter need not identify the number of the item (or page) and tariff in which the rate, charge, or provision may be found that was in effect one year prior to the date of the proposed rate, or on July 1, 1980, or later, as appropriate. However, if the rate is protested, the carrier, in its reply to the protest, must make such identification.

* * * * *

4. Section 1310.1 would be amended by revising paragraphs (c)(6) (ii), (iii), (iv), and (vi) as follows:

§ 1310.1 Filing tariffs (rule 1).

* * * * *

(c) *Letters of transmittal.*

* * * * *

(6) * * *

(ii) If the application of the proposed rate, charge, or provision would result in an increase in charges, the letter shall state that the proposed increase in the aggregate is not more than 15 percent [1] above that in effect 1 year prior to the effective date of the proposed increase.

(iii) If the application of the proposed rate, charge, or provision would result in a reduction in charges, the letter shall state that the proposed reduction in the aggregate shall be no more than 15 percent [1] below the lesser of that in effect on July 1, 1980 (or the date, if after July 1, 1980, on which a rate, charge, or provision first became effective for a service not provided by the carrier on July 1, 1980), or that in effect 1 year prior to the effective date of the proposed reduction.

(iv) The letter need not identify the number of the item (or page) and tariff in which the rate, charge, or provision may be found that was in effect one year prior to the date of the proposed reduction, or on July 1, 1980 or later, as appropriate. However, if the rate is protested, the carrier, in its reply to the protest, must make such identification.

* * * * *

(vi) The carrier will also be required in the letter to certify that the rates or provisions do not exceed the amount allowed by Section 10708(d)(3) (A or B), and that the rates or provisions fall within the 15 percent [1] zone; also, if the rate is more than 15 percent [1] above the rate in effect one year earlier, to include in the statement whether the proposed rate has been subject to general rate increases during the previous year, what percent increase was taken, the bureau which published the increase, and the effective date.

* * * * *

§ 1310.4 [Amended]

5. Section 1310.4 would be amended by removing and reserving paragraph (f)(6).

§ 1310.5 [Amended]

6. Section 1310.5 would be amended by removing and reserving paragraph (m).

CIVIL AERONAUTICS BOARD

Announcement of Proposed Collection of Information Under the Provisions of the Paperwork Reduction Act (44 U.S.C. 35)

Agency Clearance Officer from whom a copy of the Collection of Information and Supporting Documents is available: Robin A. Caldwell (202) 673-5922.

REVISION

Title of the Collection of Information: Part 291, "Domestic Cargo Transportation."

Agency Form Number: 291.

How often the Collection of Information must be filed: Semiannually.

Who is asked or required to report: Domestic air cargo carriers.

Estimate of number of annual responses: 84.

Estimate of number of annual hours needed to complete the collection of information: 336.

Dated: April 28, 1983.

Robin A. Caldwell

Chief, Information Management Division, Office of Comptroller.

BILLING CODE 6320-01-M

Commuter Fitness Determination

The Board is proposing to find the following carriers fit, willing and able to provide commuter air carrier service under Section 419(c)(2) of the Federal Aviation Act, as amended, and that aircraft used in this service conform to applicable safety standards.

Order	Applicant	Response date
83-5-18	AmericAir, Inc. d.b.a. Air Link Commuter.	May 24, 1983
83-5-24	Airways of New Mexico, Inc.	May 24, 1983

All interested persons wishing to respond to the Board's tentative fitness determination shall serve their responses on all persons listed in Attachment A of the respective orders and file response together with a summary of the testimony, statistical data, and other material relied upon to support the allegations with the Special Authorities Division, Room 915, Civil Aeronautics Board, Washington, D.C. 20428.

The complete text of the orders is available from the Distribution Section, Room 100, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428. Persons outside the metropolitan area may send a postcard request to the above address.

For further information contact: Ms. Barbara P. Dunnigan for Order 83-5-18 (202) 673-5918 and Mr. James P. Lawyer for Order 83-5-24 at (202) 673-5348; Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428.

By the Civil Aeronautics Board: May 3, 1983.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320-01-M

[Order 83-4-36]

Employee Protection Program Investigations; Dismissal of Four Applications

AGENCY: Civil Aeronautics Board.

ACTION: Institution of Employee Protection Program Investigations; Dismissal of four applications, Order 83-4-36.

SUMMARY: The Board is instituting investigations in the following dockets to determine whether any of the major contractions experienced by the carrier under consideration amounted to a qualifying dislocation, within the meaning of Section 43 of the Airline Deregulaiton Act of 1978:

(a) Airlift International Employee Protection Program Investigation—Docket 38418;

(b) Air New England Employee Protection Program Investigation—Docket 40201;

(c) American Airlines Employee Protection Program Investigation—Docket 38570;

(d) Braniff International Airways Employee Protection Program Investigation—Docket 38978;

(e) Continental Airlines Employee Protection Program Investigation—Docket 38720;

(f) Mackey International Airlines Employee Protection Program Investigation—Docket 39783;

(g) Pan American World Airways Employee Protection Program Investigation—Docket 38883;

(h) Trans World Airlines Employee Protection Program Investigation—Docket 38184; and

(i) United Air Lines Employee Protection Program Investigation—Docket 38571.

The Board is also dismissing the applications in Dockets 38586, 39700, 38885, and 34562 of Eastern Air Lines, Delta Air Lines, Aeroamerica, and Overseas National Airways, respectively.

DATE: Petitions for reconsideration of this order and petitions for leave to intervene shall be filed by June 6, 1983.

ADDRESSES: Documents should be filed in all pertinent dockets, Docket Section, Room 714, Civil Aeronautics Board, Washington, D.C. 20428.

CONTACT: Steven B. Farbman, Office of Deputy Director/Associate Director, Legal Affairs, Bureau of Domestic Aviation, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428; (202) 673-3340.

[Order 83-5-11, Docket 41452]

Delta Development Corp.; Order to Show Cause

AGENCY: Civil Aeronautics Board

ACTION: Notice of order to show cause: Order 83-5-11, Docket 41452.

SUMMARY: The Board proposes to revoke the certificate of Delta Development Corp., d.b.a. Western Yukon Air for its failure to comply with the continuing fitness requirements of section 401(r) of the Act.

VOL 48 ISS 90 MY 9 1983 UMI

OBJECTIONS: All interested persons having objections to the Board's conclusions, as described in the order cited above, shall, no later than June 9, 1983, file a statement of such objections with the Civil Aeronautics Board (20 copies, addressed to Docket 41452, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428) and mail copies to all the persons listed in paragraph 6 of Order 83–5–11.

A statement of objections must cite the docket number and must include a summary of testimony, statistical data, or other such supporting evidence.

If no objections are filed, the Board will issue an order which will make final the Board's tentative findings and conclusions. To get a copy of the complete order, request it from the C.A.B. Distribution Section, Room 100, 1825 Connecticut Avenue, NW., Washington, D.C. 20428; (202) 673–5432. Persons outside the Washington Metropolitan area may send a postcard request.

BILLING CODE 6320–01–M

DEPARTMENT OF COMMERCE

International Trade Administration

[Case No. 640]

Robert J. Lambert et al.; Order Amending Temporary Denial of Export Privileges

In the matter of Robert J. Lambert, d.b.a. Computer and Test Systems, 5671 Via Ceresa Yorba Linda, California 92686, Dierk Hagemann, d.b.a. Uni-Data World Transport Corporation, 110 Standard Street, El Segundo, California and Albert Franz Kessler, 20 Kennel Street, 8800 Thawil, Switzerland.

By Order of February 28, 1983, 48 FR 10108 (March 10, 1983), Manuel Rodriguez d.b.a. Export Assistance Services, 5671 Via Ceresa, Yorba Linda, California 92686, was designated, in Paragraph III, as a person related to one or more of the respondents and was temporarily denied, pursuant to § 386.19 of the Export Administration Regulations (15 CFR Part 368, *et seq.* (1982)), all privileges of participating in any manner or capacity in the export of U.S.-origin commodities or technical data.

Mr. Rodriguez moved to vacate the Order of February 28, 1983 with respect to himself on the ground that he lacks any relationship with any of the respondents such that he should be designated a related person. The Department of Commerce (the "Department") has now answered this motion by joining in its request to vacate the Order with regard to Mr. Rodriguez. The Department cited as its reasons the additional information provided by Mr. Rodriguez and also other facts available to the Department.

Based on the representations made by Mr. Rodriguez and by the Department, I find that the requested motion is justified, and that granting it will not jeopardize the purpose of the Order.

Accordingly, it is hereby Ordered that, effective immediately, the Order of February 28, 1983 is amended by removing Manuel Rodriguez, d.b.a. Export Assistance Services, 5671 Via Ceresa, Yorba Linda, California 92686, from its designation of related persons in Paragraph III.

A copy of this Amendment of the Order of February 28, 1983 shall be served upon Mr. Rodriguez and published in the **Federal Register.**

Dated: May 2, 1983, 3:30 p.m. EST.

Thomas W. Hoya,

Hearing Commissioner.

BILLING CODE 3510–25–M

National Oceanic and Atmospheric Administration

National Marine Fisheries Service; Issuance of Permit

On March 7, 1983, Notice was published in the **Federal Register** (48 FR 9551), that an application had been filed with the National Marine Fisheries Service by Mr. Jeffrey D. Goodyear, Moss Landing Marine Laboratories, P.O. Box 223, Moss Landing, California 95039, for a permit to conduct biopsy and radio tagging studies involving humpback whales (*Megaptera novaeangliae*) and fin whales (*Balaenoptera physalus*) over a 2-year period.

Notice is hereby given that on May 3, 1983, and as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Endangered Species Act of 1973 (16 U.S.C. 1531–1543), the National Marine Fisheries Service issued a permit to Jeffrey D. Goodyear, Moss Landing Marine Laboratories, for taking up to 135 humpback whales and up to 90 fin whales subject to certain conditions set forth therein.

As required by the Endangered Species Act of 1973 issuance of this permit is based on a finding that such permit: (1) Was applied for in good faith; (2) will not operate to the disadvantage of the endangered species which is the subject of the permit, and (3) will be consistent with the purposes and policies set forth in Section 2 of the Endangered Species Act of 1973. This Permit was issued in accordance with, and is subject to Parts 220–222 of Title 50 CFR of the National Marine Fisheries Service regulations governing endangered species permits (39 FR 41367), November 24, 1974.

The Permit is available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C.;

Regional Director, National Marine Fisheries Service, Northeast Region, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731.

Dated: May 3, 1983.

R. B. Brumsted,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

[FR Doc. 83–12352 Filed 5–6–83; 8:45 am]

BILLING CODE 3510–22–M

National Marine Fisheries Service; Proposed Modification to Permit No. 347 (P77W)

Notice is hereby given that the Southwest Fisheries Center, National Marine Fisheries Service, P.O. Box 271, La Jolla, California 92038, has requested a modification of Permit No. 347 issued on July 25, 1981 (46 FR 38950) under the authority of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

The Permit Holder is requesting to take an additional 1,600 California sea lions by tagging and marking as described in the original application, and to extend the period of validity of the permit by two years until December 31, 1986.

Concurrent with the publication of this notice in the **Federal Register,** the Secretary of Commerce is forwarding copies of the modification to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this modification request should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington D.C. 20235 within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular modification request would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in the modification are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above modification are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, California 90731

Dated: May 5, 1983.

R. B. Brumsted,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

[FR Doc. 83–12351 Filed 5–6–83; 8:45 am]

BILLING CODE 3510–22–M

National Marine Fisheries Service; Receipt of Application for Permit

Notice is hereby given that an Applicant has applied in due form for a Permit to take endangered species as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations governing the Taking and Importing of Marine Mammals (50 CFR Part 216)

1. Applicant: New York Aquarium (P112D), Boardwalk and West 8th Street, Brooklyn, New York 11224.
2. Type of Permit: Public Display.
3. Names and Number of Animals: Atlantic bottlenose dolphins (*Tursiops truncatus*).
4. Type of Take: To take for permanent maintenance.
5. Location of Activity: West Coast of Florida.
6. Period of Activity: 2 years.

The arrangements and facilities for transporting and maintaining the marine mammals requested in the above-described application have been inspected by a licensed veterinarian, who has certified that such arrangements and facilities are adequate to provide for the well-being of the marine mammals involved.

Concurrent with the publication of this notice in the **Federal Register,** the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C.;

Regional Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, Florida 33702; and

Regional Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930.

Dated: May 3, 1983.

R. B. Brumsted,

Acting Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

BILLING CODE 3510–22–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Changes in Officials of the Government of the Republic of Singapore Authorized To Issue Visas and Exempt Certifications for Certain Textile and Apparel Products Exported to the United States

May 4, 1983

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Announcing a new list of officials of the Government of the Republic of Singapore authorized to sign export visas and exempt certifications for cotton, wool, and man-made fiber textile and apparel produced or manufactured in Singapore.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175).

SUMMARY: The Government of the Republic of Singapore has notified the Government of the United States that nine officials are now authorized to sign export visas and exempt certifications for cotton, wool, and man-made fiber textile products exported to the United States.

EFFECTIVE DATE: May 10, 1983.

FOR FURTHER INFORMATION CONTACT: Ronald Sorini, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230, (202/377–4212).

SUPPLEMENTARY INFORMATION: On February 16, 1982 a letter dated February 10, 1982 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs was published in the **Federal Register** (47 FR 6663) which established export visa and exempt certification requirements for certain cotton, wool, and man-made fiber apparel products, produced or manufactured in Singapore and exported to the United States on and after April 1, 1982. A further letter dated November 19, 1982 was published in the **Federal Register** on November 26, 1982 (47 FR 53446) extending coverage of the existing export visa and exempt certification requirements to include additional categories of cotton, wool, and man-made fiber textiles and textile products, produced or manufactured in Singapore and exported on and after January 15, 1983. One of the requirements is that the visas and exempt certifications be signed by an official of the Government of the

VOL 48 ISS 90 MAY 9 1983 UMI

Republic of Singapore. The following officials have been so authorized:

Shirley Sim Mui Gek
Tay Guek Khiam
Wong Swee Kim
Mohamed Saimi Bin Talib
Irene Mok Moh Wan
Chia Keng Chun
Irene Lee Kim Eng
Abeedah Binti Rustam Ali
Soo Eng Pok

Walter C. Lenahan,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-25-M

CONSUMER PRODUCT SAFETY COMMISSION

Notification of Proposed Collection of Information

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1981 (44 U.S.C. 3501 *et seq.*), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for approval of a collection of information in the form of a study of residential fires originating with components of electrical systems.

The purpose of this study is to gather information which will be used by the Commission: (a) To direct engineering work related to identification of factors contributing to residential fires originating in components of electrical systems; (b) to advise manufacturers and voluntary standards organizations of the need for changes in the design of components of electrical systems; (c) to support proposed changes to the National Electrical Code; and (d) to support educational efforts directed toward consumers concerning proper installation and maintenance of components of residential electrical systems.

This study will gather information from a maximum of ten local fire departments. The fire departments participating in this study will do so on a voluntary basis and will receive reimbursement from the Commission for staff time and costs incurred to provide information. Personnel from the participating fire departments will receive a training course on identification of the components of a residential electrical system. After completion of the training course, personnel from the participating fire departments will investigate selected residential fires following written guidance prepared by the Commission, and will report the results of each investigation using a standardized report form furnished by the Commission. The study will involve investigations of approximately 100 residential fires.

Information about the Proposed Collection of Information.

Agency address: Consumer Product Safety Commission, 1111 18th Street, NW., Washington, D.C. 20207.

Title of information collection: Data Collection on Fires Originating in Components of Residential Electrical Systems.

Type of request: Approval of a new plan.

Frequency of collection: Approximately 10 investigations per respondent.

General description of respondents: Local fire departments.

Estimated number of respondents: 10.

Estimated average number of hours per response: 8.

Comments: Comments on this proposed collection of information should be addressed to Gwen Pla, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, telephone: (202) 395-7313. Copies of the proposed collection of information are available from Francine Shacter, Office of Budget, Program Planning and Evaluation, Consumer Product Safety Commission, Washington, D.C. 20207, telephone: (301) 492-6529.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable.

Dated: May 3, 1983.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

DEPARTMENT OF DEFENSE

Department of the Navy

Board of Advisors to the President, Naval War College, Newport, Rhode Island; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. App. I), notice is given that the Board of Advisors to the President, Naval War College, will meet on June 9, 1983, in room 210, Conolly Hall. The session will commence at 8:30 a.m. and terminate at approximately 4:30 p.m. The purpose of the meeting is to elicit the advice of the Board on educational, doctrinal, and research policies and programs of the Naval War College.

For further information concerning this meeting contact: Elizabeth F. Crosby, Executive Assistant to the Dean of Academics, Naval War College, Newport, Rhode Island 02841. Telephone: (401) 841-3535.

Dated: May 4, 1983.

F. N. Ottie,

Lieutenant Commander, JAGC, U.S. Navy, Alternate Federal Register Liaison Officer.

[FR Doc. 83-12286 Filed 5-6-83; 8:45 am]

BILLING CODE 3810-AE-M

Naval Discharge Review Board; Hearing Locations

In November 1975 the Naval Discharge Review Board commenced to convene and conduct prescheduled discharge review hearings for a number of days each quarter in locations outside of the Washington, D.C., area. The cities in which these hearings are scheduled are determined in part by the concentration of applicants in a geographical area.

The following Naval Discharge Review Board itinerary for May through September 1983 has been approved, but remains subject to modification if required:

May 16 through May 27, 1983; Dallas, TX.
June 6 through June 10, 1983; San Francisco, CA.
June 13 through June 20, 1983; Arlington, VA.
August 15 through August 26, 1983; Arlington, VA.
September 12 through September 23, 1983; Chicago, IL.

Any former member of the Navy or Marine Corps who desires a discharge review, either in Washington, D.C., or in a city nearer to their residence, should file an application with the Naval Discharge Review Board using DD Form 293. If a personal appearance is requested, the petitioner should enter on the application the hearing location which is preferred. Applicant forms (DD 293) may be obtained from, and the completed application should be mailed to, the following address: Naval Discharge Review Board, Suite 910, 801 North Randolph Street, Arlington, Virginia 22203.

Notice is hereby given that since the foregoing itinerary is subject to modification and since, following receipt of a new application, the Naval Discharge Review Board must obtain the applicant's military records before a hearing may be scheduled, the submission of an application to the Naval Discharge Review Board is not tantamount to scheduling a hearing. Applicants and representatives will be mailed a notification of the date and place of their hearing when personal appearance has been requested.

For further information concerning the Naval Discharge Review Board, contact: Captain Raymond A. Ways, U.S. Navy, Executive Secretary, Naval Discharge Review Board, Suite 910, 801 North Randolph Street, Arlington, Virginia 22203. Telephone: (202) 696-4881.

Dated: May 4, 1983.

F. N. Ottie,

Lieutenant Commander, JAGC, U.S. Navy Alternate Federal Register Liaison Officer.

BILLING CODE 3810-AE-M

DEPARTMENT OF ENERGY

Energy Information Administration

[EIA-254]

Quarterly Progress Report on Status Reactor Construction

AGENCY: Energy Information Adminstration, United States Department of Energy.

ACTION: Request for comments on the extension of Form EIA-254.[1]

SUMMARY: The Energy Information Administration (EIA) of the U.S. Department of Energy (DOE) plans to extend the "Quarterly Progress Report on Status of Reactor Construction," (EIA-254) and invites comments on the survey and the content of the form.

DATES: Written comments must be submitted on or before June 8, 1983.

ADDRESS: Send comments to Ms. Justine G. Johnson at the address listed immediately below.

FOR FURTHER INFORMATION CONTACT: To obtain additional information or copies of the Form EIA-254, contact Ms. Justine Johnson, Nuclear and Alternate Fuels Division, MS: 2F-021, Energy Information Administration, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, D.C. 20585; (202) 252-6330.

SUPPLEMENTARY INFORMATION:

I. Background
II. Request for Comments

I. Background

The EIA announces plans to extend the Form EIA-254, which is used to collect data on those nuclear units planned or under construction by an electric utility. The cost and construction scheduling data requested on the form are utilized in the Office of Coal, Nuclear, Electric and Alternate Fuels for analysis in support of its program, for replies to Congress and for publication of statistical information.

The primary data elements are respondent identification, name and location of nuclear electric generating unit, contact name, address, telephone number, and electrical capacity expressed as design electrical rating in net megawatts. Total nuclear plant costs in specific categories are requested in direct, indirect and contingency costs reported in constant dollar terms. Estimated costs for cost escalation on direct and indirect costs and interest during construction are requested in nominal dollar terms. The form also requests weight of U-238 and U-235 and total other weights (i.e. thorium, plutonium and U-233).

The chronological data reported are application for constuction permit docketed by the Nuclear Regulatory Commission (NRC), start of construction at site, application for facility license docketed by NRC, first criticality, percent of physical construction completed to date, date of first operation at plant's designed full power, date plant placed in commercial operation, and first discharge of nuclear fuel.

Form EIA-254 is a voluntary quarterly progress report. Electric utility companies within the U.S. who have nuclear units planned or under construction are the sole source of data. Forms are mailed in the beginning of the month of the new quarter and respondents are asked to submit their completed forms within a five or six week period.

II. Request for Comments

The EIA invites prospective respondents to comment on the planned extension within 30 days of the publication of this notice. The following general guidelines are provided to assist in the preparation of responses:

(As a potential data provider)

a. Are the instructions and definitions clear and sufficent?

b. Can data be sumitted using the defintions included in the instructions?

c. Can the data be submitted in accordance with the response time specified in the instructions?

d. How many hours, including time for preparation and administrative review, will your company require to complete and submit the form?

e. What is the estimated cost of completing the form, including the direct and indirect costs associated with the data collection? Direct costs should include all costs, such as development, assembly, equipment, ADP and other administrative costs directly attributable to providing this information.

f. Do you know of other Federal, State or local agencies that collect similar data? (If yes, please identify.)

g. How can the form be improved?

(As a potential user)

a. Do you need data at the levels of detail indicated on the form?

b. For what purposes would you use these data? (Be specific)

c. How could the form be improved to better meet your specific data needs?

d. Are there alternative sources of data and do you use them? What are their deficiences?

The EIA is also interested in receiving comments from persons as to their views on the need for the collection of this information at all.

Comments submitted in response to this notice will be included in the request for Office of Management and Budget approval of this data collection and will become a matter of public record.

Issued in Washington, D.C., May 2, 1983.

Yvonne M. Bishop,

Director, Statistical Standards, Energy Information Administration.

BILLING CODE 6717-01-M

[Docket No. CP82-379-001]

Delhi Gas Pipeline Corp.; Amendment

May 3, 1983.

Take notice that on December 20, 1982, Delhi Gas Pipeline Corporation (Delhi), Fidelity Union Tower, Dallas, Texas 75201, filed in Docket No. CP82-379-001 an amendment to its pending application filed in Docket No. CP82-379-000 pursuant to Section 311(a)(2) of the Natural Gas Policy Act of 1978 and 284.127 of the Commission's Regulations so as to authorize the transportation of natural gas to an additional point of delivery located in Beaver County, Oklahoma, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

It is stated that on June 16, 1982, Delhi filed in Docket No. CP82-379-000 an application to transport gas for Transwestern Pipeline Company (Transwestern) for a period ending March 1, 1990. Such service, it is stated, commenced on July 9, 1980. Delhi, it is asserted, receives natural gas at various points of delivery on its Western Oklahoma pipeline system and subsequently transports and redelivers equivalent quantities of gas to Transwestern at points in Ellis and Custer Counties, Oklahoma.

Delhi proposes herein to deliver gas to Transwestern at an additional point in Beaver County, Oklahoma.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before May 24 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP61-92-010]

El Paso Natural Gas Company; Petition to Amend

May 3, 1983.

Take notice that on April 6, 1983, El Paso Natural Gas Company (El Paso), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP61-92-010 a petition to amend the order issued January 11, 1965,[1] as amended, in Docket No. CP61-92 pursuant to Section 7(c) of the Natural Gas Act so as to authorize the transportation and exchange of natural gas with Northern Natural Gas Company, a Division of InterNorth, Inc. (Northern), at a revised delivery point and the establishment of five new delivery points from Northern to El Paso under the terms of an amended exchange arrangement between El Paso and Northern, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

[1] This proceeding was commenced before the FPC. By joint regulation of October 1, 1977 (10 CFR 1000.1), it was transferred to the Commission.

El Paso states that it was authorized to construct and operate certain facilities and to exchange natural gas with Northern at certain points in Texas and Oklahoma pursuant to the terms of a 1963 service agreement dated August 17, 1962, as amended. It is further stated that Northern has volumes of residue gas from Amoco Production Company's (Amoco) Slaughter Plant in Hockley, Texas, which are available to El Paso as part of the authorized exchange. Some of the residue gas received by El Paso for Northern's account at the Slaughter Plant must be returned by Northern to Amoco's Prentice Plant in Yoakum County, Texas, pursuant to the terms of a gas sales contract between Northern and Amoco, it is averred. Additionally, El Paso asserts that Northern must deliver gas to Energas Company, Division of Pioneer Corporation (Energas), for resale to an existing right-of-way grantor located on Northern's pipeline in Yoakum County.

In order to enable Northern to meet its obligations, El Paso and Northern have amended their exchange arrangement to reflect the proposed change of a delivery point from a Northern delivery point to an El Paso delivery point, it is stated. In this petition, El Paso proposes to deliver up to 1,000 Mcf of gas per day to Northern at an existing point of interconnection between El Paso's Dumas pipeline and Northern's discharge line in Yoakum County. It is averred that this delivery point would enable Northern to return gas to Amoco's Prentice Plant and to render service to Energas.

Furthermore, Northern has volumes of gas available to it under existing surplus residue agreements and other gas purchase agreements, it is asserted. In order for Northern to receive its gas from these sources, Northern and El Paso have further amended their exchange arrangement to include five additional delivery points from Northern to El Paso, it is stated. El Paso avers it would receive up to 34,250 Mcf of gas available to Northern from the following sources: (1) Phillips Petroleum Company's (Phillips) Lee Plant located in Lea County, New Mexico; (2) Phillips' Dumas Plant located in Moore County, Texas; (3) the No. 1 Cross B well located in Roger Mills County, Oklahoma; (4) the Carruth 1-43 well located in Hemphill County, Texas; and (5) the Poker Lake State 1-32 well located in Eddy County, New Mexico. El Paso would redeliver the volumes to Northern as part of the exchange volumes now authorized, it is stated.

No new facilities or increases in the existing volumetric limitations are proposed.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before May 24, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-12251 Filed 5-6-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-367-000]

Empire District Electric Company; Order Accepting Rate for Filing, Noting Intervention, and Terminating Docket

Issued: May 2, 1983.

On March 3, 1983, Empire District Electric Company (Empire) submitted for filing an executed amendment to Service Schedule L of the interchange and interconnection agreement between Empire and Kansas Gas and Electric Company (KG&E).[1] The amendment would increase the capacity charge for sales under Schedule L, peaking service, from the cost of procurement plus $0.27/kW/month to the cost of procurement plus $0.46/kW/month.[2] The peaking power is resold by KG&E to Kansas Electric Power Cooperative (KEPCo)[3] at a rate which includes a pass-through of Empire's charges. Empire requests that the effective date of its proposed rate be April 1, 1983, although it has not requested waiver of notice in order to accomplish this result.

Notice of Empire's filing was published in the **Federal Register**[4] with comments due by March 28, 1983. KEPCo filed a timely motion to intervene, protest, and request for a maximum suspension. KEPCo states that as the ultimate purchaser of the peaking power, it has a direct interest in the outcome of this proceeding. KEPCo also contends that Empire's filing fails to satisfy the Commission's filing requirements and provides an insufficient basis for evaluation of the proposed charge. As a result, KEPCo contends that the submittal should be rejected or declared deficient. However, KEPCo suggests that a preferable approach would be to suspend the rate for five months to allow for discovery and settlement discussions. While KEPCo asserts that Empire's filing raises a number of unanswered questions (such as the support for the stated "replacement capacity cost"), KEPCo has offered no specific substantive objections.

Empire answered KEPCo's pleading on April 13, 1983. The company does not oppose the motion to intervene, but does assert that its submittal substantially complies with the Commission's filing requirements and is consistent in form with a prior submittal to implement rates under Service Schedule L. Concerning the challenged "replacement capacity cost" calculation, Empire has noted a typographical error on its rate worksheet and has provided additional explanation of the derivation of its figures. Empire objects to the request for a maximum suspension, stating that the suspension period is not a mechanism designed to allow for discovery or settlement negotiations.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure (18 CFR 385.214), the unopposed motion to intervene serves to make KEPCo a party to this proceeding.

[1] The amendment is designated as: *The Empire District Electric Company*, Supplement No. 3 to, Supplement No. 16 to Rate Schedule FPC No. 60.

[2] Empire purchases the power and energy required from a third party (generally Southwestern Power Administration) and resells it to KG&E. Empire's capacity charge in excess of the cost of procurement represents the company's cost to wheel the power over its transmission system.

[3] KEPCo's member systems are: Ark Valley Electric Cooperative Association, Inc.; Butler Rural Electric Cooperative Association, Inc.; Caney Valley Cooperative Association, Inc.; CMS Electric Cooperative Association, Inc.; Coffey County Rural Electric Cooperative Association, Inc.; C&W Rural Electric Cooperative Association, Inc.; Jewell-Mitchell Cooperative Electric Company; NCK Electric Cooperative, Inc.; Ninnescah Rural Electric Cooperative Association, Inc.; Norton-Decatur Cooperative Electric Company; Radiant Electric Cooperative, Inc.; Sedgwick County Electric Cooperative Association, Inc.; Sekan Electric Cooperative Association, Inc.; Smoky Hill Electric Cooperative Association, Inc.; Sumner-Cowley Electric Cooperative, Inc.; United Electric Cooperative, Inc.; and Victory Electric Cooperative Association, Inc.

[4] 48 FR 11315 (March 17, 1983).

VOL 48 ISS 90 MY 9 1983 UMI

While the additional information contained in Empire's April 13 answer is helpful in allowing the Commission to evaluate the company's rate filing, we find that Empire's submittal, as originally tendered, substantially complied with the Commission's filing requirements. As a change in rate for an interconnection service, the submittal is subject to the abbreviated filing requirements contained in section 35.13(a)(2)(i)(D) of the Commission's regulations. Absent any other alleged basis for rejection or the issuance of a deficiency letter, we shall therefore deny KEPCo's request for such action.[5]

We further find that suspension of the rate (for five months or otherwise) is neither necessary nor appropriate. Empire has supported the proposed capacity charge of $0.46/kw/month on the basis of an annual fixed charge applied to average investment in 161 kV transmission facilities plus an allowance for losses. We note that rates identical to that currently proposed by Empire are already on file with the Commission for similar service provided by Empire to other interconnected utilities.[6] Having reviewed the filing as well as the pleadings, we conclude that the proposed charge is cost justified and that no basis exists upon which to proceed to hearing. Therefore, we shall accept Empire's rate for filing without suspension. However, Empire has neither requested nor supported a waiver of the notice requirements and we cannot conclude that good cause exists to authorize such a waiver. Accordingly, Empire's rate will be accepted for filing to become effective on May 3, 1983, sixty days after filing.

The Commission orders:

(A) KEPCo's requests for rejection, issuance of a deficiency letter, or a maximum suspension are hereby denied.

(B) Waiver of the notice requirements is hereby denied.

(C) Empire's proposed rate is hereby accepted for filing to become effective on May 3, 1983, without suspension.

(D) Docket No. ER83-367-000 is hereby terminated.

(E) The Secretary shall promptly publish this order in **Federal Register**.

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 5924-001]

Energenics Systems, Inc.; Surrender of Preliminary Permit

May 3, 1983.

Take notice that Energenics Systems, Inc., Permittee for the Trenton Dam Project No. 5924, has requested that its preliminary permit be terminated. The permit was issue on May 24, 1982, and would have expired on November 1, 1983. The project would have been located on the Republican River in Hitchcock County, Nebraska.

The Permittee filed its request on April 15, 1982, and the surrender of the preliminary permit for Project No. 5924 is deemed accepted as of the date of this notice.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No. 3982-001]

Utilities Board of the City of Lamar, Colorado; Surrender of Preliminary Permit

May 3, 1983.

Take notice that Utilities Board of the City of Lamar, Colorado, Permittee for the Eagle Nest Dam Project No. 3982 located on the Cimarron Creek in colfax County, New Mexico, has requested that its preliminary permit be terminated. The preliminary permit was issued on March 17, 1982, and would have expired on August 31, 1983. The Permittee states that analysis of the Eagle Nest Dam Project did not indicate feasibility for development by a utility system.

Utilities Board of the City of Lamar, Colorado's request was filed April 18, 1983. The surrender of the permit for Project No. 3982 is in the public interest and is accepted as of the date of issuance of this notice.

Kenneth F. Plumb,

Secretary.

Secretary.

[FR Doc. 83-12257 Filed 5-6-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-263-000]

Northern Border Pipeline Company; Application

May 3, 1983.

Take notice that on April 5, 1983, Northern Border Pipeline Company (Applicant), 224 South 108th Avenue, Omaha, Nebraska 68154, filed in Docket No. CP83-263-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas on behalf of Michigan Wisconsin Pipe Line Company (Mich Wis), Natural Gas Pipeline Company of America (Natural), Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), and Transcontinental Gas Pipe Line Corporation (Transco) and authorizing the operation of an existing tee and side valve in order to receive the gas to be transported, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that Great Plains Gasification Associates is constructing a coal gasification plant near Beulah, North Dakota, which would produce approximately 137,500 Mcf of synthetic natural gas per day. This production would be purchased by Mich Wis, Natural, Tennessee, and Transco, it is asserted. Applicant proposes to receive the synthetic natural gas at an existing valve on its pipeline in Mercer County, North Dakota, transport it commingled with natural gas and redeliver the volumes to Northern Natural Gas Company, Division of InterNorth, Inc., at Ventura, Iowa, for the account of the four shippers. Applicant states that it would be obligated to transport on a firm basis up to 34,375 Mcf per day for Mich Wis, 27,500 Mcf per day for Natural, 41,250 Mcf per day for Tennessee, and 34,375 per day for Transco, for a total of 137,500 Mcf per day.

Applicant proposes to transport up to 137,500 Mcf per day for the shippers on an interruptible basis during a testing period from January 1 to December 31, 1984. Applicant would charge a transportation rate of the product of the dekatherm-mile rate and the dekatherm miles transported. During a development period from January 1 to December 31, 1985, Applicant proposes to transport up to 137,500 Mcf per day for the shippers on a firm basis The transportation rate would be the greater of the dekatherm-mile charge or the appropriate minimum charge.

Finally, beginning on January 1, 1986, and continuing for 23 years, Applicant proposes to transport up to 137,500 Mcf per day for the shippers on a firm basis, at a rate based on its cost of service Rate Schedule T-1. Applicant further states that volumes in excess of the shippers' firm daily receipt quantities would be accepted and transported on an interruptible basis.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 24, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-12258 Filed 5-6-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. EC83-6-000]

Southwestern Public Service Co. and New Mexico Electric Service Company Order Accepting Application for Filing, and Approving Sale of Assets

Issued April 28, 1983.

On December 14, 1982, Southwestern Public Service Company ("SPS") and New Mexico Elelctric Service Company ("NME") jointly filed an application under Section 203 of the Federal Power Act for commission approval of the sale of NME's assets and electric utility business to SPS. SPS is a public utility as defined in Part II of the Federal Power Act. The company engages primarily in the generation, transmission, and distribution of electricity to approximately 309,000 retail customers and at wholesale to 23 electric cooperative, municipal, and investor-owned utilities. The company transacts business in the States of New Mexico, Texas, Oklahoma, and Kansas.NME, also a public utility uner the Federal Power Act, is engaged primarily in the generation, transmission, and distribution of electricity in Lea County, New Mexico, located in the southeastern corner of the State.

NME serves approximately 21,000 retail customers.

The electric systems of NME and SPS serve contiguous territories and are interconnected with one another at a point near Hobbs, New Mexico. NME is also interconnected with Lea County Electric Cooperative (Lea County). NME and Lea County, through a joint venture, entered ito an interconnection agreement with SPS effective January 1, 1979; this agreement superseded a prior interconnection agreement with Southwestern. Pursuant to their contractual arrangements, SPS supplies firm power and economy energy to NME and Lea County. In addition, SPS purchases and dispatches the output of NME's gas turbine generating unit.

SPS proposes to purchase NME's assets and electric utility business in exchange for: (1) 1,065,000 shares of SPS common stock; and (2) the assumption, defeasance, or refunding by SPS of NME's liabilities, based upon the latter's September 30, 1982 balance sheet. The number of shares will be adjusted for changes in retained earnings above or below $50,000 at the rate of one share for each $15.75. Based upon the September 30, 1982 price of $15.75 for a share, the SPS common stock has a value of $16,773,750.

Notice of the instant filing was published in the **Federal Register**, [1] with comments due on or before January 17, 1983. No comments have been received.

Discussion

The Statutory Standard

The standards pertaining to acquisitions are set forth in Section 203 of the Federal Power Act, 16 U.S.C. 824b. Section 203(a) provides that:

> No public utility shall sell, lease, or otherwise dispose of the whole of its facilites subject to the jurisdiction of the Commission, • • • merge or consolidate such facilities • • • or purchase, acquire, or take any security of any other public utility, without first having secured an order of the Commission authorizing it to do so • • •. After notice and an opportunity for hearing, if the Commission finds that the proposed disposition, consolidation, acquisition, or control will be consistent with the public interest it shall approve the same.

Further, under Section 203(b), the Commission may condition its approval on terms "necessary or appropriate to secure the maintenance of adequate service and the coordination in the public interest of facilities subject to the jurisdiction of the Commission."

As the statute has been applied, the applicants are not required to establish that the transaction will add to the public benefit; they need only establish that the transaction is not inconsistent with the public interest. The principle which underlies Section 203 is one of compatibility. *Pacific Power and Light Co.* v. *FPC*, 111 F. 2d 1014 (9th Cir. 1940). Moreover, the application filed by SPS and NME must be evaluated within the broad context of the Public Utility Holding Company Act of 1935, 15 U.S.C. 79 *et. seq.* That act, *inter alia*, seeks to assure that electric utility holding systems are fully integrated. Section 2(a)(29) , 15 U.S.C. § 79b; Section 10(c)(2), 15 U.S.C. 79j.

In *Commonwealth Edison Co.*, 36 FPC 927, 932 (1966), the Commission set forth a non-exclusive list of relevant fac'ors

---

[5] *See Municipal Light Boards of Reading and Wakefield, Massachusetts* v. *FPC*, 450 F. 2d 1341 (D.C. Cir. 1971).

[6] Similar changes in the capacity charge have been accepted for filing in Docket Nos. ER83-322-000 and ER83-327-000 for peaking power service provided by Empire to Kansas City Power & Light Company. *See* Letter Order of the Director of the Office of Electric Power Regulation, dated March 25, 1983.

[1] 48 FR 000 (Jan. 0, 1983).

VOL 48 ISS 90 MAY 9 1983 UMI

appropriate for consideration of any merger agreement subject to the Commission's jurisdiction. These factors included:

> * * * the effect of the proposed action on the applicants' operating cost and rate levels, the contemplated accounting treatment, reasonableness of the purchase price, whether the acquiring utility has coerced the to-be acquired utility into acceptance of the merger, the effect the proposed action may have on the competitive situation, and finally, whether the consolidation will impair effective regulation by this Commission or the appropriate state regulatory authority.

The Need For A Hearing

In the order setting the *Commonwealth Edison* merger for hearing, the Commission also stated that "the public interest will generally be best served by setting for hearing all applications requesting approval of the merger and consolidation of two or more Class A electric utilities." 35 FPC at 930. While both SPS and NME have revenues in excess of those necessary to attain Class A status, [2] we do not believe that a hearing is necessary where the receipt of evidence will not aid the Commission in reaching an ultimate decision. *Denver Stock Yard Co.* v. *Producers Livestock Marketing Ass'n*, 356 U.S. 282, 287 (1958); *City of Lafayette* v. *SEC*, 454 F. 2d 941, 953 (D.C. Cir. 1971); *affirmed sub nom. Gulf States Utilities Co.* v. *FPC*, 411 U.S. 747 (1973).

In the instant case, we have carefully reviewed the joint application of SPS and NME. In addition, we have reviewed information contained in the Commission's public files as well as the record of the proceedings held before the New Mexico Public Service Commission (NMPSC) on December 21, 1982 concerning the companies' application to transfer NME's assets and business to SPS. [3] Based upon our review, we find that sufficient information exists from which to determine whether the proposed transfer of assets is consistent with the public interest and that a formal evidentiary hearing in the instant case is unnecessary. As noted, no interventions have been filed in opposition to the transaction. Accordingly, we now turn to an evaluation of the SPS-NME proposal, in light of the factors set forth in *Commonwealth Edison, supra.*

[2] A Class A electric utility is one whose annual electric operating revenues are $20.5 million or greater. For the twelve months ending September 30, 1982, the applicants' electric operating revenues were: SPS–$804 million; NME–$41 million.

[3] By order dated December 22, 1982, the NMPSC approved the transfer.

The Effect of the Proposed Transaction on Operating Costs and Rate Levels

NME operates an electric utility system centered at Hobbs, New Mexico. The company operates two generating units at its Maddox Station power plant: a 114 MW nameplate capacity gas-fired steam turbine and an 81 MW nameplate capacity gas turbine. According to NME's 1981 Form 1, the latter unit was operated for only 180 hours during the year; thus, the bulk of NME's system requirements are met by the company's steam unit. For 1981, NME's operating expenses per kWh was an average of 4.2¢, of which 3.4¢ consisted of production-related expenses.

SPS, on the other hand, operates its steam turbine units at average operating costs ranging form 1.7–2.7¢/kWh. With respect to distribution, NME's expenses averaged 0.13¢/kWH for 1981, as compared to SPS' cost of 0.09¢/kWh. For administrative and general expenses, each company's average expense during 1981 was 0.15¢/kWh. Based upon SPS' present rates, the sale of NME's assets and business to SPS would result in an immediate overall decrease of 3.3% in rates to NME's customers.

It appears that no additional investment in facilities by SPS will be necessary as a result of the purchase of NME's assets, since the two companies are contiguous and interconnected. However, the proposed transaction is expected to reduce administrative expenses presently being incurred by both companies as a result of their separate operation.

We conclude, on the basis of the foregoing, that the proposed transaction offers the prospect of lower costs and rates for the two companies' customers as a result of more efficient utilization of SPS' generating capacity and reduction in combined operating expenses.

Reasonableness of the Purchase Price

As indicated previously, the proposed transaction involves a transfer of stock valued at $16,773,750, and and assumption of liabilities; no cash payment will be made.

In *Southwestern Public Service Co.*, Opinion No. 162, 22 FERC ¶ 61,341 (March 23, 1983) we affirmed the presiding administrative law judge's finding [4] that a just and reasonable return on equity for SPS was 16.5%. Application of this 16.5% rate to the incremental earnings which would accrue to SPS if the instant transaction were consummated results in a value of $16,025,000. In addition, the average price-to-earnings ratio for electric utilities in that region of the country is approximately 6.6 Applying this ration to the incremental earnings which would result from the transaction results in a vaule of $19,034,400. Finally, we note that NME's book value as of September 30, 1982 was $16,863,797. Under the circumstances, we find that the purchase price of $16,773,750 is reasonable.

[4] 18 FERC ¶ 63,007, p. 65,053 (Jan. 18, 1982).

Was the Sale Coerced by the Acquiring Utility

As the dominant utility in southeastern New Mexico, SPS obviously is in a position to inhibit NME's efforts to retain its independence through means such as joint participation with it in the planning and construction of new facilities, or interconnection with other utilities. The record, however, indicates no such actions. There is no evidence that SPS ever inhibited NME in its efforts to interconnect or otherwise establish closer relations with nearby utilities [5] or otherwise unreasonably refused to cooperate with NME. On the contrary, NME and SPS, along with Lea County, coordinate their electric operations pursuant to their 1979 Interconnection Agreement which provides for the sale of firm power by NME to SPS and for the exchange of unit capacity, emergency service, and economy energy. In addition, we note that SPS and NME are unaffiliated and that the negotiations regarding the proposed agreement were conducted at arms-length. Accordingly, we find no evidence of coercion in the instant case.

The Effect on the Competitive Situation

As part of our analysis we must consider what effect, if any, our approval of a proposed acquisition will have on the existing and future competitive situation in electric utility operations. *Gulf States Utilities Co.* v. *FPC*, 411 U.S. 747 (1973); *Central Power & Light Co.* v. *FERC*, 575 F. 2d 937 (D.C. Cir.), *cert. denied* 439 U.S. 981 (1978); *see*

[5] In January 1981, NME and Public Service Company of New Mexico (PNM), a public utility located in the northern and central part of New Mexico, filed applications under Section 203 to merge the former into the latter. Similar applications were filed before the NMPSC in December 1980. In applying for permission to merge, the parties stated that, upon consummation of the transaction, NME would not become interconnected with PNM. SPS intervened in the proceedings before both this angency and the NMPSC. The NMPSC denied that application in the fall of 1981. On December 13, 1982, PNM and NME filed a joint notice of withdrawal of their applications before this Commission, which became effective December 29, 1982. *See Public Service Co. of New Mexico, et al.*, Docket Nos. EC81–4–000 and EC81–5–000 (January 12, 1983).

also FPC v. *Conway Corp.*, 426 U.S. 271 (1976) (Commission must consider allegations that proposed rates are anticompetitive in effect); *California* v. *FPC*, 369 U.S. 482 (1982); *Northern Natural Gas Co.* v. *FPC*, 399 F. 2d 953 (D.C. Cir. 1968) (antitrust policies must be considered in evaluating the "public interest" standard under the Natural Gas Act). However, while the antitrust laws and the policies underlying them are relevant, they are but one factor to be considered in determining whether the proposed acquisition is consistent with the public interest.

Both SPS and NME are regulated by the NMPSC and this Commission. The existence of regulation clearly serves to constrain potential abuse of monopoly power by public utilities *Commonwealth Edison, supra*, 36 FPC at 940–41.

In the context of regulated public utilities, the "anti-competitive effect" of an acquisition requires consideration of at least three different questions: (1) Will the merger bring a significant added concentration of economic power? (2) Will it eliminate any meaningful competition which may exist, either directly or indirectly, such as in attracting new industry, in making wholesale sales, or in providing economical service? and (3) Will it have an adverse effect on competing energy sources? On the basis of the record in this proceeding, we find that each of these inquiries must be answered in the negative.

In the instant case, the acquisition of NME's assets and business by SPS will increase its operating revenues by approximately 7%, its net income by 3%. Thus, it does not appear that the acquisition of NME will add appreciably to its command of economic power. On the other hand, this increase in SPS' size promises to bring tangible rate advantages to customers of both companies.

We have no reason to conclude that approval of the acquisition eliminates substantial actual or potential competition, at retail or wholesale, between SPS and NME. Furthermore, there is no evidence in this proceeding that the acquisition will have any adverse effect on any competition which may exist between electric power and other energy sources, such as oil, coal, and natural gas.

Effectiveness Of Regulation

Impairment of the effectiveness of regulation is another of the abuses to be guarded against in considering whether an acquisition is consistent with the public interest. In the instant case, the acquisition will not interfere with this Commission's regulation of SPS' wholesale transactions.

SPS does business in Texas and Oklahoma, as well as in the State of New Mexico. The company's retail business in New Mexico is presently subject to regulation by the NMPSC: as part of the regulation, costs incurred by SPS in serving New Mexico ratepayers are segregated out of SPS' systemwide costs. Thus, we do not believe that the addition of NME's retail customers to SPS' system should hamper or interfere with regulation by the NMPSC or any other interested State commission. Accordingly, we do not believe that regulatory effectiveness will be impaired by the merger.

Accounting Treatment

SPS proposes to acquire NME for stock valued at $16,773,750, $2,090.047 less than NME's book value. SPS proposes to record this difference between net book value and the purchase price as a negative adjustment in Account 114 (Electric Plant Acquisition Adjustments) of the Uniform System of Accounts and to amortize the amount over a 20-year period by crediting Account 406 (Amortization of Electric Plant Acquisition Adjustments). We believe, however, that the full amount of the difference between book value and purchase price should be credited to Account 108 (Accumulated Provision For Depreciation of Electric Utility Plant) at the time of purchase.

We conclude that the accounting, as so modified, fairly represents the results of the sale and will accord both with generally accepted accounting principles and the requirements of our Uniform System of Accounts prescribed for public utilities subject to the Federal Power Act.

Conclusion

On the basis of the foregoing analysis, we believe that the proposed acquisition by SPS of NME's assets and electric utility business, as modified with respect to SPS' proposed accounting treatment of the transaction, is consistent with the public interest. Accordingly, we shall approve the joint application of SPS and NME on the terms and conditions stated below.

The Commission orders:

(A) The joint application of SPS and NME tendered on December 14, 1982 is hereby accepted for filing.

(B) The proposed acquisition of NME's facilities by SPS as described in the application is hereby authorized and approved upon the terms and conditions set forth in the application, subject to the modification set forth in Ordering Paragraph (C) below.

(C) SPS shall credit the full amount of the negative acquisition adjustment resulting from the purchase of NME's assets and electric utility business to Account 108 under the Uniform System of Accounts as of the date of purchase.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuations, estimates or determination of costs, or any matter now pending or which may come before this Commission or any other regulatory body.

(E) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717–01–M

[Docket No. CP83–267–000]

Tennessee Gas Pipeline Co. and Columbia Gas Transmission Corporation Application

May 3, 1983.

Take notice that on April 11, 1983, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77001 and Columbia Gas Transmission Corporation (Columbia), P.O. Box 1273, Charleston, West Virginia 25325, filed in Docket No. CP83–267–000 a joint application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the exchange of natural gas and an application by Tennessee for permission and approval to abandon a transportation service provided Columbia, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants state that pursuant to an agreement between them dated December 8, 1982, they propose to exchange 50,000 Mcf of natural gas per day. Columbia would deliver gas to Tennessee at existing interconnections at Tennessee's main line valve 225 in Chautauqua County, New York, and at Tennessee's main line valve 223 in Erie County, Pennsylvania, and other mutually agreed upon points, it is stated. It is also stated that Tennessee would deliver gas to Columbia on Columbia's WB system at or near Servia, Braxton County, West Virginia, and at or near Columbia's Files Creek Compressor Station in Randolph County, West

VOL
48
ISS
90
MY
9
1983
UMI

Virginia, and at other mutually agreed upon points. Applicants state that Tennessee would provide interconnection facilities at the delivery points to Columbia pursuant to blanket certificate authorization. Applicants also indicate that 17 existing interconnections have been agreed to as balancing points for the exchange. There would be no charge to either party for the exchange service, it is stated.

It is also stated that Tennessee desires to abandon a transportation service currently provide to Columbia. Applicants state that the proposed exchange is a substitute for the transportation service and that the exchange would utilize the same gas volumes currently being transported by Tennessee, with the same Tennessee receipt points. It is stated that Applicants have agreed to cancel the transportation service in favor of the proposed exchange.

Any person desiring to be heard or to make any protest with reference to said application should on or before May 24, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determing the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rule.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-12281 Filed 5-6-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP83-265-000, Docket No. RP83-78-000 [1]]

Wyoming Interstate Company, Ltd., Application and Proposed Changes in FERC Gas Tariff

May 3, 1983.

Take notice that on April 7, 1983, Wyoming Interstate Company, Ltd. (Applicant), Post Office Box 1087, Colorado Springs, Colorado 80944, filed in Docket No. CP83-265-000 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the continued transportation of natural gas in interstate commerce, with changes in contract demand volumes of four existing customers, and tendered for filing in Docket No. RP83-78-000 pursuant to Section 4 of the Natural Gas Act Second Revised Sheet No. 5 and Alternate Second Revised Sheet No. 5, superseding First Revised Sheet No. 5, which changes Applicant's Rate Schedule T of the FERC Gas Tariff to reflect changed and increased contract demand volumes to be effective October 1, 1983, all as more fully set forth in the application and tariff sheets which are on file with the Commission and open to public inspection.

In Docket No. CP83-265-000 Applicant requests authority to continue service with the following changes in contract demand volumes:

Customer	Existing contract demand Mcf/d	Proposed contract demand Mcf/d
Colorado Interstate Gas Co.	149,300	150,000
Columbia Gas Transmission Corp.	64,900	65,000
Natural Gas Pipeline Co. of America	165,300	140,000
Northern Natural Gas Co.	46,000	70,000
Total	425,500	425,000

Applicant proposes that on October 1, 1983, its aggregate contract demand volume increase to 500,000 Mcf per day.[2]

Applicant alleges that construction of the 5,400 horsepower Cheyenne Compressor Station authorized by Opinion No. 138 and Order in Docket No. CP79-80, *et al.*, issued March 12, 1982, will be necessary to increase its system capacity to 500,000 Mcf per day.

In Docket No. RP83-78-000 Applicant has tendered for filing certain alternative proposed changes to Rate Schedule T of its FERC Gas Tariff. Rate Schedule T provides a two-part rate under which Applicant provides firm transportation service to its jurisdictional customers. The revision to Rate Schedule T proposed incorporates the annualized effect of the investment in the Cheyenne Compressor Station and applies the related powered throughput factor in the commodity component. The rate proposed in Second Revised Sheet No. 5 is based on a contract demand of 500,000 Mcf per day while the rate proposed in Alternate Second Revised Sheet No. 5 is based on Applicant's existing contract demand volume of 425,500 Mcf per day. Applicant states that the alternate sheet is provided only in the event that its applications for authorization in Docket Nos. CP83-63-000 and CP83-265-000 are not approved prior to October 1, 1983.[1] Applicant alleges the changed rate reflects the additional investment in compression facilities and reflects a lowering of throughput requirement from 87% of unpowered capacity to 72% of the proposed powered capacity of the system.

Any person desiring to be heard or to make any protest with reference to said application or tariff filing should on or before May 24, 1983, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will

[1] Not Consolidated.

[2] In Docket No. CP83-63-000 Applicant seeks authorization to transport a contract demand volume of 75,000 Mcf per day for Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Notice of Application issued November 29, 1982, 47 FR 54536). The sum of the volumes proposed to be transported in Docket Nos. CP83-63-000 and CP83-265-000 equal 500,000 Mcf per day.

be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[Docket No. QF83-162-000]

Amalgamated Sugar Co.; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

May 3, 1983.

On January 31, 1983 Amalgamated Sugar Co. of P.O. Box 250, Nampa, Idaho 83651, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's rules. On April 11, 1983, supplementary information was filed regarding the facility.

The topping-cycle facility is located at North Nampa Boulevard and Karcher Road, Nampa Township, Canyon County, Idaho. The primary energy source is coal. The electric power production capacity is 9,200 kilowatts. Installation of turbine/generators began is 1968. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petiton to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petiton to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

Biomass Power Corp.; Application for Commission Certification of Qualifying Status of a Small Power Production Facility; ERRATA

May 3, 1983.

Correction

In Docket No. QF83-185-000 appearing in the **Federal Register** issue of Friday, March 4, 1983, 48 FR 9359, make the following correction: on page 9359, in the middle column, in the third full paragraph, lines five, six and seven.

"The electric power production capacity of the facility will be 7,500 kilowatts" is corrected to read "The electric power production capacity of the facility will be 6,400 kilowatts."

Energy Systems Division of Thermo Electron Corp.; Application for Commission Certification of Qualifying Status of a Cogeneration Facility

May 3, 1983.

On April 6, 1983, Energy Systems Division of Thermo Electron Corp., P.O. Box 459, Waltham, Massachusetts 02254, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's rules.

The topping-cycle cogeneration facility is located at Dade County Downtown Government Center in Miami, Florida. It will consist of a gas turbine, an unfired heat recovery boiler, a steam turbine and absorption chillers. The electric power production capacity of the facility will be 25 megawatts. The primary energy source will be natural gas. Installation of the facility will begin in 1984. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to

[Docket No. QF83-252-000]

James D. Schumacher; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

May 3, 1983.

On April 11, 1983, James D. Schumacher, (Applicant), 11273 Edgemere Terrace, Roscoe, Illinois 61073, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The wind-powered generating facility is located at the Applicant's address. The electric power production capacity of the facility is 3 kilowatts. No other wind-powered small power production facility owned by the Applicant is located within one mile of the facility. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission. 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to

VOL 48 ISS 90 MAY 9 1983 UMI

the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. QF83-244-000]

Windpower Partners 1983-1; Application for Commission Certification of Qualifying Status of a Small Power Production Facility

May 3, 1983.

On April 1, 1983, Windpower Partners 1983-1, 500 Sansome Street, San Francisco, California 94111, filed with the Federal Energy Regulatory Commission (Commission) an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's rules.

The windplant, consisting of 150–200 50 kilowatt windmills and 500–525 100 kilowatt windmills, will be located in the Altamont Pass area near Livermore, California. The electric power production capacity of the facility will be 60 megawatts. At any one point on the wind plant property, the aggregate capacity of windmills located within a one-mile radius will be 30 megawatts or less and no other wind-powered small power production facility will be located within one mile of the facility for which qualifying status is sought. No electric utility, electric utility holding company or any combination thereof has any ownership interest in the facility.

Any person desiring to be heard or objecting to the granting of qualifying status should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests must be filed within 30 days after the date of publication of this notice and must be served on the applicant. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[OPPM-FRL 2360-6]

Agency Forms Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507 (a) (B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.) requires the Agency to publish in the **Federal Register** a notice of proposed information collection requests that have been forwarded to the Office of Management and Budget (OMB) for review. The information collection requests listed are available to the public for review and comment.

FOR FURTHER INFORMATION CONTACT: David Bowers: Office of Standards and Regulations; Information Management Section (PM-223); U.S. Environmental Protection Agency; 401 M Street, S.W.; Washington. D.C. 20460; telephone (202) 382-2742 or FTS 382-2742.

SUPPLEMENTARY INFORMATION:

Policy and Resource Programs

• Title: Survey of Small Businesses to Determine Regulatory Compliance Problems (EPA ID 1035).

Abstract: EPA plans to survey a sample of small businesses and trade associations for their perceptions on regulatory issues and their concerns about environmental regulations. The information will help the Agency develop an agenda for its proposed conference on small businesses.

Respondents: 200 small businesses and 30 trade associations.

• Title: Economic Dislocation Early Warning System (EDEWS) (EPA ID 0849).

Abstract: EPA will collect information each quarter on actual/threatened plant closings and production curtailments possibly related to environmental requirements of the Clean Air Act. The Agency will use the information to evaluate the effects of these requirements on potential loss/shifts of employment.

Respondents: State/local environmental enforcement authorities and some small businesses.

Pesticides and Toxics Programs

• Title: Form for Requesting Samples (EPA ID 0941).

Abstract: Laboratories will use this revised form to request quality control samples and toxic/hazardous materials samples from EPA. The form will also assist these labs in conducting internal quality control sample programs as recommended by EPA.

Respondents: Federal, state, local, university and private laboratories.

• Title: National Pesticide Usage Survey of Nurseries (EPA ID 1034).

Abstract: EPA is conducting a study of nurseries to gather information on pesticide usage. The information collected will ultimately affect regulatory decisions involving registration, data requirements and special studies.

Respondents: Nurseries.

BILLING CODE 6560-50-M

FEDERAL RESERVE SYSTEM

Bank Holding Companies, Chemical New York Corp.

Chemical New York Corporation, New York, New York, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and

§ 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to engage through its subsidiary, Chemical Mortgage Company, Columbus, Ohio, in arranging equity financing for income producing properties. These activities would be performed from offices of Applicant's subsidiary in Cincinnati and Columbus, Ohio, and the geographic area to be served is the entire United States. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of New York.

Any person wishing to comment on the application should submit views in writing to the Reserve Bank to be received not later than June 1, 1983.

Board of Governors of the Federal Reserve System, May 3, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

SSB Bancorp; Formation of Bank Holding Company

SSB Bancorp, Shipshewana, Indiana, has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 100 per cent of the voting shares of Shipshewana, State Bank, Shipshewana, Indiana. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

SSB Bancorp, Shipshewana, Indiana, ha also applied, pursuant to section 4(c)(8) of the Bank Holding Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of Shipshewana, Insurance Agency, Inc., Shipshewana, Indiana.

Applicant states that the proposed subsidiary would engage in the activities of providing general insurance agency services, including fire, casualty, life and health insurance in a community of less than 5,000 in population. These activities would be performed from offices of Applicant's subsidiary in the towns of Shipshewana, LaGrange, and Topeka, Indiana, and the geographic areas to be served are Shipshewana, LaGrange, Topeka, and the outlying areas of LaGrange County, Indiana. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago.

Any views or requests for hearing should be submitted in writing and received by the Reserve Bank not later than May 24, 1983.

Board of Governors of the Federal Reserve System, May 3, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed de Novo Nonbank Activities; Fleet Financial Group, Inc., et al.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of Boston** (Richard E. Randall, Vice President), 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Fleet Financial Group, Inc.*, Providence, Rhode Island (mortgage banking; Nevada): To engage, *de novo*, through its direct subsidiary Fleet Mortgage Corp., Milwaukee, Wisconsin, in the following activities: Origination and sale of residential and commercial mortgage loans; and servicing of residential and commercial mortgage loans. These activities will be conducted within the limitations set forth in § 225.4(a)(1) of Regulation Y promulgated under Section 4(c)(8) of the Bank Holding Company Act and the limitations set forth in § 225.4(a)(3) of the aforesaid Regulation Y. Such activities will be conducted at a new office in Moana-Lakeside Plaza, Reno, Nevada. The service area will be the Nevada counties of Churchill, Douglas, Elko, Esmeralda, Eureka, Humboldt, Lander, Lyon, Mineral, Pershing, Storey, Washoe, White Pine and the city and suburbs of Tonopah in Nye County. Comments on this application must be received not later than May 26, 1983.

2. *Fleet Financial Group, Inc.*, Providence, Rhode Island (mortgage banking; Illinois): To engage, *de novo*, through its direct subsidiary Fleet Mortgage Corp., Milwaukee, Wisconsin, in the following activities: Origination and sale of residential and commercial mortgage loans; and servicing of residential and commercial mortgage loans. These activities will be conducted within the limitations set forth in § 225.4(a)(1) of Regulation Y promulgated under Section 4(c)(8) of the Bank Holding Company Act and the limitations set forth in § 225.4(a)(3) of the aforesaid Regulation Y. Such activities will be conducted at a new office in Chicago, Illinois. The service area will be the northeast portion of Cook County and the southeast portion of Lake County, Illinois. Comments on this application must be received not later than May 26, 1983.

3. *Fleet Financial Group, Inc.*, Providence, Rhode Island (mortgage banking; Illinois): To engage, *de novo*, through its direct subsidiary Fleet Mortgage Corp., Milwaukee, Wisconsin, in the following activities: Origination and sale of residential and commercial mortgage loans; and servicing of residential and commercial mortgage loans. These activities will be conducted within the limitations set forth in Section 225.4(a)(1) of Regulation Y promulgated under Section 4(c)(8) of the Bank Holding Company Act and the limitations set forth in § 225.4(a)(3) of the aforesaid Regulation Y. Such activities will be conducted at a new office in Urbana, Illinois. The service area will be the Illinois counties of Bureau, Champaign, Clark, Coles, Cumberland, De Witt, Douglas, Edgar, Ford, Fulton, Hancock, Henderson, Henry, Iroquois, Knox, Livingston, Logan, McDonough, McLean, Macon, Marshall, Mercer, Moultrie, Peoria, Piatt, Putnam, Shelby, Stark, Tazewell, Vermilion, Warren, and Woodford. Comments on this application must be received not later than May 26, 1983.

B. **Federal Reserve Bank of New York** (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Barclays Bank PLC* and *Barclays Bank International Limited*, London, England (consumer finance and insurance activities; Florida): To continue to engage through their subsidiaries, BarclaysAmerican/Financial, Inc. ("BAF"), BarclaysAmerican/Mortgage, Inc. ("BAM") and BarclaysAmerican/Financial Services, Inc. ("BAFS"), in making direct consumer loans, including loans secured by real estate, and purchasing sales finance contracts representing extensions of credit such as would be made or acquired by a consumer finance company, and wholesale financing (floor planning); and acting as agent for the sale of related credit life, credit accident and health and credit property insurance. These insurance activities are permissible pursuant to Sections 601 (A) and (D) of the Garn-St Germain Depository Institutions Act of 1982. Credit life and credit accident and health insurance sold as agent may be underwritten or reinsured by BAC's insurance underwriting subsidiaries. These activities would be conducted from an office of BAF, BAM and BAFS located in Tampa, Florida, serving customers in Tampa and surrounding areas in Florida. This notification is for the relocation of an existing office located in Mulberry, Florida. Comments on this application must be received not later than May 31, 1983.

2. *The Chase Manhattan Corporation*, New York, New York (finance, servicing, and leasing activities; Northeastern U.S.): To engage through its indirect subsidiary, Chase Commercial Corporation, in making or acquiring, for its own account or for the account of others, loans and other extensions of credit such as would be made by a commercial finance, equipment finance or factoring company, including factoring accounts receivable, making advances and over-advances on receivables and inventory and business installment lending as well as unsecured commercial loans; servicing loans and other extensions of credit; leasing personal property on a full payout basis and in accordance with the Board's Regulation Y, or acting as agent, broker or advisor in so leasing such property, including the leasing of motor vehicles. These activities would be conducted from an office in Rochester, New York

VOL 48 ISS 90 MY 9 1983 UMI

serving northern New York State, and the states of Connecticut, Maine, New Hampshire, Rhode Island, Massachusetts and Vermont. Comments on this application must be received not later than May 31, 1983.

C. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *NCNB Corporation*, Charlotte, North Carolina, (consumer finance and insurance activities; North Carolina): To engage, through its subsidiary, TranSouth Financial Corporation, in making direct loans for consumer and other purposes, purchasing retail installment notes and contracts and acting as agent for the sale of credit life, credit accident and health and physical damage insurance directly related to its extensions of credit and through its subsidiary, TranSouth Mortgage Corporation, in making direct loans for consumer and other purposes under the general usury statues, purchasing retail installment notes and contracts, making direct loans to dealers for the financing of inventory (floor planning) and working capital purposes and acting as agent for the sale of credit life, credit accident and health and physical damage insurance directly related to its extensions of credit from a common office to be located in Kannapolis, North Carolina, serving an area consisting of a 25 mile radius of said office. This notification is for the relocation of an existing office located in Concord, North Carolina. Comments on this application must be received not later than may 30, 1983.

D. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Associated Banc-Corp*, Green Bay, Wisconsin (financing, servicing and leasing activities; Wisconsin, Illinois, Michigan): To engage, through its proposed subsidiary, Associated Commercial Finance, Inc., in making or acquiring loans and other extensions of credit such as would be made by a commercial financial company, including commercial loans secured by a borrower's inventory, accounts receivable, or other assets; serving such loans for others; and making leases of personal property or acting as agent, broker or advisor in leasing such property. These activities would be performed in the States of Illinois, Michigan and Wisconsin, from an office located in Milwaukee, Wisconsin. Comments on this application must be received not later than May 26, 1983.

E. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *BankAmerica Corporation*, San Francisco, California (investment advising and real estate appraisal activities; *de novo* offices; all fifty (50) states and the District of Columbia): To engage, through its direct subsidiary, BA Appraisals, Inc., a Delaware corporation, in the activities of providing portfolio investment advice (real estate) to any person; furnishing general economic information and advice; providing financial advice to state and local governments on methods of financing real estate development projects and performing real estate appraisals. These activities will be conducted from two *de novo* appraisal offices located in Walnut Creek and El Monte, California, serving all fifty (50) states and the District of Columbia. Comments on this application must be received not later than June 1, 1983.

Board of Governors of the Federal Reserve System, May 3, 1961.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed de Novo Nonbank Activities; PNC Financial Corp., et al.

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 C.F.R. 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of Cleveland** (Lee S. Adams, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *PNC Financial Corp.*, Pittsburgh, Pennsylvania (trust activities; Florida): To engage, through its subsidiary, PNC Trust Company of Florida, N.A., in performing the activities of trust company in the manner authorized by Federal law. These activities will be conducted at an office located in the metropolitan areas of Tampa and St. Petersburg, Florida, serving Hillsborough and Pinellas Counties, Florida. Comments on this application must be received not later than May 26, 1983.

B. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *The Toronto-Dominion Bank*, Toronto, Ontario, Canada, Toronto-Dominion Holdings (U.S.A.), Inc., Atlanta, Georgia (solicitation, servicing, lending and leasing activities; the United States) Too engage *de novo* through their subsidiary, Toronto-Dominion (Colorado), Inc., in soliciting, making or acquiring loans and other extensions of credit, including permitted leasing transactions, for its own account as well as in soliciting and servicing credit for the Toronto-Dominion Bank's agencies, branches and lending subsidiary companies, including marketing credit and other services offered by, assisting in the negotiation of the term of transactions with, and servicing an monitoring extensions of credit and relationships entered into by the entities described above in accordance with the Board's Regulation Y. These activities will be conducted through the expansion of the service area of Toronto-Dominion (Colorado) Inc.'s existing Denver, Colorado Office, serving the area described in the above caption. Comments on this application must be received not later than June 1, 1983.

Board of Governors of the Federal Reserve System, May 3, 1983.

Fee Schedules for Federal Reserve Bank Services

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Interim fee schedule for automated clearing house service corporate trade payments pilot.

SUMMARY: The Board has approved the following interim fee schedule for the automated clearing house (ACH) corporate trade payments pilot:

Interim Fee Schedule

	Cents
Intra-ACH:	
Debits Originated	4.5
Credits received	4.5
Each addenda record after the first 15	0.1
New York Intra-ACH:	
Debits Originated	1.5
Credits received	1.5
Intra-ACH:	
Debits Originated	7.5
Credits received	7.5
Each addenda record after the first 15	0.2
New York Intra-ACH:	
Debits Originated	4.5
Credits received	4.5
Each addenda record after the first 15	0.1

EFFECTIVE DATE: June 2, 1983.

FOR FURTHER INFORMATION CONTACT: Elliott C. McEntee, Assistant Director (202/ 452–2231) or Florence M. Young, Program Manager (202/452–3955), Division of Federal Reserve Bank Operations; Daniel L. Rhoads, Attorney (202/452–3711), or Robert G. Ballen, Attorney (202/452–3265), Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: Since the inception of the ACH, it has primarily been oriented toward consumer payments, such as, salaries, insurance premiums, and mortgage payments. The ACH service is being modified to facilitate corporate trade payments as now permitted under the rules of the National Automated Clearing House Association. The use of the ACH for corporate trade payments will be implemented on a pilot basis. The pilot, scheduled to begin in June 1983, will initially be limited to ten participating corporate originators and 50 participating receivers. The number of maximum participating originators and receivers will gradually be expanded during the course of the pilot. It is expected that the program will be fully phased-in by the end of 1983, at which time the use of the ACH for corporate trade payments will be available to any company that wishes to use the service.

The Board has adopted an interim fee schedule that will apply to this pilot program. This fee schedule will be reviewed when the program becomes fully operational.

The current ACH fee schedule assesses charges to the recipients of funds, that is, receivers of credits and originators of debits, because the recipients of funds realize greater benefits from the ACH than do payors.[1] Based on available information, the benefits to originators and receivers of corporate trade payments appear to be comparable to current ACH applications. Therefore, the current method of assessing ACH fees will be applied to the corporate trade payment pilot.

The current ACH fee schedule assesses higher fees to receivers of ACH credit transactions than to originators of day cycle debit transactions. Additionally, originators of cash concentration debits are assessed a surcharge for these debits that are processed on the night cycle. The price differentials in the current fee schedule reflect the relative benefits realized by the participants in the ACH service. Because corporate trade payment processing has not begun, there currently is little information regarding the average dollar value of the payments or whether the average dollar value of credits and debits differs significantly. It is expected, however, that the average dollar value of credit and debit payments should not differ substantially. Further, the ability of corporations to negotiate trade terms, including payment dates, suggests that both receivers of credits and originators of debits should realize comparable improvements in funds availability. Therefore, the interim fee schedule for the pilot program will provide for the same fee to be charged to receivers of credits and originators or debits.

Unlike current ACH applications, corporate trade payments will be accompanied by records containing supporting documentation, such as, invoice identification, adjustment documentation, and discount information. Balancing the number of these addenda records and the payment information included on them to the payment record necessitates additional processing and will result in higher costs. As many as 4,990 addenda records may accompany a corporate trade payment.

It cannot be determined with precision how corporations will use the addenda record feature of the application. Assessing a separate fee for each addenda record would increase the difficulty for receiving corporations to evaluate the costs and benefits of participating in the ACH since they have no control over the number of invoices (addenda records) that the originators of the payments may choose to include with each payment. On the other hand, setting a single fee to recover the cost of processing all potential addenda records would be unfair to these users who may not need such capacity. Corporate representatives have indicated that, at least initially, the number of addenda records accompanying a payment should average 10 to 15. Therefore, until more experience is gained with the corporate trade payments application, the Board has determined that it would be appropriate to set a fee for the payment and 15 addenda records and to establish a separate fee for each additional addenda record.

The current ACH fees were set to recover 40 percent of the costs of providing commercial ACH services, including the private sector adjustment factor (PSAF). These prices were established in accordance with the ACH pricing policy that was adopted by the Board during April 1982. (Under this policy, the System will reduce the support provided to the ACH service by 20 percent each year so that ACH fees set in 1985 would be set to recover 100 percent of the costs of providing commercial ACH services, including the (PSAF.) Similarly, the interim fee schedule for the pilot will be set on the same basis, that is, currently at the 40 percent recovery rate.

Since it appears that receivers of credits and originators of debits will realize comparable benefits from the corporate trade payments application, the interim intra-ACH fees applicable to the pilot will be based on the average of current intra-ACH prices. This average price is 3.0 cents per transaction for all Reserve Banks, except the New York Reserve Bank. The average price for New York intra-ACH payments is 1.5 cents per transaction, reflecting the fact that the New York Automated Clearing House Association (NYACH) processes all commercial ACH transactions in the New York District.

The interim intra-ACH fee for the pilot will also reflect the additional costs incurred in editing addenda records. It has been estimated that 40 percent of the cost, including the PSAF, of editing one addenda record at one Reserve office is 0.1 cent. Given the 15 addenda records per transaction base, this will result in a 1.5 cents increase in the basic transaction fee. This additional cost will be included in the intra-ACH fees for all Reserve Banks, except New York. For corporate trade payments, the current 1.5 cents interregional differential will

[1] 47 FR 53500 (November 26, 1982).

VOL
48
ISS
90
MY
9
1983
UMI

be increased by 1.5 cents to reflect the cost of editing addenda records at the second Federal Reserve office.

The interim fee schedule for the ACH corporate trade payments pilot effective June 2, 1983 is as follows:

	Cents
Intra-ACH:	
Debits Originated [1]	4.5
Credits received [1]	4.5
Each addenda record after the first 15	0.1
New York Intra-ACH: [2]	
Intra-ACH:	
Debits Originated	1.5
Credits received	1.5
Intra-ACH:	
Debits Originated [1]	7.5
Credits received [1]	7.5
Each addenda record after the first 15	0.2
New York Intra-ACH:	
Debits Originated	4.5
Credits received	4.5 [2]
Each addenda record after the first 15	0.1

[1] Fees reflect the costs associated with processing of ACH payment plus 15 addenda records.
[2] New York intra-ACH fees do not reflect the costs associated with processing addenda records because ACH transactions are processed by NYACH.

By order of the Board of Governors of the Federal Reserve System, May 3, 1983.

James McAfee,

Associate Secretary of the Board.

[Docket Nos. R-0392, 0433]

Reduction and Pricing of Federal Reserve Float

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Approval of proposals to reduce and price Federal Reserve check float.

SUMMARY: The Board of Governors has approved procedures to eliminate and price Federal Reserve check float. A substantial portion of float arising from interterritory returned checks will be eliminated by deferring credit for these returned checks by one day. Other check float will be eliminated or priced. With the implementation of these procedures, all Federal Reserve float arising from the provision of check collection services to depository institutions will be eliminated or priced.

EFFECTIVE DATE: August 1, 1983. On that date, Reserve Banks will change availability schedules for interterritory returned checks. The other procedures will be implemented on October 1, 1983.

FOR FURTHER INFORMATION CONTACT: Elliott C. McEntee, Assistant Director (202/ 452–2231) or Morgan J. Hallmon, Program Manager, Payments Mechanism Planning (202/452–3676), Division of Federal Reserve Bank Operations; Gilbert T. Schwartz, Associate General Counsel (202/452–3625), Daniel L. Rhoads, Attorney (202/452–3711), or Robert G. Ballen, Attorney (202/452–3265), Legal Division, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

SUPPLEMENTARY INFORMATION: The Monetary Control Act of 1980 (Pub. L. 96–221) ("MCA") requires that fees be established for Federal Reserve Bank services. The MCA requires that the Federal Reserve price for Federal Reserve float that remains after operational means to reduce float are implemented.[1]

On December 31, 1980, the Board determined, in response to comments received on the Board's proposals to reduce and price float (45 FR 58689), to proceed with internal operational improvements to reduce float.

As a method of eliminating a portion of Federal Reserve check float, the Board requested comment in April 1982 on a proposed amendment to Regulation J to require a depository institution to pay for checks made available to it by a Reserve Bank on a weekday that is a banking day for the Reserve Bank even if the institution is closed on a regular basis during the business week ("midweek closings"). Comment was also requested on whether this procedure should apply to checks made available to institutions that are closed on state or local holidays by Reserve Banks that are open on such days ("nonstandard holidays"). 47 FR 15349, (April 9, 1982).

The Board also requested comment in November 1982 on a proposal to charge a depository institution that deposits an interterritory check of $50,000 or more based on a wire notification by the Reserve Bank when that check is returned. Comment was also requested on proposals to price holdover check float, intraterritory check transportation float, and other categories of check float as well as interterritory check float. 47 FR 50342 (November 5, 1982).

On March 8, 1983, the Board announced a program to reduce and/or price interterritory check float and check holdover float. 48 FR 10753 (March 14, 1983). Under this program, depository institutions would be offered two crediting options to reduce interterritory check float and three methods for paying for remaining interterritory check float. Additionally, the Board approved pricing of check holdover float over a six month period by incorporating the value of this float in the cost of check services to be recovered in 1983. The Board has now adopted procedures to reduce and/or price the remaining categories of Federal Reserve float arising from the provision of check collection services to depository institutions.

[1] 126 Cong. Rec. S3167 (daily ed. March 27, 1980) (statement of Senator Proxmire).

Return Item Float

Float associated with interterritory returned items amounted to $150 million on a daily average basis in 1982. This float arises because current System procedures specify that payor institutions receive immediate credit for returned items. Reserve Banks, however, are operationally unable to debit immediately the original depositing institution's account for returned items drawn on an institution located in another Federal Reserve territory.

In order to reduce the float associated with such interterritory returned items, the Board requested public comment in November 1982 on a proposal to charge the depositing institution's account for large interterritory returned items ($50,000 or more) based on receipt of a wire notification from the returning Federal Reserve office. As an alternative to having the institution's account debited immediately, the Board proposed that a depository institution could compensate for such return item float through an "as of" adjustment to its account.

The Board received 144 comments on the return item float proposal. A substantial number of commenters (68) expressed support for the proposal. However, a number of commenters, including many who supported the proposal, raised legal concern regarding the proposal. These concerns included: (1) The impact of the proposal on the midnight deadline for returned items; (2) whether a Reserve Bank has authority to charge an institution's account based upon a wire notification; (3) the authority of a depository institution to charge its customer's account prior to receipt of the physical item; (4) the depository institution's liability for errors in account entries, including the possibility of charging an account twice for the same return or charging an account improperly, which may result in subsequent wrongful dishonors; and (5) the Federal Reserve's lack of liability for transmission of erroneous payment data. In addition, a large number of commenters also cited considerable operational difficulties such as reconciling the wire notification with the paper return.

Many commenters suggested that the Federal Reserve consider alternative methods of recovering return item float. Twenty commenters suggested that return item float be handled through a modification to the Federal Reserve's availability schedules. Commenters suggesting this deferred availability approach generally stated their belief that such an approach would more equitably assign float costs associated with returned items by placing the burden of this cost on the institutions that are returning the items and their customers. Some commenters suggested that the Federal Reserve impose an explicit fee for returned items, which would also cover the float costs.

The Board believes that the commenters raised legal and operational issues with respect to the proposal that cannot be resolved in a cost effective manner. Further, since the proposal would have applied only to large dollar returned items, procedures for pricing remaining return item float would still have to be developed. The Board has therefore decided not to adopt the proposal regarding interterritory return item float. Further, the Board does not believe that adoption of an explicit fee for returned items as suggested in some of the comments is appropriate at this time since the System is conducting pilot programs in the Dallas and Kansas City Districts to determine the effectiveness of return item pricing.

After consideration of the comments received and further analysis, the Board has decided to adopt an alternative suggested by the commenters. Under this approach, credit for interterritory returned items would be deferred one day. This deferral of credit on interterritory returned items would eliminate $130 million of return item float.[2] [3] Deferring credit by one day for interterritory returned items will be implemented in August 1983 in order to provide Reserve Banks and depository institutions sufficient time to make operational changes.[4] Since this procedure may affect local clearinghouses that require immediate credit for returned items, Reserve Banks will consult with local clearinghouses to assure orderly implementation of the procedures.

[2] Some commenters suggested that credit for interterritory returned items be provided based upon a fixed availability schedule depending upon the location of the depositing bank. The Board does not believe that such a schedule is necessary or appropriate since most returned items are delivered to the depositing bank's Federal Reserve office within on day.

[3] The remaining $20 million of return item float arises from a variety of other reason, including when a Reserve Bank is unable to return the item to the depositing institution on a timely basis or when it has sent the item to the wrong payor. This "holdover" float will be priced in the same manner as other holdover float, that is, the value is to be added to the cost of the check collection service.

Midweek Closing and Nonstandard Holidays

In April 1982, the Board requested public comment on a proposal to amend Regulation J to require a depository institution to pay for checks delivered or made available to it on days the institution is closed and on which the Reserve Bank is open. Such days consist of "midweek closing days"—regular weekdays on which a depository institution closes as permitted by state law and "nonstandard holidays"—days on which the paying institution is closed because of a state or local holiday. The proposal was intended to eliminate the float that results from granting credit to the depositor for checks that could not be charged to the closed paying institution. Float resulting from midweek closings was approximately $160 million, and float resulting from nonstandard holidays was approximately $100 million on a daily average basis in 1982.

A total of 150 comments were received on the issue of midweek closings; 59 commenters favored the proposal, and 91 were opposed. Most of those opposed were small institutions and their trade associations. These commenters opposed the proposal because they believed that it was unfair to require depository institutions to pay for checks when they are closed as permitted by state law. The commenters also stated that the proposal would make it difficult and more expensive for them to manage their cash positions.

Those in favor of the proposal generally indicated that it is an equitable way of eliminating float. Institutions that are the source of the float would be most immediately affected by the proposal. These commenters also indicated that the proposal would eliminate the advantages these closed institutions may have in not having to bear the cost of such float directly.

A total of 82 comments were received on the issue of nonstandard holidays. Of these, 19 were in favor of the proposal, and 63 were opposed. Those opposed indicated that bank holidays are mandated by state law and it would be unfair to penalize banks for acting in accordance with state law; it is inequitable to charge banks that are closed on nonstandard holidays when Reserve Banks themselves do not follow a uniform holiday schedule; and the proposal would make it more difficult and expensive for depository institutions to manage their cash positions.

The Board believes the comments on both midweek closings and nonstandard holidays raise significant issues. The major impact of the midweek closing proposal would be on small institutions in small communities that are closed during the week. In some areas the practice has been widespread for many years. For example, it is reported that over 70 percent of the banks in western Tennessee close during the week. Such institutions typically prefer to open on Saturdays as a convenience to customers that are unable to do their banking business during the week. Adoption of the proposal could also have a significant effect upon the operations of some small institutions, particularly since they would be unable to debit their customers accounts until the following day. In addition, there is little evidence to suggest that the bulk of these institutions are closed in order to avoid paying for checks or to create Federal Reserve float. Further, depository institutions closed on nonstandard holidays generally do not have the opportunity to remain open. Therefore, the Board has determined not to adopt the proposed amendment to Regulation J at this time.

The Board believes, however, that it is necessary to adopt procedures to eliminate or price this float as required by the MCA. Therefore, Reserve Banks will have three options to deal with float arising from midweek closings and nonstandard holidays. First, a Reserve Bank could modify its availability schedule for local depositors so that credit for checks drawn on closed institutions would be deferred one additional day.[5] Second, a Reserve Bank could modify its current practice of posting funds received for the account of the insititution on the day the institution is closed. A one day deferral of credits received on the day the institution is closed would offset some of the float arising from midweek closings and nonstandard holidays. Finally, Reserve Banks could price all or any remaining float arising from midweek closings or nonstandard holidays in the same manner as holdover float. The value of this float would be added to the cost of the check collection service.

The Board intends to monitor float associated with midweek closings to

[4] This one-day deferal generally would apply to intererterritory and intraterritory returned items that are comingled. However, if intraterritory returned items are separated by the paying bank, credit for such items would not be deferred since the items can be returned to the depositing bank the same day and no Federal Reserve float would be created. Reserve Banks that are able to process commingled returns in a timely fashion could give immediat credit for such intraterritory returned items when no Federal Reserve float would arise from such a practice.

determine whether it is increasing to any significant extent. If a pattern develops, the Board may reconsider the proposed amendment to Regulation J.

Intraterritory Transportation Float

In November 1982, it was proposed that intraterrioty transportation float be priced in the same manner as holdover float. Intraterritory transportation float results primarily from the inability of a Federal Reserve office to make presentment of checks to payor institutions as a result of transportation delays. The few commenters expressing views specifically on this proposal generally were opposed to charging at all for float that arises from conditions beyond the control of depository institutions. Other commenters argued that pricing of intraterritory transportation float in this manner would not provide Reserve Banks with an incentive to operate efficiently.

The MCA requires that all Federal Reserve float arising from the provision of priced services to depository institutions be priced. Because of the operational difficulty of allocating intraterritory transportation float back to specific depository institutions and in view of the small amount of float involved ($110 million), it would also be inefficient to attempt to trace the float to individual depositors. Accordingly, the Board believes that the values of such float should be added to the cost of the check collection service. Reserve Bank performance will continue to be monitored to ensure that intraterritory transportation float is kept to a minimum and that Reserve Banks continue to operate efficiently.

All Other Check Float

Only a small amount ($40 million) of check float will remain after implementation of the above procedures. This remaining check float arises primarily from adjustments to the accounts of depository institutions because of Federal Reserve accounting errors and from the handling of government agency deposits at Reserve Banks. The amount of float arising from adjustments is relatively small ($30 million) and it would not be cost effective to charge the float to particular depository institutions. The Board therefore believes it appropriate to add the value of this float to the cost of the check collection service.

The Board also believes that it is inappropriate to charge depository institutions for float arising from deposits by government agencies ($10 million) since such float does not arise from the provision of priced services to depository institutions. Indeed, since such float arises from the provision of services to government agencies, it is not necessary to price such float under the Monetary Control Act. Accordingly, the value of this float will be attributed to such government agencies.

Implementation Schedule

The one day deferral of credit for interterritory returned items will be implemented on August 1, 1983, in order to provide Reserve Banks and depository institutions sufficient time to make the appropriate operational adjustments.

Virtually all other categories of check float will be priced by adding the value of the float to the cost of the check collection service. Any Necessary adjustments to fee schedues will be implemented beginning in October, 1983, thus providing Reserve Banks with an opportunity to implement operational adjustments designed to reduce float further and to put into place and test the systems necessary to implement the adopted procedures. An October 1983 implementation date also will enable Reserve Banks to coordinate these changes with modifications to fees that may result from the comprehensive review of their fee schedules planned for this summer. The Board believes that piecemeal adjustments to fee schedules at an earlier time could be disruptive to depository institutions that take Federal Reserve fee schedules into account in their planning and operations. After implementation of these procedures, all Federal Reserve float arising from the provision of check collection services to depository institutions will have been eliminated or priced in accordance with the Monetary Control Act of 1980.

By order of the Board of Governors of the Federal Reserve System, May 3, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Advisory Council on Social Security; Meeting

AGENCY: Department of Health and Human Services.

ACTION: Notice of meeting.

SUMMARY: Pursuant to Section 10(a)(2) of Pub. L. 92-463, the Federal Advisory Committee Act, notice is hereby given of a meeting of the Advisory Council on Social Security, as established by the Secretary of Health and Human Services in accordance with Section 706 of the Social Security Act, 42 U.S.C. 907.

DATE/ADDRESS: The meeting will be held May 24–25, 1983, from 9:00 a.m. to 4:00 p.m. each day. It will be held in the Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, D.C. 20201, in room 503–A.

FOR FURTHER INFORMATION CONTACT: Thomas R. Burke, Executive Director, Advisory Council on Social Security, 200 Independence Avenue, SW., Washington, D.C. 20201; telephone (202) 755–8670/71.

SUPPLEMENTARY INFORMATION: The meeting is open to the public. Attendance will be limited to the space available. Correspondence can be addressed to Advisory Council on Social Security, 200 Independence Avenue, SW., Washington, D.C. 20201.

Sign language interpreting services will be provided if requested in advance.

The proposed meeting agenda includes further briefings and discussion on the Medicare program; and such other business as the Chairperson, the Executive Director, or the membership may put before the Council.

A previous meeting of the Advisory Council on Social Security was announced in 48 FR 12136–12137, March 23, 1983.

Records are kept of all Council proceedings and are available for public inspection at the Office of the Administrative Officer, Advisory Council on Social Security, Room 317–H, HHH Building, 200 Independence Avenue, SW., Washington, D.C. 20201.

Thomas R. Burke,

Executive Director.

BILLING CODE 4120-03-M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Realty Action-Exchange; Public Lands in Lassen County, California

The following described public lands have been determined to be suitable for disposal by exchange under Section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Mount Diablo Meridian, California

T.29N., R.9E.,
Sec. 33, SE¼NE¼.
T.30N., R.10E.,
Sec. 1, Lots 3 and 4;
Sec. 2, Lot 1, SE¼NE¼, SW¼NW¼, NW¼SW¼;
Sec. 3, SE¼NE¼;
Sec. 9, E½SE¼;
Sec. 10, NW¼SW¼;
Sec. 11, NW¼NW¼, S½SW¼;
Sec. 14, NW¼.
T.29N., R.11E.,
Sec. 10, NW¼NE¼;
Sec. 19, SE¼NE¼;
Sec. 20, NW¼NE¼;
Sec. 21, NE¼NE¼.
T.30N., R.11E.,
Sec. 1, N½SW¼;
Sec. 5, Lots 1, 2, S½NE¼, NE¼SE¼;
Sec. 6, Lots 1, 2, SW¼NE¼;
Sec. 18, W½NE¼.
T.31N., R.11E.,
Sec. 26, SW¼SE¼.

Containing 1,392.07 acres.

In exchange for these lands, the Federal Government will acquire tracts of non-Federal land in Lassen County from the management consultants and land managers firm of Beaty and Associates, P.O. Box 898, Redding, California, 96001, authorized by the landowners, Walker et. al. The lands are described as follows:

Mount Diablo Meridian, California

Fee Title

T.29N., R.11E.,
Sec. 2, Lots 2, 3, 4, S½NW¼;
Sec. 3, S½N½, N½SW¼, NW¼SE¼;
Sec. 4, S½NE¼, NE¼SE¼, W½SW¼;
Sec. 5, N½SE¼, SE¼SE¼, and those portions of the SE¼NW¼ and the NW¼SW¼ lying South of the centerline of State Highway 36, except that one acre portion of the SE¼NW¼ described as follows: Commencing at the CN 1/16 corner of Section 5, thence South 208 feet; thence West 208 feet; thence North 208 feet; thence East 208 feet to the point beginning;
Sec. 6, That portion of the SE¼SW¼ and the SW¼SE¼ lying South of the centerline of the Southern Pacific Railroad right-of-way (S 015838).
T.30N., R.11E.,
Sec. 35, SE¼SW¼, N½SE¼, SW¼SE¼.
T.30N., R.9E.,
Sec. 36, That portion of the N½ lying north of the south boundary of the SPRR right-of-way.

Easements

T.29N., R.9E.,
Sec. 4, That portion of the old Southern Pacific Railroad right-way (SU 03144) lying within the SW¼SW¼; Section 17, That portion of the old Southern Pacific Railroad right-of-way (SU 03144) lying within the W½SW¼.

Containing 1,177.16 acres.

All minerals in the private and public lands will be exchanged.

The purpose of this exchange is to acquire non-Federal lands that have significant multiple-use values, recreational, cultural, wildlife, botanical, and scenic, that far outweigh values found on the Federal lands to be exchanged. The exchange is consistent with Bureau planning and has been discussed with Lassen County and various other State of California agencies. The public interest will be well served by making the exchange.

The value of the lands to be exchanged is approximately equal and the acreage will be adjusted or money will be used to equalize the values upon completion of the final appraisal of the lands.

There will be reserved to the United States in the public lands to be exchanged, a right-of-way thereon for ditches and canals constructed by the authority of the United States (Act of August 30, 1980, 43 U.S.C. 945).

There will also be reserved to the United States of America, and its assigns, a nonexclusive easement to use, maintain, improve, and repair roads over and across the following described real property situated in the County of Lassen, State of California, to wit:

Mount Diablo Meridian, California

T. 30 N., R. 10 E.,
Sec. 1, Lots 3 and 4;
Sec. 2, Lot 1, SE¼NE¼, SW¼NW¼, NW¼SW¼;
Sec. 3, SE¼NE¼;
Sec. 9, E½SE¼;
Sec. 10, NW¼SW¼;
Sec. 11, NW¼NW¼, S½SW¼;
Sec. 14, NW¼.

The publication of this notice in the **Federal Register** shall segregate the public lands described herein from all other forms of appropriation and entry under the public land laws and the mining laws for a period of two years. The exchange is expected to be consummated before the end of that period.

Detailed information concerning the exchange, including the environmental analysis and the record of non-Federal participation, is available for review at the Bureau of Land Management's Susanville District Office, 705 Hall Street, Susanville, California, 96130 and at the Eagle Lake Resource Area Office, 2545 Riverside Drive, Susanville, California, 96130.

The publication date of this notice, May 9, 1983 will commence the 45 day comment period. For a period of 45 days after publication of this notice in the Federal Register, interested parties may submit comments to the District Manager, Bureau of Land Management, 705 Hall Street, P. O. Box 1090, Susanville, California, 96130.

C. Rex Cleary,

District Manager.

Dated: April 19, 1983.

BILLING CODE 4310-84-M

[M 55074]

Realty Action; Competitive Sale of Public Land in Treasury County, Montana

The following described land has been examined and identified as suitable for disposal by sale pursuant to Section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750; 43 U.S.C. 1713), at no less than fair market value ($4,800).

Montana Principal Meridian

T. 3 N., R. 38 E.,
Sec. 26: SE¼NE¼, SW¼NW¼.

The areas described aggregate 80 acres.

The subject land will be offered for sale by sealed bid utilizing competitive bidding procedures. Bids will be opened at the Montana State Office on July 13, 1983, at 9 a.m. If not sold the land will remain available for sale on a continuing basis until a sale is completed. Any sealed bids received will be opened at 9 a.m. each succeeding first and third Wednesdays until the lands are sold or the sale is closed.

Each bid must be accompanied by a certified check, postal money order, bank draft, or cashier's check made payable to the Bureau of Land Management for not less than one-fifth of the amount bid.

The sealed bid envelope must be marked in the lower left-hand corner as follows:

Public Land Sale M 55074

July 13, 1983 (or continuation date)

Bids must be submitted to the BLM Montana State Office, 222 North 32nd Street, Billings, Montana 59107.

All minerals will be reserved to the United States. A right-of-way for ditches and canals will be reserved and the sale will be subject to all valid existing rights and reservations of record.

For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Bureau of Land Management, Miles City District, P.O. Box 940, Miles City, Montana 59301.

Information related to the sale, including planning documents and environmental assessment is available for review at the Miles City District Office.

Ray Brubaker,

District Manager.

VOL 48 ISS 90 MAY 9 1983 UMI

Bureau of Reclamation

Hoover Powerplant Modification Project, Arizona-Nevada; Public Hearing on Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, the Department of the Interior has prepared a draft environmental statement for the Hoover Powerplant Modification Study Project. That study was authorized by Pub. L. 94–158 on December 16, 1975. This statement (INT DES 83–28 dated May 4, 1983), filed with the Environmental Protection Agency, is available to the public, as specified in the Notice of Availability.

The purpose of the proposed construction and operation of additional generating units is to increase the generating capacity of the powerplant by 500 megawatts to help meet peak demand in the Southwest. The project will not result in additional electrical generation. Construction of the feature is scheduled to begin in 1987 with project completion scheduled for 1992.

A public hearing to receive comments on the draft environmental statement will be held in Boulder City, Nevada, at the Boulder City Hall, 900 Arizona Avenue, on June 8, 1983. The hearing will commence at 7 p.m. Oral statements at the hearing will be limited to a period of 10 minutes. Speakers will not trade their time to obtain longer oral presentation; however, the person authorized to conduct the hearing may allow any speaker to provide additional oral comment after all persons wishing to make comments have been heard. Speakers will be scheduled according to the time preference mentioned in their letter or telephone request, whenever possible. Any scheduled speaker not present when called will lose his or her privilege in the scheduled order, and his name will be recalled at the end of the scheduled speakers. Requests for scheduled presentations will be accepted up to 4 p.m. June 1, 1983, and any subsequent requests will be handled on a first-come, first-serve basis following the scheduled presentations.

Organizations or individuals desiring to present their statements at the hearing should contact Mary Webb of the Office of Environment, Bureau of Reclamation, P.O. Box 427, Boulder City, Nevada 89005, telephone (702) 293–8464, and announce their intention to participate. Written comments from those unable to attend and from those wishing to supplement their oral presentation at the hearing should be sent on or before June 1, 1983, so that they can be included in the hearing records.

Dated: May 4, 1983.

Robert N. Broadbent,

Commissioner.

[INT DES 83–28]

Hoover Powerplant Modification Project, Arizona-Nevada; Availability of Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, the Department of the Interior has prepared a draft environmental statement for the Hoover Powerplant Modification Project, Arizona-Nevada.

This statement describes the environmental impacts resulting from the proposed construction and operation of additional generating units at the Hoover Powerplant to increase the capacity. The project will not result in additional electrical generation. The powerplant would be increased by 500 megawatts for a total plant capacity of about 2,300 megawatts. Development of the proposed project is contingent upon Administration and congressional consideration of the results of the feasibility study and environmental review process. Written comments may be submitted to the Regional Director (address below) on or before August 2, 1983.

Copies are available for inspection at the following locations:

Director, Office of Environmental Affairs, Bureau of Reclamation, Room 7622, Department of the Interior, Washington, DC 20240, Telephone: (202) 343–4991;

Division of Management Support, General Services, Library Section, Code 950, E&R Center, Denver Federal Center, Denver, Colorado 80225, Telephone (303) 234–3007;

Office of the Regional Director, Bureau of Reclamation, Nevada Highway and Park Street, Boulder City, Nevada 89005, Telephone: (702) 293–8464;

Arizona Projects Office, Bureau of Reclamation, 201 North Central Avenue, Valley Bank Center, Suite 2200, Phoenix, Arizona 85073, Telephone: (602) 261–3577;

Boulder City Public Library, 813 Arizona Avenue, Boulder City, Nevada 89005, Telephone: (702) 293–1281;

Clark County Library, 1401 East Flamingo Road, Las Vegas, Nevada 89109, Telephone: (702) 733–7810;

Bullhead City Public Library, Bullhead City, Arizona 86430; or

Los Angeles County Public Library, 3200 West Temple Street, Los Angeles, California 90053.

Single copies of the draft environmental statement may be obtained on request to the Commissioner of Reclamation or the Regional Director. Please refer to the statement number above.

Dated: May 4, 1983.

Tom Loomis,

Acting Director, Office of Environmental Project Review.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–133]

Certain Vertical Milling Machines and Parts, Attachments and Accessories Thereto; Receipt of Initial Determination Terminating Respondent on the Basis of Consent Order Agreement

AGENCY: U.S. International trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminating the following respondent on the basis of a consent order agreement: Deka Machine Sale Corporation.

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon the parties on May 4, 1983.

Copies of the initial determination, the consent order agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

Written Comments: Interested persons may file written comments with the Commission concerning termination of the aforementioned respondent. The original and 14 copies of all such comments must be filed with the Secretary to the Commission, 701 E Street, NW., Washington, D.C. 20436, no later than 10 days after publication of this notice in the **Federal Register**. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Rudy J. Dionne, Office of the Secretary, U.S. International Trade Commission, telephone 202–523–0176.

By order of the Commission.

Issued: May 4, 1983.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

INTERSTATE COMMERCE COMMISSSION

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; Water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brookers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Resigter** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Resigter** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Resigter** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR Part 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. in addition to fitness grounds, these applications may be opposed on the grounds that the tranportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the following types of applications as indicated: common carrier of property—that the service proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provieded under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed), appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Please direct status inquiries to Team 3 at (202) 275–5223.

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (fitness-only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisified before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract."

Please direct status inquiries to Team 2, (202) 275–7030.

Volume No. OP2–204

Decided: April 29, 1983.

By the Commission, Review Board No. 1, members Parker, Chandler, and Fortier.

MC 167272 (Sub-1), filed April 11, 1983. Applicant: CHEETAH TRANSFER LTD., INC., 151 Route 206—Bldg. 21, Suite 12, Flanders, NJ 07836. Representative: Robert B. Motor Carriers; Permanent Authority Decisions; Decision-Notice

Decided April 29, 1983.

90–Day Intrastate Motor Common Carriers of Passengers.

The following applications, filed on or after November 19, 1982, are governed by Part 1168 of the Commission's Rules of Practice. See 49 CFR Part 1168, published in the **Federal Register** on November 24, 1982, at 47 FR 53275. For compliance procedures, see 49 CFR 1168.6 and 49 U.S.C. 10922(c)(2)(E).

Persons wishing to oppose an application must follow the rules under 49 CFR Part 1168. In addition to fitness grounds, applications may be opposed on the grounds that the transportation to be authorized would directly complete with a commuter bus operation and would have a significant adverse effect on all commuter bus service in the area in which the competing service will be performed. Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demontrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulation. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 25 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 30 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board Number 1, Members Parker, Chandler, and Fortier (Board Member Parker not participating).

Agatha L. Mergenovich,

Secretary.

Note.—All applications are filed under 49 U.S.C. 10922(c)(2)(A) for authority to operate as a motor common carrier of passengers in intrastate commerce on a route over which applicant has interstate, regular-route authority on November 19, 1982.

Please direct status inquiries to Team 2, (202) 275–7030.

MC 109312 (Sub-44), filed April 11, 1983. Applicant: DE CAMP BUS LINES, 101 Greenwood Ave., Montclair, NJ 07042. Representative: Edward F. Bowes, 7 Becker Farm Rd., P.O. Box Y, Roseland, NJ 07068, 201–992–2200. Applicant seeks authority in intrastate commerce to conduct service at all intermediate points on routes in MC–109312, which traverse NY and NJ.

BILLING CODE 7035-01-M

Motor Carriers; Temporary Authority Applications

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register**. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

Notice No. F–259

The following applications were filed in region I.

Send protests to: Interstate Commerce Commission, Regional Authority Center, 150 Causeway Street, Room 501, Boston, MA 02114.

MC 166951 (Sub-1–2TA), filed April 21, 1983. Applicant: ANDREW'S XPRESS, INC., 508 E. 36th Street, Patterson, NJ 07504. Representative: Jack L. Schiller, 111–56 76th Drive, Forest Hills, NY 11375. *Chemicals (except chemicals in bulk),* between the facilities of FR Chemicals-Division of Cine Magnetics, Inc., located at Mt. Vernon, NY, on the one hand, and, on the other, points in CT, DE, MA, MD, NJ, PA and RI. Supporting shipper: FR Chemicals-Division of Cine Magnetics, Inc., 524 S. Columbus Ave., Mt. Vernon, NY 10550.

MC 167618 (Sub-1–1TA), filed April 25, 1983. Applicant: BLUE JAY TRANSPORTATION INC., 400 South Street, P.O. Box 773, Marlboro, MA 01752. Representative: David M. Marshall, Marshall and Marshall, Sixth Floor—95 State Street, Springfield, MA 01103. *General commodities (except Classes A and B explosives, household goods and commodities in bulk),* between points in Middlesex and Norfolk Counties, MA, on the one hand, and, on the other, points in CT, NH, NJ and NY. Supporting shipper(s): Nypro Corp., Inc. 101 Union Street, Clinton, MA 01510; Merck, Sharp & Dohme Division, Merck & Co., Inc., 40 A Street, Needham, MA 02192; Urell, Inc., 86 Collidge Avenue, Watertown, MA 02172; and H. B. Fuller Co., Hayes Memorial Drive, Marlboro, MA 01752.

MC 162133 (Sub-1–2TA), filed April 20, 1983. Applicant: COMMUTER BUS LINE, INC., 1515 Jefferson Street, Hoboken, NJ 07030. Representative: Sidney J. Leshin, Esq., 3 East 54th Street, New York, NY 10022. *Contract carrier:* irregular routes: *Passengers and their baggage,* between Staten Island and Manhattan, NY via NJ under continuing contract with Great Kills Commuters Association, Staten Island, NY. Supporting shipper: Great Kills Commuters Association, 134 Rye Avenue, Staten Island, NY 10312.

MC 167163 (Sub-1–1TA), filed April 26, 1983. Applicant: EASTERN CONNECTION, INC., 101 Tremont Street, Suite 215–216, Boston, MA 02108. Representative: Robert R. Berluti, Esq., Connor & Hilliard, 1350 Main Street, Walpole, MA 02081. *Printed matter (except in bulk and tank vehicles) weighing less than 10,000 lbs.* between Washington, DC, Boston, MA, New York, NY, Philadelphia, PA, Hartford, CT and Baltimore, MD. Supporting shipper: Bingham, Dana and Gould, 100 Federal Street, Boston, MA 02108.

MC 119103 (Sub-1–3TA), filed April 20, 1983. Applicant: J. E. FORTIN, INC., 116 Fortin Boulevard, St. Bernard de Lacolle, P.Q. J0J 1V0 CD. Representative: W. Norman Charles, P.O. Box 724, Glens Falls, NY 12801. *Meat and meat products* from ports of entry on the U.S./CD Boundary Line in ME, MI, NH, NY, and VT, to points in AL, CT, DE, FL, GA, IL, IN, KY, ME, MD, MA, MI, MS, NH, NJ, NY, OH, PA, NC, RI, SC, TN, VT, VA, WV, WI, and DC. Supporting shipper: Olympia Packers Ltd., 171 St. Edouard Street, St. Simon, Quebec, J0H 1Y0 CD.

MC 143127 (Sub-1–33TA) (Republication), filed March 29, 1983. Applicant: K. J. TRANSPORTATION, INC., 6070 Collett Road, Victor, NY 14564. Representative: Catherine Jablonski (same as above). *General commodities (except Classes A & B explosives; Household Goods; Commodities in bulk, and Hazardous wastes)* between points in the U.S. (except AK and HI) originating at or destined to the facilities of Arcata Graphics Co. Supporting shipper: Arcata Graphics Co., 101 Merritt 7, Norwalk, CT 06852. Sole purpose of this republication is to delete the specific reference of Norwalk, CT as the only originating/destination facility. Applicant seeks authority to provide service to all facilities of Arcata Graphics Co.

MC 167632 (Sub-1–1TA), filed April 26, 1983. Applicant: OVAL CARGO DISTRIBUTION SYSTEM, INC. d.b.a. OVAL TRANSPORT, 345 Sussex Road, Wood-Ridge, NJ 07075. Representative: Harold L. Reckson, 32–28 Halsey Road, Fair Lawn, NJ 07410. *General commodities (except Classes A and B explosives, household goods and commodities in bulk),* between Boston, MA, Portsmouth, NH, Providence, RI, New York, NY, Philadelphia, PA, Baltimore, MD, and Norfolk, VA, and points in their commercial zones, on the one hand, and, on the other, points in the U.S. in and east of MN, IA, MO, AR and LA. Supporting shipper: Hapag-Lloyd Agencies, Inc., 1 Edgewater Plaza, Staten Island, NY 10305.

MC 111729 (Sub-1–14TA), filed April 20, 1983. Applicant: PUROLATOR COURIER CORP., 3333 New Hyde Park Road, New Hyde Park, NY 11042. Representative: Elizabeth L. Henoch (same as applicant). *Contract carrier:* irregular routes: *General commodities (except Classes A and B explosives, household goods and commodities in bulk),* between points in the U.S. (except AK and HI), under continuing contract(s) with Western Electric Company, Incorporated of Greensboro, NC. Supporting shipper: Western Electric Company, Incorporated, Guilford Center, Greensboro, NC 27420.

MC 125875 (Sub-1–1TA), filed April 21, 1983. Applicant: REAL TRANSIT CO., P.O. Box 343, Fords Road, Rockaway, NJ 07866. Representative: Andrew J. Carraway, Suite 1301, 1600 Wilson Boulevard, Arlington, VA 22209. *Common carrier:* regular routes: *Passengers* between Long Valley, NJ and New York City, serving all intermediate points: From the intersection of NJ Hwy 24 and County Rts. 513 and 517 at Long Valley, NJ, east along NJ Hwy 24 to the intersection of U.S. Hwy 206 near Chester, NJ, then north over U.S. Hwy 206 to the Intersection of I–80, then east over I–80 to the intersection of NJ Hwy 23 and U.S. Hwy 46, then east over U.S. Hwy 46 to the intersection of NJ Hwy 3, then east over U.S. Hwy 3 to I–495, the east over I–495 to the New York Port Authority bus Terminal. Supporting shipper(s): There are 38 statements in support of this application which may be examined at the I.C.C. Regional Office, Boston, MA.

MC 22527 (Sub-1–1TA), filed April 25, 1983. Applicant: RIVERSIDE SERVICE CORPORATION, 7 Austin Street, Buffalo, NY 14207. Representative: Frederick H. Staub (same address as applicant). *Metal products,* between points in NY, on the one hand, and, on the other, points in PA, OH, NJ, MA, CT, RI, NH, VT and ME. Supporting shipper: Bethlehem Steel Corporation, Bethlehem, PA 18016.

MC 167554 (Sub-1–1TA), filed April 21 1983. Applicant: SANBORN'S MOTOR EXPRESS QUEBEC, INC., 550 Forest Avenue, Portland, ME 04101. Representative: Zoe Ann Pace, Esq., Zelby & Burstein, 387 Park Avenue South, New York, NY 10016. *General commodities (except household goods, commodities in bulk and Class A and B explosives)* between the U.S./Canadian border with ports of entry at LaColle/Champlain, NY, Rock Island/Derby, VT, and Philipsburg/High Gate Springs, VT, on the one hand, and, on the other points in ME, NH, VT, MA, CT, RI, NY, NJ, PA and MD. Supporting shipper(s): There are 38 statements in support of this application which may be examined at the I.C.C. Regional Office, Boston, MA.

MC 150260 (Sub-1–1TA), filed April 25, 1983. Applicant: L. F. STARBIRD & SON, R. R. 2, Box 462, Hollis Center, ME 04042. Representative: John G. Feehan, 178 Middle Street, Portland, ME 04112. *(1) Coal in bulk* from points in PA to the facilities of Solid Ruel Depot Company in Biddeford, ME; *(2) Carbonated soft drinks in cans and bottles* from points in MA to the facilities of Seltzer & Rydholm Distributors, Inc., in Portland, ME. BILLING CODE 7035–01–M

[No. 38879]

Motor Carriers; Agricultural Cooperative; Commission of Intent To Perform Interstate Transportation for Certain Nonmembers

Dated: May 4, 1983.

The following notices were filed in accordance with section 10526(a)(5) of the Interstate Commerce Act. These rules provide that agricultural cooperatives intending to perform nonmember, nonexempt interstate transportation must file the Notice, Form BOp–102, with the Commission within 30 days of its annual meetings each year. Any subsequent change concerning officers, directors, and location of transportation records shall require the filling of a supplemental Notice within 30 days of such change.

The name and address of the agricultural cooperative (1) and (2), the location of the records (3), and the name and address of the person to whom inquiries and correspondence should be addressed (4), are published here for interested persons. Submission of information which could have bearing upon the propriety of a filing should be directed to the Commission's Office of Compliance and Consumer Assistance, Washington, DC 20423. The Notices are in a central file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, DC.

[No. 38879]

Motor Carriers; Aero Mayflower Transit Co., Inc.; Petition for Exemption From Tariff Filing Requirements

AGENCY: Interstate Commerce Commission.

ACTION: Notice of final exemption of existing operations and provisional exemption of future operations.

SUMMARY: The provisional exemption of petitioner's existing operations granted at 47 FR 47331 (October 25, 1982) is made final. Additionally, in accordance with current Commission policy, a provisional exemption of petitioner's future contracts is granted.

DATE: Comments are due on May 24, 1983. The provisional exemption of petitioner's future contracts will become final on June 8, 1983, unless, in response to timely filed adverse comments, the Commission issues a future decision withdrawing this relief.

ADDRESS: Send an original and 15 copies of comments to: No. 38879, Room 2139, Interstate Commerce Commission, Office of Proceedings, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT:

Leonard L. Arnaiz, (202) 275–7831
or
Howell I. Sporn, (202) 275–7691.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. Infosystems, Inc., Room 2227, 12th and Constitution Ave., N.W., Washington, D.C. 20423, or call 289–4357 in the DC metropolitan area or toll free (800) 424–5403.

Decided: April 29, 1983.

By the Commission, Division 1, Commissioners Sterrett, Taylor, and Gradison. Commissioner Taylor is assigned to this Division for the purpose of resolving tie votes. Since there was no tie in this matter, Commissioner Taylor did not participate.

Agatha L. Mergenovich,
Secretary.

VOL 48 ISS 90 MY 9 1983 UMI

[Ex Parte No. 387]

Rail Carriers; Exemptions for Contract Tariffs

AGENCY: Interstate Commerce Commission.

ACTION: Notices of provisional exemptions.

SUMMARY: Provisional exemptions are granted under 49 U.S.C. 10505 from the notice requirements of 49 U.S.C. 10713(e), and the below-listed contract tariffs may become effective on one day's notice.[1] These exemptions may be revoked if protests are filed.

DATES: Protests are due within 15 days of publication in the **Federal Register**.

ADDRESS: An original and 6 copies should be mailed to: Office of the Secretary, Interstate Commerce Commission, Washington, DC 20423.

FOR FURTHER INFORMATION CONTACT: Douglas Galloway (202) 275-7278.

SUPPLEMENTARY INFORMATION: The 30-day notice requirement is not necessary in these instances to carry out the transportation policy of 49 U.S.C. 10101a or to protect shippers from abuse of market power; moreover, the transaction is of limited scope. Therefore, we find that the exemption requests meet the requirements of 49 U.S.C 10505(a) and are granted subject to the following conditions:

These grants neither shall be construed to mean that the Commission has approved the contracts for purposes of 49 U.S.C. 10713(e) not that the Commission is deprived of jurisdiction to institute a proceeding on its own initiative or on complaint, to review these contracts and to determine their lawfulness.

Sub-No.	Name of railroad, contract no. and specifics	Review Board [1]	Decided date
919	Soo Line RR Co. Exemption for Contract Tariff ICC-SOO-C-0051, Supplements 1 (Woodpulp)	3	05-03-83
920	Norfolk and Western Railway Co. Exemption for Contract Tariff ICC-NW-C-0080, Supplement 1 (Motor Vehicles)	1	05-03-83

[1] Review Board No. 1, Members Parker, Chandler, and Fortier. Review Board No. 3, Members Krock, Joyce, and Dowell.

This action will not significantly affect the quality of the human environment or conservation of energy resources.

(49 U.S.C. 10505)

[1] Note tariff supplements advancing contracts' effective date shall refer to these decisions for authority.

By the Commission.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Denial of Application; B. Earl Mahan

On January 13, 1983, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), directed an Order to Show Cause to B. Earl Mahan, 736 Searchlight, Stockton, California 95205 seeking to deny the application filed on May 8, 1982 for registration as a researcher in Schedules I and II and as an analytical laboratory under 21 U.S.C. 823(F). The statutory predicates for the Order were that B. Earl Mahan was not registered with the State of California as a researcher in Schedules I and II, as required by California law, and therefore is not authorized to conduct research in California; that the Food and Drug Administration disapproved Mahan's application as a Schedule I researcher on May 28, 1982 finding him to be unqualified and incompetent to conduct research in Schedule I; and that he is not a practitioner as that term is defined in 21 U.S.C. 802 (20) and used in 21 U.S.C. 824(a). Respondent sent an undated letter which was received by the Drug Enforcement Administration on February 1, 1983. The Acting Administrator has considered this letter and constitutes it to be a waiver of the hearing under 21 CFR 1301.54(d) and 1301.54(e). The Acting Administrator enters this final order on the record as it appears.

Respondent posses an associate's degree in general education from a community college. He has submitted no evidence to indicate that he possesses the requisite training, knowledge, or equipment for controlled substance research or the operation of an analytical laboratory. This matter first came to the attention of DEA when Respondent filed applications for registration as a researcher in Schedule I. In that application Respondent wrote: "project. the use of catoles. the filling of pitholes in the face. catgut or pure cow skin in chemical injection. Purpose. to be better at my trade controlled substances. Liteocain, codeine." When DEA personnel contacted Respondent concerning this application, he explained theat his research involved "opium extraction from hearts of lettuce leaf" in addition to "catoles treatment" and the sale of look-alike drugs. Respondent described his specialty as that of chemical facelifting.

When DEA personnel investigated Respondent's application at his home he showed them a quantity of look-alike drugs. When DEA personnel informed him that he did not need to be registered with DEA to possess these substances, Respondent indicated that he is aware of this and added that the reason that he needs a DEA registration is so that he can get the real drugs. Respondent informed DEA investigators that he had obtained his expertise in drug handling from taking a course on drugs at Sacramento State University and from reading the Physicians' Desk Reference. The Acting Administrator notes that Respondent submitted a copy of his transcript from Sacramento State University, and that this transcript is devoid of any indication than Mahan enrolled in a chemistry or other physical science course. He did, however, receive a "D" in a course entitled Drug Abuse and Criminal Behavior.

It is clear that DEA cannot register Respondent as a researcher in Schedule I and II since he lacks California registration for such activities. Respondent would lead DEA to believe that a business license he obtained from the City of Stockton somehow authorizes him to operate as a researcher in California. Similarly, DEA cannot register Respondent as a researcher under 21 U.S.C. 823(f), since the Food & Drug Administration disapproved his application as a Schedule I researcher. The Acting Administrator finds the denial memorandum from the Acting Director of the Division of Pharmacological Drug Products at the Food and Drug Administration to be very well taken. That memorandum reads: "We find this is not research; there was no protocol. The applicant is found to be not qualified and competent. This submission has no scientific merit."

The third ground for the denial of Respondents's application is the fact that he does not meet the statutory definition of a practitioner as that term is defined in 21 U.S.C. 802 (20). That section defines a practitioner, in pertinent part, as a "physician, dentist, veterinarian, scientific investigator * * * or other person licensed, registered, or otherwise permitted, by the United States or the jurisdiction in which he practices or does research, to distribute, dispense, conduct research with respect to, administer, or use in teaching or chemical analysis, a controlled substance in the course of professional practice or research."

Mahan is not a physician, dentist or veterinarian. He would be registered with DEA, if at all, as a scientific investigator. As the Acting Administrator noted in Michael J. McClara, 46 FR 57375 (1981), the CSA contains no explicit definition of "scientific investigator." In McClara, the Acting Administrator noted that the State of California does not license analytical laboratories. McClara possessed limited chemistry training and very minimal laboratory equipment that was inaufficient to conduct analysis of controlled substances. The Acting Administrator concluded that DEA has an obligation to evaluate the qualifications of individuals who seek registration as analytical laboratories in states that do not license such activities, in order to protect the public health and safety.

The Acting Administrator finds that B. Earl Mahan is not a "scientific investigator." These applications are nothing more than transparent ruses to obtain controlled substances. Mahan would lead this agency to believe that a business license and a mediocre academic record somehow rendered him competent to conduct research in controlled substances. In McClara, the Acting Administrator concluded that the first responsibility of DEA is to protect the public health and safety, and DEA would have been remiss in its duties if it had granted McClara's application for registration. The same considerations apply in denying the application of B. Earl Mahan. Registration of Mr. Mahan could wreak catastrophic results upon the public.

For the reasons stated above, the Acting Administrator finds that B. Earl Mahan, the applicant herein, does not meet the definition of a practitioner found in 21 U.S.C. 802 (20). The Acting Administrator also finds that B. Earl Mahan lacks the requisite California registration to conduct research in Schedules I and II and that the Food and Drug Administration disapproved his application as a Schedule I researcher. It is the decision of the Acting Administrator to deny the application filed by B. Earl Mahan May 8, 1982 for registration with DEA as a researcher in Schedules I and II and as a analytical laboratory. Accordingly, pursuant to the authority vested in the Attorney General by 21 U.S.C 824 and redelegated to the Administrator of the Drug Enforcement Administration, the Acting Administrator hereby denies the application filed May 8, 1982, and any other applications that may be pending, effective immediately.

Dated: May 2, 1983.

Francis M. Mullen, Jr,

Acting Administrator.

BILLING CODE 4410-09-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[83-41]

NASA Advisory Council, Space Systems and Technology Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Systems and Technology Advisory Committee, Informal Advisory Subcommittee on Computer Science and Applications.

DATE AND TIME: May 26, 1983, 8:30 a.m. to 4:30 p.m.; and May 27, 1983, 8:30 a.m. to 3:30 p.m.

ADDRESS: Ames Research Center, Building 244, Room 103, Moffett Field, CA 94035.

FOR FURTHER INFORMATION CONTACT: Mr. Lee Holcomb, National Aeronautics and Space Administration, Code RTC-6, Washington, D.C. 20546; (202/755-2494).

SUPPLEMENTARY INFORMATION: The Informal Advisory Subcommittee on Computer Science and Applications was established to review and make recommendations on NASA research and technology programs and plans in aerospace computing, including concurrent processing, reliable engineering, data systems, artificial intelligence, and high performance computational facilities. The subcommittee is composed of eleven members and chaired by Professor Raj Reddy of Carnegie-Mellon University. The meeting will be open to the public up to the seating capacity of the room (approximately 45 persons including the subcommittee members and participants).

Type of Meeting: Open.

Agenda

May 26, 1983

8:30 a.m.—Opening Remarks.

9 a.m.—Overview of Office of Aeronautics and Space Technology Long Range Plan.

9:30 a.m.—Computer Science and Applications Long Range Plans.

4:30 p.m.—Adjourn.

May 27, 1983

8 a.m.—Ames Research Center Computer Science and Applications Program.

3:30 p.m.—Adjourn.

Ann P. Bradley,

Acting Associate Administrator for Management, Office of Management.

April 29, 1983.

NASA Advisory Council, Space Systems and Technology Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space Systems and Technology Advisory Committee, Informal Advisory Subcommittee on Space Electronics.

DATE AND TIME: June 1-2, 1983, 8:30 a.m. to 5:00 p.m. each day.

ADDRESS: Langley Research Center, Building 1202, Room 246, Hampton, Virginia 23665.

FOR FURTHER INFORMATION CONTACT: Mr. Duncan McIver, National Aeronautics and Space Administration, Code RTC-6, Washington, DC 20546; (202/755-2494).

SUPPLEMENTARY INFORMATION: The Informal Advisory Subcommittee on Space Electronics was established to review and make recommendations on NASA research and technology programs and plans in space electronics which include microelectronic devices, sensors, communications, robotics and teleoperation, and control technology. The Subcommittee, chaired by Dr. Don Fraser, is comprised of 11 members, the meeting will be open to the public up to the seating capacity of the room (approximately 45 persons including the Subcommittee members and participants).

Type of Meeting: Open.

Agenda

June 1, 1983

8:30 a.m.—Opening Remarks.

8:50 a.m.—Overview of Office of Aeronautics and Space Technology Long Range Plan.

9:20 a.m.—Space Electronics Long Range Plan.

5 p.m.—Adjourn.

NASA Advisory Council, Aeronautics Advisory Committee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Aeronautics Advisory Committee, Informal Advisory Subcommittee on Aircraft Controls and Guidance.

DATE AND TIME: June 7, 1983, 8:30 a.m. to 4:30 p.m.; June 8, 1983, 8:30 a.m. to 4:30 p.m.; June 9, 1983, 8:30 a.m. to 11:00 a.m.

ADDRESS: Langley Research Center, Building 1202, Room 246, Hampton, Virginia 23665.

FOR FURTHER INFORMATION CONTACT: Mr. Duncan E. McIver, National Aeronautics and Space Administration, Code RTH-6, Washinton, D.C. 20546; (202/755-3273).

SUPPLEMENTARY INFORMATION: The Informal Advisory Subcommittee on Aircraft Controls and Guidance was established to assist the NASA in assessing the overall program. Particular emphasis is placed on the responsiveness to the critical needs, significant technology gaps and exploiting new opportunities with high potential benefits. The subcommittee chaired by Mr. Duane McRuer, is comprised on 12 members. The meeting will be open to the public up to the seating capacity of the room (approximately 50 persons including the subcommittee members and participants).

Type of Meeting: Open.

Agenda

June 7, 1983
8:30 a.m.—Subcommittee Business.
9:30 a.m.—Introductory Remarks.
10 a.m.—NASA Aircraft Controls and Guidance Research and Technology Plan.
1 p.m.—Simulation Validation Technology Review Task.
2 p.m.—NASA Controls and Guidance Program Issues.
4:30 p.m.—Adjourn.

June 8, 1983
8:30 a.m.—NASA Controls and Guidance Program Issues Continued.
4:30 p.m.—Adjourn.

June 9, 1983
8:30 a.m.—Subcommittee Deliberation.
11 a.m.—Adjourn.

Ann P. Bradley,
Acting Associate Administrator for Management, Office of Management.

BILLING CODE 7510-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-213]

Connecticut Yankee Atomic Power Co.; Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 56 to Facility Operating License No. DPR-61 to Connecticut Yankee Atomic Power Company (the licensee), which revised the Technical Specifications for operation of the Haddam Neck Plant (the facility) located in Middlesex County, Connecticut. This amendment is effective as of its date of issuance.

This amendment deletes the fish impingement monitoring requirements form the Appendix B (Environmental) Technical Specifications (ETS).

The applications for amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The applications for amendment dated July 23, 1982 and February 15, 1983, (2) Amendment No. 56 to License No. DPR-61, and (3) the Commission's related letter of transmittal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Russell Library, 119 Broad Street, Middletown, Connecticut 16457. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 2nd day of May 1983.

For the Nuclear Regulatory Commission.

Dennis M. Crutchfield,
Chief, Operating Reactors Branch #5, Division of Licensing.

[FR Doc. 83-12360 Filed 5-6-83; 8:45 am]
BILLING CODE 7590-01-M

[Docket No. 50-155]

Consumers Power Co. and Big Rock Point Plant; Issuance of Director's Decision

By petitions sent in the form of Mailgrams on April 11 and 12, 1983 to the Commissioners of the Nuclear Regulatory Commission (the Commission) (NRC), Ms. JoAnn Bier and Ms. Christa-Maria requested that no additional fuel be allowed in the Big Rock Point spent fuel pool (beyond the 132 assemblies currently stored in the pool) until the issue of pool thermal/structural adequacy is resolved. The petitions have been treated under 10 CFR 2.206 of the Commission's regulations. They were referred to the NRC staff for disposition on April 14, 1983. Big Rock Point is located in Charlevoix County, Michigan.

The petitions quoted concerns about the thermal/structural adequacy of the Big Rock Point spent fuel pool which were identified by the NRC staff in a letter to the licensee dated May 21, 1982.

Upon review of the NRC staff's ongoing efforts regarding these concerns, the Director of Nuclear Reactor Regulation has determined that the NRC staff is already addressing the issues raised by the petitioners, and that no further actions need be undertaken at this time. The reasons for this determination are explained in the "Director's Decision" under 10 CFR 2.206 (DD-83-07) which is available in the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Charlevoix Public Library, 107 Clinton Street, Charlevoix, Michigan 49720.

A copy of the decision will be filed with the Secetary for the Commission's review in accordance with 10 CFR 2.206(c). As provided in this regulation, the decision will become the final action of the Commission twenty-five (25) days after issuance, unless the Commission on its own motion institutes review of the decision within that time.

Dated at Bethesda, Maryland, this 3d day of May 1983.

For the Nuclear Regulatory Commission.

Dennis M. Crutchfield,
Chief, Operating Reactors Branch #5, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-331]

Iowa Electric Light & Power Co., et al.; Issuance of Amendment to Facility Operating License

The Nuclear Regulatory Commission (the Commission) has issued Amendment No. 89 to Facility Operating License No. DPR-49 issued to Iowa Electric Light and Power Company, Central Iowa Power Cooperative, and Corn Belt Power Cooperative, which revises the Technical Specifications for operation of the Duane Arnold Energy Center, located in Linn County, Iowa. The amendment is effective as of its date of issuance.

This amendment to the Technical Specification revises the following: (1) The Group I Containment Isolation signal from reactor vessel low-low water level to reactor low-low-low water level, (2) the Group I isolation reactor pressure setpoint from 880 psig to 850 psig and (3) the low-low set logic to the two non-ADS safety relief valves.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a singificant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated March 10, 1983, (2) Amendment No. 89 to License No. DPR-49, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Cedar Rapids Public Library, 426 Third Avenue, S.E., Cedar Rapids, Iowa 52401. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 29th day of April 1983.

For the Nuclear Regulatory Commission.

[Docket No. 50-298]

Nebraska Public Power District; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 82 to Facility Operating License No. DPR-46 issued to Nebraska Public Power District (the licensee), which revised the Technical Specifications for operation of the Cooper Nuclear Station located in Nemaha County, Nebraska. The amendment is effective as of its date of issuance.

The amendment revises the Technical Specifications to include modifications to the following: (1) Fire protection system clean water supply; (2) scram discharge volume; (3) RPS power monitoring system; (4) plant staff working hours; (5) Safety Review Audit Board duties; (6) snubber listings; (7) Standby Gas Treatment (SBGT) testing requirements; (8) 10 CFR Appendix J testing; (9) Station Operations Review Committee and Safety Review Audit Board review frequency, and (10) increase in the suppression pool temperature limit during normal operation and (11) administrative controls.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The applications for amendment dated June 10, 1982, November 24, 1982 and February 25, 1983 (2) Amendment No. 82 to License No. DPR-46, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Auburn Public Library, 118 15th Street, Auburn, Nebraska 68305. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

[Docket No. 50-344]

Portland General Electric Co., et al.; Issuance of Amendment to Facility Operating License

The Nuclear Regulatory Commission (the Commission) has issued Amendment No. 80 to Facility Operating License No. NPF-1, issued to Portland General Electric Company, the City of Eugene, Oregon, and Pacific Power and Light Company (the Licensees), which revised the operating license and Technical Specifications for operation of the Trojan Nuclear Plant (the facility) located in Columbia County, Oregon. The amendment is effective as of the date of issuance.

The amendment implements International Atomic Energy Agency (IAEA) Safeguards at the Trojan facility by the addition of a license condition subjecting the facility to IAEA safeguards inspections as defined in the Facility Attachment. The Facility Attachment defines the IAEA inspection program, and was prepared jointly by the United States and the IAEA in consultation with the licensees. Under the Treaty with the IAEA, the U.S. is committed to permit the IAEA to apply safeguards in the U.S. in the same manner as non-nuclear weapons countries.

Unrelated to the above, the amendment also corrects an error in Table 2-1 in Part I of the Environmental

VOL 48 ISS 90 MY 9 1983 UMI

Technical Specifications which defines radiological sampling types and locations.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated March 23, 1982, (2) Amendment No. 80 to License No. NPF-1 and (3) the Commission's related letter dated April 27, 1983. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the local public document room located at the Multnomah County Library, Social Science and Science Department, 801 S.W. 10th Avenue, Portland, Oregon 97205. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 27th day of April, 1983.

For the Nuclear Regulatory Commission.

Robert A. Clark,

Chief, Operating Reactors Branch No. 3, Division of Licensing.

[FR Doc. 83-12384 Filed 5-6-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-333]

Power Authority of the State of New York (James A. FitzPatrick Nuclear Power Plant); Exemption

I

The Power Authority of the State of New York (the licensee) is the holder of Facility Operating License No. DPR-59 (the license) which authorizes the operation of the James A. FitzPatrick Nuclear Power Plant (the facility) at steady-state reactor power levels not in excess of 2436 megawatts thermal. The facility consists of a boiling water reactor located at the licensee's site in Oswego County, New York. The license provides, among other things, that it is subject to all rules, regulations and Orders of the Commission now or hereafter in effect.

II

Section IV.F of Appendix E to 10 CFR Part 50 requires that an emergency preparedness exercise be conducted (at least) annually. By letter dated January 4, 1983 the licensee requested a one-time exemption from the requirements of 10 CFR 50, Appendix E, Section IV.F, to conduct an annual emergency preparedness exercise for the year subsequent to its first full-scale exercise (August 11, 1982). This first exercise of August 11, 1982, was scheduled in response to a January 21, 1982 letter from the NRC to G. T. Berry, which granted a deferral from an earlier mandated exercise date and required that the second annual exercise be conducted prior to April 1, 1983. However, as a result of coordination efforts with New York State, Oswego County and Niagara Mohawk, the licensee has tentatively scheduled the 1983 exercise for October 12, 1983. Therefore the licensee requested a one-time waiver for the date of this currently scheduled exercise.

During our review we found: that the last full-scale exercise held on August 11, 1982 demonstrated an acceptable level of preparedness; that a full-scale exercise was conducted September 16, 1981 by Niagara Mohawk at its Nine Mile Point facility, which is adjacent to the FitzPatrick plant (on the same site), and that this has effectively resulted in an annual exercise involving state and local authorities with the FitzPatrick-Nine Mile Point site; that these full-scale exercises provide adequate assurance regarding the capability of the State and local officials to respond to an emergency at either nuclear plant; that another exercise will be conducted prior to October 15, 1983; and that the training of emergency response personnel will continue as committed to in the James A. FitzPatrick Nuclear Power Plant Emergency Plan to ensure that personnel remain familiar with emergency response duties.

Based on our findings, we have determined that a one-time delay in performing the next annual emergency preparedness exercise will not adversely affect the overall state of emergency preparedness at FitzPatrick. Therefore, we conclude that the licensee's exemption request is acceptable and should be granted.

III

Accordingly, the Commission has determined that pursuant to 10 CFR 50.T2, an exemption is authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest. Therefore, the commission hereby approves the following exemption request:

The licensee is exempt from the requirement of Section IV.F of Appendix E to 10 CFR Part 50 with respect to the requirement for conducting an annual emergency preparedness exercise and is required to conduct the next emergency preparedness exercise no later than October 15, 1983.

The NRC staff has determined that the granting of this Exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d) (4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

Dated at Bethesda, Maryland this 28th day of April 1983.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Division of Licensing, Office of Nuclear Reactor Regulation.

[FR Doc. 83-12385 Filed 5-6-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-267]

Public Service Company of Colorado (Fort St. Vrain Nuclear Generating Plant); Order Confirming Licensee Commitments on Post-TMI Related Issues

I

Public Service Company of Colorado (the licensee) is the holder of Facility Operating License No. DPR-34 which authorizes the operation of the Fort St. Vrain Nuclear Generating Station (the facility) at a steady-state power level not in excess of 842 megawatts thermal. The facility is a high temperature gas-cooled reactor (HTGR) located at the licensee's site in Weld County, Colorado.

II

Following the accident at Three Mile Island No. 2 (TMI-2) on March 28, 1979, the Nuclear Regulatory Commission (NRC) staff developed a number of proposed requirements to be implemented on operating reactors and on plants under construction. These requirements include Operational Safety, Siting and Design, and

Emergency Preparedness and are intended to provide substantial additional protection in the operation of nuclear facilities based on the experience from the accident at TMI-2 and the official studies and investigations of the accident. The staff's proposed requirements and schedule for implementation are set forth in NUREG-0737, "Clarification of TMI Action Plan Requirements." Among these requirements are a number of items, consisting of hardware modifications, administrative procedure implementation and specific information to be submitted by the licensee, scheduled to be completed on or after July 1, 1981. On March 17, 1982, a letter (Generic Letter 82-05) was sent to all licensees of operating power reactors for those items that were scheduled to be implemented from July 1, 1981 through March 1, 1982. Subsequently, on May 5, 1982, a letter (Generic Letter 82-10) was also sent to all licensees of operating power reactors for those items that were scheduled for implementation after March 1, 1982. These letters are hereby incorporated by reference. In these letters each licensee was requested to furnish within 30 days pursuant to 10 CFR 50.54(f) the following information for items which the staff had proposed for completion on or after July 1, 1981: (1) For applicable items that have been completed, confirmation of completion and the date of completion, (2) For items that have not been completed, a specific schedule for implementation, which the licensee committed to meet, and (3) Justification for delay, demonstration of need for the proposed schedule, and a description of the interim compensatory measures being taken.

III

Public Service Company of Colorado (PSC) responded to Generic Letter 82-05 by letter dated March 26, 1982, and provided supplemental information by letter dated June 30, 1982; PSC responded to Generic Letter 82-10 by letter dated June 1, 1982. In these submittals, PSC confirmed that some of the items identified in the Generic Letters had been completed, some were not applicable to Fort St. Vrain, and made firm commitments to complete the remainder. The attached Tables summarizing the liensee's schedular commitments or status were developed by the staff from the Generic Letters and the licensee-provided information.

Generic Letters 82-05 and 82-10 addressed nineteen and sixteen items, respectively. Of the 11 items listed in Generic Letter 82-10 requiring a response, six items are not included in this Order. Item I.A.1.3.2 is part of a separate rulemaking; Items I.C.1, III.A.1.2 (2 items), and III.A.2.2 will be handled separately following Commission actions that would proceed as a result of its consideration of Commission Paper SECY 82-111, as amended; and Item II.K.3.30 and II.K.3.31 (one item) is not required until one year after staff approval of the generic model and staff review of these models has not been completed. Some items are still under reveiw to resolve philosophical differences in reactor technology, and one, the simulator item, is under policy review to account for a one-of-a-kind, unique facility. The staff has reviewed the licensee's submittals and determined that the licensee's response is acceptable based on the following:

I.A.3.1 Simulator Exams. Since specific requirements for a Fort St. Vrain simulator are not available, and a simulator for a one-of-a-kind, unique reactor would be difficult and expensive to develop, the issue of a simulator exam must be resolved at a later date by cognizant management at the NRC and therefore is not included in this Order. In the interim, PSC is providing training in accident analyses and plant behavior during transients as well as more hands-on experience and use of accident simulation codes for its operators. Until the issue of a simulator exam is resolved, PSC is in compliance with the intent of the requirement.

II.B.2 Plant Shielding

II.B.3 Post Accident Sampling. The existing methods and instrumentation for monitoring the plant exhaust stack gas and primary activity are acceptable for the previously analyzed design basis accident at Fort St. Vrain. However, it appears that for some worst-case severe accident sequence scenarios beyond the design basis, the on-line monitors could go off scale and personnel access might not be permissible either to obtain a primary coolant grab sample or to read an inplace monitor. Until an NRC ruling becomes available on severe accident analyses, PSC is in compliance with this item.

II.B.4 Training to Mitigate Core Damage. Procedures and training in place at FSV are satisfactory with respect to prevention and mitigation of core damage. PSC is reviewing procedures for alternate depressurization methods and will possibly include them in a training manual.

II.F.1 Accident Monitoring. This item consists of six parts dealing with instrumentation necessary to detect certain failed conditions. The containment water level and hydrogen concentration monitors are not applicable to FSV. The containment pressure monitor is for determining if a coolant line has failed; the FSV coolant helium pressure is monitored continuously and a loss of helium, is known immediately and a reactor trip is initiated by the plant protection system. FSV has provisions for continuous sampling of plant effluents for post-accident releases of radioactive iodines and particulates and onsite laboratory capabilities. The ruling mentioned in Items II.B.2 and II.B.3, above, may also affect this item.

The effluent gases at FSV are monitored before release by instrumentation having a continuous recording and control room display. Permanent online monitors have an upper limit reading of 10 μci/cc. Installed semiportable monitors are capable of 10E5 μci/cc.

The requirement of monitoring the radiation level of the containment (reactor building for FSV) is met in a qualitative sense at FSV, but the upper limit of radiation specified at 10^8 rad/h cannot be met with the existing installed instrumentation, (which has a limit of 10E4 rad/h). The power density and fuel configuration are different for water reactors and FSV. The power density is lower and the fuel is encapsulated with a multilayered ceramic coating having a high temperature capability. This coating would delay the release of highly active fission products after a reactor scram. Also, the Prestressed Concrete Reactor Vessel (PCRV) has a minimum thickness of nine feet. Consequently, the post-accident radiation levels in the reactor building would probably be lower than those of a water reactor.

We find, based on the above evaluation, that: (1) The licensee has taken corrective actions regarding the delays and has made a responsible effort to implement the NUREG-0737 requirements noted; (2) there is good cause for the several delays; and (3) as noted above, interim compensatory measures have been provided.

In view of the foregoing, I have determined that these modifications and actions are required in the interest of public health and safety and should, therefore, be confirmed by Order.

IV

Accordingly, pursuant to Sections 103, 161i, and 161o of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 2 and 50, it is hereby ordered effective immediately that the licensee shall:

VOL 48 ISS 90 MAY 9 1983 UMI

Implement and maintain the specific items described as complete in the attachments to this Order. Incomplete items shall be completed by no later than the dates shown in the attachments (as described in the licensee's submittals noted in Section III herein) and maintained thereafter.

V

The licensee may request a hearing on this Order within 20 days of the date of publication of this Order in the **Federal Register**. A request for a hearing shall be addressed to the U.S. Nuclear Regulatory Commission, Regional Administrator, Region IV, 611 Ryan Plaza Drive, Suite 1000, Arlington, Texas 76011. A copy shall also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. A request for hearing shall not stay the immediate effectiveness of this Order.

If a hearing is requested by the licensee, the Commission will issue an Order designating the time and place of any such hearing.

If a hearing is held concerning this Order, the issue to be considered at the hearing shall be whether the licensee should comply with the requirements set forth in Section IV of this Order.

This Order is effective upon issuance.

Dated at Arlington, Texas, this 27th day of April 1983.

For the Nuclear Regulatory Commission.

James E. Gagliardo,

Director, Division of Resident, Reactor Project and Engineering Programs, Region IV.

[Docket Nos. 50-272 and 50-311]

Public Service Electric and Gas Co. Salem Nuclear Generating Station, Units 1 and 2; Issuance of Director's Decision

Notice is hereby given that the Director, Office of Nuclear Reactor Regulation, has denied the petition filed by the Public Advocate of the State of New Jersey on April 12, 1983, amended April 18, 1983. The petition has been treated pursuant to 10 CFR 2.206 of the Commission's regulations.

The petition requested that the Nuclear Regulatory Commission order Public Service Electric and Gas Company to show cause why it should not be restrained from restarting the Salem facilities until it had taken certain actions related to the causes of the reactor circuit-trip breaker failures of February 22 and 25, 1983 at the Salem Unit 1 facility. In addition, the Public Advocate requested that the licensee be required to demonstrate certain actions before an Atomic Safety and Licensing Board in response to the show cause order.

A copy of the "Director's Decision under 10 CFR 2.206" is available in the Commission's Public Document Room located at 1717 H Street, N.W., Washington, D.C. 20555, and the local public document room for the Salem facility located at the Salem Free Public Library, 112 West Broadway, Salem, N.J. 08097.

A copy of the Decision is being filed with the Secretary for the Commission's review in accordance with 10 CFR 2.206(c).

Dated: at Bethesda, Maryland, thia 29th day of April 1983.

For the Nuclear Regulatory Commission.

Edson G. Case,

Deputy Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

[Docket No. 50-206

Southern California Edison Co. and San Diego Gas & Electric Co.; Issuance of Amendment To Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 68 to Provisional Operating License No. DPR-13, to Southern California Edison Company and San Diego Gas and Electric Company (the licensees), which revised the Technical Specifications for San Onofre Nuclear Generating Station, Unit No. 1 (the facility) located in San Diego County, California. The amendment is effective upon issuance; however, the Technical Specifications are to be implemented within 30 days of issuance.

The amendment modified Section 3.7 of the Appendix A Technical Specifications and Bases to incorporate conditions of electrical power availability during cold shutdown or refueling.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated August 27, 1980, (2) Amendment No. 68 to License No. DPR-13, and (3) the Commission's related Satety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the San Clemente Branch Library, 242 Avenida Del Mar, San Clemente, California. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director of Licensing.

Dated at Bethesda, Maryland, this 3d day of May 1983.

For the Nuclear Regulatory Commission.

Dennis M. Crutchfield,

Chief, Operating Reactors Branch #5, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. 50-206]

Southern California Edison Co.; Issuance of Amendment to Provisional Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 69 to Provisional Operating License No. DPR-13, to Southern California Edison Company and San Diego Gas and Electric Company (the licensees), which revised the Technical Specifications for San Onofre Nuclear Generating Station, Unit No. 1 (the facility) located in San Diego County, California. The amendment is effective as of its date of issuance.

The amendment deletes the Technical Specifications related to audits of Emergency Preparedness and Safeguards Contingency (Security) Plans.

The application for amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated March 4, 1983, (2) Amendment No. 69 to License No. DPR-13, and (3) the Commission's letter of transmittal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the San Clemente Branch Library, 242 Avenida Del Mar, San Clemente, California. A single copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director of Licensing.

[Docket Nos. 50-361 and 50-362]

Southern California Edison Co., et al.; Issuance of Amendments Facility Operating License Nos. NPF-10 and NPF-15

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 17 to Facility Operating License No. NPF-10, and Amendment No. 5 to Facility Operating License NPF-15 to Southern California Edison Company (SCE), San Diego Gas and Electric Company, The City of Riverside, California and The City of Anaheim, California (licensees) for the San Onofre Nuclear Generating Station, Units 2 and 3 (the facility) located in San Diego County, California. These amendments are effective April 29, 1983.

The amendments modify the license condition and Technical Specifications covering the Post Accident Sampling System (PASS) to require availability and training of operators, development of procedures, implementation of interim compensatory measures, monthly progress reports, and full operability by September 1, 1983. These amendments were requested by the SCE letters of February 24, March 4, April 14, and April 19, 1983.

Issuance of these amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I, which are set forth in the license amendments.

Prior public notice of these amendments is not required because the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amemdments will not result in any significant environmental impact and pursuant to 10 CFR 51.5(d)(4) and environmental impact statement, or negative declaration an environmental impact appraisal need not be prepared in connection with issuance of the amendments.

For further details with respect to this action, see: (1) Southern California Edison Company's letters dated February 24, March 4, April 14 and April 19, 1983, (2) Amendment No. 17 to Facility Operating License No. NPF-10, (3) Amendment No. 5 to Facility Operating License NPF-15, and (4) the Commission's related Safety Evaluation.

These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and the San Clemente Library, 242 Avenida Del Mar, San Clemente, California 92672. A copy of items (2), (3) and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 29th day of April 1983.

For the Nuclear Regulatory Commission.

C. Jean Shoemaker,

Secretary to the Appeal Board.

[FR Doc. 83-12373 Filed 5-6-83; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-305]

Wisconsin Public Service Corp., et al.; Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 49 to Facility Operating License No. DPR-43, issued to Wisconsin Public Service Corporation, Wisconsin Power and Light Company, and Madison Gas and Electric Company (the licensees), which revised Technical Specifications for operation of the Kewaunee Nuclear Plant (the facility) located in Kewaunee, Wisconsin. The amendment is effective as of the date of issuance.

The amendment changes the Technical Specifications related to reactor coolant system leakage, condensate storage tank supply and auxiliary feedwater pump testing.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since this amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see: (1) The application for amendment dated December 20, 1982, (2) Amendment No. 49 to License No. DPR-43 and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W. Washington, D.C. and at the Kewaunee Public Library, 822 Juneau Street, Kewaunee, Wisconsin, 54216. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 29th day of April 1983.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch #1, Division of Licensing

BILLING CODE 7590-01-M

[Docket Nos. 50-266 and 50-301]

Wisconsin Electric Power Co. (Point Beach Nuclear Plant Units 1 and 2); Exemption

I

Wisconsin Electric Power Company (the licensee) is the holder of Facility Operating License Nos. DPR-24 and DPR-27 (the licenses) which authorize operation of the Point Beach Nuclear Plant, Units 1 and 2, respectively (the facilities) at a steady state reactor power level not in excess of 1518 megawatts thermal (rated power). The facilities consist or Westinghouse Electric Corporation designed pressurized water reactors (PWRs) located at the licensee's site in Manitowoc County, Wisconsin.

The license is subject to all rules, regulations and Orders of the Commission.

II

On November 19, 1980, the Commission published a revised Section 10 CFR 50.48 and a new Appendix R to 10 CFR Part 50 regarding fire protection features of nuclear power plants (45 FR 76602). The revised Section 50.48 and Appendix R became effective on February 17, 1981. Section III of Appendix R contains fifteen subsections, lettered A through O, each of which specifies requirements for a particular aspect of the fire protection features at a nuclear power plant. One of these fifteen subsections, III.G, is the subject of this exemption request.

Section III.G details the requirements for fire protection of safe shutdown capability. Specifically, Section III.G.1 requires that fire protection features shall be provided for structures, systems and components important to safe shutdown. These features shall be capable of limiting fire damage such that one train of systems necessary to achieve and maintain hot shutdown conditions from either the control room or emergency control station(s) shall be free of fire damage and systems necessary to achieve and maintain cold shutdown from either the control room or emergency station(s) shall be capable of being repaired within 72 hours.

Section III.G.2 provides requirements to ensure that the objectives of Section III.G.1 are met. Section III.G.3 specifies the requirements for alternative or dedicated shutdown capability necessary to ensure that the objectives of Section III.G.1 are met given that the specific provisions of Section III.G.2 cannot be met.

III

By letters dated June 30 and October 11, 1982, the licensee requested an exemption from Section III.G, "Fire Protection of Safe Shutdown Capability" of Appendix R to 10 CFR Part 50 to the extent that it requires the installation of a fixed suppression system in the control room.

The licensee's rationale for the exemption is as follows. First, the in situ fire loading for the control room is low, and the presence of transient combustibles is strictly controlled. Second, the room is covered by a fire detection system. Third, the room is continuously manned and a hose station and portable extinguishers are immediately available to assure prompt manual suppression of a fire. Finally, an alternate safe shutdown system is available which assures that the plant can be shut down safely even if the control room is made temporarily uninhabitable by a fire.

We have evaluated the licensee's rationale and find it acceptable. The installation of a fixed fire suppression system in the control room would not significantly increase the level of fire protection. On this basis, we conclude that the exemption should be granted.

IV

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12(a), an exemption is authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest and hereby grants an exemption from the requirements of Section III.G of Appendix R to the extent that it requires a fixed suppression system in the Control Room.

The Commission has determined that the granting of this Exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

This exemption is effective upon issuance.

Dated at Bethesda, Maryland this 28th day of April 1983.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing.

BILLING CODE 7590-01-M

Issuance and Availability "for Comment" of NUREG-0897 Entitled "Containment Emergency Sump Performance;" Standard Review Plan Section 6.2.2, Rev. 4 Entitled, "Containment Heat Removal Systems;" NUREG-0869 Entitled "USI A-43 Resolution Positions"

The U.S. Nuclear Regulatory Commission (NRC) staff has prepared the following documents for public comment: NUREG-0897 entitled, "Containment Emergency Sump Performance;" Standard Review Plan Section 6.2.2, Rev. 4, entitled, "Containment Heat Removal Systems;" and NUREG-0869 entitled, "USI A-43 Resolution Positions." NUREG-0869 contains a draft of the proposed Regulatory Guide 1.82, Rev. 1 entitled, "Sump for Emergency Core Cooling and Containment Spray Systems;" the A-43 supporting Value/Impact Statement and summaries of the Committee to Review Generic Requirements Meetings No's 26 and 28 pertinent to Unresolved Safety Issue (USI) A-43. These documents, when issued in final form, will serve as the NRC staff's resolution of USI A-43, "Containment Emergency Sump Performance." This issue was identified as an Unresolved Safety Issue in the 1978 Annual Report pursuant to Section 210 of the Energy Reorganization Act of 1974.

The central issue of Unresolved Safety Issue A-43 is the capability of the containment emergency sump to provide an adequate water source to sustain long-term recirculation cooling following a loss-of-coolant accident. The NRC staff has completed its technical evaluation of this issue and these findings are reported in NUREG-0897. Based upon extensive experimental data and analysis, the NRC staff proposes that certain revisions be made to the current sump review guidelines to incorporate these findings. The necessary modifications are contained in the proposed revisions to Standard Review Plan, Section 6.2.2, and Regulatory Guide 1.82.

The proposed changes to Standard Review Plan, Section 6.2.2 and Regulatory Guide 1.82 amend requirements that are subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq). The final proposed changes will be submitted to the Office of Management and Budget for review and approval of the paperwork requirements following receipt and review of "For Comment" responses.

Comments are being solicited from interested organizations, groups and individuals. The staff will evaluate the comments received and address them in the final documents. It should be clearly noted that these "For Comment" documents are not to be used as interim requirements. The staff plans to hold public meetings to discuss these findings and proposed changes to SRP, Section 6.2.2, and Regulatory Guide 1.82 on June 1-2, 1983 at the U.S. Nuclear Regulatory Commission, 7920 Norfolk Avenue, Bethesda, Maryland.

Copies of the "For Comment" documents will be available after May 13, 1983. Copies will be sent directly to utilities, utility industry groups and associations and environmental and public interest groups. Other copies will be available for review at the NRC Public Document Room, 1717 H Street, NW, Washington, D.C.; and the Commission's Local Public Document Rooms located in the vicinity of nuclear power plants. Addresses of these Local Public Document Rooms can be obtained from the Chief, Local Public Document Room Branch, U.S. Nuclear

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards, Subcommittee on Anticipated Transients Without Scram; Meeting

The ACRS Subcommittee on Anticipated Transients Without Scram (ATWS) will hold a meeting on May 27, 1983, Room 1046, at 1717 H Street, NW., Washington, D.C. The purpose of the meeting is to continue review of the NRC Staff's proposed rule on ATWS.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the cognizant Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance except for those sessions which will be closed to protect proprietary information (Sunshine Act Exemption 4). One or more closed sessions may be necessary to discuss such information. To the extent practicable, these closed sessions will be held so as to minimize inconvenience to members of the public in attendance.

The agenda for subject meeting shall be as follows:

Friday, May 27, 1983—8:30 a.m. until the conclusion of business.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding this topic.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Paul Boehnert (telephone 202/634–3267) between 8:15 a.m. and 5:00 p.m., e.d.t.

I have determined, in accordance with Subsection 10(d) of the Federal Advisory Committee Act, that it may be necessary to close some portions of this meeting to public attendance to protect proprietary information. The authority for such closure is Exemption (4) to the Sunshine Act, 5 U.S.C. 552b(c)(4).

Dated: May 3, 1983.

John C. Hoyle,

Advisory Committee Management Officer.

BILLING CODE 7590–01–M

Advisory Committee-on-Reactor Safeguards, Subcommittee on Emergency Core Cooling Systems; Meeting

The ACRS Subcommittee on Emergency Core Cooling Systems will hold a meeting on May 24–25, 1983, at the Denver Plaza, 7201 East 49th Avenue, Commerce City, CO. The Subcommittee will review the NRC Research Programs in LOCA and Thermal Hydraulic Transient research.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance except for those sessions which will be closed to protect proprietary information (Sunshine Act Exemption 4). One or more closed sessions may be necessary to discuss such information. To the extent practicable, these closed sessions will be held so as to minimize inconvenience to members of the public in attendance.

The agenda for subject meeting shall be as follows:

Tuesday, May 24, 1983–8:30 a.m. until the conclusion of business.

Wednesday, May 25, 1983–8:30 a.m. until the conclusion of business.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested person regarding the topics to be discussed.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Paul Boehnert (telephone 202/634–3267) between 8:15 a.m. and 5:00 p.m., e.d.t.

I have determined, in accordance with Subsection 10(d) of the Federal Advisory Committee Act, that it may be necessary to close sessions of this meeting to public attendance to protect proprietary information. The authority for such closure is Exemption (4) to the Sunshine Act, 5 U.S.C. 552b(c)(4).

Dated: May 2, 1983.

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards, Subcommittees on Metal Components and Reactor Fuels; Meeting

The Combined ACRS Subcommittees on Metal Components and Reactor Fuels will hold a meeting on May 26 and 27, 1983, 1717 H Street, NW, Washington, DC. The Subcommittees will review BWR pipe cracking phenomena and modifications, turbine disk cracking its causes and fixes, reactor coolant pump seal failures, its causes, fixes and consequences and fuel clad degradation.

In accordance with the procedures outlined in the **Federal Register** on October 1, 1982 (47 FR 43474), oral or written statements may be presented by members of the public, recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittees, their consultants, and Staff. Persons desiring to make oral statements should notify the Designated Federal Employee as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements.

The entire meeting will be open to public attendance except for those sessions during which the Subcommittees finds it necessary to discuss proprietary information. One or more closed sessions may be necessary to discuss such information. (Sunshine Act Exemption 4). To the extent practicable, these closed sessions will be held so as to minimize inconvenience to members of the public in attendance.

The agenda for subject meeting shall be as follows:

Room 1046—Thursday, May 26, 1983—8:30 a.m. until the conclusion of business.

Room 1167—Friday, May 27, 1983—8:30 a.m. until the conclusion of business.

During the initial portion of the meeting, the Subcommittees, along with any of their consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittees will then hear presentations by and hold discussions with representatives of the NRC Staff, their consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant Designated Federal Employee, Mr. Elpidio Igne (telephone 202/634-1414) between 8:15 a.m. and 5:00 p.m., e.d.t.

I have determined, in accordance with Subsection 10(d) of the Federal Advisory Committee Act, that it may be necessary to close some portions of this meeting to protect proprietary information. The authority for such closure is Exemption (4) to the Sunshine Act, 5 U.S.C. 552b(c)(3), (4).

BILLING CODE 7590–01–M

NATIONAL ADVISORY COMMITTEE ON OCEANS AND ATMOSPHERE

Meeting

May 4, 1983.

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1976), as amended, notice is hereby given that the National Advisory Committee on Oceans and Atmosphere (NACOA) will hold a meeting on Monday and Tuesday, May 23–24, 1983. The meeting on Monday and Tuesday will be held in Rooms 416 and B–100 at the Page Building No. 1, 2001 Wisconsin Avenue, NW., Washington, DC. The Committee, consisting of 18 non-Federal members appointed by the President from academia, business and industry, public interest organizations, and State and local government, was established by Congress by Pub. L. 95–63, on July 5, 1977. Its duties are to: (1) Undertake a continuing review, on a selective basis, of national ocean policy, coastal zone management, and the status of the marine and atmospheric science and service programs of the United States; (2) advise the Secretary of Commerce with respect to carrying out of the programs administered by the National Oceanic and Atmospheric Administration; and (3) submit an annual report to the President and to the Congress setting forth an assessment, on a selective basis, of the status of the Nation's marine and atmospheric activities, and submit other reports as may from time to time be requested by the President or Congress.The Tentative Agenda is as follows:

Monday, May 23, 1983

2001 Wisconsin Avenue, NW., Page Building No. 1, Rooms 416 and B–100, Washington, D.C.

Plenary

[9:00 a.m.–12:00 Noon]

9:00 a.m.–9:15 a.m.:

- Announcements—Room 416

9:15 a.m.–12:00 Noon:

- Shipbuilding/Shipyard—Room 416

Speakers: Admiral Harold E. Shear, Administrator, Maritime Administration, U.S. Department of Transportation; Rear Admiral James W. Lisanby, Deputy Commander for Acquisition and Logisitcs, Naval Sea Systems Command; Lee Rice, President-elect of the Shipbuilders Council of America; and Herman Molzahn, Vice President for Shipyard Operations, the American Waterways Operators, Inc.

12:00 Noon–1:00 p.m.: *Lunch*

Panel Meetings

[1:00 p.m.–5:00 p.m.]

1:00 p.m.–3:00 p.m.:

- Ocean Research Chairman: Sylvia A. Earle—Room 416

Topic: Undersea Technology

Speakers: John Steele, Director, Woods Hole, Oceanographic Institution and Carl Helwig, Chairman, Government Relations Committee, Association of Diving Contractors

1:00 p.m.–3:00 p.m.:

- Marine Minerals Chairman: Burt Keenan—Room B–100A

Topic: Panel Work Session

1:00 p.m.–5:00 p.m.:

- Coastal Zone Co-Chairman: Sharron Stewart and Jack R. Van Lopik—Room B–100

Topic: Wetlands

5:00 p.m.: *Adjourn*

Tuesday, May 25, 1983

2001 Wisconsin Avenue, NW., Page Building No. 1, Rooms 416 and B–100, Washington, D.C.

Panel Meetings

[8:30 a.m.–12:30 p.m.]

8:30 a.m.–10:30 p.m.:

- Radioactive Waste Disposal Chairman: John A. Knauss—Room 416

Topic: Panel Work Session

10:30 a.m.–12:30 p.m.:

- Weather Satellites Chairman: FitzGerald Bemiss—Room 416

Topic: Panel Work Session

Note.—A final decision to hold a Weather Satellites Panel Meeting has not yet been reached. In the event that a Weather Satellites Panel Meeting is not held, the Radioactive Waste Disposal Panel Meeting will commence at 8:30 a.m. and run through 12:30 p.m. You will be further advised on this agenda item in a later notice.

12:30 p.m.–1:30 p.m.: *Lunch*

1:30 p.m.–3:30 p.m.:

Plenary

- Action Items
- Panel Reports

3:30 p.m.: *Adjourn*

Persons desiring to attend will be admitted to the extent seating is available. Persons wishing to make formal statements should notify the Chairman in advance of the meeting. The Chairman retains the prerogative to place limits on the duration of oral statements and discussions. Written statements may be submitted before or after each session.

Additional information concerning this meeting may be obtained through the Committee's Executive Director, Steven N. Anastasion, whose mailing address is: National Advisory Committee on Oceans and Atmosphere, 3300 Whitehaven Street, NW., Washington, DC 20235.

BILLING CODE 3510-12-M

PENSION BENEFIT GUARANTY CORPORATION

Exemption From Bond Escrow and Sale-Contract Requirements Relating To Sale of Assets By an Employer; Interstate Brands Corporation

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of exemption.

SUMMARY: Based on a request by the Interstate Brands Corporation, the Pension Benefit Guaranty Corporation has granted an exemption from the bond/escrow and sale-contract requirements of section 4204(a)(1) (B) and (C) of the Employee Retirement Income Security Act of 1974, as amended. A notice of the request for exemption from these requirements was published on February 22, 1983 (48 FR 7530). The effect of this notice is to advise the public of the decision on the exemption request.

ADDRESSS: The request for an exemption and the PBGC response to the request are available for public inspection at the PBGC Public Affairs Office, Suite 7100, 2020 K Street, N.W., Washington, D.C. 20006, between the hours of 9:00 a.m. and 4:00 p.m. A copy of these documents may be obtained by mail form the PBGC Disclosure Officer (160) at the above address.

FOR FURTHER INFORMATION CONTACT: James M. Graham, Office of the Executive Director, Policy and Planning (140), 2020 K Street, N.W., Washington, D.C. 20006; (202) 254–4862

SUPPLEMENTARY INFORMATION:

Background

Section 4204(a)(1) of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), 29 U.S.C. 1384, provides that the sale of assets of an employer that contributes to a multiemployer pension plan will not constitute a complete or partial withdrawal from the plan if certain conditions are met. One of these conditions is that the purchaser post a bond or deposit money in escrow for five plan years after the sale. Another condition is that the sales agreement provide that the seller will be secondarily liable for its withdrawal liability if the purchaser withdraws as within the first five plan years after the sale and fails to pay withdrawal liability.

Section 4204(c) of ERISA authorizes the Pension Benefit Guaranty Corporation ("PBGC") to grant individual or class variances or exemptions from the purchaser's bond/escrow and sale-contract requirements of section 4204(a)(1) (B) and (C). Under § 2643.3(a) of the PBGC's regulation on procedures for variances for sales of assets (46 FR 46127, September 17, 1981), the PBGC shall approve a request for a variance or exemption if it determines that approval of the request is warranted, in that it—

(1) Would more effectively or equitably carry out the purposes of Title IV of the Act; and

(2) Would not significantly increase the risk of financial loss to the plan.

The legislative history of section 4204 indicates a Congressional intent that the sales rules be administered in a manner that assures protection of the plan with the least practicable intrusion into normal business transactions.

ERISA section 4204(c) and § 2643.3(b) of the regulation require the PBGC to publish a notice of the pendency of a request for a variance or exemption in the **Federal Register**, and to provide interested parties with an opportunity to comment on the proposed variance or exemption.

Decision

On February 22, 1983 (48 FR 7530), the PBGC published a notice of the pendency of a request from the Interstate Brand Corporations ("Interstate") for an exemption from the requirements of ERISA section 4204(a)(1) (B) and (C). The request pertains to the February 28, 1981 purchase by American Barkeries Company ("American") of certain of the assets of Interstate. No comments were received in response to the notice.

Interstate contributed to the Northern California Retail Clerks Unions and Food Employers Joint Pension Plan (the "Plan"). According to the Plan, Interstate's potential withdrawal liability to the Plan has been calculated to be $41,763. The amount of the bond or escrow required under section 4204(a)(1)(B) is $10,544 (the amount of Interstate's required annual contribution to the Plan for the plan year ending December 31, 1980).

American is the parent in a controlled group of corporations. American's audited consolidated financial statements for the two years ending before the date of the sale were submitted. According to those statements, American had an average net income after taxes of $1.8 million for its fiscal years 1980 and 1979, and total net assets as of December 27, 1980 of approximately $52 million. American has indicated its intention that section 4204 should apply to the sale.

Based on the facts of this case and the representations and statements made in connection with the request for exemption, PBGC has determined that an exemption under section 4204(c) would more effectively or equitably carry out the purposes of Title IV of ERISA and would not significantly increase the risk of financial loss to the plan. Therefore, PBGC has granted the request for an exemption from the bond/escrow and sale-contract requirements. The granting of an exemption or variance from the requirements of section 4204(A)(1) (B) and (C) does not constitute a finding by PBGC that the transaction satisfies the other requirements of section 4204(a)(1). The determination of whether the transaction satisfies such other requirements is a determination to be made by the plan sponsor.

Issued at Washington, D.C. on this 4th day of May 1983.

Edwin M. Jones,

Excecutive Director, Pension Benefit Guaranty Corporation.

[FR Doc. 83-12360 Filed 5-6-83; 8:45 am]

BILLING CODE 7708-01-M

Pendency of Request for Exemption From Bond/Escrow and Sale-Contract Requirements Relating To Sale of Assets By an Employer That Contributes To a Multiemployer Plan; A. A. Brown, et al.

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of consideration of amendment to class exemption.

SUMMARY: This notice advises interested persons that the Pension Benefit Guaranty Corporation has received a request from A. A. Brown, as a representative for two liquidated corporations (Centennial Laundry Company and Ace Laundry Company), for an exemption from the bond/escrow and sale-contract requirements of section 4204(a)(1) (B) and (C) of the Employee Retirement Income Security Act of 1974. On the basis of that request, PBGC is considering an amendment to its class exemption, which presently covers certain transactions that were consummated prior to January 1, 1981. Under the amendment, the class exemption would be extended to also include any sale for which a legally enforceable contract containing all of the terms and conditions of the sale was signed by the parties prior to January 1, 1981.

Section 4204(a)(1) provides that the sale of assets by an employer that contributes to a multiemployer pension plan will not constitute a complete or partial withdrawal from the plan if certain conditions are met. One of these conditions is that the purchaser post a bond or deposit money in escrow for five plan years beginning after the sale. Another condition is that the sales agreement provide that the seller will be secondarily liable for its withdrawal liability if the purchaser withdraws within the first five plan years after the sale and fails to pay withdrawal liability. The PBGC is authorized to grant individual and class exemptions from these requirements. Prior to granting an exemption, the PBGC is required to give interested persons an opportunity to comment on the exemption request. The effect of this notice is to solicit the views of interested persons on this exemption request and the PBGC's proposal to amend the existing class exemption.

DATES: Comments must be submitted on or before June 23, 1983.

ADDRESSES: All written comments (at least three copies) should be addressed to: Assistant Executive Director for Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 2006. The request for exemption and the comments received will be available for public inspection at the PBGC Public Affairs Office, Suite 7100, at the above address, between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: James M. Graham, Office of the Executive Director, Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006; (202) 254–4862. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Background

Section 4204 of the Employee Retirement Income Security Act of 1974, as amended by the Multiemployer Pension Plan Amendments Act of 1980, (ERISA), 29 U.S.C. 1384, provides that a bona fide arm's-length sale of assets of a contributing employer to an unrelated party will not be considered a withdrawal if three conditions are met. These conditions, enumerated in section 4204(a)(1) (A)–(C), are that—

(A) The purchaser has an obligation to contribute to the plan for substantially the same number of contribution base units for which the seller was obligated to contribute;

(B) The purchaser obtains a bond or places an amount in escrow, for a period of five plan years after the sale, in an amount equal to the greater of the seller's average required annual contribution to the plan for the three plan years preceding the year in which the sale occurred or the seller's required annual contribution for the plan year preceding the year in which the sale occurred; and

(C) The contract of sale provides that if the purchaser withdraws from the plan within the first five plan years beginning after the sale and fails to pay any of its liability to the plan, the seller shall be secondarily liable for the liability it (the seller) would have had but for section 4204. The bond or escrow described above would be paid to the plan if the purchaser withdraws from the plan or fails to make any required contributions to the plan within the first five plan years beginning after the sale.

Additionally, section 4204(b)(1) provides that if a sale of assets is covered by section 4204, the purchaser assumes by operation of law the contribution record of the seller for the plan year in which the sale occurred and the preceding four plan years.

All of the withdrawal liability provisions of the Multiemployer Act—sections 4201 through 4225—are effective as of April 29, 1980. Since Congress made section 4204 effective as of April 29, 1980, it is apparent that Congress intended that provision to be available with respect to transactions occurring after that date that would otherwise constitute withdrawals.

Section 4204(c) of ERISA authorizes the Pension Benefit Guaranty Corporation ("PBGC") to grant individual or class variances or exemptions from the purchaser's bond/escrow requirement of section 4204(a)(1)(B) and the sale-contract requirement of section 4204(a)(1)(C) when warranted. The legislative history of section 4204 indicates a Congressional intent that the sales rules be administered in a manner that assures protection of the plan with the least practicable intrusion into normal business transactions. The granting of an exemption or variance from the requirements of section 4204(a)(1)(B) or (C) does not constitute a finding by PBGC that a particular transaction satisfies the other requirements of section 4204(a)(1).

Section 4204(c) and § 2643.3(b) of the PBGC's regulation on procedures for variances for sales of assets (46 FR 46127 (1981)), require the PBGC to publish a notice of the pendency of a request for a variance or exemption in the **Federal Register** and to provide interested parties with an opportunity to comment on the proposed variance or exemption.

On August 10, 1982 (47 FR 34662), PBGC issued a class exemption from the requirements of ERISA section 4204(a)(1) (B) and (C). The class exemption applies to all sales of assets consummated prior to January 1, 1981, but on or after the effective date of Part 1, Subtitle E of Title IV of ERISA, on the condition that each of the parties provide written notification to the affected plan of the party's intention to have the transaction governed by section 4204.

The Request

The PBGC has received a request from A. A. Brown ("Brown"), acting as representative for two liquidated corporations, Centennial Laundry Company ("Centennial") and Ace Laundry Company ("Ace"), for an exemption from the requirements of ERISA section 4204(a)(1) (B) and (C). In the request, Brown represents, among other things, that:

1. During the latter part of 1980, Centennial and Ace entered into negotiations for a sale of assets to the Chief Laundry Company, a wholly owned subsidiary of North Chicago Laundry Company ("North Chicago"). An agreement of sale between the parties was executed on December 17, 1980. The agreement contained all the material terms and conditions of the sale. However, in order to take advantage of certain tax law changes, the closing, including execution of the installment notes, was deferred until January 1981. The December agreement did not take into account the provisoins of ERISA section 4204, although it was subsequently amended on September 1, 1982 in an effort to comply with section 4204(a)(1)(A).

2. Prior to the sale, Ace was a wholly owned subsidiary of Centennial, in which Brown was the sole stockholder. Following the sale of assets, both Centennial and Ace were liquidated and their remaining assets distributed to Brown.

3. North Chicago has assumed Centennial's and Ace's responsibilities, as members of the Textile Maintenance Institute, under a collective bargaining agreement with the Textile Processors, Service Trade, Health Care, Professional and Technical Employees International Union, Local No. 46 (formerly the Laundry, Dry Cleaning and Dye Workers' International Union No. 46).

VOL
48
ISS
90
MY
9
1983
UMI

which obligated Centennial and Ace to contribute to the Laundry, Dry Cleaning and Dye House Workers' International Union Pension Fund (the "Fund"). The combined potential withdrawal liability of the sellers to the Fund has been estimated to be $150,000.

4. The amount of the bond or escrow required under section 4204(a)(1)(B) is estimated to be $45,000 (the annual contribution required to be made by Centennial and Ace for the 1980 plan year, the plan year preceding the sale).

5. An exemption should be granted from the requirements of section 4204(a)(1) (B) and (C), because, even though the closing occurred in January 1981, a binding contract containing all the terms and conditions of the sale was entered into on December 17, 1980.

6. North Chicago has indicated its intention that ERISA section 4204 should apply to the sale.

7. A complete copy of this request has been sent by Brown to the Fund and the collective bargaining representative of the seller's former employees.

No financial information on North Chicago was submitted as part of this request.

Issue Under Consideration

This request asserts that relief is warranted under ERISA section 4204(c) because a binding contract containing all of the terms and conditions of the sale was entered into on December 17, 1980, and that only for tax purposes was the closing deferred until January 1981. Thus, the parties were in essentially the same position as parties to a sale that was consummated prior to January 1, 1981 and therefore covered by the class exemption. This transaction, like the transactions presently covered by the class exemption, was due to its timing likely to have been a normal business transaction undertaken without regard to the question of withdrawal liability. Moreover, the parties want their sale to be covered by section 4204 and have indicated their agreement to assume the responsibilities they would incur if section 4204 applies.

Accordingly, on the basis of the instant request, PBGC is considering amending the class exemption from the requirements of section 4204(a)(1) (B) and (C) to also include sales for which a legally enforceable contract containing all of the terms and conditions of the sale was signed by the parties prior to January 1, 1981.

Comment

All interested persons are invited to submit written comments on the pending class exemption to the above address, on or before June 23, 1983. All comments will be made a part of the record. Comments received, as well as the application for exemption, will be available for public inspection at the address set forth above.

Issued at Washington, D.C. on this 3rd day of May 1983.

Edwin M. Jones,

Executive Director, Pension Benefit Guaranty Corporation.

SECURITIES AND EXCHANGE COMMISSION

Forms Under Review by Office of Management and Budget

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.), the Securities and Exchange Commission has submitted for clearance proposed rule 22d-6 (17 CFR 270.22d-6) under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.) which would permit registered investment companies to adopt a pricing scheme on sales of their sharers that include rates specifically described in a schedule, that permits negotiated rates, or by a combination of these two methods. Adoption of this rule would obviate the necessity of such companies' filing applications for exemptive orders permitting certain pricing variations. The rule was proposed for public comment in Investment Company Act Release No. 13183.

The potential respondents are approximately 1650 registered broker/dealers who underwrite and sell shares of investment companies.

Agency Clearance Officer—Kenneth A. Fogash—(202)272-2700.

Upon written request copy available from: Securities and Exchange Commission, Office of Consumer Affairs and Information Services, Washington, D.C. 20549.

BILLING CODE 8010-01-M

[Release No. 13207; 812-5436]

Pruco Life Series Fund, Inc.; Filing of Application

April 29, 1983.

Notice is hereby given that Pruco Life Series Fund, Inc. ("Applicant"), 3003 North Central Avenue, Phoenix, AZ 85012, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, filed an application on January 25, 1983, requesting an order of the Commission pursuant to Section 6(c) of the Act exempting Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a-4 and 22c-1 thereunder to the extent necessary to permit Applicant to compute the net asset value per share of its Money Market Portfolio using the amortized cost method of valuing portfolio securities. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act and the rules thereunder for the text of the provisions from which Applicant seeks to be exempted.

Applicant states that it was organized under the laws of the State of Maryland on November 15, 1982. Applicant's investment Adviser is the Prudential Insurance Company of America ("Prudential").

According to the application, Applicant will offer for sale three separate classes of shares, one of which will represent a Money Market Portfolio ("Fund") whose investment objective is to achieve as high a level of current income as is consistent with the preservation of capital and the maintenance of liquidity by investing in high quality, short-term debt obligations. Applicant will offer its shares only to separate accounts of Prudential subsidiaries established to fund certain variable life insurance contracts.

Applicant has agreed to the following conditions to any order granting the application:

1. Applicant's board of directors in supervising the operations of the Fund and delegating special responsibilities involving portfolio management to Applicant's investment adviser undertakes—as a particular responsibility within the overall duty of care owed to the stockholders of the Fund—to establish procedures reasonably designed, taking into account current market conditions and the Fund's investment objectives, to stabilize the Fund's net asset value per share as computed for the purpose of distribution and redemption at $1.00 per share.

2. Included within the procedures to be adopted by the board of directors shall be the following:

(a) Periodic review by the board of directors, as it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of the net asset value per share based upon available market quotations from the Fund's amortized cost price per share, and the maintenance of records of such review. To fulfill this obligation, Applicant intends to use actual quotations or estimates of market value reflecting current market conditions chosen by its board of directors in the exercise of its discretion to be appropriate indicators of value, which may include, among other things: (i) quotations or estimates of market value for individual portfolio instruments, or (ii) values obtained from yield data relating to classes of money market instruments published by reputable sources.

(b) In the event such deviation from the $1.00 amortized cost price per share exceeds one-half of one percent, the board of directors will promptly consider what action, if any, should be initiated.

(c) Where the board of directors believes the extent of any deviation from the Fund's $1.00 amortized cost price per share may result in any material dilution or other unfair results to investors or existing stockholders, it shall take such corrective action as it deems appropriate to eliminate or reduce to the extent reasonably practicable such dilution or unfair results, which action may include: selling portfolio instruments prior to maturity to realize capital gains or losses or to shorten the averge maturity of the Fund; withholding dividends or payment of distributions from capital or capital gains, redeeming of shares in kind; or utilizing a net asset value per share as determined by using available market quotations.

3. The Fund will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share; provided, however, that the Fund will not: (a) Purchase any instrument with a remaining maturity of greater than one year, or (b) maintain a dollar-weighted average portfolio maturity which exceeds 120 days. In fulfilling this condition, if the disposition of a portfolio maturity in excess of 120 days, the Fund will invest its available cash in such a manner as to reduce its dollar-weighted average portfolio maturity to 120 days or less as soon as reasonably practicable. The maturity of portfolio securities held by the Fund shall be calculated as set forth in proposed Rule 2a-7 under the Act or in such other manner as the Commission may adopt in the Rule as finally adopted.

4. Applicant will record, maintain, and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in paragraph 1 above; and, Applicant will record, maintain and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the considerations of the board of directors and its actions taken in connection with the discharge of its responsibilities, as set forth above, to be included in the minutes of the meetings of the board of directors. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act, as if such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit the investments of the Fund, including repurchase agreements, to those United States dollar denominated instruments which the board of directors determines present minimal credit risks and are of high quality as determined by any major rating service or, in the case of any instrument that is not rated, of comparable quality as determined by the Board of Directors.

6. Applicant will include in each quarterly report, as an attachment to Form N-1Q, a statement as to whether any action pursuant to paragraph 2(c) above was taken during the preceding fiscal quarter and, if any such action was taken, will describe the nature and circumstances of such action.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 24, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19718; File No. SR-CBOE-83-08]

Self-Regulatory Organizations; Proposed Rule Change By Chicago Board Options Exchange, Incorporated; Relating to Index Options

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 25, 1983, the Chicago Board Options Exchange, Incorporated filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Text of Proposed Rule Change

In Securities Exchange Act Release No. 19284, issued on November 22, 1982, the Commission approved certain rules changes of the Chicago Board Options Exchange ("CBOE"), the American Stock Exchange and the New York Stock Exchange relating to the listing and trading of standardized put and call option contracts on various stock indices. In the release the Commission stated, "Each index that will underlie an options contract must be reviewed separately as a proposed rule change pursuant to Rule 19b-4 under the Act before trading in an option based on that index may commence." The purpose of this proposed rule change is to permit CBOE to list options on the stock index described in Item 3.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below and is set forth in sections (A), (B), and (C) below.

VOL

UMI

(A) *Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change.* The purpose of the proposed rule change is to permit CBOE to list and trade standardized put and call options on the stock index commonly known as the S&P 500. CBOE expects shortly to obtain a license from Standard & Poor's Corporation to use the S&P 500 Stock Price Index as an underlying stock index for securities options trading. Options on the S&P 500 will be traded within the general framework of Exchange rules for trading index options which were approved by the Commission in Securities Exchange Act Release Nos. 19264, 19586, 19587, 19588, 19589 and 19590.

Certain contract terms will differ from the terms of options which are already traded on the CBOE 100 Index. The index multiplier on the S&P 500 Index Option, defined in Rule 24.1(f), will be 500. For example, an at-the-money option when the S&P 500 is 150 would be a $75,000 contract.

The current index value would be the continuously disseminated value as reported by Standard & Poor's and by various securities information vendors who calculate and disseminate the S&P 500 throughout the day. The final index value reported by Standard & Poor's will be the closing index value as defined in Rule 24.1(g). Shortly before trading actually commences, the Exchange will designate a reporting authority as that term is defined in Rule 24.1(h).

Following is Standard & Poor's description of the S&P 500.

"The purpose of the S&P 500 Stock Price Index is to portray the pattern of common stock price movement. Construction of the index proceeds from industry groups to the whole. Since some industries are characterized by companies of relatively small stock capitalization, the Index does not comprise the 500 largest companies listed on the New York Stock Exchange. However, the total market value of the S&P 500 as of November 30, 1982 represented 79.0% of the aggregate market value of common stocks traded on the New York Stock Exchange.

"A major use of the group indexes is as a standard for comparison of the performance of individual stocks within each group. Care is taken to avoid construction of a group index in which the movements of a single, dominant stock would effectively determine the movements of the group index.

"Component stocks are chosen solely with the aim of achieving a distribution by broad industry groupings that approximates the distribution of these groupings in the New York Stock Exchange common stock population, taken as the assumed model for the composition of the total stock market. Each stock added to the Index must represent a viable enterprise and must be representative of the industry group to which it is assigned. Its market price movements must in general be responsive to changes in industry affairs. Aggregate market value of the stock and its trading activity are important considerations in the selection process. Judgments as to the investment appeal of the stocks do not enter into the selection process.

"The S&P 500 Committee is responsible for all decisions affecting the Index. It determines the overall policy and objectives of the Index and establishes guidelines and criteria for adding or deleting a company from the Index. The Committee passes on all changes. It is specifically charged with keeping the Index representative and updated, but always within the context of the basic principle of stability of composition, and every effort is made to aviod excessive turnover of the Index.

"To increase the usefulness of these price indexes, Standard & Poor's computes companion series of per share data by industry groups, all related to the stock price indexes, including per share earnings, dividends, sales, operating income, depreciation, taxes, book value, working capital and capital expenditures, and significant ratios and yields. These data are published in Standard & Poor's Analysts Handbook annually back to 1951. The Analysts Handbbok is kept current through a monthly supplement which, in addition to quarterly sales, earnings and dividends, also contains S&P's official group earnings estimates and indicated dividend rates.

Stock Price Index Formula

"The forumla adopted by Standard & Poor's after much testing is generally defined as a "base-weighted aggregative" expressed in relatives with the average value for the base period (1941–1943) equal to 10. This method of computation has two distinct advantages over most index number series: (1) It has the necessary flexibility to adjust for arbitrary price changes caused by the issuance of rights, stock dividends, splitups, etc., and (2) the resultant index numbers are accurate and have a relatively high degree of continuity, which is especially important when long term comparisons are to be made.

"*Weighting*—Each component stock is weighted so that it will influence the index in proportion to its respective market importance. The most suitable weighting factor for this purpose is the number of shares outstanding. The price of any stock multiplied by the number of shares outstanding gives the current market value for that particular issue. This market value determines the relative importance of the security.

"*Base values and group indexes*—Market values for individual stocks are added together to obtain the group market value. This group value is expressed as a relative, or index number to the base period (1941–1943) market value. As the base period market value is relatively constant the index number reflects only fluctuations in current market prices."

The basis under the Securities Exchange Act of 1934 (the Act) for the proposed rules change is Section 6(b)(5) in that the proposed changes are designed to facilitate transactions in options on a stock index and to bring such transactions within the regulatory framework of the Act and of CBOE's own rules.

(B) *Self-Regulatory Organization's Statement on Burden on Competition.* The Exchange does not believe the proposed rule change will impose any burden on competition.

(C) *Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others.* Comments on the proposed rule change were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 29, 1983.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-19720; File No. SR-NASD-83-4]

Self-Regulatory Organizations; Proposed Rule Change By National Association of Securities Dealers, Inc., Relating To a Fee for the Computer-To-Computer Interface Trade Reporting Service

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 26, 1983, the National Association of Securities Dealers, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change amends Schedule D of the NASD's By-Laws to provide a fee for the Computer-to-Computer Interface Service which permits members to report transactions through their computer systems or service bureaus. The fee for each subscriber shall be $1,200 per month.

II. Self-Regulatory Organization's Statements Regarding the Proposed Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. *Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change.* The proposed rule change establishes a fee for the Computer-to-Computer Interface Service. This Service will facilitate trade reporting by permitting members to automatically report transactions directly through their computer systems. This proposed rule change is consistent with Section 15A(b)(5) of the Act.

B. *Self-Regulatory Organization's Statement on Burden on Competion.* The Association anticipates no burden on competition presented by this porposed rule change.

C. *Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others.* Comments were neither solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 5th Street, NW. Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW. Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication. For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 2, 1983.

George A. Fitzsimmons,

Secretary.

[FR Doc. 83-12356 Filed 5-6-83; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 34-19721; File No. SR-NYSE-83-13]

Self-Regulatory Organizations; Proposed Rule Change By New York Stock Exchange, Inc.; Relating to the Proposed Rule Change Altering the Fidelity Insurance Requirements for Members and Member Organizations

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 25, 1983, the New York Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would alter the fidelity insurance requirements for members and member organizations and change the basis for calculating such requirements from one utilizing required net capital to one based upon the total amount of securities and money under possession and control by a member organization.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization include statements concerning the purpose of an basis for the proposed rule change and

VOL 48 ISS 90 MAY 9 1983 UMI

discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B) and (C) below, of the most significant aspects of such statements.

A. *Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change.* The purpose of the proposed rule change is to:

- Increase the fidelity insurance coverage required to be carried by members and member organizations. Coverage for carrying organizations would be raised from a range of $200,000 to $5 million to a range of $1 million to $50 million. Required coverage for introducing members would be raised to $500,000.
- Mandate coverage for all members or member organizations that deal with the public or clear their own securities transactions.
- Permit introducing organizations to meet coverage requirements if their carrying member organization extends its coverage to them via a "Disclosed Accounts Rider."
- Change the basis for calculation of required fidelity insurance coverage from one utilizing required net capital to one based upon the total amount of securities and money under a member organization's possession and control. For member organizations with no ready method to value customers' portfolios, a substitute calculation using items reported on FOCUS is available.
- Specifically spell out categories of coverage which were previously required by policy or interpretation.

Statutory Basis for the Proposed Rule Change

The proposed change is consistent with Section 6(b)(5) of the Act in that it is generally designed to protect investors and the public interest by insuring that members and member organizations comply with certain prescribed minimum fidelity insurance standards.

The proposed amendment is also consistent with Section 6(c)(3)(A) which permits a national securities exchange to deny or condition the membership of a broker dealer that does not meet such standards of financial responsibility as are prescribed by the rules of the Exchange.

In addition, the proposed revision is in keeping with SEC Rule 15c3–1 in that it protects a member organization's capital structure against unexpected loss.

B. *Self-Regulatory Organization's Statement of Burden on Competition.* The proposed rule change does not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. *Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others.* Comments on the proposed amendments were solicited from the Exchange membership and ten responses were received. A summary of the substance of the comments received including the significant issues raised and the actual comment letters are available for inspection and copying in the Commission's Public Reference Branch, 450 Fifth Street, NW., Washington, D.C. Copies of this filing, a summary of the comments and the actual comment letters will also be available for inspection and copying at the principal office of the above captioned self-regulatory organization.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period: (i) As the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organizatioin consents, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Branch, 450 Fifth Street, NW., Washington, D.C. Copies of such filing, a summary of the comments and actual comment letters will also be available for inspection and copying at the principal office of the above mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted within 21 days after the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 2, 1983.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

San Francisco International Airport; FAA Acceptance of Noise Exposure Map; Receipt of Noise Compatibility Program and Request for Review

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its acceptance of noise exposure maps submitted by San Francisco International Airport (SFO) under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96–193) and 14 CFR Part 150. The FAA also announces that it is reviewing a proposed noise compatibility program that was submitted for SFO under Part 150 in conjunction with the noise exposure map, and that this program will be approved or disapproved on or before July 24, 1983.

DATES: The effective date of the FAA's acceptance of the SFO noise exposure maps and of the start of its review of the associated noise compatibility program is January 25, 1983.

FOR FURTHER INFORMATION CONTACT: Ellis A. Ohnstad, Airport Planning Officer, AWP–640, Federal Aviation Administration, Western-Pacific Region, P.O. Box 92007, World Way Postal Center, Los Angeles, California 90009; (213) 536–6250. Comments on the proposed noise compatibility program should also be submitted to that office.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has accepted the noise exposure maps for San Francisco International Airport, effective January 25, 1983, and is reviewing a proposed noise compatibility program for that airport which will be approved or disapproved on or before July 24, 1983. This notice also announces the availability of this program for public review and comment.

Under Section 103 of Title I of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as "the Act"), an airport operator may submit to the FAA a noise exposure map which meets applicable regulations and which depicts noncompatible land uses as of the date of submission of such map, a description of projected aircraft operations, and the ways in which such operations will affect such map. The Act requires such maps to be developed in consultation with interested and affected parties in the local community, government agencies and persons using the airport.

An airport operator who has submitted a noise exposure map that is accepted by FAA as meeting Federal Aviation Regulation Part 150, promulgated pursuant to Title I of the Act, may submit a noise compatibility program for FAA approval which sets forth the measures the operator has taken or proposes for the reduction of existing noncompatible uses and for the prevention of the introduction of additional noncompatible uses.

San Francisco International Airport submitted to the FAA on June 2, 1982, noise exposure maps, descriptions and other documentation which were produced during an airport noise control and land use compatibility (ANCLUC) study conducted at SFO from August 1977 to March 1980. It was requested that the FAA accept this material as a noise exposure map as described in Section 103(a)(1) of the Act, and that the noise mitigation measures, to be implemented jointly by the airport and surrounding communities, be approved as a noise compatibility program under Section 104(b) of the Act.

The FAA has completed its review of the noise exposure maps and related descriptions submitted by San Francisco International Airport. The specific maps under consideration are depicted in Figures IID–4, IID–6 and IVB–1 in the Joint Land Use Study Final Technical Report, the final report of the ANCLUC study. The FAA has accepted these materials as the noise exposure maps for San Francisco International Airport, effective on January 25, 1983.

FAA's acceptance of an airport operator's noise exposure map is limited to the determination that the map was developed in accordance with the procedures contained in Appendix A of FAR Part 150. Such acceptance does not constitute approval of the applicant's data, information or plans, or a commitment to approve a noise compatibility program or to fund the implementation of that program.

If questions arise concerning the precise relationship of specific properties to noise exposure contours depicted on a noise exposure map submitted under Section 103 of the Act, it should be noted that the FAA is not involved in any way in determining the relative locations of specific properties with regard to the depicted noise contours, or in interpreting the noise exposure map to resolve questions concerning, for example, which properties should be covered by the provisions of Section 107 of the Act. These functions are inseparable from the ultimate land use control and planning responsibilities of local government. These local responsibilities are not changed in any way under Part 150 or through FAA's acceptance of noise exposure maps. Therefore, the responsibility for the detailed overlaying of noise exposure contours onto the map depicting properties on the surface rests exclusively with the airport operator which submitted those maps, or with those public agencies and planning agencies with which consultation is required under Section 103 of the Act. The FAA has relied on the certification by the airport operator, under § 150.21 of FAR Part 150, that the statutorily required consultation has been accomplished.

Upon acceptance of the noise exposure maps, the FAA has formally received the noise compatibility program for SFO, also effective on January 25, 1983. Preliminary review of the submitted material indicates that it conforms to the requirements for the submittal of noise compatibility programs, but that further review will be necessary prior to approval or disapproval of the program. The formal review period, limited by law to a maximum of 180 days, will be completed on or before July 24, 1983.

The proposed program, however, includes recommended measures relating to flight procedures for noise control purposes, the review of which is not subject to the 180-day review procedures. The FAA's detailed evaluation will be conducted under the provisions of 14 CFR Part 150, § 150.33. The primary considerations in the evaluation process are whether the proposed measures may reduce the level of aviation safety, create an undue burden on interstate or foreign commerce, or be reasonably consistent with obtaining the goal of reducing existing noncompatible land uses and preventing the introduction of additional noncompatible land uses.

Interested persons are invited to comment on the proposed program with specific reference to these factors. All comments, other than those properly addressed to local land use authorities, will be considered by the FAA to the extent practicable. Copies of the accepted noise exposure maps, the FAA's evaluation of the maps, and the proposed noise compatibility program are available for examination at the following locations:

Federal Aviation Administration, National Headquarters, 800 Independence Avenue SW., Room 615, Washington, D.C.;

Federal Aviation Administration, Western-Pacific Regional Office, 15000 Aviation Boulevard, Room 6E25, Hawthorne, California;

Federal Aviation Administration, Airports District Office, 831 Mitten Road, Room 210, Burlingame, California; or

San Francisco International Airport, Office of Community Affairs, Second Level Connector (between Central and North Terminal Buildings), San Mateo County, California.

Questions may be directed to the individual named above under the heading, **"FOR FURTHER INFORMATION CONTACT."**

Issued in Hawthorne, California, on April 27, 1983.

R. L. Devereaux,

Acting Director, Western-Pacific Region.

[FR Doc. 83–12344 Filed 5–6–83; 8:45 am]

BILLING CODE 4910–13–M

National Airspace Review; Meeting

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of meeting.

SUMMARY: Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. 1) notice is hereby given of a meeting of Task Group 1–3 of the Federal Aviation Administration (FAA) National Airspace Review Advisory Committee. The agenda for this meeting is as follows: Develop a concept for an improved airway/route structure to use in the En Route Navigation (VOR) Network Program.

DATE: Beginning May 31, 1983, at 1 p.m., continuing daily, except Saturdays, Sundays, and holidays, not to exceed two weeks.

ADDRESS: The meeting will be held at the Federal Aviation Administration,

BILLING CODE 4910-13-M

National Highway Traffic Safety Administration

[Docket No. 82-22]

Economic Cost to Society of Motor Vehicle Accidents

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Notice of publication and availability

SUMMARY: The National Highway Traffic Safety Administration has prepared a report which discusses and measures the economic loss to society that results from motor vehicle accidents. The report addresses losses associated with medical expense, lost productivity, insurance expense, property damage, legal expenses and other sources of economic loss. In addition, the report discusses the impact of these costs on Federal and state governments. The purpose of this notice is to announce the availability of the report.

ADDRESS: Interested persons may obtain a copy of the report free of charge by contacting Mr. Robert Hornickle, Office of Management Services, National Highway Traffic Safety Administration, Room 4423, 400 Seventh Street, SW., Washington, DC, 20590 (202/426-0874). Comments should refer to the docket number (82-22) and be submitted to: Docket Section, Room 5108, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC, 20590 (docket hours are from 8:00 am to 4:00 pm, Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Ellen A. Kranidas, Director, Office of Program and Rulemaking, Analysis, Plans and Programs, National Highway Traffic Safety Administration, Room 5212, 400 Seventh Street, SW., Washington, DC, 20590, (202/426-1600).

SUPPLEMENTARY INFORMATION: In 1980, over 51,000 persons were killed and nearly 4 million were injured in accidents on the nation's highways. The loss of life and bodily injury resulting from these accidents is a major cause of personal grief and economic hardship for the immediate victims, their families and friends. While it is impossible to economically value the pain, suffering, and frustration that results from these accidents, both the individual accident victims and society as a whole are affected in numerous ways which can appropriately be valued in quantitative terms. The cost of medical care, for example, is borne by the individual through payments for uninsured expenses, by society through higher insurance premiums, and through the diversion of medical resources away from other needs such as disease control or medical research. Significant costs are also associated with the productivity that is lost when an individual's life is claimed at an early age. Those dependent on the victim suffer the immediate economic hardship from foregone income, but society also suffers through efforts to support the victim's dependents and through foregone contributions to the nation's productivity. These and other costs resulting from motor vehicle accidents are examined in a NHTSA report entitled "The Economic Cost to Society of Motor Vehicle Accidents."

The report estimates that the total economic cost in 1980 resulting from motor vehicle accidents was $57.2 billion. Of this total, medical costs were responsible for $3.3 billion, property losses for $21.0 billion, lost productivity for $14.2 billion, and other costs for $18.6 billion. Because of their great number, property-damage-only accidents were the largest source of loss, totalling $21.7 billion. The second largest contributor was fatal accidents, totalling $13.7 billion followed by the frequent but relatively less serious accidents classifed under the abbreviated injury scale (AIS) I totalling $7.5 billion.

Any person or organizations wishing to comment may do so by sending their comments to the address shown above.

Issued on May 4, 1983.

Barry Felrice,

Associate Administrator, Plans and Programs.

[T. D. 83-55]

Change of Practice Relating to the Tariff Treatment of Moon Boot Shells Imported With Removable Liners; Correction

AGENCY: Customs Service, Treasury.

ACTION: Change of practice; correction.

SUMMARY: This document corrects and error in a document published in the **Federal Register** on Wednesday, March 9, 1983 (48 FR 9982), relating to a change of practice with respect to the tariff classification of moon boot shells imported with removable liners.

FOR FURTHER INFORMATION CONTACT: Jesse V. Vitello, Regulations Control Branch, U.S. Customs Service (202-566-8237).

Background

In FR Doc. 83-5963, appearing at page 9982, in the issue of March 9, 1983, the word "felt" was inadvertently included in the heading and summary portion of the document. However, as indicated in the change of practice portion, the change relates to moon boot shells imported with an equal number of liners of any construction. It is not limited to felt liners. Accordingly, the following correction is made to the document:

On page 9982, in the heading and summary, the word "felt" is removed.

Dated: May 3, 1983.

B. James Fritz,

Director, Regulations Control and Disclosure Law Division.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

DATE AND TIME: 9:30 a.m. (eastern time), Tuesday, May 10, 1983.

PLACE: Commission Conference Room No. 200, Second floor, Columbia Plaza Office Building, 2401 E Street NW., Washington, DC. 20506.

STATUS: Part will be open to the public and part will be closed to the public.

MATTERS TO BE CONSIDERED:

1. Ratification of Notation Vote/s.
2. A Report on Commission Operations (Optional).
3. Freedom of Information Act Appeal No. 83-1-FOIA-020-NY, concerning a request for documents from a closed age discrimination charge file.
4. A Proposed Contract for Computer Services.

Closed:

1. Litigation Authorization: General Counsel Recommendations.
2. Proposed Withdrawal of prior Commissioners Charges.

Note.—Any matter not discussed or concluded may be carried over to a later meeting. (In addition to publishing notices on EEOC Commission meetings in the **Federal Register**, the Commission also provides recorded announcements a full week in advance on future Commission sessions. Please telephone (202) 634-6748 at all times for information on these meetings).

CONTACT PERSON FOR MORE INFORMATION: Treva McCall, Executive Secretary to the Commission at (202) 634-6748.

FEDERAL COMMUNICATIONS COMMISSION

The Federal Communications Commission will hold an Open Meeting on the subjects listed below on Thursday, May 12, 1983, which is scheduled to commence at 9:30 a.m., in Room 856, at 1919 M Street, NW., Washington, D.C.

Agenda, Item No., and Subject

General—1—*Title*: Notice of Inquiry in the Matter of Allowing the Public Direct Remote Access to Commission Computer Data Bases. *Summary*: The proposed Notice of Inquiry has been developed to address the desirability of authorizing direct electronic access by the public to the Commission's automated computer files. This action is the result of a petition submitted by the Association of Federal Communications Consulting Engineers.

General—2—*Title*: Petition for rulemaking concerning the repeal or modification of the personal attack and political editorial rules. *Summary*: The Commission will consider adoption of a Notice of Proposed Rulemaking concerning repeal or modification of Section 73.1920 and 73.1930 of the rules, the personal attack and political editorial rules.

Private Radio—1—*Title*: Amendment of the Amateur Radio Service Rules, Part 97, to make additional frequencies available for repeater operation. *Summary*: The Commission will consider whether to adopt a Notice of Proposed Rule Making proposing to amend Part 97 of the Rules to make additional Amateur Radio Service frequencies in the 28.0—29.7 MHz band available for repeater operation.

Private Radio—2—*Title*: Amendment of Subpart K of Part 90 of the Rules to permit the use of omnidirectional antennas with operational-fixed stations operating on assignments in the 450-470 MHz band (RM-4230). *Summary*: The FCC will consider whether to adopt a Notice of Proposed Rule Making to allow 450-470 MHz operational fixed stations to utilize omnidirectional antennas if they communicate with at least three receiving locations separated by at least 160° in azimuth.

Common Carrier—1—*Title*: Application of American Telephone and Telegraph Company for authority under Section 214 of the Communications Act to install and operate packet switches at specified telephone company locations in the United States. *Summary*: The Commission will consider whether to grant or deny AT&T's application for Section 214 authority to install and operate packet facilities at specified telephone company locations. The facilities would be used in a new service offering called the Basic Packet Switching Service (BPSS).

Common Carrier—2—*Title*: National Association of Regulatory Utility Commissioners Petition for Declaratory Ruling that State Commissions Have Authority to Require Exchange Carriers to Provide and Maintain Basic Telephone Instruments and Associated Inside Wiring. *Summary*: The Commission will consider whether it is consistent with the Second Computer Inquiry for states to require telephone companies to provide customer premises equipment and related installation and maintenance services to their subscriber on a detariffed basis under a specific alternative regulatory scheme proposed by NARUC.

Common Carrier—3—*Title*: Adoption of Rules Relating to the Provision of CPE by the Florida Public Service Commission. *Summary*: In response to a petition for declaratory ruling filed by the Florida Telephone Association, the Commission will consider whether the *Second Computer Inquiry* has preempted the Florida PSC's requirements relating to the provision of customer premises equipment by carriers.

Video—1—*Title*: (1) Application for the involuntary assignment of the license of station WDHO-TV, Toledo, Ohio, from D. H. Overmyer Telecasting Co., Inc., as debtor in possession under the United States Bankruptcy Court, Southern District of New York to D. H. Overmyer Telecasting Co., Inc.; (2) Application for the involuntary assignment of the WDHO-TV license from D. H. Overmyer Telecasting Co., Inc., to D. H. Overmyer Telecasting Co., Inc., as debtor in possession under the United States Bankruptcy Court, Norther District of Ohio, Eastern Division; (3) an application from the First National Bank of Boston for the involuntary transfer of control of D. H. Overmyer Telecasting Co., Inc., as debtor in possession under the United States Bankruptcy Court, Northern District of Ohio, Eastern Division, from The Overmyer Company to the First National Bank of Boston; (4) Petition for Special Relief and Informal Objection to the application of the First National Bank of Boston by The Overmyer Company. *Summary*: The Commission will consider the significance of the assumption of control of a broadcast facility pursuant to the order of a bankruptcy court, but without prior Commission consent, and other matters alleged regarding the appropriateness of granting the First

VOL

1983
UMI

National Bank of Boston's involuntary transfer application.

Video—2—*Title:* Petition for Reconsideration of a partial denial of a tax certificate (CSR–1708) filed by Georgia Cablevision Corporation and Atlanta Home Theater. *Summary:* Petitioners seek a tax certificate, pursuant to Section 1071 of the 1954 Internal Revenue Code, for the sale of a MDS system.

Video—3—*Title:* "Petition for Clarification," filed by Direct Broadcast Satellite Corporation (DBSC) of the Commission's action of December 3, 1982, granting a direct broadcast satellite authorization to DBSC. *Summary:* The Commission will consider the request by Direct Broadcast Satellite Corporation (DBSC) for clarification of the grant of its construction permit for an interim direct broadcast satellite system.

Policy—1—*Title:* Increased antenna height of Class A FM broadcast stations in Puerto Rico and the Virgin Islands. *Summary:* The Commission will consider amending its rules to permit increased antenna height, up to 1,100 feet above average terrain for Class A FM stations in Puerto Rico and the Virgin Islands.

Policy—2—*Title:* Amendment of FM Table of Assignments regarding Helena, Montana (BC Docket No. 80–523). *Summary:* The Commission will review a Broadcast.

Enforcement—1—*Title:* License Renewal Applications of Certain Broadcast Stations Serving the States of Louisiana and Mississippi. *Summary:* The Commission considers a petition to deny filed by the National Black Media Coalition against the renewal applications of 19 broadcast stations located in Louisiana and Mississippi as well as a petition to deny filed by the Mississippi NAACP against the renewal applications of Stations WROA/WZKX (FM), Gulfport and WSLI/WXLY (FM), Jackson, Mississippi. Both petitions allege that the licensees have deficient employment practices with regard to Blacks.

Enforcement—2—*Title:* License Renewal Application of United Communications Corporation for Station WVBK, Herndon, Virginia. *Summary:* The National Black Media Coalition filed a petition to deny alleging that the licensee's employment practices regarding minorities do not comply with the Commission's EEO rules and policies. The Commission considers the petitioner's allegations.

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Maureen Peratino, FCC Public Affairs Office, telephone number (202) 254–7674.

Issued: May 6, 1983.

William J. Tricarico,

Secretary, Federal Communications Commission.

FEDERAL COMMUNICATIONS COMMISSION

The Federal Communications Commission will hold a Closed Meeting on the subjects listed below on Thursday, May 12, 1983, following the Open Meeting which is scheduled to commence at 9:30 a.m., in Room 856, at 1919 M Street NW., Washington, D.C.

Agenda, Item No., and Subject

Hearing—1—Application for Review in Illinois Bell Telephone Company DPLMRS application/complaint proceeding (CC Docket Nos. 78–314 and 315).

Hearing—2—Applications for Review of a final Review Board Decision and a Petition to Enlarge Issues in the Louisville, Kentucky television proceeding (Docket Nos. 79–280 and 79–281).

Hearing—3—Petition for Reconsideration in the Orange Park, Florida, comparative TV proceeding (Docket Nos. 81–690 and 81–692).

Hearing—4—Petition for Reconsideration, Certified Question, and Motion to Show Cause in the Arlington, Virginia, comparative DPLMRS proceeding (CC Docket No. 79–229–31).

Hearing—5—Petitions for Reconsideration in the City of New York Municipal Broadcasting System (WNYC–WCCO) AM radio proceeding (Docket Nos. 11227, 17558, 19403).

Hearing—6—Application for a Construction Permit for a new standard broadcast station in Lares, Puerto Rico (Docket No. 20989)

Hearing—7—Applications for Review, Petitions for Enlargement of the Issues, and Petition for Leave to Amend in the Muncie, Indiana FM radio comparative proceeding (BC Docket Nos. 80–96 to 80–98).

Hearing—8—Applications for Review in the Cleveland, Ohio comparative UHF television proceeding: (BC Docket Nos. 80–425 and 80–426).

Hearing—9—Exceptions to the Initial Decision in the complaint proceeding involving MCI Telecommunications Corp., AT&T and PT&T (CC Docket No. 81–217).

Hearing—10—Joint Motion for Dismissal of Action with Prejudice and Termination of Proceedings in the Western States Telephone Company Common Carrier proceeding (Docket No. 16883).

Hearing—11—Application for Review in the TV–8, Inc., Somerset, Kentucky UHF television comparative proceeding (BC Docket Nos. 80–454 and 455).

These items are closed to the public because they concern Adjudicatory Matters (See 47 CFR 0.603 (j)).

The following persons are expected to attend:

Commissioners and their Assistants
Managing Director and members of his staff
General Counsel and members of his staff
Chief, Office of Public Affairs and members of his staff

Action by the Commission:

Hearing Items 1 thru 9, May 4, 1983. Commissioners Fowler, Chairman; Quello, Fogarty, Jones, Dawson, Rivera and Sharp, voting to consider these items in Closed Session.

Hearing Item 10, February 9, 1983. Commissioners Fowler, Chairman, Quello, Fogarty, Jones, Dawson, Rivera and Sharp, voting to consider this item in Closed Session.

Hearing Item 11, April 18, 1983. Commissioners Fowler, Chairman, Quello, Fogarty, Jones, Dawson, Rivera and Sharp, voting to consider this item in Closed Session.

This meeting may be continued the following work day to allow the Commission to complete appropriate action.

Additional information concerning this meeting may be obtained from Maureen Peratino, FCC Public Affairs Office, telephone number (202) 254–7674.

Issued: May 6, 1983.

NATIONAL CREDIT UNION ADMINISTRATION

TIME AND DATE: 10:00 a.m., Thursday, May 12, 1983.

PLACE: Sheraton Centre Hotel, 811 7th Avenue (7th and 53rd Street), New York, New York 10019; (212) 581-1000.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Approval of Minutes of Previous Open Meeting.
2. Review of Central Liquidity Facility Lending Rate.
3. Membership in Federal Credit Unions; Final Amendment to Policy Statement 82-3, Allowing Addition of Groups Within Area Around Branch Office.
4. Federal Credit Union Loan Rate Ceiling; Continuation or Reduction of 21% Ceiling Beyond Present Expiration Date of September 4, 1983.
5. Final Amendment to NCUA Regulation Section 701.1(a), to include in the definition of low income credit union, credit unions predominantly serving students.
6. Proposed Charter Amendment from Zelico Federal Credit Union, Bogalusa, Louisiana, to convert the Field of Membership from Occupational to Community Charter.
7. Appeal of Denial for Charter Application for Proposed El Campo Aluminum Employees Federal Credit Union, El Campo, Texas.

TIME AND DATE: 4 p.m., Wednesday, May 11, 1983.

PLACE: Sheraton Centre Hotel, 811 7th Avenue (7th and 53rd Street), New York, New York 10019.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Approval of Minutes of Previous Closed Meetings.
2. Requests from Federally insured credit unions for special assistance to prevent liquidation under Section 208(a)(1) of the Federal Credit Union Act. Closed pursuant to exemptions (8) and (9)(A)(ii).
3. Requests for special assistance under Section 208(a)(2) of the Federal Credit Union Act. Closed pursuant to exemptions (8) and (9)(A)(ii).
4. Requests for emergency mergers under Section 205(h) of the Federal Credit Union Act with special assistance under Section 208(a)(2) of the Federal Credit Union Act. Closed pursuant to exemptions (8) and (9)(A)(ii).
5. Proposed Memorandum of Agreement between NCUA and a Federal Credit Union. Closed pursuant to exemptions (8) and (9)(A)(ii).
6. Personnel Actions. Closed pursuant to exemptions (2) and (6).

11

SECURITIES AND EXCHANGE COMMISSION

STATUS: Open/closed meeting.

PLACE: 450 5th Street NW., Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: Tuesday, May 3, 1983.

CHANGES IN THE MEETING: Deletions/additional items.

The following item will not be considered at a closed meeting scheduled for Tuesday, May 10, 1983, at 10:00 a.m.

Regulatory matter bearing enforcement implications.

The following additional item will be considered at an open meeting scheduled for Wednesday, May 11, 1983, at 10:00 a.m. in Room 1C30.

Consideration of whether to issue an interpretative release discussing certain questions raised by *Colema Realty Corp. v. Bibow* with respect to Rule 16b-3 under the Securities Exchange Act of 1934. For further information, please contract William E. Toomey at (202) 272-2573.

The following item will not be considered at a closed meeting scheduled for Wednesday, May 11, 1983, following the 10:00 a.m. open meeting.

Regulatory matter regarding financial institution.

The following items will be considered at a closed meeting scheduled for Wednesday, May 11, 1983, following the 10:00 a.m. open meeting:

Settlement of adminstrative proceeding of an enforcement nature.
Litigation matter.

Commissioner Evans, as duty officer, determined that Commission business required the above changes and that no earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any matters have been added, deleted or postponed, please contact: Jerry Marlatt at (202) 272-2092.

Airport Traffic Control Towers; Revised Establishment and Discontinuance Criteria

VOL 48 ISS 90 MAY 9 1983 UMI

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Revised Establishment and Discontinuance Criteria for Airport Traffic Control Towers

AGENCY: DOT, Federal Aviation Administration (FAA).

ACTION: Invitation for public comment on proposed criteria for establishment and discontinuance of VFR airport traffic control towers.

Summary and Purpose: Current criteria for establishment and discontinuance of airport traffic control towers, publiched in FAA Order 7031.2B, Airway Planning Standard Number One—Terminal Air Navigation Facilities and Air Traffic Control Services (Reference 1), are based upon an economic analysis published in 1975 (Reference 2). These criteria have been revised to incorporate updated economic values and costs and improved analysis of tower benefits (Reference 3). The FAA is soliciting public comment on the proposed changes because: (1) Public comments on FAA's tower criteria have not been solicited since several policy alternatives for tower discontinuance were proposed for public comment in 1977 (Reference 4), (2) the revised criteria are somewhat more stringent than current criteria, (3) the Airport and Airway Improvement Act of 1982 provides that direct costs for operation and maintenance of airport traffic control facilities, as well as establishment of such facilities, may be taken from the Aviation Trust Fund (Reference 5), (4) the criteria are an important element to assist in the implementation of FAA's National Plan of Integrated Airport Systems, and (5) it is expected that these revised criteria will also serve as a basis for decisions concerning contracting tower operations to the private sector. The FAA believes that it is appropriate for the public to have input to the criteria development process, since these criteria will help to determine how much of Aviation Trust Fund resources will be used to provide airport traffic control services.

Invitation for Public Comment: Interested parties are invited to submit written comments on the proposed revised airport traffic control tower establishment and discontinuance criteria and/or suggest alternative criteria.

DATE: Comments should be received on or before June 15, 1983.

ADDRESS: Communications should be mailed in duplicate to FAA, APO–230, 800 Independence Ave., SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: Harvey B. Safeer, Director of Aviation Policy and Plans, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591, telephone 202–426–3331. Copies of the Draft Criteria Report Number FAA–APO–83–2 and additional copies of this notice may be obtained from the same address. The referenced literature is also available for review at this location.

SUPPLEMENTARY INFORMATION:

Background

Criteria for the establishment of airport traffic control towers have been published by FAA and its predecessor organization since 1951. Current criteria for tower establishment, published as Change 3 to Airway Planning Standard Number One in October 1975 and shown in an Appendix to this notice, are based upon an economic analysis detailed in an FAA report, "Establishment Criteria for Airport Traffic Control Towers (ATCT)" (Reference 2).

Criteria for the discontinuance of tower services have been available since 1956. While establishment criteria revisions tightened criteria for new facilities, FAA maintained "grandfather" clauses for discontinuance of towers commissioned under previous criteria. This "grandfather" approach protected towers already in service by relating discontinuance of an existing tower to the criteria in effect at the time the tower was programmed or established.

In 1977 the FAA drafted a report, "An Analysis of Continued Operation of Selected Airport Traffic Control Towers" (Reference 6), which provided a comprehensive benefit-cost approach to assess the merits of continued funding of towers. Locations were identified as candidates for discontinuance wherever benefits from continued tower operation were less than operating and maintenance costs over a 15-year forecast period. That same year, the FAA published a notice in the **Federal Register** (Reference 4) and held public hearings inviting comments on alternative policy formulations for tower discontinuance. Most of the respondents (about 75 percent) wanted the tower at "their" location retained.

In June 1981, the U.S. General Accounting Office (GAO) published a report "FAA Misses Opportunities to Discontinue or Reduce Operating Hours of Some Airport Traffic Control Towers" (Reference 7). GAO criticized the FAA for continuing to use a "grandfather" clause instead of "uniform criteria" for tower discontinuance, continuing "operation of economically unjustified control towers," and using "outdated information in benefit-cost analysis." The GAO recommended that the FAA "identify control tower candidates for discontinuance by adopting uniform criteria which require (1) an economic analysis based on up-to-date benefits and costs and (2) consideration of noneconomic factors, such as topography or the frequent occurrence of severe weather at each airport, and institute procedures to ensure that the criteria are applied periodically and that discontinuance of candidate towers is actively pursued."

Current discontinuance criteria were published as Change 19 to Airway Planning Standard Number One in November 1981. This Change established uniform criteria for decommissioning airport traffic control towers and required that a site-specific analysis be performed which would consider specific factors listed in the change. (See Appendix for additional details.)

Revised Criteria

The FAA has completed a revised economic analysis for VFR airport control towers (Reference 3) and has used this analysis to revise the establishment and discontinuance criteria. The analysis campares the present value of tower benefits with the present value of tower costs over a fifteen-year time frame.

Site-specific activity forecasts are used to develop the three categories of VFR tower benefits: benefits from prevented collisions between aircraft, benefits from other prevented accidents, and benefits from reduced flying time. Considered in the benefit analysis are the mix of aircraft types (air carrier, air taxi, general aviation, and military) and levels of local and itinerant traffic operating within the terminal area. Also considered are the number of passengers and crew aboard each generic category of aircraft who might be killed or injured should a collision or other type of tower-preventable accident occur. Updated economic values (Reference 8) are used to develop tower benefits and assign explicit dollar values to fatalities, injuries and passengers' time to provide a common basis for comparing costs and benefits.

Revised VFR tower costs include annual costs of staffing, maintenance, equipment, supplies and leased services. Establishment costs also include non-recurring investment costs such as facilities, equipment, and operational start-up. Tower discontinuance criteria use the same annual costs as establishment criteria, but investment costs are replaced by the costs of closing the tower.

A location meets tower establishment criteria when the benefits which derive from operating the tower exceed the installation and operations costs—the benefit/cost ratio is greater than or equal to one. A tower meets discontinuance criteria, when the life-cycle costs of continued operation exceed the benefits—the benefit/cost ratio is less than one. If a tower meets the initial benefit-cost screening criteria for discontinuance, a site-specific analysis will then be performed. Factors which must be included in this analysis are specified in the proposed Change to the Airway Planning Standard given in the Appendix.

Preliminary screenings, using the revised benefit-cost criteria, indicate that fewer airports will tend to qualify for tower establishment and somewhat fewer towers will qualify for continued operation. Report Number FAA–APO–83–2, "Establishment and Discontinuance Criteria for Airport Traffic Control Towers" (Reference 3) provides a comprehensive description of the revised benefit-cost analysis and criteria for VFR towers.

Issued in Washington, D.C., on April 29, 1983.

Harvey B. Safeer,

Director of Aviation Policy and Plans.

Appendix

This appendix contains the text of the proposed change to Airway Planning Standard Number One and the current text of the Planning Standard which it would replace.

Proposed Revised Tower Criteria

5. *FAA Airport Traffic Control Tower.*

a. *Establishment.*

(1) *Phase I Criteria.*

Phase I criteria, simple tests for identifying possible sites for tower establishment, use the following ratio sum derived from the latest annual operation counts. Let

AC=Air Carrier Operations
AT=Air Taxi Operations
GAI=General Aviation Itinerant Operations
GAL=General Aviation Local Operations
MI=Military Itinerant Operations
ML=Military Local Operations

Then

$$\frac{AC}{38{,}000} + \frac{AT}{90{,}000} + \frac{GAI}{160{,}000} + \frac{GAL}{280{,}000} + \frac{MI}{48{,}000} + \frac{ML}{90{,}000}$$

is the *Phase I Establishment Ratio Sum.* If this sum is greater than or equal to one, then the site becomes a candidate for tower establishment.

(2) *Benefit/Cost Criteria (Phase II).* Phase II criteria, detailed in Report Number APO–83–2, Establishment and Discontinuance Criteria for Airport Traffic Control Towers, compare the present value of tower benefits with the present value of costs over a fifteen-year time frame, using site-specific activity forecasts to develop the benefits. The present values are then obtained by discounting the future costs and benefits to the present and summing. A location meets *tower establishment criteria* when the ratio of benefits to costs is 1.0 or greater.

(3) Phase I is used to identify a potential candidate and Phase II verifies its economic justification. A location may be exempted from meeting Phase I and/or Phase II and be considered an establishment candidate because of other special factors. In these cases a site-specific analysis must be performed and adequate justification presented.

The site specific analysis should include, but not be limited to:

(a) Assurance that factors unique to the location such as weather and topography, are properly accounted for.

(b) Potential use of the site to provide capacity and training relief for a hub airport.

(c) Impact on adjacent facilities.

(d) Operational factors which cannot otherwise be accounted for by the benefit-cost analysis.

(e) The possibility of significant changes in traffic activity attributable to unique local conditions.

(f) Military requirements.

(4) FAA Regional Offices shall submit site-specific data required to apply the criteria and validate candidacy with their response to the annual Call for Estimates.

b. *Hours of Operation.*

(1) Normally new control towers will be operated 16 hours or less a day. Individual operational justification is required to operate any newly established control tower more than 16 hours per day.

(2) Order 7232.5E, Reduced Operating Hours for Airport Traffic Control Tower/Approach Control Facilities, establishes criteria and provides guidelines for selecting airport traffic control tower/approach control facilities for reduced hours of operation.

Based on a study of the individual location's activity pattern, the region shall submit recommended hours of operation to the Washington Office. (See Order 7232.5E, Reduced Operating Hours for Airport Traffic Control Towers/Approach Control Facilities.)

c. *Discontinuance.*

(1) *Phase I Criteria.*

For tower discontinuance, the following ratio sum, analogous to the sum in Paragraph 5a. Establishment, is used:

$$\frac{AC}{15{,}000} + \frac{AT}{40{,}000} + \frac{GAI}{75{,}000} + \frac{GAL}{125{,}000} + \frac{MI}{20{,}000} + \frac{ML}{35{,}000}$$

VOL 48 ISS 90 MY 9 1983 UMI

A site becomes a discontinuance candidate if this sum, the *Phase I Discontinuance Ratio Sum*, drops below one.

(2) *Benefit Cost Criteria (Phase II).* Phase II criteria, detailed in Report Number APO–83–2, compare the present value of continued tower operation with associated benefits. A location meets *tower discontinuance criteria* when the ratio of benefits to costs falls below one.

(3) *Site-Specific Analysis (Phase III).* If continued tower operation is not economically justified, a site-specific analysis will be performed which should include, but not be limited to:

(a) Assurance that factors unique to the location such as weather and topography, are properly accounted for.

(b) Potential use of the site to provide capacity and training relief for a hub airport.

(c) Impact on adjacent facilities.

(d) Operational factors which cannot otherwise be accounted for by the benefit-cost analysis.

(e) The possibility of significant changes in traffic activity attributable to unique local conditions.

(f) Military requirements.

(4) FAA Regional Offices shall submit discontinuance candidates, along with the site-specific data required to apply the criteria and validate candidacy, annually or more often if appropriate.

d. *Withdrawn*—CHG 3

Current Tower Criteria

5. *FAA Airport Traffic Control Tower.*

a. *Establishment.* An airport having certificated route air carrier service, air taxi (including scheduled commuter service) or general aviation activity or any combination thereof is a candidate for a control tower if it satisfies the sum of the ratio value level described below: A ratio value for each of the three (3) types of operation categories is computed. If the sum of the three ratio values is equal to or greater than 1, then the location is a candidate.[1]

Type of operation		Ratio value
(1)	Number of air carrier operations / 15,000 =	xxxxx
(2)	Number of air taxi operations / 25,000 =	xxxxx
(3)	Number of general aviation and military operations (local plus itinerant) / 200,000 =	xxxxx
	Sum of ratio values	If 1 or greater, location is a candidate.

b. *Hours of Operation.*

(1) Normally new control towers will be operated 16 hours a day. Individual operational justification is required to operate any newly established control tower more than 16 hours per day.

(2) Order 7232.5E, Reduced Operating Hours for Airport Traffic Control Towers/Approach Control Facilities, establishes criteria and provides guidelines for selecting airport traffic control tower/approach control facilities for reduced hours of operation.

Based on a study of the individual location's activity pattern, the region shall submit recommended hours of operation to the Washington Office. (See Order 7232.5E, Reduced Operating Hours for Airport Traffic Control Towers/Approach Control Facilities.)

c. *Discontinuance.* A control tower is a candidate for decommissioning when the sum of the ratio values computed in paragraph 5a. *Establishment* drops below 0.65. Using the approach described in Report No. ASP–75–4, Establishment Criteria for Airport Traffic Control Towers, tower decommissioning candidates will be screened in FAA Headquarters to determine whether continued operation is economically justified. If this screening does not show that continued operation is justified, a site-specific analysis will be performed which shall include:

(1) Assurance that factors unique to the location such as weather and topography, are properly accounted for.

(2) Potential use of the site to provide capacity and training relief for a hub airport.

(3) The possibility of reducing FAA operating costs.

(4) The possibility of significant changes in traffic activity attributable to unique local conditions.

(5) The feasibility of local cost-sharing.

FAA Regional Offices shall submit discontinuance candidates along with the data required for screening annually, or more often if appropriate.

d. Withdrawn—CHG 3.

[FR Doc. 83–12183 Filed 5–6–83; 8:45 am]

BILLING CODE 4910–13–M

[1] Tower candidates identified by the above procedure will be screened in FAA Headquarters using the approach described in Report No. ASP–75–4, Establishment Criteria for Airport Traffic Control Towers. FAA Regional Offices shall submit data required for screening purposes with their responses to the annual Call for Estimates.

Part III

Department of Energy

Office of Conservation and Renewable Energy

Affordable Manufactured Housing Through Energy Conservation; Notice of Inquiry

VOL 48 ISS 90 MAY 9 1983 UMI

DEPARTMENT OF ENERGY

Office of Conservation and Renewable Energy

10 CFR Ch. II

[Docket No. CAS-RM-79-112A]

Affordable Manufactured Housing Through Energy Conservation

AGENCY: Department of Energy.

ACTION: Notice of inquiry.

SUMMARY: The Department of Energy announces the availability of draft voluntary guidelines for home manufacturers and retailers entitled, "Affordable Manufactured Housing Through Energy Conservation: A Guide to Designing and Constructing Energy Efficient Manufactured Homes". For the purposes of the guidelines, a manufactured home is a structure: transportable in one or more sections; built on a permanent chassis; and designed to be used as a dwelling. This Notice of Inquiry is intended to solicit public comment on the draft guidelines. The Department is particularly interested in receiving comments on the set of questions contained in this Notice.

Congress has directed the Department to develop and promulgate voluntary energy performance standards for the design of new commercial and residential buildings. Compliance with these standards will only be required for the design of new Federal buildings. For all other buildings, these standards will serve as voluntary guidelines.

As defined by statute, an energy performance standard for a new building is a design requirement which prescribes an energy consumption goal and a method for calculating whether the design meets that goal.

The draft guidelines, which are the subject of this Notice, provide a simplified calculation technique for analyzing whether the design of a manufactured home meets an energy consumption goal which could be set by a manufacturer, retailer, financial institution, or a consumer. No energy consumption goals, however, have been developed at this time.

Instead of establishing specific energy consumption goals, the draft guidelines provide a simple, reliable way to determine the cost effectiveness of different energy conservation options, without prescribing a specific level in investment for energy conservation. They allow the user to consider regional differences in climatic conditions, building materials and labor costs, fuel prices, and fuel types.

The draft guidelines contain an easy to operate slide rule which will enable home manufacturers and retailers to calculate the amount of energy that can be saved by incorporating energy conservation options that affect space conditioning. The use of the slide rule is explained in a short brochure. Both slide rule and brochure are packaged in a folder for easy access and use. Accompanying the slide rule folder is a design and construction guidebook that explains how to construct, install, specify, and operate the several energy conservation options analyzed by the slide rule. The guidebook discusses and analyzes additional space conditioning options as well as a variety of domestic hot water and appliance options. The guidebook also provides the user with an easy to use economic evaluation technique for determing the cost effectiveness of a single or combination of options.

The draft guidelines and a technical support document will be available for public inspection at the DOE Headquarters in Washington, D.C. or at the nine DOE Regional Support Offices on May 9, 1983. Address for each are listed elsewhere in this Notice. A copy of the draft guidelines and the technical support document may be obtained by submitting a written request to the Hearings and Dockets Branch of the Office of Conservation and Renewable Energy. Because supplies of each are limited, respondents are asked to specify whether they are interested in reviewing either the draft guidelines or the technical support document, or both, and to request the documents only if they plan to submit comments.

DATES: Written comments must be received no later than July 8, 1983, 60 days after the guidelines and technical support documents are made available for review, to receive consideration by the Department. Current plans are to make the guidelines available through a network which includes the Government Printing Office. A public meeting will be held on May 20, 1983, 9:00 a.m., in Washington, D.C. at the Department of Energy, 1000 Independence Ave. S.W. Room 1E-245. The purpose of the public meeting is to provide a briefing on the draft guidelines to interested parties and to allow the opportunity for oral comments.

ADDRESSES: Send written comments (5 copies) to: Hearings and Dockets Branch, Office of Conservation and Renewable Energy, Department of Energy, Docket Number CAS-RM-79-112A, 1000 Independence Avenue SW., Room 6B-025, Washington, D.C. 20585, (202) 252-9319.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

I. Background
II. A Revised View of Performance Standards
III. Technical Approach
IV. Summary of Guidelines
V. Use of Guidelines
VI. Questions for Public Comment
VII. Availability of Guidelines
VIII. Comment Procedures

I. Background

The Energy Conservation Standards for New Buildings Act of 1976, as amended (Act), 42 U.S.C. Section 6831 *et seq.*, requires the Department of Energy (DOE) to issue voluntary performance standards for the design of new commercial and residential buildings. Compliance with the standards is only required for the design of new Federal buildings. For all other buildings, compliance is voluntary, and the standards serve only as voluntary guidelines.

As originally enacted, Title III of the Energy Conservation and Production Act, Pub. L. 94-385, 90 Stat. 1144 *et seq.*, required the Department of Housing and Urban Development (HUD) to develop, promulgate, implement and enforce compliance with the performance standards. On August 4, 1977, the Act was amended by Section 304(a), 42 U.S.C. Section 7154, of the Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565 *et seq.*, which transferred from HUD to DOE the responsibility to develop and promulgate the standards. HUD retained its implementation responsibilities.

In November 1979, DOE published proposed energy performance standards in the **Federal Register**, 44 FR 68120 *et seq.* (November 28, 1979). The Notice was controversial and generated over 40,000 comments. The comments included technical and other substantive criticisms of the proposed standards. Many commenters expressed concern that the proposed standards were not technically practicable or economically achievable. Furthermore, many commenters stated that the proposed standards placed too great a reliance upon the use of a complex computer program which many commenters said

they neither understood nor could afford to use.

Less than a year after publication of the proposed standards, the Act was again amended by Section 326, 94 Stat. 1629, of the Housing and Community Development Act of 1980, Publ. L. 96-399 (October 8, 1980). This amendment required that DOE promulgate interim standards by August 1, 1981, and extended the date for promulgation of a final rule to April 1, 1983. These interim standards were only to apply to new Federal buildings and required demonstration projects in at least two geographical areas.

In August 1981, Congress again amended the Act and also deferred the appropriation for the program for Fiscal Year 1981 to Fiscal Year 1982. Subtitle D of Title 10 of the Omnibus Reconciliation Act of 1981, 97 Stat. 35 (August 13, 1981), amended the Act to create the term "voluntary performance standards;" eliminated the provision for a possible statutory sanction for noncompliance; added a provision that, except for Federal buildings, "voluntary standards will be developed solely as guidelines to provide technical assistance for the design and construction of energy efficient buildings;" and extended the time to meet a reporting requirement.

II. A Revised View of Performance Standards

The legislative changes which have taken place since enactment of the Act in 1976 require a fundamental change in focus. DOE retains the responsibility for developing voluntary performance standards for all new buildings but these standards now serve a dual purpose. The performance standards serve one purpose for the Federal sector where the standards would set required performance levels for Federal buildings only. However, the Act specifically directs that, except for Federal buildings, voluntary performance standards "* * * shall be developed solely as guidelines for the purpose of providing technical assistance for the design and construction of energy efficient buildings" Section 304(a)(4) of the Act. Accordingly, voluntary guidelines serve a second purpose for the private sector by providing sound technical information and examples of cost effective, energy efficient design and construction practices.

The Act defines the term "voluntary performance standards" to mean:

> an energy consumption goal or goals to be met without specification of the method, materials, and processes to be employed in achieving that goal or goals, but including statements of the requirements, criteria and evaluation methods to be used, and any necessary commentary." Section 303(a) of the Act.

As defined by the Act, the voluntary performance standards serve as an objective during the design stage. They do not apply to the operation, maintenance or energy consumption of a building once built. They operate by setting an energy consumption goal for a building; i.e., a quantified target of energy consumption at the design stage and a method to calculate whether a design meets the energy consumption goal.

Past experience with the development of standards for this program has demonstrated the need for a simple, reliable way to enable a person to determine the cost effectiveness of different energy conservation options. Comments received in response to proposed energy performance standards published in November 1979 were especially critical of the apparent need to use a complex, time-consuming computer program as the calculation method.

Use of a complex computer program alienated many and left others unconvinced of its technical accuracy. Additionally, it became clear that people will only invest in greater energy efficiency if convinced that the long term cost savings, from reduced energy consumption, justify the first cost expenditure. Accordingly, DOE has concluded that the most effective way to convince a person to invest in additional energy conservation options is to provide a method which convincingly demonstrates that the savings justify the investment. One must first be able to calculate the costs and benefits of additional levels of energy conservation. Only then does it make sense to recommend a voluntary energy consumption goal which is technically achievable, economically attainable and environmentally sound.

DOE has made a major effort to develop calculation techniques which are inexpensive, readily understood and easy to operate. The objective has been to develop calculation techniques, which, to borrow a term from the computer industry, are "user friendly".

Today's issuance announces the availability of what DOE hopes will prove to be a user friendly calculation technique to determine the cost effectiveness of energy conserving options for manufactured homes.

The draft guidelines, which are the subject of this Notice, provide a simplified technique which will assist home manufacturers, retailers and home buyers in assessing the relative economic viability of conservation purchases. In effect, users of the guidelines will set their own energy consumption goal and use the simple analysis tools to establish the best energy conservation options to meet that goal. No energy consumption goal has been set by DOE at this time.

The guidelines provide a simple, reliable way to determine the relative cost effectiveness of different combinations of energy conservation options, without prescribing specific levels of investment. By considering regional differences in materials and labor costs, fuel prices, fuel types, and climatic conditions, the results of the selection of energy conservation options may be specifically selected by each user.

Although actual fuel consumption will vary with differences in family size and lifestyle, site differences, building orientation on a site, rapid and/or severe changes in temperature, humidity and sun availability, and other considerations, the guidelines and accompanying slide rule will give relative mean energy use under uniformly assumed living conditions. The guidelines will contain an easy to operate Slide Rule calculator which will enable home manufacturers and retailers to calculate the amount of energy that may be saved by incorporating energy conservation options that affect Space Conditioning. The use of the Slide Rule is explained in a short brochure. Both Slide Rule and brochure are packaged in a folder for easy access and use. Accompanying the slide rule folder is a design and construction guidebook that explains how to construct, install, specify, and operate the several energy conservation options analyzed by the Slide Rule. The guidebook discusses and analyzes additional Space Conditioning options as well as a variety of Domestic Hot Water and Appliance options. The guidebook also provides the user with an easy-to-use Economic Evaluation Technique for determining the cost effectiveness of a single or combination of options.

III. Technical Approach

DOE established a technical project for the development of manufactured home guidelines using the management services of the American Institute of Architects Foundation (AIA-F). Steven Winter Associates, Inc. (SWA) of New York, an architectural/engineering firm, developed the comprehensive information on energy conservation options included in the guidelines. SWA was responsible for performing the

VOL 48 ISS 90 MAY 9 1983 UMI

computer analyses on manufactured homes and for preparing complete documentation of the research methods, assumptions, and results.

Lawrence Berkeley Laboratory (LBL) also contributed to the effort. Much of the initial computer analyses on manufactured homes and residential buildings was compiled through their long-term residential research program. Additionally LBL performed much of the data base research on climate and location factors.

The project has been aided by several review panels which provided guidance and assistance to the project team: a panel of home manufacturers and retailers; a research review panel composed of passive solar, climate, and project overview subpanels; and a panel of architects. The research review panel reviewed research methods, assumptions, and results. The home manufacturer and retailer and architect panels reviewed the development of the guidelines as the project progressed. Representatives from utilities, HUD, public interest groups, consumer groups, environmental groups, and the financial community were asked to provide their views and advice as appropriate.

This project focuses on the credibility of the energy use analyses. Considerable attention has been given to examining all research assumptions and procedures to ensure their adequacy and accuracy. In addition, all research methods, assumptions, and results have been thoroughly documented to ensure that all research results are reproducible and verifiable. The research documentation is available for review at the DOE Headquarters Office in Washington, D.C. and at the nine DOE Regional Support Offices.

The first step in the research effort was to define building prototypes. For manufactured housing they are single- and double-section prototypes—a 14-foot-wide single unit and a 4-foot-wide double unit. Prototypes have been defined largely on the basis of data from the Manufactured Housing Institute and the National Institute of Building Sciences. DOE–2.1 was then used to determine the prototypes' base energy used in 45 U.S. climatic locations. DOE-2.1 is a public-domain computer program for energy analysis of buildings. It calculates the hour-by-hour energy use of a building if provided with its location, construction, operation, and heating, ventilation and air-conditioning equipment specifications. It was developed by the Lawrence Berkeley Laboratory in collaboration with Los Alamos National Laboratory with financial support from DOE. Next, a variety of energy conservation options were defined, and DOE–2.1 sensitivity analyses were performed for the prototypical homes in various climates and locations to determine the energy use effects of each option.

The data from this research provided the basis for preparing a data base for displaying the research results. This process enabled the researchers to determine the energy effects of a variety of options. The results were analyzed further and it was determined that an easy to use Slide Rule would be the most practical format to display the information.

Fifty-one cities, included in an original DOE–2.1 data base, were selected because they included most major cities and covered the range of climate types in which there is significant building construction and acquisition.

This data base was subsequently modified by a DOE sponsored project. Locations were eliminated if the changes in both heating and cooling were within 5% of that of another base city. This resulted in the elimination of eight cities. At the same time two new locations were added for better coverage, resulting in 45 base cities.

To develop results for other locations the following climate data was used: (1) heating and cooling degree days to various degree bases for the 3400 National Oceanographic and Atmospheric Administration (NOAA) stations (20-year average 1951–1980), and (2) latent humidity calculated from Typical Meteorological Year (TMY) weather tapes for 300 U.S. loctions.

IV. Summary of Guidelines

The draft guidelines are written for those in the manufactured housing industry who desire a simple procedure for designing and constructing energy conserving, cost efficient manufactured homes. They show how different energy conservation strategies in different regions can actually increase monthly disposable income by reducing fuel bills. Home buyers, weary of the spiraling cost of fuel, are becoming increasingly receptive to retailers and manufacturers who are prepared to explain how particular energy conservation related expenditures may, over a short period of time, save more money in reduced fuel bills than they cost. The draft guidelines may be used by manufacturers and retailers interested in improving energy efficiency and using energy cost savings as a marketing strategy to sell homes.

The design and construction of those parts of the home, which affect energy use, are influenced by a number of industry and government participants. HUD, under the National Manufactured Home Construction and Safety Standards Act of 1974, as amended, Put L. 93–383, 42 U.S.C. Section 5401 *et seq.*, regulates certain energy related aspects of a manufactured home's construction. The HUD Standards (24 CFR Part 3282) apply to all homes manufactured for sale to purchasers in the United States and are designed to improve the quality and durability of the homes. The thermal integrity of the home is a significant part of the standards. In addition, product manufacturers, lenders, and home buyers are all market forces influencing the energy efficiency of the manufactured home.

Manufacturers confronted with these sometimes conflicting pressures have had to rely on intuition, experience and, where available, complicated energy used and economic analysis tools to estimate the costs and savings of options designed to reduce energy use in the home. Many of the tools are ill-suited to this purpose, difficult to use and may not cover a sufficient range of possible energy improvements to allow comparisons. For example, one tool might be useful for estimating the energy and cost impacts of increased insulation levels but is not applicable for estimating the impacts from the installation of a solar domestic hot water system.

By providing user friendly energy and economic analysis procedures, the guidelines fill a number of gaps. First, they allow the manufacturer or retailer to evaluate the impact on energy use of an array of options. Next, local fuel costs may be utilized to more accurately estimate the dollar savings from a given option.

Finally, by providing an easy-to-use tool for economic analysis, the guidelines allow the savings in fuel costs to be compared with the costs of purchasing and installing the option to reveal the "net" savings to the homeowner. Demonstrating that an option or a package of options will result in a net savings is equivalent to saying that purchasing these options will reduce the cost of home ownership. For example, it may be possible to show that increasing the cost of the home $100, by purchasing a more efficient furnace, will save $300 in fuel costs in the first year. Demonstrating and documenting estimated dollar savings in this way is not only an excellent marketing tool, but it also provides data to convince a lender to finance the cost of the improvement. In addition, lenders, concerned with a potential home buyer's ability to carry a mortgage, are beginning to view fuel costs as an important consideration in deciding whether or not a loan is secure.

Application of this tool should encourage that trend.

V. Use of Guidelines.

The guideline document is divided into three main chapters and an appendix. The chapters are entitled:

- Chapter 1. Overview and Using the Guide
- Chapter 2. Design and Construction
- Chapter 3. Selecting Energy Conservation Options
- Appendix. Estimating Local Energy Costs

The first chapter introduces the guideline package and provides a road map for using the materials presented. The second chapter contains construction, design and specification information on the energy conservation options discussed in the third chapter. Worksheets are provided which, when used in conjunction with the Slide Rule, are useful in selecting those energy conservation options which are most cost-effective.

The worksheets are divided into two parts. The first describes the characteristics of a "Comparison Home." The Comparison Home is used as a benchmark against which the energy savings of various conservation options are compared. The Comparison Home is representative of construction specifications typically used by retailers and manufacturers. The second part of the worksheet is used to identify how various components and systems (the "OPTIONS") which when added to, or substituted in, the Comparison Home, influence the amount of energy the home is expected to use.

Separate worksheets are provided for evaluating options in each of the major areas of energy use: Space Conditioning, Domestic Hot Water and Appliances. Options from all three worksheets are compared and the final selection of options is made by the manufacturer or retailer using a set of economic worksheets.

It is anticipated that the guidelines will aid the manufacturer and retailer in assisting the potential home buyer in selecting and financing energy conservation options. Further, but covering the most popular and effective options from each of the major areas of energy use (Space Conditioning, Domestic Hot Water, and Appliances), the guidelines help identify a 'balanced' package of options.

The discussion which follows describes in more detail the information contained in each separate chapter of the guidelines.

Design and Construction

This chapter discusses the characteristics, affecting heating and cooling, which contribute to the overall energy efficiency of the manufactured home. The chapter is intended to be used with the Slide Rule and contains descriptions of energy efficient construction techniques required to achieve the performance levels estimated by the slide rule analysis procedure.

The design and construction information in the guidebook is divided into individual sections providing recommended techniques for constructing or installing each of the options evaluated by the Slide Rule.

It is suggested that interested persons carefully note these discussions to ensure that the home will be built properly for an energy efficiency standpoint, and that the assumptions built into the Slide Rule are, in fact, reflected in the construction of the actual home. In order to make these assumptions absolutely clear to the manufacturer or retailer, a summary is provided at the end of each discussion explicitly listing the assumptions for the particular component being reviewed.

Selecting Energy Conservation Options

The first section of this chapter explains the use of the Space Conditioning worksheet. The worksheet, which is filled in using the energy savings calculated from the Slide Rule, is designed to calculate the actual fuel costs for a "Comparison Home" and for a series of "options" in which one or more of the characteristics of the Comparison Home have been changed. Properly completed, the worksheet gives the manufacturer or retailer a clear indication of the energy use implications for a variety of alternative methods for designing and constructing a particular home for a particular location. The information contained on the worksheet is used in the Economic Evaluation Technique described below.

The second section of the Selecting Energy Options chapter discusses the energy performance characteristics of the Domestic Hot Water system in the manufactured home. The Federal Trade Commission (FTC) promulgated "Energy Guide" performance labels form the basis for the energy use and fuel cost analyses provided in this section.

A method is also provided for fine tuning the accuracy of these labels with respect to the location of the home, its particular fuel costs, and the system characteristics. The resultant simple analysis technique allows the energy cost savings associated with Domestic Hot Water energy conserving options to be compared. As in the preceding Space Conditioning section, a worksheet is provided comparing the fuel costs of the various system and energy conservation options being considered.

Once completed, the worksheet gives the manufacturer or retailer a simple and clear indication of the cost implications of utilizing a particular Domestic Hot Water system. The information, tabulated on the worksheet, can be used with the Economic Evaluation Technique discussed below.

The Appliance section of this chapter reviews the effects on annual fuel costs of the major Appliances in the manufactured home. As in the Domestic Hot Water discussion, the Energy Guide labels which appear on appliances manufactured since May 1980, form the basis of the energy use and cost analysis method presented.

The Appliances analyzed in this section are:

- Refrigerator
- Refrigerator-Freezers
- Freezers
- Dishwashers
- Clothes Washers
- Clothes Dryers
- Kitchen Ranges and Ovens

The use of the labels to calculate and compare the fuel costs of various different pieces of equipment is explained in detail in the section.

A worksheet is provided and the manufacturer or retailer can quickly assess the fuel cost implications of specifying particular pieces of equipment and of substituting other, more energy efficient models. This worksheet, like those for Space Conditioning and Domestic Hot Water, is also designed to be used with the Economic Evaluation Technique.

Having calculated the energy use and fuel cost characteristics for a variety of Space Conditioning, Domestic Hot Water, and Appliance options and recorded this information on the appropriate worksheets, the next step is to decide which of the options are most appropriate for a particular home in a particular location. This last section of the Selecting Energy Options chapter provides an easy-to-use Economic Evaluation Technique for making decisions based on the relative cost effectiveness of each of the options being considered.

The technique is focused on three final worksheets which incorporate information from the preceding three worksheets and which, when properly completed, display the options for a particular home, ranked according to the

VOL
48
ISS
90
MY
9
1983

order in which they are most cost effective. The resulting list of individual options can be combined into packages of options with recalculated total energy cost savings information. These packages with their accompanying technical and financial documentation will provide valuable tools for the successful marketing of cost effective, energy conserving manufactured housing.

Slide Rule Brochure

A separate brochure entitled "Using the Slide Rule and Modifiers" outlines the procedures for quantifying energy savings due to the energy conservation options. The Slide Rule and additional analysis techniques are used to calculate the change in energy use associated with changing one or more of the following characteristics of the Comparison Home:

- Ceiling Insulation
- Wall Insulation
- Floor Insulation
- Infiltration
- Floor Area (as a base parameter)
- Window Characteristics
  - a. sash material
  - b. glazing layers
  - c. area
  - d. glazing materials
- Location (climate zone)
- Equipment and Controls (efficiency)
- Fans (Whole House Type)
- Movable Window Insulation
- Exterior Roof Color
- Thermostat Setback

Different sets of slide rule inserts will be provided for each of the 45 locations, thus simplifying the necessary calculations. The Slide Rules alone will provide quick, reliable estimates of the changes in home energy use resulting from changes in particular building characteristics.

VI. Questions for Public Comment

DOE welcomes the comments of interested persons. However, DOE is particularly interested in obtaining the views of the public, including home manufacturers and retailers, mortgage institutions and the Department of Housing and Urban Development and other interested persons on the questions set forth below. DOE would appreciate receipt of all written comments and related information by July 8, 1983 in order to utilize this material for the next phase of the program.

1. Are the documents useful to manufacturers and retailers in marketing conservation measures and to home buyers in purchasing energy conservation options?

2. Would a guidebook oriented to the energy related concerns of manufactured home buyers be appropriate and/or necessary?

3. Are the construction details useful, clearly presented and accurately discussed?

4. Does the economics section provide the information of most concern to sellers and purchasers?

5. Should an energy label or sticker, based on the guidelines, be developed for attachment to the home?

VII. Availability of Draft Guidelines

Copies of the Draft Guidelines and the Technical Support Document will be available on May 9, 1983 for inspection at the DOE Freedom of Information Office, Forrestal Building, Room 1E-090, 1000 Independence Avenue, S.W., Washington, D.C. 20585, between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday, and at each of the DOE Regional Support Offices, which are located at the following addresses:

U.S. Department of Energy, Boston Support Office, 150 Causeway Street, Room 700, Boston, Massachusetts 02114

U.S. Department of Energy, New York Support Office, 26 Federal Plaza, Room 3200, New York, New York 10278

U.S. Department of Energy, Philadephia Support Office, 1421 Cherry Street, Philadelphia, PA 19102

U.S. Department of Energy, Atlanta Support Office, 1655 Peachtree NE., 8th Floor, Atlanta, Georgia 30309

U.S. Department of Energy, Chicago Operations Office, 9800 South Cass Avenue, Argonne, Illinois 60439

U.S. Department of Energy, Dallas Support Office, P.O. Box 35228, 2626 W. Mockingbird Lane, Dallas Texas 75235

U.S. Department of Energy, Kansas City Support Office, 324 East Eleventh Street, Kansas City, Missouri 64106

U.S. Department of Energy, Denver Area Office, P.O. Box 26247—Belmar Branch, 1075 South Yukon Street, Lakewood, Colorado 80226

U.S. Department of Energy, San Francisco Operations Office, 1333 Broadway, Oakland, California 94612.

Copies of the draft guidelines, technical support document or both may be obtained by making a written request to: Office of Conservation and Renewable Energy, Hearings and Dockets Branch, Department of Energy, 1000 Independence Avenue, S.W., Room 6B-025, Washington, D.C. 20585. (202) 252-9319

VIII. Comment Procedures

All interested persons are invited to submit written comments to DOE. The correspondence should be mailed to the same address as above. Comments should be identified on the document and envelopes submitted to DOE with the designation "Affordable Manufactured Housing through Energy Conservation". Five (5) copies should be submitted. All written comments and related information should be received by DOE no later than July 8, 1983, 60 days after the documents are made available, in order to receive consideration in the final guidelines.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. DOE reserves the right to determine the confidential status of the information or data and to treat it according to its determination, pursuant to DOE's regulations on confidentiality (10 CFR Part 1004).

(Energy Conservation Standards for New Buildings Act of 1976, as amended, 42 U.S.C. Section 6831 *et seq.*; the Department of Energy Organization Act, 42 U.S.C. Section 7101 *et seq.*)

Issued in Washington, D.C., April 26, 1983.

Joseph J. Tribble,

Assistant Secretary, Conservation and Renewable Energy.

Department of Energy

Western Area Power Administration

General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects

UMI

VOL 48 ISS 90 MAY 9 1983 UMI

DEPARTMENT OF ENERGY

Western Area Power Administration

General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects

AGENCY: Western Area Power Administration, Department of Energy.

SUMMARY: The Western Area Power Administration has developed the General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects (Criteria) contained herein through an extensive public process. Western began the informal process in November 1979, holding several informal Public Information Forums, and continued with the formal public process, when proposed Criteria were published in the **Federal Register** on September 22, 1981 (46 FR 46864–46874) and August 24, 1982 (47 FR 36946–36957). Two Public Comment Forums were held to gather public input on the proposals. The Public Comment Forums were announced in the **Federal Register** on December 29, 1981 (46 FR 62929) and September 20, 1982 (47 FR 41420), and were held on January 21, 1982, and November 23, 1982.

The Criteria contained herein will serve as the principles and guidelines for the marketing of power from the Boulder Canyon Project, Parker-Davis Project and the United States entitlement in the Navajo Generating Station (Navajo), a feature of the Central Arizona Project. Power from these Projects will become available as existing contracts or contract extensions terminate, and will be marketed in accordance with these Criteria.

The Criteria contained herein provide for:

1. Renewal of Boulder Canyon Project contracts under new terms and conditions;

2. Reservation of capacity and energy amounts for current Parker-Davis Project contractors;

3. Marketing principles for the additional capacity made available through the Boulder Canyon Project Uprating Program and energy in excess of Boulder Canyon Project renewal amounts;

4. Marketing principles for additional Parker-Davis Project capacity made available through operational integration of the Federal system and energy in excess of amounts reserved for current contractors;

5. Marketing principles for Navajo capacity and energy surplus to Central Arizona Project and Title I Salinity Control Project needs; and

6. General contract provisions applicable to the power sales from all resources in the Boulder City Area.

In accordance with applicable authorities for power sales from the Projects, the Criteria defines the geographic area in which the power available will be marketed, the amounts and classes of power available, the service seasons for the Boulder City Area, priorities and preferences in allocation, points of delivery, and general contract provisions.

DATES: These General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects are effective 30 days from the date of this notice.

ADDRESS: For further information concerning these Criteria contact: Mr. R. A. Olson, Area Manager, Boulder City Area Office, Western Area Power Administration, P.O. Box 200, Boulder City, Nevada 89005.

SUPPLEMENTARY INFORMATION:

Contents

A. Discussion of Public Comments
B. Revisions to the "Proposed General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects—Revision" as a Result of Public Comment
C. Documents in Public File
D. Regulatory Procedural Requirements
E. General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects

A. Discussion of Public Comments

Throughout the informal and formal public process, Western received numerous comments from organizations comprised of present contractors, public and private utilities, municipalities, state and Federal agencies, Congressional representatives, and private citizens. The Comments centered around 15 major issues. They are:

1. Term of Contract;
2. Marketing Area;
3. Service Seasons;
4. Central Arizona Project Regulatory Storage;
5. Priority Use Power;
6. Renewal of Current Boulder Canyon Project Contracts;
7. Amount of Capacity and Energy Reserved for Renewal to Current Boulder Canyon Project Contractors;
8. Total Energy Available from the Boulder Canyon Project;
9. Firming Energy for the Boulder Canyon Project;
10. Operational Flexibility of the Boulder Canyon Project Resource;
11. Nonfederal Funding of the Boulder Canyon Project (Hoover) Uprating Program;
12. Marketing Power to the Metropolitan Water District of Southern California;
13. Environmental Assessment;
14. Comments from the San Diego, California Area; and
15. Allocations to Military Installations.

1. *Term of Contract.* The Criteria provides that Parker-Davis Project power will be placed under contract for a 20-year period. Boulder Canyon Project power will be placed under contract for a 30-year period with a reevaluation of the amount of energy available from the project at the end of the first 20 years.

These terms of contract have been established in response to comments received to the proposed Criteria of September 1981, that solicited comments on terms of contract ranging from 10 to 20 years, and the revised Criteria published in August 1982, that proposed a 20-year term of contract and the unique nature of the resources. With few exceptions, the comments received indicated that no support would be given for a 10-year term of contract. Commentors insisted that Western's reason to establish the 10-year term of contract; i.e., to allow accurate resource commitments based on near-term hydrologic studies, was insufficient justification for such a short term of contract. They proposed that a longer term of contract, with provisions for adjustment of energy at reasonable intervals, would be a more reasonable approach.

At the present time, there are no proposed additions to the Parker-Davis Project. The amount of resources available are expected to remain stable for at least 20 years. Additionally, due to the complexity of combining Boulder Canyon Project marketing with Parker-Davis Project marketing, the term of contract of 20 years contained in the Criteria for Parker-Davis Project resources is a reasonable term of contract in these unique circumstances.

With regard to the Boulder Canyon Project, legislative amendments have been proposed recently by the Department of the Interior. These amendments would authorize the development of additional capacity at the Boulder Canyon Project through contributed funding agreements. The amount of capacity financed by the entities receiving the allocation of capacity from the Hoover Uprating Program will be delivered in stages as the uprating program is completed.

Western believes that the proposed (August 1982) 20-year term could unnecessarily restrict some smaller entities from participating in the Hoover Uprating Program. Therefore, these amounts of capacity will be placed under contract that will terminate on September 30, 2017. Western believes that this term of contract for Boulder Canyon Project power is sufficient to amortize any bond financing arrangements at reasonable annual rates.

In order to have a common term of contract for Boulder Canyon Project power, renewal contracts will also terminate on September 30, 2017. Western believes the term of contract shown in the Criteria for the Projects to be fair and reasonable.

Comments were also received that the post-1987 Boulder Canyon Project contracts must contain a renewal clause. Western believes that there is no need for, and therefore will not include, renewal language in Boulder Canyon Project contracts, or the Criteria, since the statute does not require such a clause.

2. *Marketing Area.* The Criteria establishes and defines the geographic boundaries of the power marketing area for all Boulder City Area resources. The area can generally be described as southern California, southern Nevada, most of Arizona and a small portion of New Mexico. This is the area in which power from Boulder City Area resources has been historically marketed.

Throughout the public process Western has received comments from entities in Utah and other states in the Upper Colorado River Basin that these states should receive a fair allocation of Boulder City Area power. They have indicated that the allocation of Colorado River Storage Project power (marketed by the Salt Lake City Area Office of Western) to entities in the Lower Colorado River Basin should be withdrawn if the Upper Colorado River Basin states do not receive a fair allocation of Boulder City Area power. They have presented maps showing the "overlap" of the Salt Lake City and Boulder City marketing areas and have indicated that entities in the Lower Colorado River Basin have an unfair advantage over entities in the Upper Colorado River Basin for allocations of Federal power due to this "overlap" of marketing areas.

In contrast, entities in the Boulder City Area have commented that Western should retain its historical marketing area.

The historical marketing area generally conforms to the boundaries of the Bureau of Reclamation's (Reclamation) Lower Colorado Region, excepting that portion of the Lower Colorado River Basin in Utah.

Power from resources in the Boulder City Area has historically been marketed to southern Nevada, southern California, Arizona, and to a narrow section of New Mexico bordering eastern Arizona. Except for Boulder Canyon Project power, there is no statutory identification of a specified geographical area in which power from Boulder City Area resources is to be marketed. The decision of the area in which to market power from particular projects has been left to Secretarial determination.

The marketing of power from the Parker-Davis Project and Navajo was influenced by the location of these projects, load centers and available transmission. In the case of the Parker-Davis Project, transmission facilities were constructed as part of the Federal project to the load centers that could economically be reached. Parker-Davis Project power was marketed within the States of Arizona, California, and Nevada due to the practicality of transmission over the relatively short distance. Service practicalities also encourage arrangements for marketing Navajo power to other participants in the Navajo Generating Station. The participants are located within Arizona, California, and Nevada. The layoff contract arrangements were practical because, either transmission service paths from the Navajo resource to the "layoff" contractors were established, for the most part, by their involvement as Navajo participants, or the contractor had access to the resource because of involvement in other Federal projects.

The total preference load in the Boulder City Area is nearly 10,000 MW, while the Federal resources to which the Criteria applies have a total capability of less than 3,000 MW. Federal resources in the Boulder City Area supply approximately 30 percent of the total preference load. In contrast, Federal resources in the Upper Colorado River Basin serve nearly 50 percent of the preference load. To expand the Boulder City Marketing Area to include the Upper Colorado River Basin would only serve to dilute the benefits of the Federal resources in the Boulder City Area. No good reason appears to reduce the amount of Federal resources to the Upper Colorado River Basin, when the proportion of Federal resources to preference load are in such contrast.

Western has concluded that the power marketing area should be established to coincide with the historical power marketing practice in the Boulder City Area.

3. *Service Seasons.* The Criteria provides for two service seasons for Boulder City Area Projects. The Summer Season is generally the months of March through September with the Winter Season being generally the months of October through February. The Criteria provides for a reduced allocation during the Winter Season, as this is the period when generator maintenance is performed and the generating capacity of the Projects is reduced.

The concept of service seasons for marketing of Boulder City Area resources is not new. The current Parker-Davis Project contracts and Southern Division Colorado River Storage Project contracts have both a Summer and Winter service season. However, the length of these service seasons do not correspond. Additionally, the current Boulder Canyon Project contracts do not contain allocations for particular service season. Western asked for comments on the desirability of adopting a 6 month Summer-6 month Winter Season similar to that contained in the Colorado River Storage Project contracts or adopting the 7 month Summer-5 month Winter Season similar to the current Parker-Davis Project contracts.

Comments received indicated that the 7 month Summer-5 month Winter Season option was preferred. Reasons cited were that the longer 7 month Summer Seaon allowed the greater Summer Season allocation to span the month of March when, in general, the loads were building and the additional resource is needed.

Present Boulder Canyon Project contractors indicated their concern that the concept of service seasons would reduce their present flexibility of scheduling energy to meet their loads. Western's intent is to allow the Boulder Canyon Project contractors to schedule the energy allocated to them to meet their loads within water release constraints, not unlike the method presently employed. The water release constraints are the same as those that have historically been imposed, and in fact, have been taken into consideration in the development of the service seasons. Historically, approximately 70 percent of the annual water release from Lake Mead has been scheduled during the 7 month Summer Season. An amount of energy equivalent to this water release is shown in the Criteria as available during the Summer Season, with the remainder being shown as available in the Winter Season. Western believes that there is sufficient diversity in the contractors' loads to be able to schedule energy to meet the needs of the

VOL 48 ISS 90 MAY 9 1983 UMI

contractors without imposing a burden on any particular contractor.

The present Boulder Canyon Project contractors objected to the reduction in capacity allocations in the Winter Season that had been proposed in the August 1982 Criteria. They stated that such a reduction was unprecedented in project history. Some of the current Boulder Canyon Project contractors proposed, as an alternative, the showing of the Summer Season allocation contained in the August 1982 Criteria as contingent capacity on a year around basis. Western agrees with this approach, and has, therefore, removed the Winter Season capacity amounts. Capacity reductions for the Boulder Canyon Project in the Winter Season will be on a pro rata basis, depending upon the capacity of the generating units actually removed from service.

4. *Central Arizona Project Regulatory Storage.* The Criteria provides for the marketing of Navajo power surplus to Central Arizona Project and Title I Salinity Control Project needs, under short term arrangements. The August 1982 Criteria provided for the marketing of 50 MW of firm power during the winter season, and recognized that the addition of a regulatory storage unit would increase the amount of power available. Due to comments received by the Central Arizona Water Conservation District and other Arizona entities, Western has deleted power amounts and contract term until studies presently underway are completed. Western has also shown a first priority of allocation to Arizona entities.

The current studies have evolved from earlier studies concerning power marketing alternatives for Navajo power. Since 1981, Western's Boulder City Area Office has been engaged in a study effort with Reclamation and other entities in the State of Arizona to determine the benefits to the Central Arizona Project of a regulatory storage unit. These studies indicate that the addition of a regulatory storage unit could allow for the marketing of Navajo power during the summer months, when the peak load for most systems in the Boulder City Area are generally higher; rather than the Winter Season availability without a regulatory storage unit.

These earlier studies indicated that as much as 216 MW of power could be made available on a firm basis during some summer months in a normal year when the Central Arizona Project is diverting 1.5 million acre-feet of water. The amount of power available will depend upon the size of the storage unit and exchange or purchase arrangements with utilities. The exchange arrangements necessary would be for a utility or utilities to provide pumping power in the winter months in exchange for power from Navajo during peak load periods in the summer months.

Following finalization of the aforementioned studies, the Arizona Power Authority and several Arizona utilities began a study, through their consultant, to determine the fiscal benefits to the Central Arizona Project of combining the marketing of Arizona's share of Boulder Canyon Project power (as shown in the August 1982 Criteria) with power from the Navajo resource. It is Western's understanding that the goal of the study is to find a marketing alternative which enhances the ability of Navajo to provide pumping power for Central Arizona Project water, revenue for repayment of project costs, and an additional value which might be sold or otherwise converted to debt-carrying capacity to assist in project funding. The possibility of contributed funding is being investigated as Federal funding for the Central Arizona Project may not be available.

The necessity for completing the Central Arizona Project on schedule is due to Arizona's ground water overdraft situation that has caused the water level to drop a reported three feet per year. The overdraft can be somewhat relieved by completion of the Central Arizona Project and the use of project water in lieu of ground water.

The Central Arizona Water Conservation District, the entity which has contracted with Reclamation to repay the Central Arizona Project, has commented that the allocation of Navajo power in Arizona may be a means of securing contributed funding for the Central Arizona Project and that contributed funding may assist in timely completion of the project. The concept of marketing Navajo power to Arizona entities was advanced in comments at the November 1982, Public Comment Forum and in written comments, and has received qualified support from several entities in the Marketing area. Therefore, Western has decided to give a first priority in allocation to Arizona entities.

Western believes that it is important to protect the repayment of the investment made by the Federal Government in the Central Arizona Project. Repayment can begin only when the project begins delivering water and becomes revenue producing. If an allocation of Navajo power to entities in Arizona can bring in contributed capital to enhance the repayment schedule of the project, this would be in the public interest of the State of Arizona and the United States, and is provided for in the Criteria. If, however, the studies being conducted by the Arizona group do not yield a favorable result, the resource will be offered to other entities within the marketing area.

5. *Priority Use Power.* The Criteria provides that certain amounts of Parker-Davis Project power is reserved for priority uses by the United States. Priority use power is defined as that amount of capacity and energy needed for Federal reclamation project use and irrigation pumping on certain Indian lands.

Comments during the early stages of the public process were directed toward limiting the geographic area in which priority use power could be used and a description of the Federal reclamation projects that would use this power. Western agreed with these comments and has provided a listing of projects using this power and has limited its use to the Lower Colorado River Basin. Western will continue the established practice of marketing Parker-Davis Project power reserved for priority use, but not presently needed, as withdrawable power.

Comments have also addressed Western's definition of the phrase "* * * irrigation pumping on certain Indian lands." Western has defined this term in the Criteria as "* * * irrigation pumping on Indian irrigation projects which are adjacent to the lower Colorado River south of Davis Dam and north of the border between the United States and Mexico."

Comments suggested that Western has misconstrued the language of the Parker Dam Act by so restricting the priority use power to Indian irrigation projects adjacent to the Colorado River. The commentors indicate that the intent of Congress in enacting the Parker Dam legislation was to allow priority use power to be used for reclamation of all Indian lands.

The interpretation of this phrase has been established in earlier allocations of Parker-Davis Project power. This interpretation was further defined in 1978 in a memorandum from the Commissioner of Reclamation. The Commissioner further defined "* * * irrigation pumping on certain Indian lands * * *," as irrigation pumping on Indian irrigation projects which are adjacent to the lower Colorado River south of Davis Dam and north of the border between the United States and Mexico. Irrigation pumping was also defined: "* * * irrigation pumping on Indian irrigation projects includes pumping for the purpose of bringing water to reservation land under agricultural production, and removing water from reservation land. Specifically excluded from this use are commercial, industrial, and residential uses."

Western has adopted this definition used by Reclamation for several years. Indian irrigation projects that do not border the Colorado River between Davis Dam and the border between the United States and Mexico will not be considered for an allocation of priority use power.

6. *Renewal of Current Boulder Canyon Project Contracts.* The Criteria provides for a renewal of current Boulder Canyon Project contracts under new terms and conditions. The principles and guidelines for renewal contracts are contained in the Criteria. Throughout the public process Western has received extensive legal briefs and comments concerning the marketing of Boulder Canyon Project power. Comments concerning the Boulder Canyon Project have centered principally around the interpretation of Section 5 of the Boulder Canyon Project Act. The California Boulder Canyon Project contractors have taken the position that Western has no authority to do anything but renew the present contracts in kind. This contention is based upon an interpretation of the renewal language of Section 5(b) of the Boulder Canyon Project Act. The States of Arizona and Nevada (States), on the other hand, contend that Western is statutorily required by Section 5(c) of the Boulder Canyon Project Act to divide the power from the Hoover resource equally for use within each of the States of Arizona, California and Nevada; except that any power not applied for by the State of California as a state must be divided between Arizona and Nevada. The States assert that this right is superior to the renewal language of Section 5(b) of the Boulder Canyon Project Act. Comments from the cities of Anaheim, Azusa, Riverside, Banning, and Colton, and other interested parties propose that Western should reallocate all of the Boulder Canyon Project power based upon the broad public interest interpretation of the Boulder Canyon Project Act.

The State of Nevada, on August 27, 1982, filed suit in Las Vegas District Court against the United States and the California Boulder Canyon Project contractors. The litigation advances the aforementioned claims to a statutory right to one-third of the Hoover resource upon contract termination and to any amount of power not applied for by California as a state. The State of Arizona has since joined the State of Nevada. The California Hoover Allottees (except MWD), have answered the claim and have filed a counter claim; and the Cities of Anaheim, Azusa, Banning, Riverside, and Colton have filed a motion to intervene.

Notwithstanding the above legal positions of the States and the California Boulder Canyon Project contractors, these entities and several other preference entities have indicated qualified support of the proposed renewals and allocations shown in the August 1982 Criteria with some additional provisions.

Western has analyzed the additional provisions and has included some of these provisions in the Criteria.

The authority granted by Congress in the Boulder Canyon Project Act provides for the necessary administrative flexibility to market Boulder Canyon Project power after May 31, 1987, without the limitation of a mechanical renewal of the existing contracts or an automatic redistribution of the power among the three states.

Western believes that the renewals and allocations shown in the Criteria will provide for a fair distribution of the resources without impairing the legitimate reliance of current contractors on the resource. Three general alternative allocation schemes were considered and evaluated. These alternatives, and an analysis of the effects of these alternatives, are contained in the Environmental Assessment for the General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects dated April 1983.

The Boulder Canyon Project Act requires Western to publish regulations for contract renewals and for the sale of power from the project. Western has stated that these Criteria are the regulations referred to, which are herewith promulgated pursuant to the Boulder Canyon Project Act.

7. *Amount of Capacity and Energy Reserved for Renewal to Current Boulder Canyon Project Contractors.* The Criteria generally provides for a renewal to the present nameplate capacity rating of the individual units assigned for the use of the contractors or to amounts of capacity designated in the current contracts. The energy reserved for the renewal offer is the individual contractors allocated percentage of 3665 MkWh, the 11-year average of total sales of Boulder Canyon Project energy from 1969–1979. The renewal offer also contains additional amounts of capacity and energy allocated to the City of Los Angeles, Department of Water and Power.

Notwithstanding the legal positions of the current contractors, qualified support for the capacity and energy amounts shown in the August 1982 Criteria has been expressed in comments from the current contractors. Some changes were suggested in comments from Boulder Canyon Project contractors and other entities. Western has adopted some of the suggested changes, where appropriate.

The renewal amounts of capacity were developed consistent with historical power marketing policy. In general, the capacity available for marketing from reclamation projects, has been based on that capacity, which is surplus to project needs, if an adverse water supply condition were to exist during a given contract period. Based on Reclamation hydrology studies, for the period 1987–1997, an adverse water supply condition would result in reservoir elevations that would still produce nearly rated head (approximately 490 feet) on the generating units. This means that if the marketing of power for the 1987–1997 period from the Boulder Canyon Project were based upon historical policy, the nameplate rating or 1,340 MW of capacity would be marketed.

Reclamation has published a special report, entitled "Hoover Powerplant Uprating Special Report," U.S. Department of the Interior, Bureau of Reclamation (May 1980), that indicates the powerplant will actually produce 1,450 MW at rated head. Arguments have been made that the renewal offer to each contractor should be based upon the actual output of the dedicated generating units at rated head; the amounts shown in Reclamation's special report.

Western has offered an amount of capacity to the individual contractors based upon the nameplate rating of generating units presently dedicated for their use, and in some cases other contract entitlements, with the exception of the renewal capacity for the City of Los Angeles, Department of Water and Power. The greatest reduction in capacity actually available at rated head to a current contractor with a renewal offer at the nameplate rating of the existing generators, is to the City of Los Angeles, Department of Water and Power. The generating units installed for their use were built in the early years of the project, and have greater overload capability than generators installed in later years. Therefore, Western has offered a renewal to the actual capacity at rated head to the City of Los Angeles. Additionally, a proportionate share of

VOL 48 ISS 90 MAY 1983 UMI

the energy available in excess of renewal shown in the August 1982 Criteria is offered to the City of Los Angeles as a part of renewal.

The energy offered for renewal is generally the present allocated percentage of 3665 MkWh, the average of total Boulder Canyon Project energy sales including Hoover Deficiency Energy, with the exception, as noted above, of the City of Los Angeles.

Under terms of their present contract, the Boulder Canyon Project contractors receive a percentage of the energy generated at the powerplant up to a quantity referred to as "defined firm" energy. This quantity is specified as 4,330 MkWh for operating year 1936, reduced at a rate of 8,760 kWh per year. If generation is greater than defined firm energy in any year of operation, this "secondary energy" is delivered first to the Metropolitan Water District of Southern California. If the Metropolitan Water District cannot use the additional energy for pumping Colorado River water, the secondary energy is distributed 55 percent to the City of Los Angeles, Department of Water and Power and 45 percent to the Southern California Edison Company. In some instances, if the energy generated is less than defined firm energy, the contractors are credited for the amount of energy not taken, and a portion of the investment, in the amount of revenue not realized, is deferred from repayment until after June 1, 1987.

The Coordinated Long-Range Operating Criteria, developed in accordance with provisions of Title VI of the Colorado River Basin Project Act (Pub. L. 90–537) and printed in the **Federal Register**, June 10, 1970, placed a method into effect for calculating the amount of energy that would not be available to the Hoover contractors during the time that Glen Canyon Reservoir (Lake Powell) was filling. This amount of energy is generally known as Hoover Deficiency Energy. This amount of energy not available due to the impounding of water behind Glen Canyon Dam was purchased and delivered to certain Hoover contractors, annually, to mitigate this loss.

As stated earlier, the 11-year period, 1969–1979, was chosen to determine the average historical energy delivered to Hoover contractors. This was the most current data available to Western when it began the informal public process to develop the Criteria in November 1979.

Western believes that renewal of the present contracts based on the 11-year average of total sales, including purchased Hoover Deficiency Energy, is a renewal of Hoover energy actually used by the current contractors. Additionally, Western will guarantee to deliver this amount of energy annually, to those contractors who so desire. This provision will give the current contractors a firm amount of energy, and not a quantity of annual energy subject to the vagaries of the hydrologic cycle. Energy in excess of amounts reserved for renewal is being used to enhance the value of the capacity available from the Hoover Uprating Program.

8. *Total Energy Available from the Boulder Canyon Project.* The Criteria provides for the annual marketing of approximatley 4500 MkWh from the Boulder Canyon Project. The amount reflected in the August 1982 Criteria has been increased from 4300 MkWh as a result of analysis of recent hydrology studies.

At the Public Information Forum in November 1979, Reclamation presented the results of the latest Colorado River Storage Project long range hydrology study. This Study indicated that the hydrology for the period 1987–2002, on the average, would support the marketing of 4300 MkWh from the Boulder Canyon Project. Throughout the public process, Western continued to show this amount of energy available. From comments received, Western requested of Reclamation the results of more recent studies. By letter dated February 5, 1983, Reclamation gave the following data:

Water year	10-year average (MkWh)	Running average (MkWh)
1998 to 1997	4541	4541
1998 to 2007	4069	4305
2008 to 2017	3921	4177

With the energy reevaluation period at 20 years, as stated in the Criteria, Western, using past Reclamation policy of marketing energy based on average hydrology, could market 4305 MkWh.

These averages are based upon historical generation efficiency at the Boulder Canyon Project. With operational integration of the powerplant, Reclamation, citing their experience with comparable facilities, believes that the generation efficiency can be increased by approximately six percent. With a six percent increase in efficiency, the generation, with average hydrology for the 20-year period, is increased to 4563 MkWh. Western has chosen to market 4500 MkWh from the Boulder Canyon Project to be consistent with historical marketing policy; that of marketing energy based on average hydrology.

9. *Firming Energy for the Boulder Canyon Project.* The Criteria provides for Western to purchase firming energy for the Boulder Canyon Project, unless a contractor can provide firming energy from its own resources more efficiently.

In comments received, some of the current Boulder Canyon Project contractors indicated objection to Western firming the resource due to the costs involved. Western's authority to purchase firming energy was also challenged.

The firming concept is important to the value of the uprated capacity. If the energy could not be firmed, the beneficial use of that capacity might be limited to those with a renewal contract. Western believes that, with its ability to purchase low cost off-peak thermal energy, the cost of firming is low when compared to the enhanced value of the uprated capacity. The enhanced value will spread the benefits of Federal power to a greater number of potential users. However, the alternative proposed by the City of Los Angeles; i.e., of providing firming energy only for those contractors requesting it, has been adopted. Western believes that if an entity does not wish to obtain firming energy from Western, Western should not force the acceptance of the energy on that entity.

The authority of the Secretary of the Interior (now Secretary of Energy pursuant to the transfer provisions of Section 302(a) of the Department of Energy Organization Act, Pub. L. 95–91) to purchase firming energy to support or firm-up the marketing of power generated at Federal hydroelectric projects has repeatedly been recognized as a lawful exercise of inherent authority under reclamation law.

The Criteria establishes, consistent with past policy, that salable firm energy will be based upon an averge water condition. This determination contemplates the purchase of energy to augment available energy in minimum water years.

The determination to sell on an average year energy basis, as opposed to a minimum or maximum basis, is a proper exercise of the Secretary's discretion. To sell on a minimum year basis would reduce the benefit of the uprated capacity. To sell on a maximum year basis would, in effect, require such large purchases of energy in deficient years, as to render such a plan an undesirable marketing policy.

10. *Operational Flexibility of the Boulder Canyon Project Resource.* The Criteria provides for current Boulder Canyon Project contractors to schedule loaded and unloaded synchronized generation to accomplish various control functions they presently enjoy through use of dynamic signal. This scheme is intended to approximate the control of generation that presently exists.

Comments received from current Boulder Canyon Project contractors have indicated the importance to their power systems of the individual unit control functions of the Hoover resource. The ability to use the individual generating units to provide spinning reserves and to control generation response to scheduled load changes, is an efficient use of the resource. Other sources of generation cannot accomplish these functions as efficiently.

The flexibility inherent in individual generators at Hoover Powerplant, under terms of the present contracts, have historically been operated for the sole benefit of the existing contractors. These generators are within four different control areas (City of Los Angeles, Southern California Edison Company, Nevada Power Company, and Western). The existing contractors have enjoyed the benefits of control area generation, which includes the use of the generating units to supply reserves, to regulate the generation to match load, and to dispatch units to keep up with system load buildup (Reserves, Regulation and Ramping).

Continued operation of Hoover Powerplant as four distinct powerplants would result in a less than optimum generation efficiency. This reduced efficiency has been the subject of one report that was submitted to the Secretary of the Interior by the General Accounting Office. The report recommended, that in order to achieve the optimum amount of energy per acre-foot of water, the operation of the powerplant should be integrated.

Personnel of the Boulder City Area Office have investigated various means of placing the Hoover units in the Boulder City control area, and of still allowing the affected parties to use the resource to accomplish these control functions. At the May 16, 1980 Public Information Forum, Western advanced a method of achieving these goals by means of an electronic dynamic schedule. This proposal met with approval as to concept.

At the November 23, 1982, Public Comment Forum, the City of Los Angeles, stated that the method of generation control proposed by Western would introduce time delays into the control of their systems that could not be tolerated. Due to these comments, members of the Boulder City Area staff, and the Lower Colorado Region Reclamation staff met with representatives of the current Boulder Canyon Project contractors on December 16, 1982, and with individual contractors in following months. The purpose of these meetings was to discuss desirable response characteristics and communication requirements to implement the control method proposed. These meetings resulted in a report by Reclamation and Western addressing the problems and requirements of the proposed operational scheme, as well as the concepts to be employed. Possible solutions to several of the problems mentioned by the City of Los Angeles are contained in the report. This report is entitled "Hoover Operational Concepts," copies of which have been furnished to the affected parties. The contractors or their operating representatives will lose full "hands on" control of the generating units, but the control offered by the electronic dynamic schedule concept, is a reasonable approximation of that control. It is proposed that implementation of the electronic dynamic schedule concept will be "phased in" with other design changes at Hoover recommended by Western and Reclamation for post-1987 operations.

11. *Nonfederal Funding of the Boulder Canyon Project (Hoover) Uprating Program.* The Criteria provides that the development and subsequent delivery of the capacity available from the Uprating Program will be contingent upon the finalization of financing agreements with Reclamation and satisfactory contractual arrangements with Western.

Some questions have arisen as to the relationship between the allocations and the funding agreements for uprated capacity. The allocation of the uprated capacity gives a potential contractor the ability to participate in funding agreements with Reclamation, with the delivery of that capacity being contingent upon the furnishing of financing by agreement with Reclamation.

The funding agreements are envisioned as three party arrangements between Reclamation, Western and the entity receiving the allocation of uprated capacity. In the event that an entity receiving the allocation fails to provide the necessary funding, Western will reallocate the amount of capacity and energy released.

Several questions were asked with regard to legislative amendments by the Interior Department to Senate Bill 306. These questions were answered by Reclamation in their letter dated January 3, 1983, to Western. The questions related to provisions of the legislative amendments that required the Secretary of the Interior to contract with entities contributing funds in amounts and for a duration as he may determine. The question was; would Interior honor Western's proposed allocation and term of contract. Reclamation has answered that, insofar as allocations and term of contract, they would defer those questions to Western. Reclamation stated, "Those amendments should not be construed as an attempt to usurp the Secretary of Energy's power marketing authority." Due to the unique nature of the Upratings, close coordination between Western and Reclamation has been necessary to insure that the Criteria does not impose constraints that would preclude contributed financing.

Recent legislative amendments proposed by Reclamation to Senate Bill 268, the successor to Senate Bill 306, have clarified many of those items mentioned at the Public Comments Forum.

12. *Marketing Power to the Metropolitan Water District of Southern California.* Under terms of the "General Regualations for Generation and Sale of Power in Accordance with the Boulder Canyon Project Adjustment Act of 1941," the Metropolitan Water District of Southern California receives its allocation of firm energy from the Boulder Canyon Project and a first priority for delivery of secondary energy, both as defined in the Regulations. The Regulations and the terms of their present contracts restrict the use of this energy to pumping water into and in the Colorado River Aqueduct. In the event the Metropolitan Water District does not need the energy for pumping Colorado River water, the energy not taken is divided in given percentages to the City of Los Angeles, Department of Water and Power, and the Southern California Edison Company.

Throughout the public process Western has not included the restriction that energy allocated to the Metropolitan Water District in the renewal contract be used only for pumping Colorado River water. Comments have been received that this restriction should again apply to the Metropolitan Water District, and energy not used in pumping Colorado River water should be distributed among new and current contractors.

When the original allocations were made in 1930, there was strong opposition to the Metropolitan Water District receiving such a large portion (35 percent) of the available energy. California utilities felt that if the Metropolitan Water District received such a large block of power from the

VOL
48
ISS
90
MAY
9
1983
UMI

Boulder Canyon Project, they might enter into competition with the utilities, and have an unfair advantage over them in securing the utility market in southern California. Due to this "fear," the restriction was placed in the Regulations and contracts, that the Metropolitan Water District could only use the energy allocated to it for pumping Colorado River water. At the time the Metropolitan Water District contracted for Boulder Canyon Project power, the only water source envisioned was the Colorado River, and the Secretary believed it to be in the public interest to allocate a large share of the energy from the project for conveying that water to the Los Angeles Basin.

Since the origional allocation of Boulder Canyon Project power, southern California has grown tremendously. The need for additional water supplies for the Los Angeles Basin have required construction of the State Water Project that brings water from northern California to the Los Angeles Basin. The Metropolitan Water District uses a significant amount of energy to bring northern California water into the basin, blend it with Colorado River water, and distribute the water to the users.

Western believes that moving water into the Los Angeles Basin to service industries, municipalities, and residents is in the public interest. The benefits of the resource flow to the entire southern California coastal plain. To restrict the Metropolitan Water District to using their allocation of Boulder Canyon Project power for pumping Colorado River water, when it is known that water supplies from northern California are necessary to meet the total water needs of southern California, would be a restriction on the beneficial use of the resource. This restriction would result in recognition of only a portion of the water supply problem of the Los Angeles Basin. Wesern believes that the policies requiring the restrictive language in the Regulations are no longer valid. Therefore, the restriction of only pumping Colorado River water with Boulder Canyon Project power is not proper and will not be continued in the next contract period.

13. *Environmental Assessment.* Several comments were received concerning the Preliminary Environmental Assessment of the Proposed General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects. These comments indicated that the Environmental Assessment is conclusory in nature with no hard analysis of the environmental consequences of the Criteria.

An Environmental Assessment is done to determine if there are significant environemental consequences of the Federal action, and to examine the possible alternatives to the action. The Environmental Assessment then, is an overview, to determine if the environmental consequences are significant enough to warrant preparation of an Environmental Impact Statement. The proposed action has not significant environmental consequences and, therefore, an Environmental Impact Statement with the inferred "hard analysis" is not necessary.

14. *Comments from the San Diego, California Area.* Western has received numerous comments from individuals, organizations and government entities located in the San Diego Gas & Electric Company service area requesting that Western: (1) Allocate power to a Joint Power Agency in the San Diego area that would contract for the power for the benefit of the citizens in the area; or (2) Allocate power to San Diego Gas & Electric in proportion to the population and energy needs of the various applicants; or (3) Auction the power to the highest bidder.

First, an allocation to a Joint Power Agency that, in and of itself, cannot take Federal power and distribute the benefits of the allocation, is not consistent with preference policy. While in general, an application for power by a municipal government or governments is a preference application, there are other requirements for qualification that exist, that are based on legal interpretations applicable to specific projects, the policies of Western, and the discretion of Western's Administrator.

One requirement is that a preference entity have the means of taking and distributing power either to subordinate preference entities or to ultimate consumers. This is an administrative policy of Western, which generally applies to preference entities that have authority to serve customers in their service area. This policy does not apply to preference entities which merely undertake to serve loads which are owned, controlled, operated and maintained solely by those entities, such as an irrigation district pumping load and the loads of Federal research laboratories, state universities, state and Federal prisons, etc.

The legal basis for this requirement was addressed by the Attorney General of the United States in an opinion entitled "Disposition of Surplus Power Generated at Clark Hill Reservoir Project" on July 15, 1955. This opinion dealt with an arrangement which appears to be similar to that contemplated as a Joint Power Agency for the San Diego Area. The Agency would contract for Federal power but would not physically have the ability to distribute that power for its own benefit. The Secretary of the Interior inquired of the Attorney General as to the legality of a contract which the Secretary, through the Southeastern Power Administration, proposed to execute with the Georgia Power Company (a privately owned utility) for the marketing of electric energy generated at the Clark Will Reservoir Project.

The proposed contract, among other things, provided for the sale, at stated rates, of one-half of the Clark Hill power to the Power Company for a period of fifteen years subject to cancellation by either party upon three years' notice. The Power Company in turn agreed to sell power, at stated rates, to preference customers to be designated by the Southeastern Power Administration. The additional cost to the preference customers would have been no more than that due to carrying, transforming, and delivering the energy. The preference customers would have obtained all benefits of the available power.

The Attorney General held that "the preference requirement [is not] satisfied by disposition of the power to a non-preference customer under an arrangement whereby it obligates itself to sell an equivalent amount of power to preference customers to be designated by the Secretary of the Interior."

An allocation to a group of preference applicants that did not have the means to take and distribute the power, or an arrangement whereby San Diego Gas & Electric would agree to pass on the benefits of Federal power, would not satisfy the requirements of Federal preference laws.

Western is mandated by reclamation law to recognize preference in the sale of Federal power. Preference is given to public bodies, cooperatives, State and Federal governments, and municipalities. If any power is left after these preference entities are served, investor owned utilities such as San Diego Gas & Electric Company, could be given an allocation. However, the preference demand for Federal power is much greater than the supply and an allocation to an investor owned utility is unlikely.

Secondly, in response to the comment that Western should allocate power in proportion to the population and energy needs of the applicants, population can be a consideration in making allocations of power. However, other factors such as load, load growth, type of load

served, and environmental factors may also be considered.

Finally, in response to comments concerning the auctioning of power, Federal power rates are set in accordance with Federal laws and regulations. These authorities contain language which can be summarized by the principle that rate schedules are drawn (1) to repay with interest over a reasonable period of years all capital investments allocated to the power purpose, (2) to repay on a current annual basis all operating costs, including operation and maintenance, replacements, purchased power, and wheeling, and (3) to repay or fund certain irrigation or other water resource project costs. While all costs must be recovered, the regulations implementing project authorities preclude the Government from making a profit on the sale of power, or from marketing the power to the highest bidder.

15. *Allocations to Military Installations.* Throughout the public process comments have been received from military installations indicating their desire to receive an allocation of Federal power. These comments have stressed the status of the installations as preference entities. They have put forth public interest arguments holding that an allocation of low cost power for the use of the installation would reduce the overall cost of government and would, therefore, benefit all of the taxpayers of the nation. Western recognizes the status of the military installations under the Reclamation Project Act of 1939 as preference entities, but not as preference entities with a higher priority as among other preference entities.

B. Revisions to the "Proposed General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects—Revisions," as a Result of Public Comment

Part I. Section C—Contractual Information

The contract term for Boulder Canyon Project power has been changed from 20 years to 30 years. This change was made to allow for a greater term of contract for Boulder Canyon Project contractors to amortize the investment in the Uprating Program at reasonable annual rates.

The energy reevaluation period for Boulder Canyon Project power has been extended from 10 to 20 years. This was changed to reflect the results of current hydrology studies.

The contract term for power from the Navajo resource has been deleted. Studies are in progress involving Reclamation, Western, and Arizona utilities to determine amounts of nonfederal funding that would be supportable from a combined marketing package of the Bouder Canyon Project power allocated for use in Arizona and Navajo power surplus to Central Arizona Project needs. The results of these studies, and any financing arrangements for Central Arizona Project features, may require adjustment of the term of contract to reflect periods of debt service of those entities advancing funds. Therefore, Western will delay setting a contract term for the Navajo resource until after the results of the studies are available.

Part IV. Navajo Generating Station

The preference order for power from the Navajo Generating Station surplus to Central Arizona Project needs has been changed to indicate that allocations will go first to entities in Arizona. As explained earlier, Western believes and Reclamation supports the allocation of Navajo power to Arizona entities, to the extent that the allocation can assist nonfederal funding of certain features of the project, and that completion of the project is of great importance to the United States and the State of Arizona. Should studies underway not prove to be fruitful, Western will allocate Navajo power in accordance with the last three preference priorities.

The class of power for the Navajo resource has been changed from Long Term Firm Power to Long Term Contingent Power. A reevaluation of the nature of the resource, the load that the Navajo resource is dedicated to serve, financial impacts to Central Arizona Project repayment of purchasing firming energy, and the vagaries of the hydrologic cycle require the marketing of contingent power.

The Navajo resource must first meet the Central Arizona Project needs. The hydrologic cycle can be such that surplus water years can be followed by normal years and vice-versa. This would lead to marketing the estimated amount of surplus capacity and energy during a normal year on a firm basis, followed by a purchase of expensive capacity and energy to meet the firm contract obligations the following surplus year. The possible disparity between the purchase and sales rates to supply the contract obligations may be such, that an adverse effect upon Central Arizona Project repayment could occur.

Part V. Parker-Davis Project

The table showing the existing Parker-Davis Project allocations has been revised to show the withdrawal of priority use power for the Fort Mohave Indian Tribe from those contractors having a withdrawable allocation.

The amounts of power available for allocation have also been changed to reflect amounts allocated to the City of Needles, California, that, as stated in the Criteria, have met the requirements to become a preference contractor.

Long-term Peaking Power in the amount of 10 MW has been removed from the Criteria. Reclamation, in its letter of March 18, 1983, indicated that the actual capacity ratings of the generating units at Davis Dam were incorrect. In actuality the Davis Units are rated at 48 MW continuously, rather than 52 MW as used in an earlier determination of marketable capacity.

Part VI. Boulder Canyon Project

The table showing the amounts of Long-Term Contingent Power reserved for renewal to current contractors has been modified to reflect comments by Southern California Edison Company, the City of Los Angles, Department of Water and Power, and the States of Arizona and Nevada.

The table in the August 24, 1982, Criteria incorrectly showed the entire entitlement for the City of Boulder City coming from the Los Angeles allocation. In actuality the entitlement is served equally from Los Angeles Department of Water and Power and Southern California Edison Company.

The States of Arizona and Nevada have agreed on a distribution of 44 MW reserved for use by these states in the General Regulations. These amounts have been changed in the table.

It has been reported that the Bureau of Mines office in Boulder City, Nevada is closing in October 1983. Inasmuch as the 20 MW entitlement is restricted for use in a specific geographic area by Regulation, the Boulder City allocation has been shown as 20 MW and the Bureau of Mines allocation has been deleted. However, should the Bureau of Mines office not close, the renewal referred to in the Criteria will be offered to the Bureau of Mines.

Preference language regarding the Boulder Canyon Project allocation has been added. This language was contained in the September 22, 1981 Criteria, but was inadvertently ommitted in drafting the August 24, 1982 Criteria.

The amount of energy shown allocated for use in the State of Nevada has been increased by 200 MkWh annually. Comments received indicated support for this additional allocation. When the Central Arizona Project is completed, Federal power will be in use for pumping the allocation of Colorado

VOL 48 ISS 90 MAY 9 1983 UMI

River water for the States of Arizona and California (Metropolitan Water District). The additional energy allocated for use within the State of Nevada could supply a major portion of the Southern Nevada Water Project energy requirements for pumping Colorado River water.

Language has been inserted to specify the distribution of energy in excess of firm contract amounts. Western agrees with comments that the State of Arizona should have a limited first right of delivery to excess energy similar to the present contract with the Metroplitan Water District and that after 200 MkWh is delivered to Arizona, such excess energy should be available for use in all three States.

An option for Boulder Canyon Project contractors has been added to allow the contractors to provide their own firming energy. In a year when generation does not meet the contractual amounts, contractors will have the option to accept a reduced amount of energy or to have Western purchase the firming energy for them.

C. Documents in Public File

In accordance with section 501(b) of the Department of Energy Organization Act of 1977, Pub. L. 95–91, the following materials relative to the research performed, analysis made and other information in support of, the need for, and the probable effect of, the Criteria, are available for inspection and copying at the Boulder City Area Office:

1. Environmental Assessment of General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects, Western Area Power Administration, April 1983.

2. Letter dated February 28, 1983 to Parties Commenting on the Proposed General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects (Revision). Transmits comments received prior to February 28, 1983.

3. Reporter's Transcript of Proceedings. Public Comment Forum for Proposed General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects, with Exhibits 1–13, November 23, 1982.

4. **Federal Register** (Vol. 47, No. 164), Tuesday, August 24, 1982, notices, pages 36946–36957. Proposed General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects; Revision.

5. Letter dated March 15, 1982, to Parties Commenting on the Proposed General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects. Transmits comments received prior to March 10, 1982.

6. Reporter's Transcript of Proceedings-Public Comment Forum for General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects, with Exhibits 1–6, January 21, 1982.

7. Letter dated December 31, 1981, to contractors and Interested Parties. Transmits **Federal Register** Notice dated December 29, 1981 announcing public comment forum.

8. **Federal Register** (Vol. 46, No. 249), Tuesday, December 29, 1981, notices, page 62929. Announcement of January 21, 1982, public comment forum.

9. Letter dated September 30, 1981, to Contractors and Interested parties. Transmits Proposed General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects.

10. **Federal Register** (Vol. 46, No. 183), Tuseday, September 22, 1981, notices, pages 46864–46874. Proposed General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects.

11. Letter dated August 11, 1981, to Mr. Robert A. Olson from California Hoover Allottees. Recites California allottees position with regard to Boulder Canyon Project power marketing.

12. Letter dated July 23, 1981, to Contractors and Interested Parties. Transmits July 17, 1981, **Federal Register** (46 FR 37062) notice which deferred publication of the Proposed General Consolidated Power Marketing Criteria for Boulder City Area Projects and Regulations for the Boulder Canyon Project Renewal (Proposed Criteria) until September 11, 1981.

13. Letter dated July 19, 1981, to Boulder Canyon Project Contractors. Transmits letter dated June 30, 1981, from the State of Nevada, Division of Colorado River Resources, to Mr. R. A. Olson.

14. Letter dated June 30, 1981, from the State of Nevada, Division of Colorado River Resources to Mr. R. A. Olson. Requests delay in publication of the Proposed Criteria.

15. Letter dated June 18, 1981, from the Arizona Power Authority to Mr. R. A. Olson. Requests delay in publication of the Proposed Criteria.

16. Letter dated June 12, 1981, from the State of Nevada, Division of Colorado River Resources, to Mr. R. A. Olson. Requests reply to Nevada legal opinion and other information.

17. Letter dated May 1, 1981, to State of Nevada, Division of Colorado River Resources. Replies to State's letter dated April 21, 1981.

18. Letter dated April 21, 1981, from the State of Nevada, Division of Colorado River Resources to Mr. R. A. Olson. Requests information concerning analysis of Nevada's legal opinion.

19. Letter dated April 9, 1981, To Contractors and Interested Parties. Transmits information regarding the schedule for completion of the General Cosolidated Power Marketing Criteria for Boulder City Area Projects.

20. Letter dated January 27, 1981, To Contractors and Other Interested Parties. Transmits comments on December 12, 1980, letter regarding tentative schedule for completion of the General Consolidated Power Marketing Plan.

21. Letter dated December 12, 1980, To Contractors and Other Interested Parties. Transmits tentative calendar of events, staff discussion paper concerning Boulder Canyon Project issues (dated December 10, 1980), and the Proposed General Consolidated Power Marketing Criteria for Boulder City Area Projects.

22. Letter dated October 20, 1980, to All Parties Who Submitted Written Comments to the August 29, 1980, public information forum. Transmits comments on August 29, 1980, public information forum.

23. Consolidated Power Marketing Plan public information forum, August 29, 1980, presentation.

24. Consolidated Power Marketing Plan public information forum, August 29, 1980, slides.

25. Letter dated July 31, 1980, to Arizona Municipal Power Users' Association. Transmits comments on May 16, 1980, public information forum.

26. **Federal Register** (Vol. 45, No. 147), Tuesday, July 29, 1980, notices, pages 50412 and 50413. Announcement of August 29, 1980, public information forum.

27. Letter dated July 25, 1980, to Contractors and Other Parties Interested in Future Power Marketing Criteria for the Boulder City Area. Notification of August 29, 1980, public information forum also transmitted Preliminary Draft Criteria.

28. Consolidated Power Marketing Plan public information forum, May 16, 1980, presentation.

29. Consolidated Power Marketing Plan public information forum, May 16, 1980, slides.

30. Letter dated May 2, 1980, to All Parties Who Submitted Written Comments to the February 22, 1980, public information forum. Transmits comments on February 22, 1980, public information forum.

31. **Federal Register** (Vol. 45, No 72), Friday, April 11, 1980, notices pages 24912 and 24913. Announcement of May 16, 1980, public information forum.

D. Regulatory Procedural Requirements

1. Determination under Executive Order 12291: Western has determined that these Criteria are not a major rule under section 1(b) of Executive Order 12291, 46 FR 13193 (February 19, 1981). Western has an exemption from sections 3, 4, and 7 of the Executive Order 12291.

2. Regulatory Flexibility Act of 1980 (5 U.S.C. 601 et seq.): Each agency, when required by 5 U.S.C. 553 to publish certain rules, is further required to prepare and make available for public comment initial regulatory flexibility analyses to describe the impact of such rules on small entities. Western has determined that this rulemaking of particular applicability relates to allocation and selling of electric power in accordance with reclamation law by Western and, therefore, is not a rule within the purview of the Regulatory Flexibility Act. In any event, the Administrator of Western hereby certifies that the impacts of such allocation and the selling of electric service by Western would not cause an adverse economic impact on a substantial number of these small entities provided for under the Regulatory Flexibility Act.

3. Environmental Assessment: Western has prepared an environmental assessment (EA) which is available for public review. The EA addresses the four alternatives of:

1. No action, essentially renewal in kind of existing Boulder Canyon Project capacity and offer from allocation of Parker-Davis Project capacity and energy.

2. One-third split of Boulder Canyon Project power and offer for allocation of Parker-Davis Project power.

3. Renewal of firm power to existing contractors and allocation of additional firm power and peaking power to existing and new customers.

4. Renewal of nameplate capacity and one-third split of additional uprated operating capacity of the Boulder Canyon Project power, offer for allocation of Parker-Davis Project power, and allocation of additional power as firm and peaking power.

The impact analysis deals with the effect these alternatives will have on the existing electrical system as well as the effect of the alternatives on the physical, natural, and social/economic environments.

Western has made a determination based upon environmental considerations of these final Criteria, that this action is not a significant action in the context of the National Environmental Policy Act, and that it will not lead to any significant environmental impacts. A Finding of No Significant Impact has been prepared. Copies of the EA and FONSI are available from the Boulder City Area Office.

E. General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects

Part I. General

Section A. Purpose and Scope

In accordance with Federal power marketing authorities in reclamation law and the Department of Energy Organization Act of 1977, the Western Area Power Administration (Western) has developed these General Consolidated Power Marketing Criteria or Regulations for Boulder City Area Projects (Criteria). These Criteria establish one set of general marketing principles for power generated at all Federal projects (Projects) under the marketing jurisdiction of Western's Boulder City Area Office. This document will serve as a new power marketing criteria for the Parker-Davis Project and Central Arizona Project (Navajo) resources, and will serve as the regulations for contract renewal and for the sale of power from the Boulder Canyon Project. The power generated at these Projects has been marketed under different power marketing guidelines or regulations. By consolidating the marketing of power from the Projects under common guidelines, the Federal system can be operated at improved

VOL 48 ISS 90 MY 9 1983 UMI

efficiency within the constraints imposed by law, regulations, and treaties.

Section B. Authorities

Federal power in the Boulder City Area is marketed in accordance with the power marketing authorities in Federal reclamation laws (Act of June 17, 1902, 32 Stat. 388, and all acts amendatory thereof or supplementary thereto); the Department of Energy Organization Act of 1977 (91 Stat. 565); and in particular, those acts and amendments enabling the Boulder Canyon Project (45 Stat. 1057); Parker-Davis Project (49 Stat. 1028, 1039; 68 Stat. 143); and the Colorado River Basin Project (82 Stat. 885).

Section C. Contractual Information

Power contracts will be implemented as existing contracts and contract extensions terminate, and as additional resources become available. The existing Boulder Canyon Project contracts terminate on May 31, 1987. The existing Parker-Davis Project contracts terminate on March 31, 1986. The Parker-Davis Project contracts will be extended through May 31, 1987, upon mutual agreement between Western and each individual contractor, in order to have common contract termination dates.

The additional Parker-Davis Project power will not be available until operational integration in the Boulder City area is implemented. Navajo power surplus to the needs of the Central Arizona Project and Title I Salinity Control Project (as amended by Pub. L. 96–336, September 4, 1980, 88 Stat. 266), may be available as early as July 1984, in varying quantities, and will be marketed in accordance with these Criteria.

Western will offer power contracts to each contractor containing the terms and conditions and any special provisions which may be applicable to the power to be marketed under these Criteria. Separate exhibits to the contracts will identify such things as the amounts of capacity and energy to be delivered on a monthly basis from a particular Project, the point(s) of delivery, and the maximum rate of delivery at each point of delivery. These exhibits will be prepared and modified as necessary. If requested by the contractor, Western, in preparation of the exhibits, will endeavor to approximate the individual contractor's seasonal and monthly energy usage pattern. The extent to which Western will be able to accommodate these patterns, will be contingent upon monthly energy availability and required water releases.

The Projects will be operationally integrated to improve the efficiency of the Federal system in accordance with: the operational constraints of the Colorado River, hydro-project powerplants, and Navajo Generating Station, as may be imposed by the Secretary of the Interior or authorized representatives; applicable laws; the general terms, conditions, and principles contained in these Criteria; and the General Power Contract Provisions in effect which are applicable to a particular Project.

Long-term contracts for Parker-Davis Project power will terminate September 30, 2007. Long-term contracts for Boulder Canyon Project power will terminate on September 30, 2017. Long-term contracts for the Boulder Canyon Project will be subject to an energy revision on or about October 1, 2007, if deemed necessary by Western, due to the results of then current hydrology studies.

Each Boulder Canyon Project and Navajo contractor will also contractually agree to supply its own reserves for power from these Projects which meet or exceed Western Systems Coordinating Council minimum reserve requirements.

Contracts for Boulder Canyon Project power will allow for a reduction in capacity due to generating unit outages caused by forced outages, maintenance schedules, or reservior drawdown. This reduction will be based on the ratio each entity's allocation of Boulder Canyon Project capacity bears to the total Boulder Canyon Project capacity marketed, multiplied by the amount of capacity removed from service, or not available because of reduction in effective head.

Notwithstanding the procedures in Section A of Part VIII, below, Western, within the constraints of river operation, intends to permit each Boulder Canyon Project power contractor to schedule loaded and unloaded synchronized generation, the sum of which cannot exceed the amount of capacity reserved for the renewal offer to the individual contractors. To the extent that energy entitlements are not exceeded, such previously scheduled unloaded synchronized generation may be used for regulation, ramping, and spinning reserves through the use of a dynamic signal. These functions will be developed by Western and Reclamation, in cooperation with the Boulder Canyon Project power contractors, and implemented by contract and through written operating instructions.

Energy used for the purpose of supplying unloaded synchronized generation to Boulder Canyon Project power contractors will be accounted for on a monthly basis, and will be supplied by the individual contractors through reductions in energy deliveries, in subsequent months, as will be specified in the power contracts.

Studies are in progress to determine the possible benefits to the Central Arizona Project of combined marketing of the Navajo resource and the Boulder Canyon Project power allocated for use within Arizona, and to determine the amount of funding that could feasibly be provided to the Bureau of Reclamation (Reclamation) by entities in the state of Arizona or political subdivisions of the State of Arizona, for the construction of a regulatory storage unit or other features of the Central Arizona Project. The results of these studies and the term of indebtedness of any contributed funding arrangements that may result will have an effect upon the term of power contracts for the Navajo resource. Therefore, Western will delay establishment of a term of contract for long-term commitments for Navajo power until these studies are completed.

Western will purchase energy, if necessary, specifically for the purpose of fulfilling the energy obligations shown in these Criteria for the Boulder Canyon Project and Parker-Davis Project; except that for those Boulder Canyon Project contractors that can provide firming energy more efficiently from their own resources, Western, on an annual basis, will agree to those contractors providing their own firming energy. Western will reduce the energy obligation to those contractors proportionately. The cost of firming energy that is provided will be reimbursed in the year in which it occurs.

The individual Projects will remain financially segregated for the purposes of accounting and Project repayment. The Boulder City Area rate schedules for each individual Project will be developed to satisfy cost recovery criteria for each Project. Cost recovery criteria for the Boulder Canyon Project and for the United States Navajo entitlement will be developed as part of a separate public process. The Parker-Davis Project cost recovery criteria is already established.

In general, the cost recovery criteria will include components such as operation and maintenance, replacements, betterments, amortization of long-term debt with interest, and other financial obligations of the Projects. Beginning June 1, 1987, the rate for Boulder Canyon Project power will include a component to provide for a contribution to the Lower Colorado River Basin Development Fund, in accordance with the Colorado River Basin Project Act of 1968, and any other applicable legislation that may be enacted.

In order to allow Reclamation to comply with required minimum water releases, and to allow Western to receive purchased energy during offpeak load hours, all power contractors may be required to schedule a minimum rate of delivery during such offpeak load hours. The percentage of energy to be taken by the contractors at the minimum scheduled rate of delivery shall be established on a seasonal basis, and may be increased or decreased as conditions dictate. The monthly minimum rate of delivery for each power contractor will be computed by dividing the number of kilowatthours to be taken during the month by a contractor at the minimum rate of delivery, by the number of offpeak load hours in the month. The number of kilowatthours to be taken during offpeak load hours at the minimum rate of delivery will not exceed 25 percent of the contractor's monthly energy entitlement. Offpeak load hours will be defined in the contracts based on individual system characteristics.

No contractor shall sell for profit any of the capacity and energy allocated to it to any customer of the contractor for resale by that customer.

Part II. Marketing Area

The marketing area for the Projects is defined in appendix A of these Criteria, and consists generally of southern California, southern Nevada, most of Arizona, and a small part of New Mexico. The Boulder City Area marketing area includes a limited portion of the Upper Colorado River Basin, in which the Navajo Generating Station is located, and most of the Lower Colorado River Basin, as defined in the Colorado River Compact.

Part III. Service Seasons

Power from all Projects will be marketed for delivery during two service seasons. These seasons are based upon historic water releases on the Lower Colorado River. Approximately 70 percent of the water is released from Lake Mead during the summer season and 30 percent is released during the winter season. The reduced water releases during the winter season allow for a period in which to perform generator maintenance.

Section A. Summer Season

The summer season for any calendar year is the 7-month period beginning the first day of the Boulder City Area's March billing period and continuing through the last day of its September billing period.

Section B. Winter Season

The winter season is the 5-month period beginning the first day of the Boulder City Area's October billing period, for any calendar year, and continuing through the last day of its February billing period in the next succeeding calendar year.

Section C. Proposed Regulatory Storage Unit

Reclamation is finalizing studies to provide a recommendation to the Secretary of the Interior concerning the location and size of a regulatory storage unit for the Central Arizona Project. Construction of a regulatory storage unit would give Reclamation the operational flexibility to increase winter season pumping and reduce summer season pumping. This may allow for marketing of Navajo power surplus to Central Arizona Project needs during both the summer and winter seasons. The length of service season for Navajo power will depend upon such factors as the construction of the storage unit, the size of the storage unit, utility exchange arrangements and Navajo outage schedules. Initally, the service seasons for delivery of Navajo power will coincide with the seasons established for all projects.

Part IV. Navajo Generating Station

Section A. General

The Central Arizona Project is tentatively scheduled to begin pump testing operations in July 1984, with intitial water deliveries in January 1985. Power surplus to pumping needs in varying quanitities may be available at that time and will be marketed under short term arrangements.

A regulatory storage unit for the Central Arizona Project, if constructed, would give Reclamation the operational flexibility to maximize winter season pumping and reduce summer season pumping with the effect of making Navajo power available during the peak load months. Arizona entities are presently completing studies to determine the amount of contributed financing that could be provided for construction of a regulatory storage unit or other features of the Central Arizona Project.

With construction of a regulatory storage unit, the potential exists for power to be made available during the summer season under long term arrangements. Allocations of Navajo power for long term arrangements will be made after the decision relative to the construction of a regulatory storage unit is reached. Delivery of Navajo power under long term arrangements with Western may require the contractor to contribute funds to Reclamation for the construction of a regulatory storage unit for the Central Arizona Project.

Navajo power, which is surplus to the Federal uses of the Central Arizona Project and Title I Salinity Control Project (as amended by Pub. L. 96–336, September 4, 1980, 88 Stat. 266), will be allocated in accordance with the preference provisions of section 9(c) of the Reclamation Project Act of 1939, in the following order of priority:

1. Preference entity(s) within Arizona;
2. Preference entities within the Boulder City marketing area;
3. Preference entities in adjacent Federal marketing areas; and
4. Nonpreference entities in the Boulder City marketing area.

In the event that a potential contractor fails to place such power under contract within a reasonable period, as specified by the United States and in accordance with the terms and conditions offered by the United States, the amounts of power released by such failure will be reallocated in accordance with the preceding order of priortiy.

Section B. Short-Term Contingent Power

Contingent power is capacity and energy which is normally available, except during either forced or planned outages that affect powerplant capability. Reduction in capacity and energy, when necessary, will be on a pro-rata basis among all contractors for Navajo surplus power. The Central Arizona Project is tentatively scheduled to begin pump testing operations in July 1984, with initial deliveries of water in January 1985. After that time, varying amounts of power may be available under short term arrangements.

Section C. Long-Term Contingent Power

Amounts of contingent power available will depend upon the construction of a regulatory storage unit and related agreements, and Central Arizona Project operation plans.

Each Navajo contractor will also contractually agree to supply its own reserves for Navajo power which meet or exceed Western Systems Coordinating Council minimum reserve requirements.

Part V. Parker-Davis Project

Section A. General

An amount of Parker-Davis Project power is reserved for priority uses by the United States, and upon application,

VOL 48 ISS 90 MAY 1983

for allocation to new and current contractors.

Power reserved for United States priority use is capacity and energy which is reserved for Federal reclamation project use, and irrigation pumping on certain Indian lands. Power that is reserved for United States priority use, but not presently needed, is marketed to some of the Parker-Davis Project contractors as withdrawable power. Requests for withdrawals for Federal reclamation project use power, and Indian irrigation pumping power have equal priority.

Federal reclamation project use power is defined for these Criteria to mean that capacity and energy which is established herein for Federal reclamation projects in the Lower Colorado River Basin. Such projects are Federal reclamation facilities established for the protection and drainage works along the lower Colorado River. The following is a list of projects for which Federal reclamation project use power is reserved: relift and drainage pumps, construction camp sites, Yuma-Mesa Irrigation and Drainage District, Gila Project drainage pumps, Wellton-Mohawk Irrigation and Drainage District Plant Nos. 1, 2, and 3, and the Colorado River Front Work and Levee System.

Power for irrigation pumping on certain Indian lands is defined for these Criteria to mean Federal capacity and energy established herein for use in irrigation pumping on Indian irrigation projects which are adjacent to the lower Colorado River south of Davis Dam and north of the border between the United States and Mexico.

When priority use power is requested, Western will substantiate that the power to be withdrawn will be used for the above specified purposes, and then will withdraw the necessary amount of power upon a 2-year advance notice. Withdrawals of power will be made as requested and substantiated until the total amount of power reserved for priority use purposes is in use.

Power surplus to that reserved for United States priority uses and that reserved for allocation to the existing contractors will be available for allocation to new or current contractors in accordance with preference provisions of section 9(c) of the Reclamation Project Act of 1939, in the following order of priority:

1. Preference entities within the Boulder City marketing area;
2. Preference entities in adjacent Federal marketing areas; and
3. Nonpreference entities in the Boulder City marketing area.

In the event that a contractor or potential contractor fails to place such power under contract within a reasonable period, to be determined by the United States, in accordance with the terms and conditions offered by the United States, the amounts of power released by such failure will be reallocated in accordance with the preceding preference order.

Section B. Long-Term Firm Power

Long-Term Firm Power is intended to have assured availability to the contractor within energy limitations specified in these Criteria. The maximum seasonal capacity entitlement for long-term firm power shall be available to a contractor during each month of the service season. The amount of energy associated with long-term firm power shall be the amount of energy specified in these Criteria and in power sales contracts.

Parker-Davis Project Long Term Firm Power capacity allocations reserved for current contractor upon receipt of an Application for Power are as follows:

Contractor * Ref. appendix B	Summer season kilowatts			Winter season kilowatts		
	Withdrawable	Non-withdrawable	Total	Withdrawable	Non-withdrawable	Total
APPA						
AEPCO		21,100	21,100		16,200	16,200
Mesa		10,450	10,450		8,000	8,000
MEC		2,700	2,700		2,200	2,200
CRIR		8,900	8,900		5,940	5,940
CRC (Nevada)	7,900	49,050	56,950	4,710	36,300	41,010
EAFB	1,935	16,350	18,285	1,180	13,450	14,630
ED-3	2,925		2,925	2,115		2,115
IID		32,550	32,550		26,300	26,300
SRP		31,700	31,700		22,500	22,500
SCIP	1,935	15,250	17,185	1,180	11,950	13,130
Thatcher		350	350		250	250
WMIDD	900	2,200	3,100	595	1,850	2,445
YID		960	960		780	780
YPG	1,935	3,300	5,235	1,180	2,900	4,080
FMIT		1,970	1,970		1,200	1,200
Subtotal	17,530	198,830	214,360	10,980	149,820	160,780
Priority Uses		39,000	39,000		24,700	24,700
TOTAL	17,530	235,830	253,360	10,980	174,520	185,480

Energy available to Long Term Firm Power contractors on and after June 1, 1987, will be equal to 3441 kWh/kW (67 percent capacity factor) in the summer season and 1703 kWh/kW (47 percent capacity factor) in the winter season.

Western advised the city of Needles, California (Needles), by letter dated January 18, 1979, that the Deputy Secretary, Department of Energy, had elected to make power available to Needles under similar terms and conditions as that which was available to Needles under terminated Contract No. 14-06-300-802. Needles met the requirements to become a preference customer.

Western has reserved for application by Needles the following amounts of power from the Parker-Davis Project for the post-1987 contract period under then current contract terms and conditions:

Kilowatt	
5,100	17,800,868 kWh, summer.
4,064	8,752,053 kWh, winter.

Section C. Power In Excess of Amount Reserved

Western will also make available for allocation to new and current contractors the power in excess of that reserved for the existing Parker-Davis Project contractors and priority uses. Amounts of such power which are estimated to be available for allocation after May 31, 1987, are as follows:

ADDITIONAL PARKER-DAVIS PROJECT POWER AVAILABLE FOR ALLOCATION

Season	Kilowatt
Summer	24,555
Winter	22,186

Energy available to Long Term Firm Power contractors on and after June 1, 1987, will be equal to 3,441 kWh/kW (67 percent capacity factor) in the summer season and 1,703 kWh/kW (47 percent capacity factor) in the winter season.

Withdrawable power will continue to be subject to a 2-year withdrawal notice. In the event that withdrawals for priority use purposes are made following the allocation process and prior to June 1, 1987, the amount of withdrawable power allocated to individual contractors will be reduced on a pro rata basis.

Part VI. Boulder Canyon Project

Section A. Long-Term Contingent Power

Contingent capacity is capacity which is normally available, except during either forced or planned outages that affect powerplant capability. Electric service renewal contracts for long-term contingent capacity and firm energy under new terms and conditions will be offered to existing Boulder Canyon Project contractors in the following amounts:

LONG-TERM CONTINGENT POWER RESERVED FOR RENEWAL CONTRACT OFFERS TO CURRENT BOULDER CANYON PROJECT CONTRACTORS

Contractor [1]	Capacity (kilowatts)	Energy	
		Summer [2]	Winter [2]
MWD	247,500	904,382	387,592
LADWP	467,875	470,535	201,658
SCE	277,500	175,486	75,208
Glendale	18,000	47,398	20,313
Pasadena	11,000	40,655	17,424
Burbank	5,125	14,811	6,347
APA (Arizona)	177,000	452,192	193,797
CRC (Nevada)	177,000	452,192	193,797
Boulder City	20,000	56,000	24,000

[1] Reference appendix C.
[2] Kilowatt hours in thousands.

The reservation shown for the City of Boulder City includes a renewal offer of 700 kW and 1,550,000 kWh to the Bureau of Mines. In the event that the renewal offer to the Bureau of Mines is released, such amounts will be offered to the City of Boulder City.

Capacity reductions, when necessary, will be on a pro rata basis among all of the Boulder Canyon Project contractors. Winter season capacity will depend primarily upon the capacity of generating units removed from service for maintenance by Reclamation.

Each Boulder Canyon Project contractor will also contractually agree to supply its own reserves for Boulder Canyon Project power which meet or exceed Western Systems Coordinating Council minimum reserve requirements.

Section B. Planned Uprating Program

Reclamation is currently planning an Uprating Program which would increase the generating capability of the Boulder Canyon Project. Reclamation is proposing that the Uprating Program be financed with contributed funds provided by the contractor receiving the allocation. The development and subsequent delivery of the uprated capacity will be contingent upon the contractor finalizing financing agreements with Reclamation and satisfactory contract arrangements with Western.

The amounts of capacity and energy in excess of renewal offers to be reserved for allocation for use in the Boulder City marketing area within the States of Arizona, California, and Nevada are:

	Capacity (kilowatts)	Energy [1]	
		Summer	Winter
Arizona	188,000	148,000	64,000
California	127,000	99,850	43,364
Nevada	188,000	298,000	124,000

[1] Kilowatt hours in thousands.

The States of Arizona and Nevada have established agencies to contract for Boulder Canyon Project power. However, other preference entities within these States have advised Western that they too have the ability to contract for Boulder Canyon Project power with Western directly, and have requested to be permitted to apply for power directly with Western. In order to avoid unduly limiting the allocation process, Western will accept applications from all qualified preference entities within these States, and determine their ability to contract with Western during the allocation process. Western will also accept applications from qualified preference entities within the State of California.

In the event that a contractor or potential contractor fails to place power under contract within a reasonable period, as specified by the United States and in accordance with the terms and conditions offered by the United States, or fails to provide contributed funds, the amounts of power released by such failure will be reallocated in the following order:

1. Preference entities within the Boulder City marketing area;
2. Preference entities in adjacent Federal marketing areas; and
3. Nonpreference entities in the Boulder City marketing area.

The Uprating Program will be constructed in stages and is currently scheduled to be completed in early 1991. Power contracts will become effective on June 1, 1987, and will contain an estimated schedule for power deliveries from the Uprating Program as this program is completed.

In the event that any part of the Uprating Program is not completed, the total amount of contingent capacity initially allocated to contractors will be reduced on a proportional basis. Power reserved for renewal to existing Boulder Canyon Project contractors will not be affected. If, subsequent to such a capacity reduction, the Uprating Program is reinstated in whole or in part, the amounts initially allocated will be restored to the contractors in proportionate amounts as the upratings are completed.

Section C. Energy in Excess of Firm Commitments

Energy generated in any year of operation in excess of firm contract commitments (approximately 4,500 MkWh) shall be delivered in the following order:

1. The first 200 MkWh for use within the State of Arizona.

2. Energy generated in excess of 4,700 million kilowatt hours (MkWh) shall be delivered equally for use within the States of Arizona, California and Nevada; *Except*, That in the event excess energy in the amount of 200 MkWh is not generated during any year of operation, Arizona shall accumulate a first right of delivery of excess energy subsequently generated in an amount not to exceed 600 MkWh. Said first right of delivery shall accrue at a rate of 200 MkWh per year for each year excess energy in the amount of 200 MkWh is not generated, less amounts of excess energy delivered.

Section D. Modification Program

Reclamation is also planning a Hoover Modification Program which would further increase the generating capability of the Boulder Canyon Project by approximately 500 MW at rated head. If developed by Reclamation, marketing of that resource will be addressed by Western at that time.

Section E. Capacity Reductions

Contracts for Boulder Canyon Project power will allow for a reduction in capacity due to generating unit outages maintenance schedules, or reservoir drawdown. This reduction will be based on the ratio each entity's allocation of Boulder Canyon Project capacity bears to the total Boulder Canyon Project capacity marketed, multiplied by the amount of capacity removed from service, or not available because of reduction of effective head.

Part VII. Nonfirm Power and Other Agreements

Section A. Short-Term Interruptible Power

Interruptible power may be available under contracts which permit curtailment of delivery by the Boulder City Area.

To the extent that capacity and energy in excess of long-term contract commitments become available, short-term interruptible power may be offered on an if-, as-, and when-available basis. Contacts for short-term interruptible

1983 UMI

VOL 48 ISS 90 MY 9 1983 UMI

power will be offered on a seasonal or monthly basis as conditions permit.

Western will continue to engage in a fuel replacement program in the Boulder City Area. Purchased energy and project generated energy in excess of long-term contract commitments may be offered as fuel replacement energy.

Section B. Short-Term Firm Power

To the extent that capacity and energy in excess of long-term contract commitments become available, short-term firm power may be offered. Contracts for short-term firm power will be offered on a seasonal, monthly, or yearly basis as conditions permit.

Section C. Other Agreements

Western may as it deems reasonable and necessary enter into such other agreements as: transmission service agreements, interchange agreeements, reserve agreeements, load regulation agreements, exchange agreements, maintenance and emergency service agreements, power pooling agreements, or other transactions.

Part VIII. Conditions of Delivery

Western, in cooperation with the contractor, will establish scheduling and accounting procedures based upon standard utility industry practices. These procedures shall be set forth in separate written instructions. Subject to Western's approval as to location and voltage, delivery will be made at Boulder City Area transmission system voltages, but not normally less than 69 kilovolts. Subject to Western's approval, deliveries will continue to be made at lower voltages at powerplant and substation locations to contractors already receiving such deliveries from Western.

Section A. Scheduling

Deliveries of Boulder City Area power shall be scheduled in advance in accordance with procedures set forth in written instructions. These procedures shall provide for the adoption of schedules to the needs of day-to-day or hour-by-hour operations. Said procedures shall also specify the conditions under which actual deliveries, which are greater or less than scheduled deliveries during the month of a particular season, shall be adjusted in later deliveries in subsequent months of that season. Except in unusual circumstances, Western will not permit energy allocated to a contractor for use within one season to be used in another season.

Section B. Accounting

Deliveries of Boulder City Area power will normally be accounted for on the basis of advance schedules, in accordance with the procedures set forth in written instuctions. The written instructions shall include procedures for determining amounts of Boulder City Area power delivered to the contractor at each point of delivery and the procedures for delivery of losses.

Section C. Designated Points of Delivery

Delivery will be made at designated points on the Boulder City Area transmission system at rates of delivery not to exceed the available capability of the transmission system. The designated points of delivery and transmission systems are those specified by Appendix D and Appendix E, respectively, and may be modified as required.

The designation of delivery points in Appendix D and the transmission systems in Appendix E does not imply any obligation for Western to furnish additional facilities or to increase transmission or transformer capabilities at the designated points. Modifications to existing facilities and alternate or additional delivery points requested by the contractors may be permitted at the discretion of Western. Requests for taps on the Boulder City Area transmission system will be considered on a case-by-case basis.

Navajo power will be delivered at the McCullough and Westwing Substations and other points on the Central Arizona Project system as may be available. If the contractor cannot take delivery of Navajo power into its own system at these delivery points, transmission service arrangements to other delivery points will be the obligation of the contractor.

Boulder Canyon Project power will be delivered at Mead Substation and designated Hoover Switchyards. If a contractor cannot accept delivery of Boulder Canyon Project power at Mead Substation or the designated Hoover Switchyard, transmission service arrangements to other delivery points will be the obligation of the contractor.

Parker-Davis Project power will be delivered to designated points of delivery shown in Appendix D, except for those points denoted as Navajo and Boulder Canyon Project delivery points.

Section D. Conservation and Renewable Energy Programs

On November 13, 1981, Western published in the **Federal Register** a notice of the "Announcement of Final Guidelines and Acceptance Criteria for Customer Conservation and Renewable Energy Programs" (Vol. 46, No. 219). These guidelines outline the requirements for Western's power contractors to develop and implement their own individual conservation and renewable energy programs. Each contractor will be subject to these guidelines.

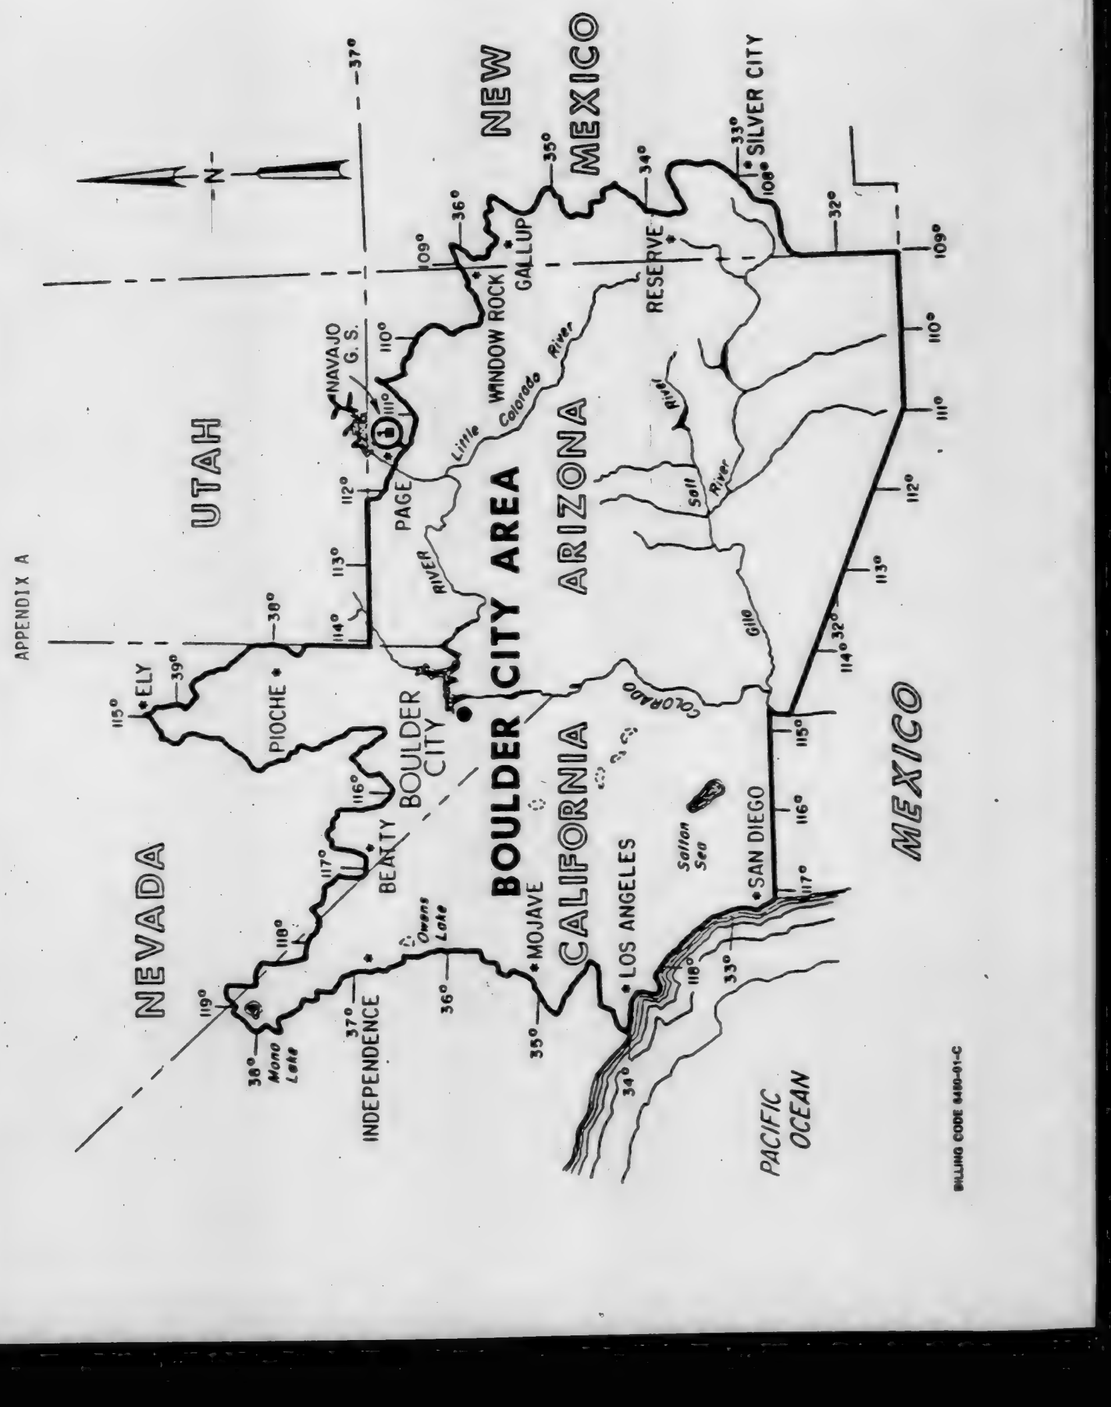
Issued at Golden, Colorado on May 3, 1983.

Robert L. McPhail,

Administrator.

BILLING CODE 6450-01-M

APPENDIX A PAGE 1 of 3



BILLING CODE 6450-01-C

VOL 48 ISS 90 MAY 9 1983 UMI

Appendix A

Included in this Area are the following:

A. All of the drainage area considered tributary to the Colorado River below a point 1 mile downstream from the mouth of the Paria River (Lee's Ferry).

B. The State of Arizona, excluding that portion lying in the Upper Colorado River Basin, except for that portion of the Upper Colorado River Basin in which the Navajo Generating Station is located. The Navajo Generating Station is included in the power marketing area as a resource only.

C. That portion of the State of New Mexico lying in the Lower Colorado River Basin and the independent Quemada Basin lying north of the San Francisco River drainage area.

D. Those portions of the State of California lying in the Lower Colorado River Basin and in drainage basins of all streams draining into the Pacific Ocean south of Calleguas Creek.

E. Those parts of the States of California and Nevada in the Lahontan Basin including and lying south of the drainages of Mono Lake, Adobe Meadows, Owens Lake, Amargosa River, Dry Lakes, and all closed independent basins or other areas in southern Arizona not tributary to the Colorado River.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR NOTICE 41 FR 32914, August 6, 1976.) Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/SECRETARY	USDA/ASCS		DOT/SECRETARY	USDA/ASCS
DOT/COAST GUARD	USDA/FNS		DOT/COAST GUARD	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/FHWA	USDA/SCS		DOT/FHWA	USDA/SCS
DOT/FRA	MSPB/OPM		DOT/FRA	MSPB/OPM
DOT/MA	LABOR		DOT/MA	LABOR
DOT/NHTSA	HHS/FDA		DOT/NHTSA	HHS/FDA
DOT/RSPA			DOT/RSPA	
DOT/SLSDC			DOT/SLSDC	
DOT/UMTA			DOT/UMTA	

Note: The Office of the Federal Register proposes to terminate the formal program of agency publication on assigned days of the week. See 48 FR 19283, April 28, 1983.

List of Public Laws

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws.**

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA* (*List of CFR Sections Affected*), the *Federal Register Index*, or both.

LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$20.00 per year

Federal Register Index

The Index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$21.00 per year

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers:
FR Indexes and the LSA (List of CFR Sections Affected) are mailed automatically to regular FR subscribers.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Executive Order 12418 of May 5, 1983

Transfer of Functions Relating to Financial Responsibility of Vessels for Pollution Liability

By the authority vested in me as President by the Constitution and statutes of the United States of America, in order to transfer certain functions relating to the financial responsibility of vessels for water pollution and establish the authority of Federal agencies to respond to discharges or substantial threats of discharges of oil and hazardous substances, it is hereby ordered as follows:

Section 1. Executive Order No. 11735 of August 3, 1973, is amended as follows:

(a) The heading of Section 3 is amended to read "Reserved".

(b) Subsections 3(1) and 3(2) are redesignated subsections 2(6) and 2(7) respectively.

(c) Section 5(a) is amended to provide as follows:

"(a) The head of each Federal department and agency having responsibilities under the National Contingency Plan (40 C.F.R. Part 300), as now or hereafter amended, is designated and empowered to exercise, without the approval, ratification, or other action of the President, in accordance with that Plan, the authority under Section 311(c)(1) of the Act (33 U.S.C. 1321(c)(1)), relating to the removal of oil and hazardous substances that have been discharged, or for which there is a substantial threat of discharge, into or upon the navigable waters of the United States, adjoining shorelines, or into or upon the waters of the contiguous zone, or in connection with activities under the Outer Continental Shelf Lands Act or the Deepwater Port Act of 1974, or which may affect natural resources belonging to, appertaining to, or under the exclusive management authority of the United States (including resources under the Fishery Conservation and Management Act of 1976).".

Sec. 2. Section 1–2 of Executive Order No. 12123 of February 26, 1979, is amended to provide as follows:

"1–2. *Determination of Financial Responsibility and the Assessment and Compromise of Penalties.*

"The Secretary of the Department in which the Coast Guard is operating is hereby delegated the following authorities:

"1–201. The authority vested in the President by Section 305(a)(1) of the Act (92 Stat. 677, 43 U.S.C. 1815(a)(1)), relating to vessels;

1–202. The authority vested in the President by Section 305(b) of the Act (92 Stat. 678, 43 U.S.C. 1815(b)), relating to offshore facilities; and

1–203. The authority vested in the President by Section 312(a)(2) of the Act (92 Stat. 684, 43 U.S.C. 1822(a)(2)), relating to the assessment and compromise of penalties concerning vessels.".

Sec. 3. Section 5(b) of Executive Order No. 12316 of August 14, 1981 is amended to provide as follows:

"(b) The functions vested in the President by Section 108(a) of the Act are delegated to the Secretary of the Department in which the Coast Guard is operating. The Secretary shall be responsible, in accordance with Section 109 of the Act, for the enforcement of civil penalties for violations of the regulations issued under Section 108(a) of the Act.".

1983

Sec. 4. The Secretary of the Department in which the Coast Guard is operating is hereby delegated the authority vested in the President by Sections 311(p)(1)–(2) of the Federal Water Pollution Control Act, as amended (86 Stat. 870, 33 U.S.C. 1321(p)(1)–(2)), as those sections are incorporated by reference in Section 204(c)(3) of the Trans-Alaska Pipeline Authorization Act of 1973 (Public Law 93–153, 87 Stat. 586, 587), relating to the demonstration of financial responsibility for vessels carrying oil loaded from the Trans-Alaska pipeline.

Sec. 5. The Director of the Office of Management and Budget shall make such determinations, issue such Orders, and take all steps necessary or appropriate to effectuate the transfer of records, property, personnel, and positions and unexpended balances of appropriations, available or to be made available, which relate to the functions transferred, as provided in this Order, from the Federal Maritime Commission to the Secretary of the Department in which the Coast Guard is operating.

Sec. 6. Any rules, regulations, orders, directives, circulars, or other actions taken pursuant to the functions transferred from the Federal Maritime Commission to the Secretary of the Department in which the Coast Guard is operating by the delegation made in this Order shall remain in effect until amended, modified, or revoked.

Executive Order 12419 of May 5, 1983

Implementation of the International Convention on Tonnage Measurement of Ships

By the authority vested in me as President by the Constitution and laws of the United States of America, and in order to implement the International Convention on Tonnage Measurement of Ships, it is hereby ordered as follows:

Section 1. The Secretary of the Department in which the Coast Guard is operating shall perform the obligations of the United States, as prescribed by the Articles of the Convention.

Sec. 2. The Secretary of the Department in which the Coast Guard is operating may authorize one or more United States corporations or associations to admeasure vessels and issue International Tonnage Certificates, pursuant to the provisions of the Convention.

Rules and Regulations

Federal Register
Vol. 48, No. 91
Tuesday, May 10, 1983

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Parts 210, 215 and 220

Claim and Report Submission; National School Lunch Program, Special Milk Program; and School Breakfast Program

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: The Food and Nutrition Service (FNS) is issuing this final rule to amend the regulations for the National School Lunch Program (NSPL), Special Milk Program (SMP) and School Breakfast Program (SBP). This rule implements a provision of Pub. L. 97–370, the 1983 Agriculture Appropriations Act, which mandates time limits for the submission of fiscal year 1983 Claims for Reimbursement to State agencies by School Food Authorities and program reports by State agencies to FNS. The rule will result in improved fiscal accountability at the local, State and Federal levels for fiscal year 1983 funds.

EFFECTIVE DATES: This rule is effective May 10, 1983. Since the statutory change reflected in this rule was effective upon enactment of Pub. L. 97–370 on December 18, 1982, fiscal year 1983 Claims for Reimbursement paid after December 18, 1982 and fiscal year 1983 program reports received by FNS after that date must have been submitted within the statutory deadlines.

FOR FURTHER INFORMATION CONTACT: Stanley C. Garnett, Branch Chief, Policy and Program Development Branch, School Programs Division, FNS, USDA, Alexandria, Virginia 22302, (703) 756–3620.

SUPPLEMENTARY INFORMATION:

Classification

This interim rule has been reviewed under Executive Order 12291 and has been classified as not major because it does not meet any of the three criteria identified under the Executive Order. This action will not have an annual effect on the economy of $100 million or more, nor will it result in major increases in costs or prices for consumers; individual industries; Federal, State or local government agencies; or geographic regions. Furthermore, it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of U.S. based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule has also been reviewed with regard to the requirements of Pub. L. 96–354; the Regulatory Flexibility Act. Robert E. Leard, Administrator of the Food and Nutrition Service, has certified that this rule will not have a significant adverse economic impact on a substantial number of small entities.

This rule is effective upon publication. Since the statutory change reflected in this rule was effective upon enactment of Pub. L. 97–370, fiscal year 1983 Claims for Reimbursement paid after December 18, 1982 and fiscal year 1983 program reports received by FNS after that date must have been submitted within the statutory deadlines. The law does not permit the Department to establish a later implementation date. Therefore, Robert E. Leard, Administrator, Food and Nutrition Service, has determined that good cause exists for making this rule effective earlier than 30 days after publication.

However, the Department did provide State agencies with advance notification that this provision was included in legislation which was likely to be enacted.

Background

There has been growing concern in the Congress, by the General Accounting Office, and by the Office of Management and Budget over the accountability for Federal funds. This regulation implements provisions included in the Agriculture Appropriation Act of 1983, Pub. L. 97–370, which was signed on December 18, 1982. These provisions mandate that "only final reimbursement claims for service of meals, supplements and milk submitted to State agencies by eligible schools, summer camps, institutions, and service institutions within sixty days following the claiming month shall be eligible for reimbursement from funds appropriated under this Act." The Act further stipulates that "States may receive program funds appropriated under this Act for meals, supplements, and milk served during any month only if the final program operations report for such month is submitted to the Department within ninety days following that month." Finally, the Act provides that "Exceptions to these claims or reports submission requirements may be made at the discretion of the Secretary."

The Department is planning to publish a proposed rule for public comment which would make permanent the claim and report submission provisions of Pub. L. 97–370 and also make other conforming changes to Parts 210, 215, and 220 of the regulations.

The claims and report provisions were included in the law because the Department was experiencing serious delays in receiving complete and accurate participation data for the various child nutrition programs. Since the receipt of timely and accurate data is essential to the administration of these programs, Congress mandated that States submit their monthly reports to FNS within 90 days. Recognizing that States must receive complete claims from schools and institutions in a timely manner in order to submit their monthly reports to FNS as mandated, Congress further established a 60-day time limit for submission of the claims from which States prepare the reports. The time limits specified in the law allow State agencies and School Food Authorities to deal with exigencies that may arise from time to time in the claim and report processes. Schools and institutions will have two months in which to collect and submit meal counts and other essential information, and State agencies will have an additional month in which to compile all participation data into a final report.

Schools, institutions, and State agencies are cautioned that claims which are not submitted within 60 days of the claiming month shall not be paid, and States shall not receive funds for meals which are not reported within 90 days of the month in which they were

VOL
48

UMI

served. Exceptions to these strictures may be granted by FNS on a case-by-case basis. However, it would be incumbent upon schools, institutions or State agencies to demonstrate to FNS that an exception is justified.

List of Subjects

7 CFR Part 210

Food assistance programs, National School Lunch Program, Grant programs—Social Programs, Nutrition, Children, Reporting and recordkeeping requirements, Surplus agricultural commodities.

7 CFR Part 215

Food assistance programs, Special Milk Program, Grant programs-Social programs, Nutrition, Children, Milk, Reporting and recordkeeping requirements.

7 CFR Part 220

Food assistance programs, School Breakfast Program, Grant programs-Social programs, Nutrition, Children, Reporting and recordkeeping requirements.

Accordingly, Parts 210, 215 and 220 are amended as follows:

PART 210—NATIONAL SCHOOL LUNCH PROGRAM

1. Section 210.4, is amended by adding a new paragraph (e) as follows:

§ 210.4 Payments to States.

* * * * *

(e) Notwithstanding any other provision of this section, for the fiscal year ending September 30, 1983, a State agency shall receive payments of Program funds under this section for any month only if a final Report of School Program Operations (FNS–10) for such month is submitted no later than 90 days following the last day of that month. FNS may grant exceptions to this requirement if it determines that such exceptions are justified.

2. In § 210.13, paragraph (b) is amended by adding the following language to the end of the paragraph:

§ 210.13 Reimbursement procedures.

* * * * *

(b) * * * Notwithstanding any other provision of this paragraph, final Claims for Reimbursement for fiscal year 1983 shall be filed with the State agency, or FNSRO where applicable, not later than 60 days following the last day of the month covered by the claim. Claims not filed within 60 days shall not be paid unless FNS determines that an exception should be granted.

* * * * *

PART 215—SPECIAL MILK PROGRAM FOR CHILDREN

1. Section 215.4 is amended by adding a new paragraph (c) as follows:

§ 215.4 Payments of funds to States.

* * * * *

(c) Notwithstanding any other provision of this section, for the fiscal year ending September 30, 1983, a State agency shall receive payments of Program funds under this section for any month only if a final Report of School Program Operations (FNS–10) for such month is submitted no later than 90 days following the last day of that month. FNS may grant exceptions to this requirement if it determines that such exceptions are justified.

2. In § 215.10, paragraph (c) previously reserved, is added to read as follows:

§ 215.10 Reimbursement procedures.

* * * * *

(c) Notwithstanding any other provision of this section, final Claims for Reimbursement for fiscal year 1983 shall be filed with the State agency, or FNSRO where applicable, not later than 60 days following the last day of the month covered by the claim. Claims not filed within 60 days shall not be paid unless FNS determines that an exception should be granted.

* * * * *

PART 220—SCHOOL BREAKFAST PROGRAM

1. Section 220.4, is amended by adding a new paragraph (d) as follows:

§ 220.4 Payments to States.

* * * * *

(d) Notwithstanding any other provision of this section for the fiscal year ending September 30, 1983, a State agency shall receive payments of Program funds under this section for any month only if a final Report of School Program Operations (FNS–10) for such month is submitted no later than 90 days following the last day of that month. FNS may grant exceptions to this requirement if it determines that such exceptions are justified.

§ 220.11 [Amended]

2. In § 220.11, paragraph (d), previously reserved, is added to read as follows:

* * * * *

(d) Notwithstanding any other provision of this section, final Claims for Reimbursement for fiscal year 1983 shall be filed with the State agency, or FNSRO where applicable, not later than 60 days following the last day of the month covered by the claim. Claims not filed within 60 days shall not be paid unless FNS determines that an exception should be granted.

BILLING CODE 1505-01-M

---

7 CFR Parts 225 and 226

Summer Food Service Program; Child Care Food Program; Claim and Report Submission

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule

SUMMARY: This final rule implements a provision of Public Law 97–370, the 1983 Agriculture Appropriations Act, mandating the submission of claims to State agencies within 60 days of the claiming month and the submission of Program reports by State agencies to the Department within 90 days of the month covered by the report. This rule amends both the Child Care Food Program (CCFP) and the Summer Food Service Program (SFSP) regulations.

EFFECTIVE DATES: This rule is effective May 10, 1983. However, the statutory change reflected in this rule was effective upon enactment of Public Law 97–370 on December 18, 1982. Therefore, fiscal year 1983 Claims for Reimbursement paid after December 18, 1982 must have been submitted within the statutory deadlines.

FOR FURTHER INFORMATION CONTACT: Beverly Walstrom or Mary Lou Wheeler at Room 416, 3101 Park Center Drive, Alexandria, Virginia 22302 or by telephone at (703) 756–3886.

SUPPLEMENTARY INFORMATION:

Classification: This rulemaking has been reviewed in accordance with Executive Order 12291 and has not been classified as major because it will not have an annual effect on the economy of $100 million, will not cause a major increase in costs or prices, and will not have a significant economic impact on competition, employment, investment, productivity, innovation or on the ability of U.S. enterprises to compete with foreign based enterprises. This rule has also been reviewed with regard to the requirements of Public Law 96–354. The Administrator of the Food and Nutrition Service, has certified that this rule does not have a significant economic impact on a substantial number of small entities.

This rule is effective upon publication. Since the statutory change reflected in this rule was effective upon enactment of Pub. L. 97–370, fiscal year 1983 Claims for Reimbursement paid after December 18, 1982 must have been submitted within the statutory deadlines. The law does not permit the Department to establish a later implementation date. Therefore, Robert E. Leard, Administrator, Food and Nutrition Service, has determined that good cause exists for making this rule effective earlier than 30 days after publication. However, the Department did provide State agencies with advance notification that this provision was included in legislation which was likely to be enacted.

The CCFP is authorized by Section 17 of the National School Lunch Act (NSLA), and the SFSP is authorized by Section 13 of the NSLA. Comprehensive regulations for the CCFP were last published on August 20, 1982, in response to changes mandated by Public Law 97–35, the *Omnibus Budget Reconciliation Act of 1981*. The most recent regulations for the SFSP were published on December 30, 1982. This regulation implements a provision of Public Law 97–370, which was signed on December 18, 1982. This provision mandates that "Only final reimbursement claims for service of meals, supplements and milk submitted to State agencies by eligible schools, summer camps, institutions, and service institutions within sixty days following the claiming month shall be eligible for reimbursement from funds appropriated under this Act." The Act further stipulates that "States may receive program funds appropriated under this Act for meals, supplements, and milk served during any month only if the final program operations report for such month is submitted to the Department within ninety days following that month." Finally, the Act provides that "Exceptions to these claims or reports submission requirements may be made at the discretion of the Secretary." The effective date of this provision established in the law is December 18, 1982.

This provision was included in the law because Congress perceived that the Department was experiencing serious delays in receiving complete and accurate participation data for the Child Nutrition Programs. Since the receipt of timely and accurate data is essential to the administration of these programs, Congress is mandating that States submit their monthly reports as soon as feasible after the end of the month. Recognizing that States must receive complete claims in a timely manner in order to submit their required monthly reports, Congress further established a 60-day time limit for submission of claims. The time limits specified in the law allow both State agencies and institutions to deal with exigencies that may arise from time to time. Institutions will have two months in which to collect and submit meal or home counts and other essential information, and State agencies will have an additional month in which to compile all participation data into a final report.

Paticipants and State agencies are cautioned that claims which are not submitted within 60 days of the claiming month shall not be paid, and States shall not be authorized to draw funds for meals which are not reported within 90 days of the month in which they were served. Exceptions to these may be granted by FNS on a case-by-case basis. However, it is incumbent upon the institution or State agency to demonstrate to FNS that an exception is justified.

The Department is planning to issue a proposed rule to make the claiming and reporting provision of Public Law 97–370 permanent.

In response to this mandate, the Department is amending the SFSP and CCFP regulations as follows:

Summer Food Service Program Regulations

(1) Two sentences are added to § 225.10(c) to specify that the final date for the State agency to report monthly information on the use of funds and on Program operations for Fiscal Year 1983 is 90 days after the month covered by the report. States shall not receive funds for any month for which the report is not submitted within this time frame unless FNS grants an exception.

(2) Two sentences are added to § 225.11(c)(6) to state that claims for Fiscal Year 1983 shall not be honored by the State agency unless they are submitted within 60 days of the month covered by the claim. No claim filed later than 60 days after the month covered will be paid unless FNS determines that an exception to this deadline should be granted.

Child Care Food Program

(1) In § 226.7(b), two sentences are added to specify that the deadline for the State to submit monthly reports for Fiscal Year 1983 is 90 days after the end of the month covered by the report. States shall not receive funds for any month for which the report is not submitted within this time limit unless FNS grants an exception.

(2) Two sentences are added to § 226.10(c) stating that claims for Fiscal Year 1983 shall not be honored unless they are submitted within 60 days after the end of the month covered by the claim. Claims submitted after the 60 day deadline will not be paid unless FNS determines that an exception should be granted.

List of Subjects

7 CFR Part 225

Food assistance program, Grant programs-health, Infants and children, Reporting and Recordkeeping requirements.

7 CFR Part 226

Day care, Food assistance programs, Grant programs-health, Infants and children, Reporting and recordkeeping requirements.

Accordingly, the Department is amending 7 CFR Part 225 as follows:

PART 225—SUMMER FOOD SERVICE PROGRAM FOR CHILDREN

1. Section 225.10(c) is amended by adding two sentences to read as follows:

§225.10 Records and reports.

* * * * *

(c) * * * For Fiscal Year 1983, the final such report for each month shall be submitted not later than 90 days following the last day of the month covered by the report. States shall not receive Program funds for any month for which the final such report is not submitted within this time limit, unless FNS grants an exception.

* * * * *

2. Section 225.11(c)(6) is amended by adding two sentences to read as follows:

§ 225.11 Program payments.

* * * * *

(c) *Reimbursements.* * * *

VOL 48 ISS 91 MAY 10 1983 UMI

(6) * * * Notwithstanding the foregoing, for Fiscal Year 1983, claims for reimbursement containing data in sufficient detail to justify the amount claimed and to enable the State agency to provide the information required in Program reports shall be filed with the State agency not later than 60 days following the last day of the month covered by the claim. Claims not filed within 60 days shall not be paid unless FNS determines that an exception should be granted.

* * * * *

Accordingly, the Department is amending 7 CFR Part 226 as follows:

PART 226—CHILD CARE FOOD PROGRAM

1. Amend § 226.7(d) by adding two sentences at the end of the present text, to read as follows:

§ 226.7 State agency responsibilities for financial management.

* * * * *

(d) *Reports.* * * * During Fiscal Year 1983, the final report for each month on the use of funds and on Program operations shall be submitted no more than 90 days following the last day of the month covered by the report. States shall not receive Program funds for any month for which the final report is not submitted within this time limit unless FNS grants an exception.

* * * * *

2. Amend § 226.10(c) by adding two sentences at the end of the present text, to read as follows:

§226.10 Program payment procedures.

* * * * *

(c) * * * Notwithstanding the above, For Fiscal Year 1983, claims for reimbursement containing data in sufficient detail to justify the amount claimed and to enable the State agency to provide the information required in Program reports shall be filed with the State agency not later than 60 days following the last day of the month covered by the claim. Claims not filed within 60 days shall not be paid unless FNS determines that an exception should be granted.

(Secs. 13 and 17 of the National School Lunch Act, as amended by Public Law 97–307).

Dated: April 22, 1983.

Robert E. Leard,

Administrator, Food and Nutrition Service.

[FR Doc. 83–12488 Filed 5–9–83; 8:45 am]

BILLING CODE 3410–30–M

Agricultural Marketing Service

7 CFR Part 979

Melons Grown in South Texas; Amended Assessment Rate

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule reduces the assessment rate for melons grown in South Texas from two cents to one cent per carton. The committee has estimated that the size of the melon crop will provide adequate income at the lower assessment rate. This will decrease the assessment burden on handlers.

EFFECTIVE DATE: May 1, 1983.

FOR FURTHER INFORMATION CONTACT: Charles W. Porter, Chief, Vegetable Branch, F&V, AMS, USDA, Washington, D.C. 20250, (202) 447–2615.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "nonmajor" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities because it reduces costs for the directly regulated handlers.

This amendment is based upon committee recommendations resulting from a telephone vote conducted April 15–19, 1983. During this period all committee members were contacted and the vote was unanimously in favor of this action. The committee has studied the reports of acreage planted in melons in the production area and has determined that sufficient income for committee operations would be generated at a rate of assessment of one cent per carton. While planted acreage is somewhat lower than last year, expenses for planned production research projects have been less than anticipated. This is because the cooperator was unable to hire a cultural practices technician, and because certain cultural practices projects will not be undertake this season. Since the committee has sufficent funds for contingencies in its reserve, committee members believe it appropriate to reduce the assessment this shipping season.

Findings

After consideration of all relevant matters, it is found that the following amendment will tend to effectuate the declared policy of the act.

It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice or to engage in public rulemaking procedure, and that good cause exists for not postponing the effective date of this section until 30 days after publication in the **Federal Register** (5 U.S.C. 553) in that (1) to maximize benefits to handlers this amendment should apply to as many shipments as possible during the effective period, (2) compliance with this amendment will not require any special preparation on the part of handlers, (3) information regarding the committee's recommendation has been made available to producers and handlers in the production area and (4) the amendment reduces the financial burden on the handling of production area melons.

List of Subjects in 7 CFR Part 979

Marketing agreements and orders, Melons, Texas.

PART 979—MELONS GROWN IN SOUTH TEXAS

The first paragraph of § 979.205 (48 FR 1932), *Expenses and assessment rate,* is hereby revised to as follows:

§ 979.205 Expenses and assessment rate.

* * * * *

Expenses of $119,000 by the South Texas Melon Committee are authorized and an assessment rate of $0.01 per carton of melons is established from the date hereof until September 30, 1983.

* * * * *

(Secs. 1–19, 48 Stat. 31, as amended: 7 U.S.C. 601–674)

Dated: May 4, 1983.

D. S. Kuryloski,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410–02–M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 238

Contracts With Transportation Lines; Cascade Airways, Inc.

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule adds Cascade Airways, Inc. to the listing of carriers which have entered into agreements with the Service for the preinspection of their passengers and crews at locations outside the United States.

EFFECTIVE DATE: April 29, 1983.

FOR FURTHER INFORMATION CONTACT: Stanley J. Kieszkiel, Acting Instructions Officer, Immigration and Naturalization Service, 425 Eye Street NW., Washington, D.C. 20536, Telephone: (202) 633–3048.

SUPPLEMENTARY INFORMATION: The Commissioner of the Immigration and Naturalization Service has entered into an agreement with Cascade Airways, Inc. to provide for the preinspection of its passengers and crews as provided by section 238(b) of the Immigration and Naturalization Act, as amended (8 U.S.C. 1228(b)). Preinspection outside the United States facilitates processing passengers and crews upon arrival at a U.S. port of entry and is a convenience to the traveling public.

Compliance with 5 U.S.C. 553 as to notice of proposed rulemaking and delayed effective date is unnecessary because the amendment merely adds an air carrier to the present listing and is editorial in nature.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that the rule will not have a significant economic impact on a substantial number of small entities.

This order constitutes a notice to the public under 5 U.S.C. 552 and is not a rule within the definition of section 1(a) of E.O. 12291.

List of Subjects in 8 CFR Part 238

Air carriers, Airlines, Aliens, Government contracts, Inspections.

Accordingly, 8 CFR Part 238 is amended as follows:

PART 238—CONTRACTS WITH TRANSPORTATION LINES

§ 238.4 is amended as follows:

1. Add in alphabetical order, "Cascade Airways, Inc.," under "At Calgary".

(Secs. 103, 66 Stat. 173 (8 U.S.C. 1103); 238, 66 Stat. 202 (8 U.S.C. 1228))

Dated: May 5, 1983.

Andrew J. Carmichael, Jr.,

Associate Commissioner, Examinations, Immigration and Naturalization Service.

BILLING CODE 4410–10–M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Parts 371, 379, 385 and 399

[Docket No. 30429–70]

Amendments to the Commodity Control List

AGENCY: Office of Export Administration, International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: This rule amends the Export Administration Regulations by inserting material inadvertently omitted and by removing material inadvertently added to the Regulations in past revisions. This rule neither expands nor limits the provisions of the Export Administration Regulations, and only conforms their provisions to previously announced policy.

EFFECTIVE DATE: May 10, 1983.

FOR FURTHER INFORMATION CONTACT: Archie Andrews, Director, Exporters' Service Staff (Telephone: (202) 377–4811).

SUPPLEMENTARY INFORMATION: On December 29, 1982, the **Federal Register** published the Commodity Control List (CCL) in a new paragraph format (47 FR 58122–58194). Two references to commodities controlled for export for reasons of nuclear non-proliferation were inadvertently omitted. Also, another reference to the old CCL format, which included footnotes, was inadvertently retained in the Regulations, and references to special export controls on shipments to South Africa and Namibia were inadvertently added to two entries on the List. Special foreign policy controls regarding Iraq were inadvertently retained on two CCL entries. In addition, typographical errors were made on three of the CCL entries.

On January 25, 1983, the **Federal Register** published a notice announcing the extension of foreign policy export controls (48 FR 3359–3361). Export controls imposed on commodities for use in the 1980 Summer Olympics in Moscow were repealed, but some references to such controls in Parts 371, 379 and 385 were inadvertently retained. In addition, a typographical error was made in reference to a CCL entry for which some export controls were amended.

This rule, which neither expands nor limits the provisions of the export Administration Regulations, makes the following amendments to those Regulations:

1. The references to the Moscow Summer Olympics controls are removed;

2. The reference to the old footnoted CCL format is revised to reflect the new paragraph format;

3. The omitted nuclear non-proliferation references are incorporated into the appropriate Commodity Control List entries;

4. The inapplicable South Africa and Namibia references are removed;

5. References to CCL ECCN 6799G are amended to read "6899G", and a typographical error involving 6899G is corrected;

6. Typographical errors in ECCNs 1362A, 1371A and 1501A are corrected;

7. "Iraq" is removed from the special foreign policy controls in ECCNs 1460A and 5460F. This change conforms these CCL entries with export controls already announced (**Federal Register** of September 15, 1982, pages 40538–40541);

8. An outdated commodity interpretation (removed by **Federal Register** announcement on November 18, 1982, pages 51858–51861) is removed from ECCN 6699G; and

9. A paragraph on special South Africa and Namibia controls that was inadvertently removed is restored to ECCN 6779F.

Rulemaking Requirements

In connection with various rulemaking requirements, the Office of Export Administration has determined that:

1. Under section 13(a) of the Export Administration Act of 1979 (Pub. L. 96–72, 50 U.S.C. app. 2401 *et seq.*) ("the Act"), this rule is exempt from the public participation in rulemaking procedures of the Administrative Procedure Act. This rule does not impose new controls on exports, and is therefore exempt from section 13(b) of the Act, which expresses the intent of Congress that where practicable "regulations imposing controls on exports" be published in proposed form.

2. This rule does not impose a burden under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

3. This rule is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*

4. This rule is not a major rule within the meaning of section 1(b) of Executive Order 12291 (46 FR 13193, February 19, 1981), "Federal Regulation."

Therefore, this regulation is issued in final form. Although there is no formal comment period, public comments on this regulation are welcome on a continuing basis.

VOL 48 ISS 91 MY 10 1983 UMI

List of Subjects

15 CFR Parts 371 and 399

Exports.

15 CFR Part 385

Communist countries, Exports.

PART 371—[AMENDED]

Accordingly, the Export Administration Regulations (15 CFR Parts 368–399) are amended as follows:

§ 371.2 [Amended]

1. Paragraph (c)(13) of § 371.2 is removed.

2. Paragraph (b) of § 371.3 is revised to read as follows:

§ 371.3 General License G-DEST; shipments of commodities to destinations not requiring a validated license.

* * * * *

(b) *Commodity Control List provisions.* If information contained in a particular entry of the Commodity Control List (Supplement No. 1 to § 399.1) modifies or alters any provisions of General License *G-DEST*, the provisions contained in the Commodity Control List shall govern.

§ 379.4 [Amended]

3. Paragraph (g) of § 379.4 is removed and reserved.

§ 385.4 [Amended]

4. In § 385.4, paragraphs (a)(2)(ii)(B) and (a)(5)(viii) are amended by revising the number "6799G" to read "6899G".

5. The following amendments are made to the Commodity Control List (Supplement No. 1 to § 399.1):

A. ECCN 4261B is amended by inserting between the *Processing Code* paragraph and the *Special Licenses Available* paragraph a new paragraph reading as follows:

4261B ***

Controls for ECCN 4261B

* * * * *

Processing Code: * * *

Reason for Control: Nuclear non-proliferation.

* * * * *

B. In ECCN 1362A, paragraph (b) of the Definitive List of Vibration Test Equipment Controlled by ECCN 1362A is amended by revising the phrase "referenced to 2×10^{-6} N)" to read "(referenced to 2×10^{-6} N/m^2)".

C. In ECCN 1371A, paragraph (a)(1) of the Definitive List of Commodities Controlled by ECCN 1371A is amended by revising the phrase "(SAE–5144C)" to read "(SAE–5144OC)".

D. ECCNs 6392F and 6599G are amended by removing the *Special South Africa and Namibia Controls* paragraph.

E. ECCN 1460A is amended by removing the word "Iraq," from the Note (beginning "Nonmilitary aircraft designed to carry up to a maximum of 25 persons, * * * ") following the three numbered paragraphs under the heading *Special Foreign Policy Controls.*

F. ECCN 5460F is amended by removing the word "Iraq," from the Note (beginning "Nonmilitary aircraft designed to carry up to a maximum of 25 persons, * * * ") following the *Special Licenses Available* paragraph.

G. ECCN 1501A is amended by revising the word "report" to read "reexport" in the *Special Foreign Policy Controls* paragraph.

H. The *Reason for Control* paragraph of ECCN 1502A amended by inserting the phrase "nuclear non-proliferation;" between the phrase "National security;" and the phrase "crime control".

I. ECCN 6699G is amended by removing the Commodity Interpretation ("Illustrative List of Chemicals and Materials * * * ").

J. ECCN 6779F is amended by removing the paragraph entitled *Special South Africa and Namibia Controls.*

K. ECCN 6899G is amended by revising the heading to read as follows:

6899G Other rubber and rubber products, n.e.s. Controls for ECCN 6899G:

* * * * *

(Sec. 13 and 15, Pub. L. 96–72, 93 Stat. 503, 50 U.S.C. app. 2401 *et seq.*; E. O. No. 12214 (45 FR 29783, May 6, 1980))

Date: April 28, 1983.

BILLING CODE 3510-25-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 1

General Regulations Under the Commodity Exchange Act—Recordkeeping; Revocation of Regulation Which Permitted Exemption to One-Minute Timing of Trades

AGENCY: Commodity Futures Trading Commission.

ACTION: Revocation.

SUMMARY: Before it was amended on December 2, 1980, § 1.35(g) of the Commodity Futures Trading Commission ("Commission") regulations required each contract market to show on its trade register the time of the execution of each futures trade to the nearest minute. On December 12, 1979, the Commission adopted § 1.35a–(T) of its regulations, which provided that if a contract market fulfilled certain conditions, it would be exempt from the then one-minute timing requirement for trades in § 1.35(g). The Commission has since deleted the one-minute timing requirement in favor of 30-minute bracket periods for the timing of trades and, thus, § 1.35a–(T) is no longer necessary.

EFFECTIVE DATE: May 10, 1983.

FOR FURTHER INFORMATION CONTACT: Thomas L. Sweat, Jr., Esq., Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581, (202) 254–8955.

SUPPLEMENTARY INFORMATION: Section 1.35a–(T) [1] states that a contract market will be exempt from the provisions of § 1.35(g)(1) [2] (one-minute timing) until January 1, 1981, if the contract market divides its trading day into separately identified time periods which are no more than 30 minutes long, if it identifies on its trade register the time period in which each trade is executed, and if it submits such reports as required by the Director or the Deputy Director of the Division of Trading and Markets on the accuracy of this time period information and the use made of this information in the contract market's surveillance of market activity required by the Commodity Exchange Act [3] and § 1.51 of the regulations thereunder.[4] Approximately a year after the Commission adopted § 1.35a–(T), the Commission deleted the one-minute timing requirement in § 1.35(g)(1) [5] and replaced it with a requirement that trades be recorded according to the time period in which they were executed, these time periods being no longer than 30 minutes each. In addition, § 1.35(g)(2), as amended, states that a contract market shall submit to the Commission such reports as requested by the Director of the Division of Trading and Markets concerning the accuracy of any information recorded on the contract market's trade register required by § 1.35(e),[6] which includes the time period in which each trade is executed.

[1] 17 CFR 1.35a–(T), 44 FR 71617 (December 12, 1979).

[2] 17 CFR 1.35(g) (1979).

[3] 7 U.S.C. 1 *et seq.*, (1976 and Supp. V 1981), *as amended by* the Futures Trading Act of 1982, Pub. L. No. 97–444, 96 Stat. 2294 (1983).

[4] 17 CFR 1.51 (1982).

[5] 45 FR 70753 (December 2, 1980).

[6] 17 CFR 1.35(e) (1982).

Section 1.35a–(T) was intended as a temporary regulation and, as a result of the Commission's amendment of § 1.35(g) (1) and (2), it has become obsolete. In consideration of the foregoing and pursuant to the authority in Section 8a(5) of the Commodity Exchange Act, 7 U.S.C. 12a(5) (1976), the Commission hereby revokes 17 CFR 1.35a–(T).

Issued in Washington, D.C. on May 5, 1983, by the Commission.

Jane K. Stuckey,

Secretary of the Commission.

Penicillin Antibiotic Drugs for Animal Use; Amoxicillin Trihydrate Tablets

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by A. H. Robins Co., Inc., and biocraft Laboratories, Inc., providing for oral use of amoxicillin trihydrate tablets for treating bacterial dermatitis and soft tissue infections in dogs.

EFFECTIVE DATE: May 10, 1983.

FOR FURTHER INFORMATION CONTACT: Sandra K. Woods, Bureau of veterinary Medicine (HFV–114), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3420.

SUPPLEMENTARY INFORMATION: A. H. Robins Co., Inc., 1405 Cummings Drive, P.O. Box 26609, Richmond, VA 23261, and Biocraft Laboratories, Inc., 92 Route 46, Elmwood Park, NJ 07407, jointly filed NADA 65–492 providing for oral use of amoxicillin trihydrate tablets (Robamox-V) for treating soft tissue infections (abscesses, wounds, and lacerations) and bacterial dermatitis in dogs.

The firms submitted data from dose-titration, subacute-toxicity, comparative-bioavailability, and clinical studies demonstrating the drug's safety and effectiveness. The NADA is approved, and the regulations are amended to reflect the approval.

Biocraft Laboratories, Inc., has not previously been included in the regulations in the list of sponsors of approved NADA's. The regulations are amended to include this sponsor.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects

21 CFR Part 510

Animal drugs, Labeling, Reporting and recordkeeping requirements.

21 CFR Part 540

Animal drugs, Antibiotics, Penicillin.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i) and (n), 82 Stat. 347, 350–351 (21 U.S.C. 360b (i) and (n))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), Parts 510 and 540 are amended as follows:

PART 510—NEW ANIMAL DRUGS

1. Part 510 is amended in § 510.600 by adding a new sponsor alphabetically to paragraph (c)(1) and numerically to paragraph (c)(2), to read as follows:

§ 510.600 Names, addresses, and drug labeler codes of sponsors of approved applications.

* * * * *

(c) * * *

(1) * * *

Firm name and address	Drug labeler code
* * * * *	
Biocraft Laboratories, Inc., 92 Route 46, Elmwood Park, NJ 07407	000332
* * * * *	

(2) * * *

Drug labeler code	Firm name and address
* * * * *	
000332	Biocraft Laboratories, Inc., 92 Route 46, Elmwood Park, NJ 07407.
* * * * *	

PART 540—PENICILLIN ANTIBIOTIC DRUGS FOR ANIMAL USE

2. Part 540 is amended by adding new § 540.103f, to read as follows:

§ 540.103f Amoxicillin trihydrate tablets.

(a) *Requirements for certification—(1) Standards of identity, strength, quality, and purity.* Amoxicillin trihydrate tablets are composed of amoxicillin trihydrate with or without one or more suitable and harmless lubricants, fillers, binder-disintegrants, and buffers. Each tablet contains amoxicillin trihydrate equivalent to 50, 100, 200, or 400 milligrams of amoxicillin. Its potency is satisfactory if it is not less than 90 percent and not more than 120 percent of the amount of amoxicillin that it is represented to contain. The moisture content is not more than 6 percent. Tablets disintegrate within 30 minutes. It passes the identity test. The amoxicillin trihydrate used conforms to the requirements of § 440.3(a)(1) of this chapter.

(2) *Labeling.* It shall be labeled in accordance with the requirements of paragraph (c) of this section and § 510.55 of this chapter, and in addition, this drug shall be labeled "amoxicillin tablets."

(3) *Requests for certification; samples.* In addition to complying with the requirements of § 514.50 of this chapter, each such request shall contain:

(i) Results of tests and assays on:

(*a*) The amoxicillin trihydrate used in making the batch for potency, safety, moisture, pH, amoxicillin content, concordance, crystallinity, and identity.

(*b*) The batch for potency, moisture, disintegration time, and identity.

(ii) Samples required.

(*a*) The amoxicillin trihydrate used in making the batch: 10 packages, each containing approximately 300 milligrams.

(*b*) The batch: A minimum of 36 tablets.

(b) *Tests and methods of assay—(1) Potency.* Assay for potency by either of the following methods; however, the results obtained from the iodometric assay shall be conclusive:

(i) *Microbiological agar diffusion assay.* Proceed as directed in § 436.105 of this chapter, preparing the sample for assay as follows: Place a representative

VOL 48 ISS 91 MY 10 1983 UMI

number of tablets into a high-speed blender jar containing sufficient 0.1*M* potassium phosphate buffer, pH 8.0 (solution 3), to give a stock solution of convenient concentration. Blend for 3 to 5 minutes. Remove an aliquot and further dilute with solution 3 to the reference concentration of 0.1 microgram of amoxicillin per milliliter (estimated).

(ii) *Iodometric assay.* Proceed as directed in § 436.204 of this chapter, preparing the sample as follows: Place a representative number of tablets in a high-speed glass blender jar and add sufficient distilled water to give a convenient concentration. Blend for 3 to 5 minutes. Further dilute an aliquot with distilled water to the prescribed concentration.

(2) *Moisture.* Proceed as directed in § 436.201 of this chapter.

(3) *Disintegration time.* Proceed as directed in § 436.212 of this chapter, using the procedure described in paragraph (e)(1) of that section.

(4) *Identity.* Proceed as directed in § 436.311 of this chapter, preparing the sample as follows: Using a mortar and pestle, grind a representative number of tablets into a fine powder. Dissolve an accurately weighed amount of this powder in 0.1*N* hydrochloric acid to give a solution containing 4 milligrams of amoxicillin per milliliter.

(c) *Conditions of marketing*—(1) *Specifications.* The drug conforms to the requirements of paragraph (a) of this section.

(2) *Sponsor.* See 000031 or 000332 in § 510.600(c) of this chapter.

(3) *Conditions of use*—(i) *Dogs—(a) Dosage:* 5 milligrams per pound of body weight twice a day.

(*b*) *Indications for use:* Treatment of bacterial dermatitis due to *Staphylococcus aureus, Streptococcus* spp., *Staphylococcus* supp., and *E. coli;* and soft tissue infections (abscesses, wounds, lacerations) due to *Staphylococcus aureus, Streptococcus* spp., *E. coli, Proteus mirabilis,* and *Staphylococcus* spp.

(*c*) *Limitations.* Use for 5 to 7 days for 48 hours after all symptoms have subsided. If no improvement is seen in 5 days, review diagnosis and change therapy. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

(ii) [Reserved]

Effective date. May 10, 1983.

(Sec. 512 (i) and (n), 82 Stat. 347, 350–351 (21 U.S.C. 360b (i) and (n)))

BILLING CODE 4160-01-M

---

21 CFR Part 558

New Animal Drugs for Use in Animal Feeds; Lincomycin

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed for Growmark, Inc., providing for use of a 50-gram-per-pound lincomycin premix in manufacturing a 20-gram-per-pound lincomycin premix. The intermediate premix is subsequently used in swine feeds for treatment and/or control of dysentery.

EFFECTIVE DATE: May 10, 1983.

FOR FURTHER INFORMATION CONTACT: Benjamin A. Puyot, Bureau of Veterinary Medicine (HFV–130), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–4913.

SUPPLEMENTARY INFORMATION: Growmark, Inc., 1701 Towanda Ave., Bloomington, IL 61701, is sponsor of NADA 133–832 filed in its behalf by the Upjohn Co. The NADA provides for use of a 50-gram-per-pound lincomycin premix in manufacturing a 20-gram-per-pound lincomycin intermediate premix for subsequent incorporation into complete swine feeds. The complete feeds are used for control and/or treatment of swine dysentery as provided in 21 CFR 558.325(f)(2). The basis of approval is discussed in the freedom of information (FOI) summary. The NADA is approved and the regulations are amended to reflect the approval.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The Bureau of Veterinary Medicine has determined pursuant to 21 CFR 25.24(d)(1)(i) (proposed December 11, 1979; 44 FR 71742) that this action is of a type that does not individually or cumulatively have a significant impact on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.83), § 558.325 is amended by adding new paragraph (b)(12) to read as follows:

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

§ 558.325 Lincomycin.

* * * * *

(b) * * *

(12) Premix level of 20 grams per pound has been granted to No. 020275 in § 510.600 of this chapter for use in paragraph (f)(2) (i), (ii) and (iii) of this section.

BILLING CODE 4160-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Part 8

[Docket No. R-83-528]

Nondiscrimination Based on Handicap in Federally-Assisted Programs and Activities of the Department of Housing and Urban Development; Correction

AGENCY: Office of the Secretary, HUD.

ACTION: Interim rule; correction.

SUMMARY: This document corrects the effective date contained in an interim rule implementing Section 504 of the Rehabilitation Act of 1973, as amended, which was published May 6, 1983 (48 FR 20638). The date listed on the regulation is an erroneous one.

DATES: Effective date: June 15, 1983.

Comments must be received by: August 4, 1983.

ADDRESS: Interested persons are invited to submit comments regarding this rule to the Office of General Counsel, Rules Docket Clerk, Room 10278, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. 20410. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection and copying during regular business hours at the above address.

FOR FURTHER INFORMATION CONTACT: John Putman, Special Advisor to Deputy Under Secretary for Intergovernmental Relations, Office of Housing, Office of Policy and Budget, Room 10184 at the above address, (202) 755–6732. A telecommunications device for deaf persons (TDD) is available at (202) 426–0016. These are not toll free numbers. This notice will be available on tape for persons with vision impairments in the Office of the Rules Docket Clerk shown above.

Accordingly, the effective date for 24 CFR Part 8, Nondiscrimination Based on Handicap in Federally-Assisted Programs and Activities of the Department of Housing and Urban Development, appearing on 20638 in the issue of May 6, 1983, is corrected to read as follows:

DATES: Effective date: June 15, 1983.

Comments must be received by August 4, 1983.

Dated: May 6, 1983.

Grady J. Norris,

Assistant General Counsel for Regulations.

BILLING CODE 4210-01-M

Office of the Assistant Secretary for Fair Housing and Equal Opportunity

24 CFR Part 108

[Docket No. R-83-701]

Compliance Procedures for Affirmative Fair Housing Marketing

AGENCY: Office of the Assistant Secretary for Fair Housing and Equal Opportunity, HUD.

ACTION: Technical amendment.

SUMMARY: This document amends 24 CFR Part 108 of HUD regulations to include OMB control numbers at the place where current information collection requirements are described.

EFFECTIVE DATE: May 10, 1983.

FOR FURTHER INFORMATION CONTACT: Sally Warner Watts, Regulations Division, Office of the General Counsel, (202) 755–7084. This is not a toll-free number.

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The information collection requirement contained in the regulatory section listed below has been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96–511) and assigned the control number listed. The requirement to notify HUD of the owner's intent to begin marketing, contained in § 108.15; is part of the owner's responsiblities in carrying out the Affirmative Fair Housing Marketing Plan, Form HUD–935.2.

Text of the Amendment

Following the text of § 108.15 of Title 24, add the following statement:

(Approved by the Office of Management and Budget under OMB Control Number 2535–0027)

Dated: May 2, 1983.

Grady J. Norris,

Assistant General Counsel for Regulations.

BILLING CODE 4210-28-M

PENNSYLVANIA AVENUE DEVELOPMENT CORPORATION

36 CFR Part 901

Bylaws of the Corporation

AGENCY: Pennsylvania Avenue Development Corporation.

ACTION: Final rule.

SUMMARY: The document published here in a revision of the Bylaws of the Pennsylvania Avenue Development Corporation ("PADC"). PADC was created by Act of Congress (Pennsylvania Avenue Development Corporation Act of 1972, 40 U.S.C. 871, *et seq.)* as a wholly-owned corporation of the United States Government, with authority to create and amend Bylaws to govern the manner in which it carries out its functions. (40 U.S.C. 875(5)).

The Corporation's Bylaws previously provided that eight voting members of the Board of Directors constitutes a quorum. In the past the Corporation on occasion has had difficulty obtaining a quorum which is necessary to transact the business of the Corporation, although it never has had to adjourn a meeting for want of such a quorum.

EFFECTIVE DATE: January 19, 1983.

FOR FURTHER INFORMATION CONTACT: Jonathan L. Kempner, General Counsel (202) 566–1078 or Mary Schneider Chyun, Attorney (202) 566–1078, Pennsylvania Avenue Development Corporation, 425 13th Street, NW., Washington, D.C. 20004.

SUPPLEMENTARY INFORMATION: To enhance the Board of Directors' ability to achieve the necessary quorum, the following two amendments to the Bylaws, both of which are consistent with a reasonable interpretation of the mandates of PADC's enabling statute, have been made:

- Provide that a quorum shall be a majority of voting members serving at the time the meeting is convened. Therefore, if for any reason there are two or three vacancies on the voting Board, a majority of seven would suffice as a quorum (and proportionately less if even more vacancies arose) rather than the eight that are presently required.
- Permit public voting members to designate two officials from their agencies, either of whom may serve on the Board in his/her stead. This would offer some protection from the situation where a Board member's primary alternate becomes unavailable without allowing sufficient time to secure a letter of appointment from the Board member for a new alternate.

The Corporation has determined that, since this document is not a rule and is published in the **Federal Register** and Code of Federal Regulations for information purposes only, it is not a "major rule," and thus does not require a regulatory impact analysis under Executive Order 12291, "Federal Regulations." (46 FR 13193, February 19, 1981). It will not result in any of the effects described in Section 1(b) of the Executive Order. In addition, the Chairman of the Corporation's Board of Directors has determined, and hereby certifies, that this document will not have a significant economic impact on a substantial number of small entities and does not require a regulatory flexibility analysis under the Regulatory Flexibility Act (Pub. L. 96–354, September 19, 1980, 5 U.S.C. 603, 604 and 605).

List of Subjects in 36 CFR Part 901

Bylaws.

For the reasons set out in the preamble, Part 901, Chapter IX of Title 36, Code of Federal Regulations, is amended as set forth below.

PART 901—BYLAWS OF THE CORPORATION

36 CFR Part 901 is amended by removing the present language of §§ 901.3(d) and 901.3(e), and inserting in lieu thereof the following language:

§ 901.3 [Amended]

* * * * *

(d) *Quorum.* The presence of a majority of the number of voting Directors serving at the time of a

VOL 48 ISS 91 MAY 10 1983 UMI

meeting of the Board shall constitute a quorum for the transaction of business at such meeting of the Board. The act of a majority of the voting Directors at any meeting at which there is a quorum shall be an act of the Board of Directors. If there shall be less than a quorum at any meeting, a majority of the voting Directors present may adjourn the meeting until such time as a quorum can practically and reasonably be obtained.

(e) *Directors Serving in Stead.* Each member of the Board of Directors specified in paragraphs (1) through (7) of subsection 3(c) of the Act, if unable to serve in person, may designate up to two officials from his agency or department to serve on the Board in his stead. Such designation shall be effected by a letter of appointment, from the Director specified in the Act, received by the Chairman prior to or at a meeting of the Board of Directors. If two officials are so designated, then the Director specified in the Act shall identify one as the First Designee and the other as the Second Designee. The Second Designee may only serve as Director if the First Designee is not in attendance at a meeting of the Board of Directors. An official designated to serve in stead shall serve as the voting Director of the represented agency until the Chairman receives written notice from the Director specified in the Act, or his successor, that the designation is rescinded.

Dated: April 23, 1983.

Henry A. Berliner, Jr.,

Chairman.

[FR Doc. 83-12333 Filed 5-9-83; 8:45 am]

BILLING CODE 7536-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

41 CFR Part 3-3

Selection of Offerors for Negotiation and Award

AGENCY: Department of Health and Human Services.

ACTION: Final rule.

SUMMARY: The Office of the Secretary, Department of Health and Human Services is amending its procurement regulations by revising an existing subpart on the selection of offerors for negotiation and award. The regulations clarify and simplify the source selection process and will result in reduced administrative burden. This revision is also consistent with Executive Order 12352 of March 17, 1982 on Federal Procurement Reforms.

EFFECTIVE DATE: May 10, 1983.

FOR FURTHER INFORMATION CONTACT: Norman Audi, Division of Procurement Policy, (202-245-6154).

SUPPLEMENTARY INFORMATION: On January 14, 1983, the proposed rule on the selection of offerors for negotiation and award was published in the **Federal Register** (48 FR 1774) and invited public comments by February 14, 1983. As a result, three responses were received—one from a nonprofit organization, another from an educational association, and the third from an agency within the Department.

The agency within the Department suggested that we expand § 3-3.5107-6(b) to provide a more detailed explanation of the peer review requirements. We concur and have revised the section accordingly.

The nonprofit organization was concerned with the usage of average ratings as stated in § 3-3.5108-4. They did not believe that the use of an average score would adequately reflect disparities of scores between individual evaluators. Further, they believed that raw scoring allows evaluators to see the picture more accurately. Their rationale included using passing scores and comparing the average rating and total points to the passing scores. We do not agree with the comments. Passing scores or predetermined cutoff scores are prohibited and are not to be employed (§ 3-3.5108-4). Further, § 3-3.5108-5 requires that a copy of each rating sheet be included in the technical evaluation report. Therefore the disparities between individual evaluators are not lost when the technical evaluation panel collectively ranks the proposals. Finally, we do not limit rating and ranking to the method set forth in § 3-3.5108-4. The method we include is the one which is generally used; however, the original rating plan may employ a different method.

The educational association was concerned that subparagraph (b) of § 3-3.5110 of the existing regulation had been deleted. This subparagraph emphasized the importance of scientific competence in the selection of a contractor to perform a research and development contract. We concur and have revised § 3-3.5515, Source selection decision, to include part of the language in the former regulation and to add additional language which the association recommended.

This rule will not have any significant economic impact on a substantial number of small entities as described in the Regulatory Flexibility Act (Pub. L. 96-3545, U.S.C. 601, et. seq.)

List of Subjects in 41 CFR Part 3-3

Government procurement.

This is not a major rule as defined by Executive Order 12291 of February 17, 1981.

The provisions of this amendment are issued under 5 U.S.C. 301, 40 U.S.C. 486(c).

Title 41 CFR Chapter 3 is amended as set forth below.

Dated: May 3, 1983.

Henry G. Kirschenmann, Jr.,

Deputy Assistant Secretary for Procurement, Assistance, and Logistics.

Under Part 3-3, it is proposed to revise Subpart 3-3.51 to read as follows:

PART 3-3—PROCUREMENT BY NEGOTIATION

* * * * *

Subpart 3-3.51—Selection of Offerors for Negotiation and Award

3-3.5118 Notification and debriefing of unsuccessful offerors.
3-3.5119 Post-award orientation of contractors.

* * * * *

§ 3-3.5100 Scope of subpart.

This subpart establishes policies and procedures concerning the source selection process for the procurement of personal property and nonpersonal services. It elaborates on the guidance provided in § 1-3.805.

§ 3-3.5101 Definitions.

(a) "Clarification," as used in this subpart, means communication with an offeror for the sole purpose of eliminating minor irregularities, informalities, or apparent clerical mistakes in the offeror's proposal. It is achieved by explanation or substantiation, either in response to contracting officer inquiry or as initiated by the offeror. Unlike discussion, clarification does not give the offeror an opportunity to revise or modify its proposal.

(b) "Deficiency," as used in this subpart, means any part of a proposal that fails to satisfy the requirements of the Department.

(c) "Discussion," as used in this subpart, means any oral or written communication between the contracting officer and an offeror that involves information essential for determining the acceptability of a proposal as submitted or provides the offeror an opportunity to revise or modify its proposal.

§ 3-3.5102 Applicability.

This subpart applies to all competitively negotiated procurements in excess of $10,000 except for:

(a) Architect-engineer services (see §§ 1-4.10 and 3-4.10); and

(b) Contracts to be awarded to the Small Business Administration pursuant to section 8(a) of the Small Business Act (see §§ 1-7.713 and 3-1.713).

§ 3-3.5103 Integrity of the source selection process.

(a) The source selection process shall be conducted in accordance with standards and procedures that:

(1) Insure fair and impartial treatment of all offerors; and

(2) Insure the selection of sources whose performance is expected to best meet the requirements or objectives of the request for proposals at a reasonable price or cost.

(b) Personnel participating in the evaluation process must not discuss or reveal information concerning the evaluations except to an individual participating in the same evaluation proceedings, and then only to the extent that the information is required in connection with the proceedings. Divulging information during the evaluation, selection, and negotiation phases of the procurement to offerors or to personnel not having a need to know could jeopardize the resultant award. Therefore, the contracting officer must instruct personnel participating in the evaluations to observe these restrictions and assure that all personnel understand that unauthorized disclosure of information, no matter how innocent, could compromise the procurement process and is prohibited (see § 1-3.805-1(b)).

(c) Discussions with offerors relative to any aspect of the procurement shall be conducted only by the contracting officer or his/her authorized representative within the contracting office.

§ 3-3.5104 Technical evaluation plan.

(a) A technical evaluation plan may be required by the contracting officer, at his/her discretion, when a procurement is sufficiently complex as to warrant a formal plan.

(b) The technical evaluation plan should include at least the following:

(1) A list of technical evaluation panel members, their organizations as well as a list of their major consulting clients (if applicable), their qualifications, and curricula vitae (if available);

(2) A justification for using non-Government technical evaluation panel members (justification is not required if non-Government evaluators will be used in accordance with standard procuring activity procedures or policies);

(3) A statement that there is no apparent or actual conflict of interest regarding any panel member;

(4) A copy of each rating sheet, approved by the contracting officer, to be used to assure consistency with the evaluation criteria; and

(5) A brief description of the general evaluation approach.

(c) The technical evaluation plan must be signed by an official within the program office in a position at least one level above the project officer or in accordance with procuring activity procedures.

(d) The technical evaluation plan should be submitted to the contracting officer for review and approval before the solicitation is issued. The contracting officer shall make sure that the principal factors relating to the evaluation are reflected in the evaluation criteria when conducting the review of the plan.

§ 3-3.5105 Changes in Government requirements.

(a) When, either before or after receipt of proposals, the Government changes, relaxes, increases, or otherwise modifies its requirements, the contracting officer shall issue a written amendment to the solicitation. However, when time is of the essence, oral advice of changes may be given if the changes involved are not complex and all firms to be notified (see paragraph (b), below) are notified as near to the same time as possible. The contracting officer shall make a record of the oral advice and promptly confirm the oral advice by a written amendment to the solicitation.

(b) In deciding which firms to notify of a change, the contracting officer shall consider the stage in the procurement cycle at which the change occurs and the magnitude of the change, as follows:

(1) If proposals are not yet due, the amendment shall be sent to all firms that have received a solicitation.

(2) If the time for receipt of proposals has passed but proposals have not yet been evaluated, the amendment shall be sent only to the responding offerors.

(3) If the competitive range has been established, only those offerors within the competitive range shall be sent the amendment.

(4) If a change is so substantial that it warrants complete revision of a solicitation, the contracting officer shall cancel the original solicitation and issue a new one, regardless of the stage of the procurement. The new solicitation shall be synopsized and issued to all firms originally solicited as well as to any firms added to the original list.

(c) If the proposal considered to be most advantageous to the Government involves a departure from the stated requirements, the contracting officer shall provide all offerors an opportunity to submit new or amended proposals on the basis of the revised requirements; *provided,* that this can be done without revealing to the other offerors the solution proposed in the original departure or any other information that is entitled to protection.

(d) The decision to issue an amendment, or cancel and reissue a solicitation, is the responsibility of the contracting officer.

§ 3-3.5106 Standard for evaluation of proposals.

The evaluation criteria included in the solicitation serve as the standard against which all proposals are evaluated. Prospective offerors rely upon the evaluation criteria in the solicitation in developing proposals and they must be assured that the evaluation is conducted in accordance with those criteria. All personnel involved in the evaluation process must make sure that the evaluation criteria contained in the solicitation are the *only* criteria used in conducting the evaluation. See §§ 3-3.5503(f) and 3-3.5511 for detailed guidance on evaluation criteria.

VOL 48 ISS 91 MY 10 1983 UMI

§ 3-3.5107 Technical evaluation panel.

§ 3-3.5107-1 General.

(a) A technical evaluation panel is required for all procurements applicable to this subpart which are expected to exceed $250,000. The contracting officer, at his/her discretion, may require a technical evaluation panel for procurements not exceeding $250,000 based on the complexity of the procurement.

(b) The technical evaluation process requires careful and deliberate consideration as to the size, composition, expertise, and function of the technical evaluation panel (see § 3-3.5005(b)(14)). The efforts of the panel can result in success or failure of the procurement.

§ 3-3.5107-2 Role of the project officer.

(a) The project officer is the contracting officer's technical representative for the procurement action. The project officer may be a voting member of the technical evaluation panel and may also serve as the chairperson of the panel unless he/she is prohibited by law or procuring activity procedures from serving on the panel.

(b) The project officer is responsible for recommending panel members who are knowledgeable of the technical aspects of the procurement and who are competent to identify strengths and weaknesses of the various proposals. The program training requirements specified in § 3-1.454 must be adhered to when selecting prospective panel members.

(c) The project officer should make efforts to ensure that persons possessing expertise and experience in addressing issues relative to sex, race, national origin, and handicapped discrimination be included as panel members in procurements which address those issues. The intent is to balance the composition of the panel so that qualified and concerned individuals may provide insight to other panel members regarding ideas and approaches to be taken in the evaluation of proposals.

(d) The project officer is to submit the recommended list of panel members to an official within the program office in a position at least one level above the project officer or in accordance with procuring activity procedures. This official will review the recommendations, appoint the panel members and select the chairperson.

(e) It is the responsibility of the project officer to arrange for adequate and secure working space for the panel.

§ 3-3.5107-3 Role of the contracting officer.

(a) The contracting officer is the Department's official representative having delegated procurement authority to enter into and administer contracts. The term "contracting officer," as used in this subpart, may be the contracting officer or his/her designated representative within the contracting office.

(b) The contracting officer shall not serve as a member of the technical evaluation panel but should be available to:

(1) Address the initial meeting of the technical evaluation panel (see § 3-3.5106-2);

(2) Provide assistance to the evaluators as required; and

(3) Assure that the scores adequately reflect the written technical evaluation report comments (see § 3-3.5108-5).

§ 3-3.5107-4 Conflicts of interest.

(a) If a panel member has an apparent or real conflict of interest related to a proposal under evaluation, he/she shall not serve on the technical evaluation panel and shall be replaced with another evaluator. If a suitable replacement is not available, the panel shall perform the review with one less evaluator.

(b) For the purpose of this subpart, conflicts of interest are defined in the Department's Standards of Conduct set forth in 45 CFR Part 73 which incorporates 5 CFR Part 737, Post Employment Conflict of Interest. The Standards of Conduct shall be applicable to both in-house personnel and outside evaluators serving on the technical evaluation panel.

§ 3-3.5107-5 Continuity of evaluation process.

(a) The technical evaluation panel is responsible for evaluating the original proposals, making recommendations to the chairperson regarding clarifications and deficiencies of proposals, and, if required by the contracting officer, assisting the contracting officer during discussions and negotiations, and reviewing supplemental, revised and/or "best and final" offers. To the extent possible, the same evaluators should be available throughout the entire evaluation and selection process to assure continuity and consistency in the treatment of proposals. However, the following are some examples of circumstances when it would not be necessary for the technical evaluation panel to evaluate any revised proposals submitted during the procurement:

(1) The answers to the questions do not have a substantial impact on the proposal (see 3-3.5111(a));

(2) The "best and final" offers are not materially different from the original proposals; or

(3) The rankings of the offerors are not affected because the revisions to the proposals are relatively minor.

(b) The chairperson, with the concurrence of the contracting officer, may decide not to have the panel evaluate the revised proposals. Whenever this decision is made, it must be fully documented by the chairperson and approved by the contracting officer.

(c) When technical evaluation panel meetings are considered necessary by the contracting officer, the attendance of evaluators is mandatory. When the chairperson determines that an evaluator's failure to attend the meetings is prejudicial to the evaluation, the chairperson may replace the individual after discussing the situation with the contracting officer and obtaining his/her concurrence and the approval of the program official responsible for appointing the panel members (see § 3-3.5107-2(d)).

(d) Whenever continuity of the evaluation process is not possible, and either new evaluators are selected or a reduced panel is decided upon, each proposal which is being reviewed at any stage of the procurement should be reviewed at that stage by all members of the revised panel unless it is impractical to do so because of the receipt of an unusually large number of proposals.

§ 3-3.5107-6 Use of outside evaluators.

(a) The technical evaluation panel shall be composed of Government employees except that outside evaluators may be used when expertise is required which is not available within the Government, or as required by law (see § 3-1.353(f)).

(b) The National Institutes of Health (NIH) and the Alcohol, Drug Abuse, and Mental Health Administration (ADAMHA) are required to have a peer review of research and development contracts in accordance with Public Law (Pub. L.) 93-352 as amended by Pub. L. 94-63; 42 U.S.C. 289 *l*-4. This legislation requires peer review of projects and proposals, and not more than one-fourth of the members of a peer review group may be officers or employees of the United States. NIH and ADAMHA are therefore exempt from the provisions of § 3-3.5107 to the extent that 42 U.S.C. 289 *l*-4 applies.

§ 3-3.5108 Evaluation of technical proposals.

§ 3-3.5108-1 Receipt of proposals.

(a) After the closing date set by the solicitation for the receipt of proposals, the contracting officer will forward the technical proposals to the project officer or chairperson for evaluation by means of a transmittal memorandum. The business proposals will be retained by the contracting officer for evaluation (see § 3-3.5109).

(b) The transmittal memorandum to the chairperson should include at least the following:

(1) A list, by name, of the organizations submitting proposals;

(2) A reference to § 3-3.5103 on the need to preserve the integrity of the source selection process;

(3) A requirement for a technical evaluation report in accordance with § 3-3.5108-5; and

(4) The establishment of a date for receipt of the technical evaluation report.

§ 3-3.5108-2 Convening the technical evaluation panel.

(a) Normally the technical evaluation panel will convene to evaluate the proposals. However, there may be situations when the contracting officer determines it is not feasible or practicable for the panel to convene. Whenever this decision is made, care must be taken to assure that the technical review is closely monitored to produce acceptable results. The procedures for handling and disclosing proposals outside the Government for evaluation purposes is set forth in § 3-1.353(e).

(b) When a panel is convened, the chairperson is responsible for the control of the technical proposals provided to him/her by the contracting officer for use during the evaluation process. The chairperson will generally distribute the technical proposals at the initial panel meeting and will establish procedures for securing the proposals whenever they are not being evaluated to insure the confidentiality of the proposals. After the evaluation is complete, all proposals must be accounted for by returning to the contracting officer, destruction, or filing in an appropriate manner to maintain the confidential nature of the data.

(c) The contracting officer should address the initial meeting of the panel and state the basic groundrules for conducting the evaluation. The contracting officer shall provide written guidance to the panel if he/she is unable to attend the initial panel meeting. The guidance should include:

(1) Explanation of conflicts of interest (see § 3-3.5107-4);

(2) The necessity to re-read and understand the solicitation especially the statement of work and evaluation criteria, prior to reading the proposals;

(3) The need for evaluators to restrict the review to only the solicitation and the contents of the technical proposals;

(4) The need for each evaluator to review all the proposals;

(5) The need to watch for ambiguities, inconsistencies, errors, and deficiencies which should be surfaced during the evaluation process;

(6) An explanation of the evaluation process and what will be expected of the evaluators throughout the process;

(7) The need for the evaluators to be aware of the requirement to have complete written documentation of the individual strengths and weaknesses which affect the scoring of the proposals; and

(8) An instruction directing the evaluators that, until the award is made, information concerning the procurement must not be disclosed to any person not directly involved in the evaluation process.

§ 3-3.5108-3 Clarifications.

Normally, clarifications of proposals can be made when discussions are conducted with all offerors in the competitive range. However, there are instances when the contracting officer may find it necessary to make inquiry of an offeror for the sole purpose of eliminating minor irregularities, informalities, or apparent clerical mistakes in the proposal. The contracting officer shall assure that the clarifications are in writing. Such inquiry of and clarification furnished in writing by such offeror shall not be considered to constitute "discussions" within the meaning of § 3-3.5101(c) and shall not necessitate any inquiry of other offerors. However, if clarification results in an offeror revising its proposal or would in any way prejudice the interest of other offerors, the information should be returned to the offeror without being evaluated or discussions should be conducted with all offerors which have not been eliminated from the competition.

§ 3-3.5108-4 Rating and ranking of proposals.

The evaluators will individually read each proposal and describe tentative strengths, weaknesses and develop preliminary scores in relation to each evaluation criterion set forth in the solicitation. The evaluators will use the rating sheets either in the technical evaluation plan or approved by the contracting officer when a technical evaluation plan is not required. (See § 3-3.5104(b). After this has been accomplished, the evaluators should discuss in detail the individual strengths and weaknesses described by each evaluator and, if possible, arrive at a common understanding of the major strengths and weaknesses and the potential for correcting each offeror's weakness(es). Each evaluator will individually rate (score) each proposal, and then the technical evaluation panel will collectively rank the proposals. Generally, but depending on the rating plan employed, ranking will be accomplished by totaling the numerical scores assigned by each evaluator to the evaluation criteria and developing an average rating for each offeror. The evaluators should then identify each proposal as either acceptable or unacceptable. Predetermined cutoff scores shall not be employed.

§ 3-3.5108-5 Technical evaluation report.

A technical evaluation report shall be prepared and furnished to the contracting officer by the chairperson and maintained as a permanent record in the contract file. The report must reflect the ranking of the proposals and identify each proposal as acceptable or unacceptable in accordance with § 3-3.5108-4. The report must also include a narrative evaluation specifying the strengths and weaknesses of each proposal, a copy of each rating sheet, and any reservations, qualifications, or areas to be addressed that might bear upon the selection of sources for negotiation and award. Concrete technical reasons supporting a determination of unacceptability with regard to any proposal must be included. The report should also include specific points and questions which are to be raised in discussions or negotiations.

§ 3-3.5109 Evaluation of business proposals.

(a) Concurrently with the evaluation of the technical proposals, the contracting officer shall begin the evaluation of the business proposals. The contracting officer must adhere to the requirements for cost or price analysis included in §§ 1-3.807 and 3-3.807.2 for each business proposal in the competitive range. An audit report may be required in accordance with §§ 1-3.809 and 3-3.809. The contracting officer must exercise judgment in determining the extent of analysis in each case depending on the amount of the proposal, the technical complexity and related cost or price, and cost

VOL 48 ISS 91 MY 10 1983 UMI

realism. The contracting officer should request the project officer to analyze such items as: the number of labor hours proposed for various labor categories; the mix of labor hours and categories of labor in relation to the technical requirements of the project; the kinds and quantities of material, equipment, and supplies; types, numbers, and hours/days of proposed consultants; logic of proposed subcontracting; analysis of the travel proposed including number of trips, locations, purpose, and travelers; and kinds and quantities of data processing. The project officer shall provide his/her opinion as to whether these elements are necessary and reasonable for efficient contract performance. Exceptions to proposed elements shall be supported by adequate rationale to allow for effective negotiations. The contracting officer should also request the assistance of a cost/price analyst when considered necessary. In all cases, the negotiation memorandum (see § 3–50.3) must include the rationale used in determining that the price or cost is fair and reasonable.

(b) The contracting officer must appraise the management capability of the offeror to perform the required work in a timely manner. In making this appraisal, the contracting officer should consider factors such as the offeror's management organization, past performance, reputation for reliability, availability of the required facilities, and cost controls. This information is to be used by the contracting officer to determine the offeror's responsibility.

§ 3–3.5110 Competitive range.

(a) The contracting officer shall determine which proposals are in the competitive range for the purpose of conducting written or oral discussions. The competitive range shall be determined on the basis of price or cost, technical and other salient factors that were stated in the solicitation and shall include all proposals which have a reasonable chance of being selected for award. A proposal must be included in the competitive range unless there is no real possibility that it can be improved to the point where it becomes the *most* acceptable. When there is a reasonable doubt as to whether a proposal should be included in the competitive range, the proposal shall be included.

(b) In certain circumstances, when deciding which proposals should be included in the competitive range, the contracting officer may request that the technical evaluation panel review the cost or price data. Typical situations which may necessitate this review include a suspected "buy-in," large differences in cost or price among the proposals, proposals receiving high technical ratings which have relatively high costs, and proposals receiving low technical ratings which have relatively low costs. The resultant comparison of cost or price to technical factors and the determination of cost or price realism should assist the contracting officer in deciding which proposals are to be included in the competitive range.

(c) All determinations regarding the inclusion or exclusion of proposals in the competitive range must be completely documented, including the salient reasons for the determinations, and set forth in the negotiation memorandum (see § 3–50.301(i)).

(d) Some of the factors which the contracting officer should consider in determining the competitive range are:

(1) The relative importance of cost or price as compared to technical factors in accordance with the solicitation provisions required in § 3–3.5511–4(c).

(2) The susceptibility of significantly reducing a proposal with an unreasonably high price or cost without undermining the technical merit if the offeror otherwise has a reasonable chance to receive an award; and

(3) The likelihood of reducing cost or price of a proposal which exceeds the Government's requirements.

(e) The contracting officer shall conduct a thorough review of the technical evaluation report to be assured that:

(1) All determinations of unacceptability are supported by concrete and comprehensive statements that are factual and convincing and are consistent with the evaluation criteria set forth in the solicitation. Every statement should be reviewed carefully to eliminate any doubts as to the unacceptability of a proposal;

(2) All recommendations to exclude proposals from the competitive range are supported by persuasive rationale and sufficient facts to substantiate a judgment that meaningful discussions are not possible or there is no reasonable chance of the proposal being selected for award;

(3) Those cases where only one organization is found to be technically acceptable are fully scrutinized; and

(4) Unacceptable proposals contain "information" deficiencies which are so material as to preclude any possibility of upgrading the proposal to a competitive level except through major revisions and additions which would be tantamount to the submission of another proposal.

§ 3–3.5111 Preparation for discussions.

(a) The contracting officer and project officer should discuss the uncertainties and/or deficiencies that are included in the technical evaluation report for each proposal in the competitive range. Technical questions should be developed by the project officer and/or the technical evaluation panel and should be included in the technical evaluation report. The management and cost or price questions should be prepared by the contracting officer with assistance from the project officer and/or panel as required. The method of requesting offerors in the competitive range to submit the additional information will vary depending on the complexity of the questions, the extent of additional information requested, the time needed to analyze the responses, and the time frame for making the award. However, to the extent practicable, all questions and answers should be in writing. Each offeror in the competitive range shall be given an equitable period of time for preparation of responses to questions to the extent practicable.

(b) The questions should be developed so as to disclose the ambiguities, uncertainties, and deficiencies of the offeror (see § 3–3.5112(b)(2)).

§ 3–3.5112 Written or oral discussions.

(a) The contracting officer, with the support of personnel who evaluated the technical proposals, and, if necessary, cost analysts, attorneys, etc., must conduct written or oral discussions with all offerors within the competitive range, except that this requirement need not apply to the exceptions in § 1–3.805–1(a). The content and extent of the discussions is a matter of the contracting officer's judgment, based on the particular facts of each procurement.

(b) The contracting officer shall:

(1) Control all discussions;

(2) Advise the offeror of deficiencies in its proposal so that the offeror is given an opportunity to satisfy fully the Government's requirements;

(3) Attempt to resolve any uncertainties concerning the technical proposal and other terms and conditions of the proposal;

(4) Resolve any suspected mistakes by calling them to the offeror's attention as specifically as possible without disclosing information concerning other offerors' proposals or the evaluation process; and

(5) Provide the offeror a reasonable opportunity to submit any cost or price, technical, or other revisions to its proposal that may result from the discussions.

(c) The contracting officer and other Government personnel shall not engage in the following:

(1) Technical leveling (i.e., helping any offeror to bring its proposal up to the level of other proposals through successive rounds of discussion by pointing out weaknesses resulting from the offeror's lack of diligence, competence, or inventiveness in preparing the proposal);

(2) Technical transfusion (i.e., Government disclosure of technical information pertaining to a proposal that results in improvement of a competing proposal); or

(3) Auction techniques, such as the following:

(i) Indicating to an offeror a price that it must meet to obtain further consideration;

(ii) Advising an offeror of its price standing relative to another offeror (however, it is permissible to inform an offeror that its price is considered by the Government to be too high or too low); and

(iii) Otherwise furnishing information about other offerors' prices.

(d) Careful judgment must be exercised in determining the extent of discussions. In some cases, more than one round of discussions with all the offerors within the competitive range may be required. The time available, the expense and administrative limitations, and the complexity, size, and significance of the procurement should all be considered in deciding on the type, duration, and depth of the discussions.

§ 3–3.5113 Request for best and final offers.

At the conclusion of discussions with all offerors in the competitive range a final, common cutoff date, which allows a reasonable opportunity for submission of written "best and final" offers must be established and all offerors in the competitive range so notified. If oral notification is given, it must be confirmed in writing. The written notification must include the following information:

(a) Discussions have been concluded;

(b) Offerors are being given an opportunity to submit a "best and final" offer;

(c) The offer is subject to both the "Late Proposals, Modifications of Proposals, and Withdrawals of Proposals" provision of the solicitation, and the requirements of § 1–3.805–1(b);

(d) Any "best and final" offers received after the time and date established for receipt of offers shall be handled in accordance with §§ 1–3.802–1 and 1–3.802–2, as applicable;

(e) The confirmation of a prior offer should be specifically stated as a final offer; and

(f) All revisions to former offers should be submitted on Optional Form 59, Contract Pricing Proposal, or Optional Form 60, Contract Pricing Proposal (Research and Development), as applicable, and should be fully documented.

§ 3–3.5114 Evaluation of best and final offers.

"Best and final" offers are subject to a final evaluation of price or cost and other salient factors by the contracting officer and project officer with assistance from a cost/price analyst, and an evaluation of technical factors by the technical evaluation panel, as necessary. Proposals may be technically rescored and reranked by the technical evaluation panel and a technical evaluation report prepared. To the extent practicable, the evaluation shall be performed by the same evaluators who reviewed the original proposals.

§ 3–3.5115 Source selection decision.

(a) After the close of discussions and evaluation of "best and final" offers, the contracting officer will select for award the offeror whose proposal offers the greatest advantage to the Government, price and other factors considered and/or in accordance with the evaluation criteria set forth in the solicitation.

(b) Of particular importance in the award of research or development contracts, including those with educational institutions, is the competence of key personnel in the specific field of science or technology involved, as reflected in the proposal. However, awards should be made for research and development capabilities that exceed those needed for the successful performance of the particular project.

§ 3–3.5116 Negotiation with the selected source.

(a) After selection of the successful proposal, a limited negotiation with the selected offeror may be conducted if deemed necessary. However, no factor which could have any effect on the selection process may be introduced into the negotiation after the common cutoff date for receipt of best and final offers. The negotiation shall not in any way prejudice the competitive interests or right of the unsuccessful offerors. Negotiaton with the selected offeror shall be restricted to definitizing the final agreement on terms and conditions; e.g., assuming none of these factors were involved in the selection process, negotiation could include such topics as payment provisions, patent rights, rights in data, property provisions, labor rates, indirect cost rates, and fees. Prior to conducting the limited negotiation, the contracting officer shall approve a written determination citing both the specific issues to be discussed and the rationale showing that the negotiations shall not have any effect on the selection process.

(b) Caution must be exercised by the contracting officer to insure that the negotiation is not used to change the requirement contained in the solicitation, nor to make any other changes which would impact on the source selection decision. Whenever a material change occurs in the requirements as a result of the negotiation, the competition must be reopened and all offerors submitting "best and final" offers must be given an opportunity to resubmit proposals based on the revised requirements. Whenever there is a question as to whether a change is material, the contracting officer should obtain the advice of technical personnel and legal counsel before reopening the competition. Significant changes in the offeror's cost proposal may also necessitate a reopening of competition if such changes alter the factors involved in the original selection process.

(c) Should negotiations beyond those specified in (a) above be required for any reason, discussions must be reopened with all offerors submitting "best and final" offers.

(d) Upon completion of the negotiation, the contracting officer should obtain a confirmation letter from the successful offeror which includes any revisions to the technical proposal, the agreed to price or cost, and, as applicable, a certificate of current cost or pricing data.

§ 3–3.5117 Post negotiation, contract preparation, and award.

(a) The contracting officer must perform the following actions after negotiations have been completed:

(1) Prepare the negotiation memorandum in accordance with Subpart 3–50.3;

(2) Prepare the contract containing all agreed to terms and conditions and clauses required by law or regulation;

(3) Include in the contract file the pertinent documents referenced in § 3–1.313–51; and

(4) Obtain the appropriate approval of proposed contract awards in accordance with Subpart 3–50.1 and procuring activity procedures.

(b) After receiving the required approvals, the contract should be

VOL 48 ISS 91 MY 10 1983 UMI

transmitted to the prospective contractor for signature. The prospective contractor must be informed that the contract is not effective until accepted by the contracting officer.

(c) The contract shall not be issued until the finance office certifies that the funds are available for obligation.

§ 3-3.5118 Notification and debriefing of unsuccessful offerors.

Unsuccessful offerors will be notified, and debriefed at their request, in accordance with §3-3.103.

§ 3-3.5119 Post-award orientation of contractors.

FPR Subpart 1-1.18 prescribes policies and procedures regarding the postaward orientation of contractors. To the extent practicable, contracting officers should utilize letters to accomplish postaward orientation objectives (see § 1-1.1806). A postaward orientation conference should be arranged only when letters cannot resolve key issues.

[FR Doc. 83-12448 Filed 5-9-83; 8:45 am]
BILLING CODE 4110-12-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6518]

List of Communities Eligible for the Sale of Insurance Under the National Flood Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain flood plain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The date listed in the fourth column of the table.

ADDRESSES: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 3429, Bethesda, Maryland 20034, Phone: (800) 638-8620.

FOR FURTHER INFORMATION CONTACT: Mr. Richard E. Sanderson, Chief, Natural Hazards Division, (202) 287-0270, 500 C Street Southwest, Donohoe Building, Room 505, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local flood plain management measures aimed at protecting lives and new constuction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Director of the Federal Emergency Management Agency has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Director finds that delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance." This program is subject to procedures set out in OMB Circular A-95.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, State and Local Programs and Support, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice stating the community's status in the NFIP and imposes no new requirements or regulations on participating communities.

List of Subjects in 44 CFR Part 64

Flood insurance, Flood plains.

Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

§ 64.6 List of eligible communities.

State and County	Location	Community No.	Effective dates of authorization/cancellation of sale of flood insurance in community	Special flood hazard area identified
North Dakota:				
Traill	Garfield, township of	380669-New	April 5, 1983, emergency	
Richland	Liberty Grove, township of	380665	...do	
Bottineau	Newborg, township of	380668-New	...do	
Traill	Norman, township of	380670-New	...do	
Colorado: Weld	Erie, town of	080181	July 22, 1975, emergency; Oct. 17, 1978, regular; Jan. 17, 1979, suspended; April 5, 1983, reinstated.	June 28, 1974 and Nov. 28, 1975.
Minnesota: Aitkin	Unincorporated areas	270628B	Apr. 23, 1974, emergency; Mar. 15, 1982, regular; Mar 15, 1982, suspended; Apr. 6, 1983, reinstated.	Dec. 30, 1977.
Idaho: Teton	...do	160230A	Apr. 8, 1983, emergency	Sept. 13, 1977.
Maine: Washington	East Machias, town of	230813	Apr. 8, 1983, emergency	Feb. 11, 1977.
Michigan: Kent	Cannon, township of	260734-New	...do	
Texas: Donley	Clarendon, city of	481584-New	...do

State and County	Location	Community No.	Effective dates of authorization/cancellation of sale of flood insurance in community	Special flood hazard area identified
Sussex	Newton, town of	3404538	do.	Apr. 12, 1974 and June 4, 1976.

(National Flood Insurance Act of 1968 (title XIII of the Housing and Urban Development Act of 1968); effective Jan. 28, 1969 (33 FR 17804, Nov. 28, 1968), as amended, 42 U.S.C. 4001–4128; Executive Order 12127, 44 FR 19367; and delegation of authority to the Associate Director, State and Local Programs and Support)

Issued: May 1, 1983.

Dave McLoughlin,

Deputy Associate Director, State and Local Programs and Support.

[FR Doc. 83-12315 Filed 5-9-83; 8:45 am]

BILLING CODE 6718-03-M

44 CFR Part 67

National Flood Insurance Program; Final Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are finalized for the communities listed below.

The base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM) showing base (100-year) flood elevations, for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated on the table below.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, National Flood Insurance Program, Federal Emergency Management Agency, Washington, D.C. 20472, (202) 287–0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of flood elevations for each community listed. Proposed base flood elevations or proposed modified base flood elevations have been published in the **Federal Register** for each community listed.

This final rule is issued in accordance with Section 110 of the Flood Disaster Protection Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90–448)), 42 U.S.C. 4001–4128, and 44 CFR Part 67. An opportunity for the community or individuals to appeal proposed determinations to or through the community for a period of ninety (90) days has been provided.

The Agency has developed criteria for flood plain management in flood-prone areas in accordance with 44 CFR Part 60.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies for reasons set out in the proposed rule that the final flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, this rule is not a major rule under terms of Executive Order 12229, so no regulatory analyses have been prepared. It does not involve any collection of information for purposes of the Paperwork Reduction Act.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

Interested lessees and owners of real property are encouraged to review the Flood Insurance Study and Flood Insurance Rate Map available at the address cited below for each community.

The base (100-year) flood elevations are finalized in the communities listed below. Elevations at selected locations in each community are shown. No appeal was made during the 90-day period and the proposed base flood elevations have not been changed.

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD)
Alabama	Town of Lincoln, Talladega County (FEMA–6442)	Blue Eye Creek	Just upstream of McClain Avenue	*486

Report and Order

(Proceeding Terminated)

In the matter of; amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Plantation Key, Florida) BC Docket No. 82–777, RM–4190.

Adopted: April 20, 1983.
Released: May 4, 1983.

By the Chief, Policy and Rules Division.

1. The Commission has under consideration the *Notice of Proposed Rule Making*, 47 FR 54519, published December 3, 1982, proposing the assignment of Channel 276A to Plantation Key, Florida, as that community's second FM assignment. The *Notice* was issued in response to a petition filed by John T. Galanses ("petitioner"). Petitioner submitted comments in support of the proposal and expressed his continuing interest in applying for the station, if assigned. The channel can be assigned in compliance with the minimum distance separation requirements. No opposing comments were received.

2. The Commission has determined that the public interest would be served by assigning Channel 276A to Plantation Key, Florida, since it could provide a second local FM service to that community.

3. Accordingly, pursuant to the authority contained in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is ordered*, That effective July 5, 1983, the FM Table of Assignments, § 73.202(b) of the Rules, *is amended*, with respect to the community listed below:

City	Channel No.
Plantation Key, Fla	262, and 276A.

4. *It is further ordered*, That this proceeding *is terminated*.

5. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634–6530.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Report and Order

Proceeding Terminated

In the Matter of Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Charlotte Amalie, Virgin Islands), BC Docket No. 82–764, RM–4211.

Adopted: April 20, 1983.
Released: May 4, 1983.

By the Chief, Policy and Rules Division.

1. The Commission has under consideration the *Notice of Proposed Rule Making*, 47 FR 53931, published November 30, 1982, proposing the assignment of Class B Channel 271 to Charlotte Amalie, Virgin Islands, as that community's third FM assignment in response to a petition filed by Thousand Islands Corporation ("petitioner"). Petitioner filed comments in support of the proposal and reaffirmed its interest in applying for the channel, if assigned. The channel can be assigned in compliance with the minimum distance separation requirements. No oppositions to the proposal were received.

2. The Commission has determined that the public interest would be served by assigning Channel 271 to Charlotte Amalie, Virgin Islands, since it could provide a third local FM service to that community.

3. Accordingly, pursuant to the authority contained in Sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and § 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is ordered*, that effective July 5, 1983, the FM Table of Assignments, § 73.202(b) of the Rules, *is amended*, with respect to the community listed below:

City	Channel No.
Charlotte Amalie, V.I.	226, 250, and 271.

4. *It is further ordered*, that this proceeding *is terminated*.

5. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634–6530.

INTERSTATE COMMERCE COMMISSION

49 CFR Ch. X

[Ex Parte No. 311; Sub-4]

Modification of the Motor Carrier Fuel Surcharge Program

AGENCY: Interstate Commerce Commission.

ACTION: Change in owner-operator fuel reimbursement figure; rule-related notice.

SUMMARY: Due to a change in the nationwide average cost of diesel fuel, owner-operator reimbursement has changed from 11 to 11.5 cents per mile.

EFFECTIVE DATE: This decision will be effective on May 24, 1983.

FOR FURTHER INFORMATION CONTACT: Lee Alexander, (202) 275–7723; Ted Kalick, (202) 275–6446; Alan Rothenberg, (202) 275–7597; Boston, MA, (617) 223–2372; Philadelphia, PA, (215) 597–4460; Atlanta, GA, (404) 881–2167; Chicago, IL, (312) 353–6204; Ft. Worth, TX, (817) 334–2794; San Francisco, CA, (415) 974–7125.

SUPPLEMENTARY INFORMATION: In a decision served April 21, 1983 (46 FR 18817, April 28, 1983), the Commission established owner-operator reimbursement at 11 cents per mile for all carrier-related business miles. This change will become effective May 10, 1983. As noted in the October 8, 1981 decision (46 FR 50070, October 9, 1981), the mileage payment will change when the price of fuel in conjunction with the reimbursement formula causes the figure to rise or decline by .5 cents per mile.

As of May 2, 1983, the current price of diesel fuel was 118.2 cents per gallon. The reimbursement figure is 11.6. Ten working days after publication of the notice in the **Federal Register** (effective May 24, 1983), carriers shall reimburse owner-operators at a minimum of 11.5 cents per mile.

During this 10-day period or after, if they choose, carriers may adjust their rates to reflect the change in owner-operator reimbursement by using the 10-day notice provisions of Special Permission No. 81–2500 (see Part 2 of Appendix B and Appendix C to the October 8 decision). All other normal rate-making avenues are also available.

Notice shall be given to the general public by mailing a copy of this decision to the Governor of each State having jurisdiction over transportation by depositing a copy in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection and by depositing a copy with the Director, Office of the Federal Register, for publication.

Decided: May 2, 1983.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

Proposed Rules

Federal Register
Vol. 48, No. 91
Tuesday, May 10, 1983

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1001

[Docket No. AO–14–A59]

Milk in the New England Marketing Area; Recommended Decision and Opportunity To File Written Exceptions on Proposed Amendments to Tentative Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision recommends a change in the New England milk order based on industry proposals considered at a public hearing in January 1983. The change would remove Dukes County, Massachusetts, from the New England milk marketing area. The recommended change is necessary to reflect current marketing conditions and to assure orderly marketing in the New England marketing area.

DATE: Comments are due on or before May 25, 1983.

ADDRESS: Comments (four copies) should be filed with the Hearing Clerk, Room 1077, South Building, United States Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Clayton H. Plumb, Chief, Order Formulation Branch, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250 (202/447–6273).

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of Sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. The amendments would promote orderly marketing of milk by producers and regulated handlers.

Prior document in this proceeding:

Notice of Hearing: Issued January 3, 1983; published January 7, 1983 (48 FR 812).

Preliminary Statement

Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to proposed amendments to the tentative marketing agreement and order regulating the handling of milk in the New England marketing area. This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington, D.C. 20250, by the 15th day after publication in the **Federal Register**. The exceptions should be filed in four copies. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposed amendments set forth below are based on the record of a public hearing held at Boston, Massachusetts, on January 26, 1983, pursuant to notice thereof issued January 3, 1983 (48 FR 812).

The material issues on the record of the hearing relate to: (1) the deletion of Dukes County, Massachusetts, from the New England milk marketing area; and (2) the re-zoning of a small portion of southwestern Connecticut from Zone 5 to Zone 6.

Findings and Conclusions

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

1. *Marketing area.* Dukes County, Massachusetts, should be removed from the New England milk marketing area. Such action would allow Seaside Dairy Corporation (SDC) to continue to operate a dairy farm and milk processing plant on Martha's Vineyard Island without being subject to the pricing and pooling provisions of the New England milk order. The portion of Dukes County other than Martha's Vineyard consists of a number of small, privately owned islands with no retail outlets for fluid milk. For administrative convenience, all of Dukes County should be removed from the marketing area.

The operator of Seaside Dairy, which began its milk production and processing business in mid-1981, testified that no milk is purchased to supplement the dairy's own production, and that all of the dairy's output is distributed on Martha's Vineyard. He stated that Seaside Dairy is the only milk pasteurization plant on the Island, and has no capability for marketing milk in a form other than Class I. He estimated that the approximately 111,000 pounds of milk produced and processed by SDC in December 1982 represented 60 percent of the fluid milk sales on Martha's Vineyard. Milk from four Order 1 handlers located on the mainland is also distributed on the Vineyard. The witness estimated the other handlers' shares of the total fluid milk disposition in December 1982 to range from 2 to 18 percent each. There is a wide seasonal fluctuation in milk consumption on the Island due to summer vacationers who cause the summer population (July through September) of the Vineyard to be as much as eight times that in winter. The witness estimated that SDC's share of the market for August 1982 was 29 percent, or only half of its share in December, when the population is just over 9,000 people.

The handler testified that because of the expense of transporting feed and supplies to the Island by ferry, the costs of operating both the dairy farm and the processing plant are substantially higher than those encountered by mainland producers and handlers. He stated that when combined with SDC's high operating costs, the effect of Federal order regulation is to threaten Seaside's economic survival by requiring Seaside to pay to the pool the difference between the Federal order Class I and blended prices. He pointed out that the continued operation of Seaside Dairy assures a reliable milk supply for the Island, which is subject to interruptions of supply from the mainland due to disruptions of ferry service. Ferry service has, he pointed out, been interrupted in the past by severe

weather conditions and by labor difficulties and will continue to be subject to such disruptions in the future, jeopardizing milk (and food) supplies for the inhabitants of Martha's Vineyard.

Seaside's owner-operator asserted that removal of Dukes County from the New England marketing area would in no way result in disorderly marketing. Seaside is the only producer or handler that would cease to be pooled as a result of such an amendment. He claimed that regulated handlers from the mainland distributing milk on the Island would not be subject to unfair price competition as a result of Seaside's nonpool status because of SDC's higher costs of operation and because of minimum price regulation by the Massachusetts Milk Control Commission. The witness also pointed out that the cost of ferry transportation and Seaside's high costs of operation would make it extremely unlikely that Seaside would be able to ship milk in excess of the Vineyard's demand for its fluid milk products to the mainland, in either bulk or packaged form, at a price competitive with that charged by mainland handlers. The volume of sales by any of the mainland handlers which could be lost to SDC during the winter months was characterized by the witness as minor, since the largest of those handlers distributed only an estimated 33,000 pounds of milk on the Island in December 1982. Due to the large seasonal variation in fluid milk sales on the Island, the witness considered it unlikely that the market share of any of the mainland handlers would decline significantly during the July through September period in which most of their on-Island sales occur.

The witness testified that although Seaside Dairy is the only dairy farmer on the Vineyard who would be affected by loss of pool status, there are other persons on the Island who keep a few dairy cows, and whose milk Seaside would like to be able to purchase to augment its own production in order to satisfy demand for its product. The witness indicated that even if Seaside Dairy qualified for producer-handler status, it could not purchase milk from other dairy farmers and avoid pooling as long as Dukes County remains part of the Order 1 marketing area. A farmer residing on Martha's Vineyard testified that he sells raw milk at his farm to summer residents, but in winter feeds most of the milk produced on his farm to his pigs because SDC cannot purchase it from him without incurring an additional pool obligation. He asserted that in the event Dukes County is deleted from the marketing area, any farmer supplying Seaside with raw milk would be assured a fair price for his milk by the Massachusetts Milk Control Commission.

Other witnesses testifying in favor of the deletion of Dukes County from the marketing area were the Massachusetts Commissioner of Agriculture and counsel for Seaside Dairy. The Commissioner emphasized the vulnerability of Martha's Vineyard residents to interruptions of their food supply, and the importance of SDC's existence to assure some local food production. He pointed out that Seaside Dairy employs five people year-round in an island economy whose heavy reliance on summer tourism results in high seasonal unemployment. He also maintained that the loss of returns to the thousands of Order 1 producers of removing Seaside Dairy's $1,200 monthly contribution to the New England pool would be negligible. The counsel for SDC testified relative to the history of dairy marketing on Martha's Vineyard and emphasized that the need for an on-island source of milk supply has become more acute due to an increase in the year-round population of the Vineyard since the early 1960's when a milk processing plant on the Island discontinued operation.

Representatives of two pooled mainland handlers with fluid milk disposition on Martha's Vineyard and a representative of a large New England cooperative association testified in opposition to the removal of Dukes County from the marketing area. Briefs opposing the proposal were filed on behalf of those parties and on behalf of a cooperative association and a federation of cooperatives. The opponents described the wide seasonal variation in sales on the Vineyard as requiring heavy reliance on supplemental supplies of fluid milk products from the mainland, and asserted that marketing conditions are not substantially different now than those in existence at the time the county was added to the marketing area. The handlers expressed concern that if production on the Island were encouraged to increase significantly, Vineyard producers would once again be relying on mainland Federal order handlers to balance their surplus production in winter as well as to supply seasonal Class I needs in summer.

The handler representatives claimed that without regulation Seaside Dairy would gain a sizeable price advantage (6.5 cents per quart, according to one witness) over fully regulated mainland handlers, seriously endangering the principle of handler equity. They warned that displacement of the mainland handlers' winter sales on the Island could cause the network of distribution to break down and thereby jeopardize the ability of regulated handlers to supply milk to Vineyard consumers during the summer at a reasonable price. Furthermore, they argued, reduced demand for their product during winter months could result in the cessation of winter deliveries to the Vineyard due to higher per unit costs of distribution in winter. A concern that Seaside Dairy would attempt to expand its sales to Nantucket Island and disrupt the distribution network serving that location was also expressed.

Estimates of fluid milk sales on Martha's Vineyard presented by the Seaside Dairy representative were based on Seaside's actual production and sales as well as the most accurate information on sales by mainland handlers available to the representative. Those estimates showed August sales to be approximately double those in December. Of the four mainland handlers distributing milk on Martha's Vineyard, the H. P. Hood Company was estimated by the Seaside witness to have the largest share of total sales. The Hood Company spokesman, rather than use Hood's actual sales information, chose to base his estimate of sales patterns on the Island on per capita consumption information for New England. As a result, Hood's estimate of total summer sales on the Vineyard was nearly four times Seaside's estimate. The Hood Company spokesman estimated that Hood's share of sales represents 20 percent of total annual sales in Dukes County, and that Hood sells about three times as much milk on Martha's Vineyard in the summer months as it does during the rest of the year. These data would be more consistent with Seaside's estimates of total sales on the Island than a projection based on regional per capita consumption.

The witness testifying for the cooperative association asserted that changing the marketing area to solve one marketing difficulty would establish an undesirable precedent for dealing with future problems encountered by other handlers or producers. He stated that a preferable approach to dealing with the present situation would be for Seaside Dairy to pursue qualification under the Order 1 producer-handler definition, and thereby avoid pooling.

Dukes County has been part of a Federal order marketing area since July 1959, when it was added to the Southeastern New England marketing

1983

area at the request of Martha's Vineyard Cooperative Dairy, Inc. The cooperative wished to ensure that its distributing plant and member producers, all located on the Island, would not lose pool status during the summer months when the cooperative's receipts would be used primarily in Class I disposition on the Island. Prior to the summer of 1959, the cooperative had been a pool handler on the basis of its shipments to pool plants on the mainland. Loss of pool status during the summer months would have made the cooperative's milk ineligible for pooling during the following December through June, when demand on the Vineyard is limited and much of the milk would have to be moved to the mainland. Under nonpool status, milk so moved would be subject to "a return of no more that the Class II price less the substantial transportation charges involved in moving milk to the mainland. Such a return would seriously jeopardize the economy of the Island, of which dairying is an important segment." In adding Dukes County to the marketing area, the Secretary found that loss of pool status would inflict "unnecessary hardship on a small group of producers who have been generally associated with the market over an extended period of years * * *". The Vineyard was described as having "a substantial relationship with other parts of the marketing area from the standpoint of both receipts and dispositions of milk." [1]

Milk marketing conditions on Martha's Vineyard today are substantially different than those which supported the incorporation of Dukes County into the Southeastern New England marketing area in 1959. The interrelationship between Martha's Vineyard and the mainland handlers is much less involved at this time than it was when Dukes County was added to the marketing area. The cooperative which requested that the county be included in order to protect its pool status has long since been out of existence as have virtually all its producers, whose hardship as a result of exclusion from the marketwide pool was a major consideration in the addition of Dukes County to the marketing area. In 1959 approximately 20 milk producers located on the Island not only supplied milk for Class I needs on the Island but produced enough surplus to be shipped to mainland pool plants during the low production months of the year to qualify for pooling. In order to qualify for pooling under the Southeastern New England Federal order, as it had for some time, the Martha's Vineyard Cooperative had to ship at least 30 percent of its producer milk to pool distributing plants. Seaside Dairy has no surplus production and, according to testimony at the hearing, would find it economically disadvantageous in view of the high cost of moving milk to the mainland to produce milk in excess of demand for its fluid products, or to encourage other Vineyard producers to do so. If disposal of surplus milk to the mainland were economically feasible, it is unlikely that the Vineyard farmer who testified would be feeding his surplus production to his pigs.

A 1964 decision denied a proposal to remove Dukes County from the marketing area on the basis that a large majority of the fluid milk sales on the Vineyard were by regulated handlers. Although mainland pool handlers still account for a majority of Class I sales on the Island on an annual basis, Seaside Dairy clearly has a majority of those sales during nine months of the year. The existence of Seaside Dairy thus has resulted in a much smaller volume of milk required from mainland pool handlers to supplement Class I needs on the island during most of the year. At the same time, summer increases in Class I needs on Martha's Vineyard provide an opportunity for mainland handlers to follow their regular customers to a vacation resort area, and offset the regular summer decline in demand for fluid milk products on the mainland.

The argument that removal of Dukes County from the New England marketing area would make it more difficult for the distributors serving the Island to adapt to the large seasonal fluctuations in fluid milk requirements is not persuasive. The record does not indicate that the regulatory status of Seaside Dairy will have any significant effect on the fluctuation in seasonal requirements for milk supplies from the mainland. During winter months, the volume of fluid milk supplied to the Island by any of the distributors is quite small, and has little potential for declining. Seaside's limited ability to expand summer production over winter levels would result in little impact on the volume of summer fluid milk sales needed on Martha's Vineyard from the mainland handlers. In the unlikely event that SDC were to acquire all of the winter fluid milk business, the regulated mainland handlers still would lose only a small amount of their total annual sales on the Island, and the amount of seasonal fluctuation would change very little. The seasonal fluctuations in milk supply required from mainland handlers with Seaside Dairy as an unregulated handler could hardly be much greater than if SDC were to remain a fully regulated handler.

Mainland distributors serving the Vineyard are accustomed to supplying milk and other products on a highly seasonal basis. The potential loss of some fluid milk sales during the nine months per year when the population (and demand for all products) is at its lowest level would not appear to be a basis for curtailing or reducing delivery of the volume of fluid milk needed from the mainland during the winter. In addition to supplies of fluid milk, year-round Island residents would continue to require the importation from the mainland of Class II dairy products and all of the other items which they obtain from mainland distributors. The handlers who testified also supply the unregulated resort areas of Nantucket and Berkshire County, Massachusetts, where demand for fluid milk also fluctuates widely on a seasonal basis.

The 6.5-cent per quart price disadvantage to which opponents to the proposal claim the distributors of milk from the mainland would be subject if SDC ceased to be regulated by the Federal order is largely overstated. Two-thirds of Seaside's "advantage" is made up of the transportation costs of getting packaged milk from mainland processing plants to the ferry and across to the Vineyard by ferry. Seaside incurs similar costs in obtaining supplies for both its dairy and processing operation by means of the same transportation system, thereby cancelling out much of any price advantage obtained by producing milk on the Island. Furthermore, no cost advantage can increase Seaside Dairy's ability to expand sales past the potential winter demand for fluid milk on the Island. SDC would have no advantage in attempting to compete on the mainland with pooled handlers, since the cost of moving packaged milk there would more than cancel out any price advantage resulting from Seaside's lack of regulation.

The welfare of year-round residents of the Island would be best-served by the removal of Dukes County from the New England marketing area. During the winter months, when mainland handlers supply the smallest proportion of sales, ferry service is most vulnerable to interruption. Those most likely to be adversely affected by the lack of a dependable local milk supply are therefore the year-round residents of the Island. Seaside Dairy represents the most likely source of a local milk supply for Vineyard residents, and its existence should be discouraged by regulation.

The local economy, a concern for which was a basis for including Dukes County in the marketing area in 1959, would clearly be benefited by the removal of the County from the marketing area in 1983. In a summer resort community such as Martha's Vineyard, year-round employment is a valuable contribution to the local economy. According to the hearing record, Seaside Dairy employs five people on a full year basis and thus is a definite asset to the economy of the Island. A further potential benefit to the Vineyard's economy is the opportunity for farmers located on the Island to sell their winter milk production to Seaside Dairy for human consumption. The farmers would welcome the supplemental income derived from such sales, and the operator of Seaside Dairy expressed his desire to use the milk of other Vineyard farmers if it were possible to obtain it for about the blended price rather than for the Class I price required under Federal order regulation. A situation in which milk eligible for fluid use is fed to livestock because of the presence of regulations inhibiting its use by a nearby handler represents an uneconomic use of resources when considered in light of the need to import fluid milk to the Island. It is not anticipated that an outlet for some supplemental supplies of milk on the Island would result in a surplus production problem. The costs of disposing of such surplus should act as a disincentive for farmers to produce milk beyond the limits of local winter demand.

A concern expressed by opponents of Proposal 1, that adoption of the proposal would create a precedent for any handler desiring to escape Federal order regulation to request that his sales area be withdrawn from the marketing area, is not well-grounded. The protection of the minimum price provisions of the order have little significance to SDC in its capacity as a dairy farmer. Dukes County is the only portion of the New England marketing area accessible only by ferry. The island location and the milk marketing channels necessary to supply such a location are unique. Measures adopted to deal with this situation would hardly create a basis for similar action in other circumstances. It is not anticipated that removal of Dukes County from the marketing area will make the competitive situation for regulated handlers on Martha's Vineyard much different than it is now.

2. *Pricing zones.* A proposal to designate a separate price zone for a small portion of southwestern Connecticut should not be adopted. Marcus Dairy, a proprietary handler pooled under the New England milk order and located at Danbury, Connecticut, proposed that locations in Fairfield County, Connecticut, that are within 15 miles of the New York-Connecticut border and north of the towns of Wilton, Weston, Easton, and Trumbull, be re-designated from Zone 5 to Zone 8. Such action would result in a 7.5-cent per hundredweight reduction in the price Marcus Dairy would be obligated to pay for producer milk used in Class I. The blended price paid to dairy farmers delivering milk to Marcus Dairy also would be reduced by 7.5 cents per hundredweight on all of their deliveries to Danbury.

The handler asserted that recent amendments to both the New York-New Jersey and New England milk orders have caused the competitive situation at Danbury to become extremely disadvantageous to Marcus. The September 1981 amendment to the New York-New Jersey milk order (Order 2) reduced costs to New York handlers with whom Marcus competes by passing back to producers some of the farm-to-plant hauling costs previously paid by handlers. A few months later, an amendment to the New England milk order (Order 1) effective January 1982 increased transportation allowances for milk moving from country to city locations without changing price relationships between Danbury and the lower-numbered, higher-priced zones of the New England marketing area, and without making any adjustments in Order 1 pricing to compensate for the changes in Order 2. The Danbury handler contended that both amendments gave its competitors substantial price advantages.

The representative for Marcus Dairy testified that without the proposed re-zoning, Marcus is subject to competitive disadvantage because of price misalignment with handlers regulated under both the New York-New Jersey and New England Federal milk orders. The inter-order price misalignment (with Order 2) was attributed by proponent to an Order 1 Class I price at Danbury that is 14.8 cents per hundredweight higher than the Order 2 Class I price at the same location. The handler claimed that its misalignment problem with New York handlers is aggravated by the fact that its principal competitors distributing milk in the New York counties of Dutchess, Putnam, and Westchester are located further from the New York metropolitan area than Marcus, and consequently are in lower-priced zones. Those Order 2 handlers therefore have more than the 14.8-cent advantage over Marcus in raw milk costs which exists at Danbury. According to proponent, the inter-order price misalignment at Danbury is the principal cause of the decline in the percentage of Marcus' total sales that are distributed in New York from 40 percent in 1978 to 20–25 percent at the present time. Proponent testified, however, that the decline in the New York percentage of total sales does not reflect a decline in volume. The volume of fluid milk sold by Marcus to be distributed in the three New York counties in which Marcus is licensed to market milk has, according to the witness, increased, but not in proportion with increased sales in Connecticut. The witness stated further that Marcus Dairy has applied for licenses to distribute milk in three additional New York couties.

The Marcus Dairy representative testified that the lower price at Danbury under Order 2 is an incentive for Marcus to so arrange its sales that the handler would be pooled under Order 2 rather than under Order 1. As a result of such action, he contended, dairy farmers delivering milk to Marcus would lose the benefit of the higher Order 1 blend price to producers, and all producers supplying the New England market would be subject to a lower blend price because of the loss to the pool of a handler with relatively high Class I use. The witness also pointed out that such a shift of regulation would result in a significant price advantage for Marcus over other Connecticut handlers located in Zone 5 of the New England marketing area. The 7.5-cent price change proposed for the Danbury location is, the witness explained, a compromise which would allow Marcus to compete freely in both orders without gaining the full 14.8-cent advantage over nearby Order 1 handlers which would be achieved by a shift to regulation under Order 2.

According to the handler representative, the 1982 Order 1 amendment was in error in two respects. First, by re-zoning western Connecticut from Zone 7 to Zone 5 and thereby maintaining the approximately 10-cent price difference between Boston/Providence and western Connecticut, the Department failed to recognize the effect increased hauling costs should have had on the price difference between those areas. Second, the witness claimed, retention of Danbury in the same zone as other plants in western Connecticut fails to take into account

[1] Official notice is hereby taken of the Acting Secretary's decision issued June 16, 1959 (24 FR 5156), adding Dukes County to the Southeastern New England milk order.

UMI

VOL 48 ISS 91 MY 10 1983 UMI

Danbury's relative proximity to the western milk supply for Order 1 and the "county plant" nature of the Danbury location. The witness described Danbury's location as between the other Zone 5 Connecticut plants and the western milk supply for Order 1 and only 3 miles from the Order 2 marketing area, with the population centers most accessible to Danbury being in New York State. He stated that other Connecticut handlers are located closer than Danbury to Connecticut population centers, and that Marcus Dairy must ship milk into those population centers in order to compete. Unless the errors of the 1982 amendment are corrected, the Marcus Dairy representative claimed, Marcus Dairy will continue to suffer a competitive disadvantage to both Order 1 handlers with whom Marcus competes in Connecticut, and its Order 2 competitors in New York.

Representatives of four proprietary handlers, two of whom are located in Zone 5, and two cooperative associations testified in opposition to Proposal No. 2. In addition, another cooperative association and a federation of cooperatives filed briefs opposing the proposed re-zoning. The opponents of the proposal denied that Marcus is subject to any competitive disadvantage in relation to either New England or New York handlers, and pointed to the growth in Marcus' sales in both New York and Connecticut to support their position. According to the opponents, the 1982 Order 1 amendment which changed the Order 1-Order 2 price difference at Danbury from 12.4 cents to 14.8 cents maintained close alignment of Order 1 and Order 2 pricing at that location. In support of their assertion that the 14.8-cent difference at Danbury does not represent any serious price misalignment, opponents of the proposition stated that there has been no significant shift of sales by Order 2 handlers into Order 1 as a result of the most recent changes to both orders, and, in fact, that there are no Order 2 handlers with sales in Connecticut.

In answer to Marcus' argument that the Danbury location should be in a lower-priced zone than the rest of western Connecticut, one witness pointed out that all of western Connecticut historically has been one zone and is a fairly contiguous metropolitan area. Another witness stated that the present Zone 5 is too small and too competitive an area to justify a 7.5-cent lower price in a small zone of townships. Several witnesses pointed out that with 75–80 percent of its sales in Connecticut, Marcus competes primarily with other Connecticut handlers. They stated that, as Marcus is a vigorous competitor in Connecticut and has expanded sales there greatly in the last few years, a 7.5-cent price advantage over other western Connecticut handlers would be unfair.

Opposing witnesses testified that the 1982 Order 1 amendment maintained stable price relationships among handlers in the former "nearby plant" zone. They supported the decision to not adjust prices further downward in a westerly direction by noting that the partial shift of the Order 1 production area from Vermont to New York, which was the basis of the zoning established by the 1978 Order 1 amendment, had reversed itself by 1981. A larger share of Order 1 production is coming from north of the marketing area now than was the case in 1977, the period on which the 1978 amendment was beased.

The 1978 decision amending the New England milk order was quoted at length by the Marcus representative in support of his proposal. In that decision the area known as the "nearby plant" zone, which included all of Connecticut, Massachusetts (except Berkshire County) and Rhode Island in a single price zone, was divided into zones to assure that milk would be moved from the "country" production areas to the primary consumption area of Boston/Providence. A key finding in that decision was that the source of milk production pooled under the New England order had been shifting from Vermont (north of Boston/Providence) to New York (west of Boston/Providence) over time, and that the shift should be reflected in price adjustments westward as well as northward. Western Connecticut was established as a lower-priced zone than Boston/Providence because "as the market shifts to greater dependence on supplies of milk from New York, it will become increasingly important to maintain a high enough price in the eastern consumption areas to attract this milk from beyond the consumption centers in the western portions of Connecticut and Massachusetts" (43 FR 45523). Greater downward price adjustments were found necessary for western Massachusetts as that area was closer than western Connecticut to the Vermont production area, as well as being much nearer than Boston/Providence to New York. There is no evidence in the present record to support a conclusion that the price difference between western Connecticut and Boston/Providence is not great enough to attract needed supplies of milk from boyond western Connecticut and Massachusetts to Boston/Providence.

There is no reason to increase the price difference between western Connecticut and Boston/Providence in order to reflect the growing importance of New York as a source of milk for the New England marketing area. As noted by opponents of the proposal, the shift of production area from Vermont to New York observed in 1978 has reversed itself. In December 1976, 28.1 percent of Order 1 producer milk was produced in New York. By December 1981, New York milk comprised only 23.4 percent of the Order 1 pool. New York production pooled under Order 1 has declined not only as a proportion of the New England pool, but in terms of volume as well. Milk produced in New York and pooled in New England declined by more than 13 million pounds from December 1976 to December 1981. Nor has the source of New York milk in Order 1 shifted from northern New York to southern New York, as suggested by Marcus. The portion of southeastern New York that is more accessible to Danbury than to other parts of the New England marketing area is the area including Delaware, Greene and Columbia Counties, and those to the south. In those counties, production declined by nearly 10 million pounds from December 1976 to December 1981, and from 43.4 percent to 39.3 percent of New York production pooled under Order 1. Production from counties north of Delaware, Greene, and Columbia declined by only 3.4 million pounds over the same period, but increased as a percentage of New York production pooled in New England from 56.6 percent to 60.7 percent. The milk from New York producers that is most readily available to Marcus Dairy has, therefore, declined not only in relation to other milk supplies pooled under the New England order, but has decreased by 20 percent in terms of volume.

At the same time, the volume of milk distributed by Marcus Dairy has increased greatly. According to the Marcus representative's testimony, the proportion of Marcus' total sales distributed within New York State has declined from 40 percent to 20–25 percent while the volume of those sales has not declined at all. A conclusion that Marcus' total sales must have at least doubled, and sales in Connecticut more than doubled, since 1978 is inescapable. As the supply of milk produced by southern New York dairy farmers for the New England market dwindles and Marcus' sales increase, the ability of Marcus Dairy to attract a sufficient supply of milk from the southern New York area, which is its primary source of supply, becomes increasingly questionable. A reduction of the blend price paid to producers delivering milk to Danbury would appear to be unwise if Marcus is to continue to obtain a sufficient supply of milk from nearby sources.

Given the expansion of Marcus' sales during the last few years, it is difficult to justify any reduction of the Class I price at Danbury on the basis that Marcus Dairy suffers from a competitive disadvantage. The handler's pending applications to add three New York counties to its distribution area would tend to indicate that Marcus is well able to compete successfully in an area of New York State where its principal competitors are handlers from the New York City area who are subject to higher raw milk costs and handlers from more distant zones who must bear the costs of transporting packaged milk to the sales area. The fact that no New York handlers compete in Connecticut while Marcus is able to expand sales in New York, given licensing approval, is a strong reason to deny a price reduction at Danbury on the basis of inter-order misalignment in favor of New York handlers.

The record does not support a claim that Marcus Dairy is subject to a competitive disadvantage in relation to other Connecticut Zone 5 handlers. Since 1978, Marcus' sales in Connecticut have more than doubled although all of the handlers in western Connecticut have been subject to the same price adjustments for some time. 1980 Census data show that the population of western Connecticut increased by less than two percent from 1970 to 1980. Marcus Dairy's ability to gain sales in Connecticut at the expense of other handlers clearly has not been impaired by any competitive disadvantage in terms of raw milk procurement costs.

The argument that Danbury is a "country" location in relation to other Connecticut locations is not valid. In prior decisions, Hartford, which is approximately 60 miles from Danbury, has been described as a population center in the sense of being the largest city in the heavily populated area of southwestern Connecticut. Hartford is, however, not located in the center of that area, but at its northeast corner. According to the 1980 Census, Fairfield County, in which Danbury is located, is the second most populous Connecticut county, after Hartford County, by only a very small margin. New Haven County, located between Fairfield and Hartford Counties, falls in third place by less than 50,000 people. Southwestern Connecticut is, as one witness described it, a fairly contiguous metropolitan area, and plants throughout southwestern Connecticut must compete for milk supplies produced in "country" locations in Vermont and New York where the bulk of the market's milk supply is produced.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision

General Findings

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may in be conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Recommended Marketing Agreement and Order Amending the Order

The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be the same as those contained in the order, as hereby proposed to be amended. The following order amending the order, as amended, regulating the handling of milk in the New England marketing area is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out:

List of Subjects in 7 CFR Part 1001

Milk marketing orders, Milk, Dairy products.

PART 1001—MILK IN THE NEW ENGLAND MARKETING AREA

§ 1001.2 [Amended]

In § 1001.2, under the heading "Massachusetts", the County of "Dukes" is removed.

Signed at Washington, D.C., on: May 5, 1983.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

[Docket No. AO-309-A24]

Milk in the Great Basin Marketing Area; Notice of Recommended Decision and Opportunity To File Written Exceptions on Proposed Amendments to Tentative Marketing Agreement and To Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This decision recommends a change affecting the classification provisions of the Great Basin Federal milk marketing order. The change would classify as Class II rather than as Class I formulas especially prepared for infant feeding or dietary use that are aseptically processed and packaged in hermetically sealed paper containers. The decision is based on an industry proposal considered at a public hearing held December 9, 1982. The recommended order amendment is necessary to reflect current marketing conditions and to assure orderly marketing in the area.

DATE: Comments are due on or before May 31, 1983.

ADDRESS: Comments (four copies) should be filed with the Hearing Clerk, Room 1077, South Building, United States Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, 202/447–7183.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of Sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

Prior documents in this proceeding:

Notice of Hearing: Issued November 19, 1982; published November 26, 1982 (47 FR 53395).

Emergency Final Decision: Issued February 8, 1983; published February 14, 1983 (48 FR 6545).

Final Order: Issued February 23, 1983, published March 1, 1983 (48 FR 8425).

Preliminary Statement

Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to proposed amendments to the tentative marketing agreement and order regulating the handling of milk in the Great Basin marketing area. This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

Interested parties may file written exceptions to this decision with the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250, on or before 20 days after publication in the **Federal Register.** The exceptions should be filed in quadruplicate. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposed amendment set forth below is based on the record of a public hearing held at Salt Lake City, Utah, on December 9, 1982, pursuant to notice thereof issued November 19, 1982 (47 FR 53395).

The hearing notice specifically invited interested persons to present evidence concerning the probably regulatory and informational impact of the proposals on small businesses. However, no participants at the hearing testified about any potentially adverse impacts of the proposals on small businesses.

Further, William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that the proposed amendment, if adopted, will not have a significant impact on a substantial number of small entities. The proposed amendment would promote orderly marketing of milk by producers and regulated handlers.

The material issues on the record of hearing relate to:

1. Performance standards for a pool plant that primarily processes and distributes aseptically processed fluid milk products.

2. Whether an emergency exists to warrant the omission of a recommended decision and the opportunity to file written exceptions thereto with respect to issue No. 1.

3. Permit an "exempt plant" to have part of its milk supply aseptically processed and packaged by another plant that primarily processes and distributes aseptically processed fluid milk products.

4. Classify as Class II rather than as Class I formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed paper containers.

A prior decision dealt with issues 1 and 2. The remaining issues (Nos. 3 and 4) of the hearing are considered in this decision.

Findings and Conclusions

The following findings and conclusions on the material issues are based on evidence presented at the hearing and the record thereof:

3. *Permit an "exempt plant" to have part of its milk supply aseptically processed and packaged by another plant that primarily processes and distributes aseptically processed fluid milk products.* The provisions of the order should not be amended to permit an exempt plant to have all or part of its supply aseptically processed and packaged by a pool plant for disposition for charitable purposes without the exempt plant losing its exempt status under the order.[1]

A proposal of Gossner Foods, Inc. (Gossner), a proprietary handler, would permit a plant that is exempt from the regulatory requirements of the order to have part or all of its milk supply custom packaged at a pooled UHT plant and returned to the exempt plant to be used for charitable purposes without the exempt plant losing its exempt status. The proposal was one of several proposals presented by the handler at the hearing which were designed to accommodate the operations of his new plant. The plant processes, packages, and distributes only UHT milk in hermetically sealed paper containers. Such milk requires no refrigeration for several months.

In support of the proposal, Gossner's spokesman testified that the exemption sought would be beneficial to the welfare program of the Church of Jesus Christ of Latter-Day Saints (Church) which operates an exempt plant under the order. He testified that the proposal would have no effect on the operation of the order since the milk supply associated with the Church's plant is neither priced nor pooled under the order.

The manager of processing operations of the Church testified in support of the proposal. He testified that UHT fluid milk products could become an important addition to the welfare program of the Church. The witness testified that for a number of years the Church has operated a self-supported Church-wide program for its needy members throughout the United States and Canada. He testified that the present volume of packaged fluid milk distributed through the Church's welfare program is about 30 million quarts per year. Of this total, about 22 million quarts per year are distributed to the needy in the Great Basin area, all of which is processed at its Salt Lake City exempt fluid milk plant. The witness indicated that in other parts of the country the Church purchases packaged fluid milk products from regulated plants to fulfill the requirements of its welfare program.

In further support of the proposal, the witness stated that the adoption of the proposal would enable the Church to test the feasibility of using UHT milk in its welfare program. He indicated that such evaluation would be of several months' duration so that the Church can determine whether or not to build its own UHT milk plant. Furthermore, he said that the Church in the Great Basin area has a sufficient supply of milk available from its own farms in the Great Basin area to supply the Church's entire welfare program with UHT milk.

At the hearing and in its post-hearing brief, Western Dairymen Cooperative, Inc., (WDCI)[2] opposed the proposal. The federation of cooperatives argued that the effect of this proposal is to have the Great Basin pool defray part of the cost of starting up the UHT plant and the Church's experiment in determining the merits of using UHT milk in its welfare program. Furthermore, it argued that the language of the proposal could not accomplish its purported purpose and that the proposal violates the uniformity requirements of the Agricultural Marketing Agreement Act. Moreover, WDCI argued that the provision that exempts the Church was adopted on the basis that the distribution of milk to needy members was limited in scope and confined essentially to the Salt Lake City area.

Although it did not testify at the hearing, Beatrice Foods Co. (Beatrice) filed a post-hearing brief opposing the proposal. It maintained that the current order provisions are sufficient to address the proponent's need. In this regard, the handler indicated that the current order would permit the UHT plant to receive milk from the Church's plant as "other source milk" and then transfer the package UHT milk as Class I milk to the Church for its welfare distribution program. Beatrice contends that this arrangement assures that Grade A milk produced for the market is handled in a manner that is uniform among all plants.

Beatrice also argued that the proposal would result in unequal recordkeeping requirements for handlers. The handler contends that the proposal would not require the proponent to accurately account to the market administrator for the exempt milk that would be moving into and out of its plant.

The opponent contends the proposal would result in an unfair competitive advantage for the proponent. In this regard, the handler states that this is because the proponent would not incur any payment obligation under the order for the exempt milk and would benefit from the Church's effort to build a market demand for its UHT milk products. Beatrice contends that the record indicates that the proponent does not intend to process this milk for the Church free of charge. Therefore, Beatrice argues that this arrangement constitutes a commercial transaction and that it should be accounted for in the same manner as other commercial transactions under the order.

Under the present provisions of the order, a handler receiving milk from an exempt plant for custom processing and packaging is required to account to the pool for such milk as Class III. The milk returned to the operator of the exempt plant would be classified as Class I milk. Thus, the pool handler would incur a payment obligation under the order at the difference between the Class I and Class IIII prices on the milk so returned. Under this accounting procedure, such payment obligation incurred by the UHT handler would be expected to be passed on to the exempt plant operator as part of the cost of processing the milk by the pool handler.

As indicated, the intent of the proposal as presented would exempt from the order's pooling and pricing requirements any milk received by the UHT pool handler from dairy farms operated by the Church. All of such milk would be aseptically packaged in hermetically sealed paper containers as UHT milk and returned to the Church for distribution to the needy throughout the United States and Canada. Thus, adoption of the proposal would allow the UHT pool handler to custom process and package part or all of the Church's milk supply without the handler incurring any payment obligation under the order on the milk so processed. It would be expected that this would result in a lower processing and packaging charge to the Church than under the present terms of the order. Adoption of the proposal would also provide the opportunity for the Church to supply the total milk requirements of its welfare program from the milk produced on its own farms. Finally, its adoption would provide the Church the option of studying the feasibility of whether or not to build its own UHT plant facilities.

Since its inception in November 1959, the Great Basin order has completely exempted the Church's plant at Salt Lake City. In this regard, official notice is taken of the Assistant Secretary's September 1, 1959 (24 FR 7207) decision proposing a new order for the Great Basin marketing area, in which appears a discussion of the basis for providing complete exemption to the Church's operation.

An important factor that was considered in exempting the Church's processing plant from regulation was that the fluid milk products handled were being disposed of to individuals or institutions for charitable purposes rather than being disposed of commercially. Also, it was contemplated that such plant would process only the milk produced on the Church's farms and that the milk would be disposed of primarily in the local market. Through the years, the Church has continued to operate in this manner. Consequently, there is no indication that the Church's present operation is a threat to orderly and stable marketing for producers whose milk is priced under the order and for those handlers who are subject to full regulation.

The proposal under consideration, which would permit the Gossner plant to custom package "UHT" milk for the Church's "exempt plant," could result in a substantial expansion of the exempt plant's operations. As indicated, the Church desired the custom packaging arrangement so that it could distribute its own milk without refrigeration not only locally but throughout the United States and Canada. The distribution of this milk over a wide area could have an impact on producers and handlers in other markets by supplanting local milk in the other areas with the Church's UHT milk. Such widespread distribution would seriously undermine the basis for exempting the Church's plant from regulation, which was that it was essentially a local operation, and that any adverse impact from its exempt status would be limited to the local market where the exemption was approved by the area's producers.

For these reasons, it is concluded that the proposal to expand the basis of exempting the Church's plant should not be adopted. Accordingly, the proposal is denied.

In conjunction with the exemption proposal, Gossner also proposed an expansion of the "non-producer" definition to have it apply to milk produced by a charitable institution that is moved directly to another plant for custom processing and packaging as UHT milk. Since the proposal to expand the basis of exempting a charitable institution is denied, the issue raised in the non-producer proposal becomes moot.

4. *Classify as Class II rather than as Class I formulas especially prepared for infant feeding or dietary use that are aseptically packaged in hermetically sealed paper containers.* A Class II classification should apply to formulas prepared for infant feeding or dietary use that are aseptically packaged in hermetically sealed paper containers.

Although not marketed at the present time in hermetically sealed paper containers, any such products so marketed would be classified as Class I under the order. However, the present order excludes from the fluid milk product definition milk or milk products used for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers.

A proposal to change the "fluid milk product" definition was made by

[1] The aseptic process embraces the use of ultra high temperature pasteurization and aseptic packaging of fluid milk products in hermetically sealed paper containers. The resulting products from this process are commonly referred to as "UHT" milk. Because of the common usage of the term "UHT", reference is made in the decision to UHT milk or milk products and UHT plant.

[2] Western Dairymen Cooperative, Inc., is a federation of cooperatives consisting of Mountain Empire Dairymen's Association, Western General Dairies, Inc., Dairymen's Cooperative Association, Lake Mead Cooperative Association, Black Hills Milk Producers Association and Ft. Collins Milk Producers Association.

VOL 48 ISS 91 MY 10 1983 UMI

Gossner. The proposal was one of several proposals made by the handler to accommodate the operations of its new UHT plant. Proponent's witness testified that Gossner expects to process for distribution in the near future formulas especially prepared for infant feeding or dietary use that are processed with ultra-high temperatures and aseptically packaged in hermetically sealed paper containers. In his opinion, there is no basis for making any distinction in classification among the various types of containers that are used to package such formulas. The witness argued that in terms of shelf life and competition for unrefrigerated shelf space, hermetically sealed paper containers are equivalent to such products packaged in glass or metal containers.

At the hearing and in its post-hearing brief, WDCI opposed the proposal. The basis of such opposition focused on the belief that the adoption of the proposal could result in the classification as Class II of certain products that are normally classified as Class I. Opponent expressed particular concern that fluid skim products could be packaged and labeled as dietary products and thus would be classified as Class II under the proposal. Finally, opponent's witness argued that no action should be taken on the proposal until after the UHT operator has had actual experience in marketing UHT dietary and infant feeding formulas in competition with similar products that are packaged in hermetically sealed glass or all metal containers.

Infant and dietary formulas, which now are sold only in hermetically sealed glass or all-metal containers, are specialized food items prepared for a very limited use. Such formulas do not compete with fluid milk beverages consumed by the general public. It is within this conceptual framework that any milk or milk products used in the production of such formulas in glass or metal containers are now excluded from the "fluid milk product" definition and classified as Class II.

When the provision for such exclusion from the "fluid milk product" definition was developed, such formulas were only packaged in hermetically sealed glass and metal containers. With the advent of UHT milk, dietary and infant feeding formulas can now be aseptically packaged in hermetically sealed paper containers. Such products can compete to a reasonable extent with glass or metal containers in terms of unrefrigerated shelf life.

It is appropriate, therefore, to remove from the "fluid milk product" definition dietary and infant feeding formulas that are aseptically packaged in hermetically sealed paper containers and specifically include such products in Class II. This will allow the UHT milk processor to compete for dietary and infant feeding formula business on a comparable basis with such formulas packaged in glass or all-metal containers.

As noted earlier, WDCI expressed concern that the adoption of this proposal would facilitate the circumvention of the Class I pricing provisions of the order through mislabeling of products. While this seems unlikely, this matter can be reviewed through the hearing process should experience indicate that there is some problem.

Rulings on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the request to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

General Findings

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order, as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the tentative marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interests; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

Recommended Marketing Agreement and Order Amending the Order

The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be the same as those contained in the order, as hereby proposed to be amended. The following order amending the order, as amended, regulating the handling of milk in the Great Basin marketing area is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out:

PART 1136—[AMENDED]

1. In § 1136.15, paragraph (b)(1) is revised to read as follows:

§ 1135.15 Fluid milk product.

* * * * * *

(b) * * *

(1) Evaporated or condensed milk (plain or sweetened), evaporated or condensed skim milk (plain or sweetened), formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass, paper, or all-metal containers, any product that contains by weight less than 6.5 percent nonfat milk solids, and whey; and

* * * * * *

2. In § 1136.40, paragraph (b)(4)(vi) is revised to read as follows:

§ 1136.40 Classes of utilization.

* * * * * *

(b) * * *

(4) * * *

(vi) Formulas especially prepared for infant feeding or dietary use that are packaged in hermetically sealed glass or all-metal containers or aseptically packaged in hermetically sealed paper containers.

* * * * * *

7 CFR Part 1139

Milk in the Lake Mead Marketing Area; Notice of Proposed Suspension of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed suspension of rules.

SUMMARY: This notice invites written comments on a proposal to suspend certain diversion provisions of the Lake Mead Federal milk order for May through July 1983. The proposed suspension would remove the requirement that 20 percent of a dairy farmer's monthly milk production be received at a pool plant in order for the remaining production to be eligible to be moved directly from the farm to nonpool manufacturing plants and still be priced and pooled under the order. The suspension was requested by a cooperative association to reduce hauling costs in disposing of an increased supply of milk that is not needed for fluid use.

DATE: Comments are due not later than May 17, 1983.

ADDRESS: Comments (two copies) should be filed with the Hearing Clerk, Room 1077, South Building, U.S. Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Robert F. Groene, Marketing Specialist, Dairy Division, Agricultural Marketing Service U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447-4824.

SUPPLEMENTARY INFORMATION: This proposed action has been reviewed under USDA procedures established to implement Executive Order 12291 and has been classified as a "non-major"action.

It has been determined that any need for suspending certain provisions of the order on an emergency basis precludes following certain review procedures set forth in Executive Order 12291. Such procedures would require that this document be submitted for review to the Office of Management and Budget at least 10 days prior to its publication in the **Federal Register.** However, this would not permit the completion of the required suspension procedures and the inclusion of May 1983 in the suspension period if it is found necessary. The initial request for this action was received on April 27, 1983.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this proposed action would not have a significant economic impact on a substantial number of small entities. Such action would lessen the regulatory impact of the order on certain milk handlers and would tend to insure that dairy farmers would continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), the suspension of certain provisions of the order regulating the handling of milk in the Lake Mead marketing area is being considered for the months of May through July 1983:

1. In § 1139.13(d)(2), the language "from whom at least 20 percent of his milk production is received during the month at a pool plant".

2. In § 1139.13(d)(3), the language "from whom at least 20 percent of his milk production is received during the month at the pool plant".

All persons who desire to submit written data, views, or arguments in connection with the proposed suspension should file two copies of such material with the Hearing Clerk, Room 1077, South Building, United States Department of Agriculture, Washington, D.C. 20250, not later than 7 days from the publication of this notice in the **Federal Register.** The period for filing comments is limited to 7 days because a longer period would not provide the time needed to complete the required procedures and include May 1983 in the suspension period.

The comments that are received will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.23(b)).

Statement of Consideration

This proposed action would make inoperative for May through July 1983 the requirement that a portion of a dairy farmer's monthly milk production be received at a pool plant in order for the remaining production to be eligible to be diverted directly from the farm to nonpool plants and still be priced and pooled under the order. The order now provides that 20 percent of a dairy farmer's production must be received at a pool plant in order for the remaining production of the producer to be eligible for diversion by a cooperative association or other handlers.

The action was requested by the Lake Mead Cooperative Association, which supplies a substantial part of the market's fluid milk needs and handles most of the market's reserve supplies. The cooperative association requested the suspension to provide for greater efficiencies in handling the market's reserve milk supply.

The need to handle an increasing quantity of reserve milk supplies is a result of a continuing imbalance between the market's fluid milk requirements and the milk supplies available from producers. The cooperative indicates that milk production continues to be heavy without a corresponding increase in sales to fluid milk outlets. As a result of these marketing conditions, the order limits on the quantity of milk that may be moved directly from farms to nonpool plants and still be priced under the order were suspended for the months of April through July 1983 (48 FR 16028). A similar suspension has been in effect since April 1982 (47 FR 17036, 47 FR 38496, 47 FR 55201).

Although the diversion limitations are currently suspended, the order still requires that 20 percent of a dairy farmer's monthly milk production must be received at a pool plant in order for the remaining quantity to be eligible for diversion to nonpool plants. As a result, the cooperative contends that substantial quantities of the milk of individual producers who are located farthest from the market must be shipped to pool plants solely for diversion qualification purposes. The shipment of distantly located milk supplies to pool plants displaces the milk of other producers who are located nearer to the distributing plants. Such milk must then be shipped to distant outlets for surplus disposal. Thus, the cooperative contends that it incurs unnecessary hauling costs because of the need to qualify the milk of its member producers to be eligible for diversion to nonpool plants. The cooperative indicates that suspension of this requirement would eliminate costly and inefficient movements of producer milk that are made solely for the purpose of pooling the milk of dairy farmers who have been regularly associated with the market.

The cooperative requested the suspension until a more permanent regulatory solution to the supply-demand imbalance in the market could be formulated based on the record of a public hearing. It is expected that a hearing will be held in the near future to consider proposals to amend the order to accommodate current marketing conditions.

FEDERAL HOME LOAN BANK BOARD

12 CFR Parts 556 and 563

[No. 83-244]

Interstate Transactions Involving Insured Institutions

AGENCY: Federal Home Loan Bank Board.

ACTION: Proposed rule.

SUMMARY: The Federal Home Loan Bank Board ("Board") is proposing to adopt a rule regarding interstate transactions involving institutions the accounts of which are insured ("insured institution") by the Federal Savings and Loan Insurance Corporation ("FSLIC" or "Corporation"). In supervisory cases, that rule generally would follow and clarify the Board's current policy, applicable to federal institutions, to permit interstate supervisory mergers, acquisitions, consolidations, and transfers of assets involving insured institutions. The Board also proposes to permit nonsupervisory interstate mergers, acquisitions, and establishment of branches where state law specifically permits entry by out-of-state institutions. This proposed change of policy is intended by the Board to address issues raised by recent and continuing changes in the financial services industry.

DATES: Comment period: July 11, 1983.

ADDRESS: Send comments to Director, Information Services Section, Office of the Secretariat, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552. Comments will be available for public inspection at this address.

FOR FURTHER INFORMATION CONTACT: Please contact Gayle Radley, Attorney, Division of Corporate and Regulatory Structure, Office of General Counsel, (202) 377-6961, Federal Home Loan Bank Board, at the above address.

SUPPLEMENTARY INFORMATION: The proposed rule embodies the policy of the Board, as operating head of the FSLIC, regarding permissible interestate transactions for insured institutions, *e.g.*, the establishment of a branch office in a state other than the state in which an institution's home office is located.

Background

Section 5 of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464) ("HOLA") grants the Board plenary authority to regulate the operations and activities of federal savings and loan institutions. Although the HOLA did not specifically address the Board's authority to permit branching until the passage of the Garn-St Germain Depository Institutions act of 1982 ("The Garn-St Germain Act" or "DIA"). The Board has always had the authority to regulate branching of federal associations both on an intrastate and an interstate basis. *See IBAA* v. *Federal Home Loan Bank Board*, Civ. No. 82-0508 (D.D.C. Aug. 4, 1982).

Accordingly, the Board has permitted federally chartered institutions to branch since 1937, 2 FR 825-26 (May 14, 1937), although its first statement of policy on branching was not adopted until 1967, 32 FR 20630-31 (Dec. 21, 1967). In 1972, the Board amended that policy to emphasize its preference for intrastate operations by stating that generally it would not approve applications for interstate branches, 37 FR 3987 (February 25, 1972). The policy statement made it clear, however, that the Board maintained its discretionary statutory authority to permit interstate branching.

This general policy has been modified because of the financial difficulties facing the thrift industry in recent years. From the beginning of 1980 through March 1983, th FSLIC arranged 354 supervisory mergers, many of which required FSLIC financial assistance. These transactions reflected the Corporation's need to protect the limited resources of its insurance fund by merging the most seriously financially weakened savings institutions with stronger institutions. In some of these cases, intrastate mergers could not be accomplished without increased risk and substantial cost to the insurance fund.

In response to these circumstances, the Board has amended its branching policy statement three times in the last two years to specifically authorize interstate operations by federally chartered institutions in supervisory cases. *See* Board Resolutions Nos. 82-498, 47 FR 34125 (Aug. 6, 1982); 81-157, 46 FR 19221 (Mar. 30, 1981); and 81-496, 46 FR 45120 (Sept. 10, 1981). These amendments enabled the FSLIC to draw from a wider range of merger partners to arrange interstate transactions in supervisory situations where acceptable merger partners could not be found in-state.

Current Board Policy

The current policy regarding branching by federal institutions, set forth at § 556.5 of the Regulations for the Federal Savings and Loan System ("Federal Regulations"), recognizes the Board's authority to permit interstate branching by federal institutions. While the Board has generally preferred intrastate transactions and its policy statement generally proscribes interstate transactions, the Board has approved acquisitions, mergers, and similar transactions that result in interstate operations in those cases where affirmative action by the FSLIC is necessary to prevent failure of an insured institution.

Under the current policy statement, an interstate transaction may be approved subject to the following conditions: (1) the interstate acquisition must be made in connection with action by the FSLIC to prevent the failure of an insured institution; (2) the FSLIC must determine that the insurance risk or cost to its fund would be reduced by the interstate transaction; and (3) there must be no equally desirable intrastate acquisition available that would pose a substantially lesser insurance risk or cost to the FSLIC. Institutions that establish interstate operations by virtue of supervisory transactions may thereafter open additional branches, merge with, acquire the assets of, or acquire another healthy institution in the newly entered state, subject to the same branching guidelines that apply to a federal institution with its home office in that state.

The Garn-St Germain Act

Congress responded to the changing competitive environment and to the financial crisis in the thrift industry by enacting the DIA. Among other things, the DIA reinforced the Board's existing plenary authority to approve branching by federally chartered institutions and expanded the authority of the Board to approve interstate activities resulting from transactions involving state-chartered insured institutions and savings and loan holding companies.

Section 334 of the DIA added a new paragraph (r) to Section 5 of the HOLA which specifically confirms the Board's authority to regulate interstate branching. Section 5(r) does, however, limit the permissible branching the Board can authorize for federal institutions by providing that no institution can operate a branch outside the state in which the institution has its home office, unless it qualifies as a domestic building and loan association under Section 7701(a)(19) of the Internal Revenue Code ("IRC") or meets the asset-composition test imposed by that IRC section. Further, all of the institution's assets located in the new state must meet the IRC standards for a qualified building and loan association. The statute, however, establishes certain exceptions to this provision. It grandfathers existing nonconforming branches and permits an institution to retain branches acquired under the emergency thrift acquisition authority set out in Section 123 of the DIA. Moreover, Section 5(r) exempts from the IRC restrictions interstate branches in those states where state law would permit the interstate branch regardless of conformance with IRC standards.

Section 123 of the Garn-St Germain Act created a new Section 408(m) of the National Housing Act ("NHA") to specifically authorize the FSLIC to override any state or federal law (other than the antitrust laws) that would prevent a financially troubled, insured institution from merging with any other insured institution or a bank insured by the Federal Deposit Insurance Corporation ("FDIC"), or being acquired by any person or company, including a bank holding company. Where an insured institution is acquired by a bank or a bank holding company, or where the home office of the acquired savings institution is not in the same state as the bank holding company's banking subsidiary, the institution is subject to national bank branching restrictions. Among other things, this section of the DIA requires that in the case of a minority-controlled institution, the FSLIC shall seek offers from other minority-controlled institutions before proceeding with the priorities established to evaluate alternative transactions governed by Section 123.

Proposed Rule on Interstate Transactons

In light of the dramatic changes that are occurring in the financial services industry which allow the movement of funds and transfer of financial services across the country in a matter of moments, the continued, nationwide competition from unregulated financial companies, and the financial crisis in the thrift industry, the Board is reevaluating its policy on interstate transactions and considering the adoption of a new policy in the form of a regulation applicable to all insured institutions.

The Board is aware that state-chartered thrift institutions already are able to establish branch offices *de novo*, by merger or acquisition on a nonsupervisory basis in a state that permits such entry by an out-of-state institution. In fact, some state-chartered thrifts are permitted by their state law, subject to FSLIC approval under the Savings and Loan Holding Company Act, 12 U.S.C. 1730a (the "Holding Company Act") to acquire out-of-state institutions as subsidiaries under their investment leeway authority. Thus, it appears that if federal thrifts are not permitted to branch to the same extent as their state-chartered competitors, they will operate at a competitive disadvantage with those state-chartered institutions.

This proposal would permit the establishment of interstate branch offices, whether *de novo*, by merger, acquisition, or otherwise, on a nonsupervisory basis where state law authorizes the transaction (*i.e.*, a "host state" approach). Under this host state approach, an insured institution headquartered or located in one state could acquire the assets of or merge with an institution having its home office in another state. Similarly, an out-of-state insured institution could establish a *de novo* branch in such a host state. In addition, this host state approach would govern FSLIC authorization under the Holding Company Act of an acquisition of an insured institution headquartered or located in one state by an insured institution, or a savings bank the accounts of which are insured by the FDIC, that is headquartered or located in a second state. An institution that acquires branches in a new state pursuant to this proposed regulation would be permitted to expand its operations within the new state to the same extent as could any other federal association headquartered or located in that state.

The Board believes that this approach to interstate transactions is consistent with the intent of Section 334 of the DIA, which limits interstate branching by federal institutions to branches that meet IRC-type requirements, except where such branches would be otherwise permitted by state law. At the same time, however, the Board specifically requests comments regarding the need for or advantages of adopting conditions to restrict interstate branching; *e.g.*, requiring reciprocal state laws that permit interstate transactions.

The proposed regulation also clarifies that the Board will permit a supervisory transaction that involves the interstate consolidation of insured institutions owned substantially in their entirety as of April 28, 1983, by the same individual or group of individuals. In addition, the Board is proposing to give out-of-state institutions that have established an in-state presence pursuant to supervisory or nonsupervisory acquisitions, priority over other out-of-state institutions when evaluating competing proposals in supervisory cases.

Nothing in this regulation should be interpreted as conflicting with the provisions of Title I of the DIA, especially Section 123, the terms and conditions of which will be applied by the Board where it is required to do so. Finally, this proposal does not otherwise affect the authority or restrictions applicable to the acquisition of an insured institution under the National Housing Act by a depository institution (other than an insured institution or an FDIC-insured savings bank), a multiple S&L holding company, or any other company.

As a general matter, the Board believes that deferral to state law would not unduly disrupt FSLIC supervisory activities and would recognize the interest and significance of state law in interstate transactions. The Board further recognizes that the pace of development in the regulated financial services industry raises significant questions regarding the advantages and appropriateness of absolute restrictions on interstate transactions which may act as artificial barriers to competition.

Home Offices

Finally, the Board proposes to permit an institution with its home office in one state to redesignate its home office to another state where it has a grandfathered branch office. However, the institution could not, thereafter, branch further in the state to which it has moved its home office solely upon the rationale that such state is now the state of the institution's home office.

Interstate operations, Branching, Mergers, Acquisitions, Consolidation of subsidiaries, Transfer of accounts.

Initial Regulatory Flexibility Analysis

Pursuant to section 3 of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the Board is providing the following initial regulatory flexibility analysis:

VOL
48
ISS
91
MY
10
1983
1 0
UMI

1. *Reasons, objectives, and legal basis underlying this proposed rule.* These factors are discussed elsewhere in the supplementary information.

2. *Small entities to which the proposed rule will apply.* The proposed rule will apply only to savings and loan institutions the accounts of which are insured by the FSLIC.

3. *Impact of the proposed rule on small institutions.* It is not anticipated that the proposed rule will have a significant impact on small institutions because, in the absence of the proposed rule, most of the transactions which the proposed rule would permit could be effectuated by a state-chartered institution.

4. *Overlapping or conflicting federal rules.* There are no known federal rules that may duplicate, overlap, or conflict with the proposed rule.

5. *Alternatives to the proposed rule.* The proposed rule would relieve existing or apparent restrictions on the regulated industry; thus, there are no alternatives that would have a lesser impact on small entities.

Accordingly, the Board hereby proposes to amend Part 556 of Subchapter C, and Part 563 of Subchapter D, Chapter V of Title 12, as set forth below.

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

PART 556—[AMENDED]

1. Amend § 556.5 by revising paragraph (a)(3) as follows:

§ 556.5 Establishment of branch offices.

(a) * * *

(3) Except as provided in § 571.15 of Subchapter D regarding interstate transactions involving insured institutions, the Board generally will approve the establishment of a branch office only in the state in which the home office of the institution is located. For purposes of this section the term home office will have the same meaning as it does in 571.15(c)(4).

* * * * *

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

PART 563—[AMENDED]

2. Add a new § 563.22–1 as follows:

§ 563.22–1 Interstate transactions involving insured institutions.

(a) *Interstate transactions.* An "interstate transaction" shall mean a transaction whereby an insured institution, including an insured institution acting as a holding company, acquires a full service corporation, of the nature available at a branch office of an insured institution, in a state other than the state in which it is headquartered. A savings bank the accounts of which are insured by the Federal Deposit Insurance Corporation ("FDIC") that is involved in a transaction with an insured institution shall be deemed to be an insured institution for the purpose of this section.

(b) *Supervisory interstate transactions.* (1) The Corporation may authorize the establishment of a branch office by an insured institution, which is not headquartered or located in the same state as such branch office, by merger, consolidation, transfer of assets and assumption of liabilities, acquisition, or similar transaction. In addition, the Corporation may authorize an insured institution to acquire, either directly or indirectly through a subsidiary, an insured institution which is headquartered or located in a state other than the state in which such acquiring insured institution is headquartered or located.

(2) The transactions governed by paragraph (b)(1) of this section may be authorized only under the following circumstances:

(i) the branch or insured institution will be acquired in connection with an action taken by the Corporation to (A) prevent the default of an insured institution, (B) restore an insured institution in default to normal operation, or (C) lessen the risk to the Corporation posed by an insured institution threatened by instability, when severe financial conditions exist which threaten the stability of a significant number of insured institutions or of insured institutions possessing significant resources;

(ii) the Corporation determines that its insurance liability or risk, including cost or potential cost, will be reduced as a result of the interstate transaction; and

(iii) no otherwise equally desirable non-interstate transaction has been determined by the Corporation to have been submitted.

(3)(i) Where a minority-controlled institution meets the standards set forth in (A), (B), and (C) of subsection (b)(2)(i) of this section, the Corporation will seek an offer from other minority-controlled institutions.

(ii) For the purpose of making a finding under paragraph (b)(2)(iii) of this section, an insured institution will be considered to be within any state in which it has a branch office.

(4) Notwithstanding the conditions set out in this paragraph (b), the Corporation may, in its discretion, approve the consolidation of insured institutions located in different states where (A) each transaction conforms to the standards of subsections (2) (ii) and (iii) of this paragraph (b), and (B) since April 26, 1983, at least 90 percent control of each of the institutions involved has been held by the same individual or group of individuals acting in concert to control such institutions.

(c) *Nonsupervisory transactions.* (1) The Corporation may authorize an insured institution which is headquartered or located in another state to establish a branch office in a state the law of which specifically authorizes the transaction by which the branch office is established ("host state approach"). If permitted by such state law, the branch office may be established *de novo* or by merger, consolidation, transfer of assets and assumption of liabilities, acquisition, or similar transaction. In addition, the Corporation may authorize under the same host state approach an insured institution headquartered or located in another state to acquire, either directly or indirectly through a subsidiary, an insured institution or similar depository institution headquartered or located in a state.

(2) The Corporation may authorize transactions that involve the establishment or acquisition of additional branch offices of an insured institution in any state in which the insured institution has already established an authorized branch in accordance with this section or its predecessor, section 556.5 of subchapter C.

(3) The Corporation may authorize the consolidation of some or all of the insured-institution subsidiaries controlled since February 14, 1968, by a multistate savings and loan holding company.

(4) An insured institution may designate as its home office a branch office it has in another state. If the institution's branch office(s) in such other state were achieved otherwise than in accordance with this section or its predecessor, section 556.5 of Subchapter C, however, the institution may not branch further in its new home-office state on the basis that such state is now the state of the institution's home office. For the purpose of future branching, the institution's former home-office state will continue to be viewed as the state of its home office.

(Sec. 5 of the Home Owners' Loan Act 48 Stat. 132 (12 U.S.C. 1464); secs. 402, 403, 406, 407, and 408 of the National Housing Act, 12 U.S.C. 1725, 1726, 1729 1730, and 1730a; Reorg. Plan No. 3 of 1947, 12 FR 4981; 3 CFR 1071 (1943–48 Comp)))

Dated: April 26, 1983.

By the Federal Home Loan Bank Board.

J. J. Finn,

Secretary.

BILLING CODE 6720–01–M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 116

Policies of General Application; Flood Insurance Protection; Floodplain Management and Wetlands Protection

AGENCY: Small Business Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Small Business Administration is publishing its proposed amendments to Part 116 of the Code of Federal Regulations (13 CFR Part 116).

The proposal would eliminate the requirement that all SBA borrowers purchase flood insurance if it is made available during the term of the loan, and amends the regulation to include insurance against mudslides and soil erosion (13 CFR 116.11 (a) and (b)).

The proposal would require disaster borrowers to purchase such insurance in an amount equal to the insurable value of the property or the maximum amount available. (13 CFR 116.11(c)).

The proposal also increases the loan amount under which SBA may waive the 8-step decision-making process, on a case-by-case basis, to determine adverse effects or incompatible development on wetlands or in a floodplain (13 CFR 116.32(a)(6)).

The proposal would also amend the "Purpose and Scope" section to conform it to current program conditions (13 CFR 116.10). It would further amend the section on "Related Regulations" to conform it to the current regulations of the Federal Emergency Management Agency.

DATE: Comments must be received on or before June 9, 1983.

ADDRESS: Written comments are to be submitted in duplicate to the Deputy Associate Administrator for Financial Assistance, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: Bernard Kulik, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416, 202–653–6879.

SUPPLEMENTARY INFORMATION: The following sections of Part 116 of 13 CFR would be amended by this proposal:

Section 116.10: The existing regulation fails to include Certified Development Companies (section 503 of the Small Business Investment Act, 15 U.S.C. 697) within the scope of this Part. The cited statute was enacted in July, 1980 (Pub. L. 96–302), whereas this § 116.10 of the regulations was promulgated in 1978 (43 FR 32128) and has not been amended since. The proposed amendment would cure this omission, but does not create a new requirement since the Flood Disaster Protection Act of 1973 mandates such inclusion. The proposed amendment also omits references to SBA programs which exist no longer, or have been merged into other listed programs.

Section 116.11(a): The existing regulation requires SBA disaster borrowers who have obtained loans at a time when flood insurance is not available in their localities to purchase flood insurance if it becomes available during the term of the loan. The Agency is not administratively able to enforce this requirement, which is not required by the Flood Disaster Protection Act of 1973 (42 U.S.C. 4001 *et seq.*), the basis for this subpart of Part 116. The reason for this inability is that neither borrowers nor SBA are always aware of the availability of flood insurance in a given locality because of the manner in which such areas are designated. Borrowers have been and will continue to be required to purchase such insurance if it is available prior to loan disbursement.

Section 116.11(b) would be amended to provide that SBA will not provide, directly or indirectly, disaster assistance to applicants located in special hazard areas, including those which are prone to mudslides and soil erosion, unless the community is participating in the Federal insurance program, or less than a year has elapsed since the community was advised of the availability of such program in the area. This change would conform the regulation to Federal Emergency Management Agency regulations, 44 CFR 64.3.

Section 116.11(c): The existing regulation merely requires a prospective borrower under all SBA financial assistance programs to provide and maintain flood insurance in the amount of the SBA loan balance, even if greater amounts are available and the insurable value of the collateral for the loan is also greater. As a result, SBA is sometimes called upon to provide subsequent disaster assistance which would not be necessary if the borrower had purchased the additional available insurance. The amendment would require borrowers to purchase the maximum amount of insurance available under the National Flood Insurance Act of 1968 not to exceed the insurable value of the property. It would further the purpose of the national flood insurance program by providing that all borrowers located in a special flood hazard area share the risk of such locations and are covered to the extent of their possible loss. It also would better protect SBA's collateral position with respect to collateral for a given loan. Many times the agency is not the first lienholder and in fact may be subordinated to more than one lien. This requirement will assure that the value of SBA's collateral is protected from floods in flood prone locations. This amendment would also benefit disaster victims by reducing the amount of debt they must incur due to a subsequent disaster.

This proposal will have an economic effect on all SBA borrowers, businesses as well as home owners, where the amount of the loan is less than the insurable value of the property. The additional cost for each borrower will be the difference between the flood insurance premiums for insurance in the amount of the SBA loan and the premiums for insurance in the amount of the insurable value of the property (or maximum insurance available, whichever is lower). Because of the impossibility of forecasting the time, magnitude or location of disasters, it is not feasible to estimate the total number of borrowers who will be located in flood prone areas nor the gross additional cost to any single borrower or all borrowers as a group. However, the gross amount of additional cost could be significant.

SBA, as indicated above, seeks to ensure its collateral for a given loan and avoid multiple loans to the same flood prone borrower by promulgating this requirement. In doing so, SBA is convinced that the benefits of the proposal outweigh its costs. The only reasonable alternative to this proposal is to continue the existent regulation, which has proved unsatisfactory. There are no additional recordkeeping or reporting requirements inherent in this proposal, and it does not contradict, overlap or duplicate any other existent regulations of statutes.

Section 116.12: This section incorrectly cites the related regulations. The amendment would conform the section to current regulations.

Section 116.32(a)(6): The existing regulation lists 6 actions which typically do not create adverse effects or incompatible development on wetlands or in floodplains. Therefore the full 8-step decision-making process [required by §116.35, implementing Section 2(a) of

VOL 48 ISS 91 MY 10 1983 UMI

Executive Order 11988] may be waived on a case-by-case basis in instances of these actions. One such action is "all SBA loan assistance of $300,000 or less." This regulation was promulgated May 24, 1978 (43 FR 22298). Due to inflation and the great increase in construction costs, the increased amount of $500,000 would more properly reflect the amount of construction contemplated by the regulation when it was promulgated. This amendment will relieve applicants for loans in the $300,000 to $500,000 range of the need to supply SBA with the necessary information and studies for the implementation of the prescribed decision-making process, and consequently will reduce both the cost and the time required to process such loan applications.

Except to the extent indicated above with respect to the revision of §116.11(c), these proposed regulations, if promulgated in final form, either singly or as a whole, would not have a significant economic impact on a substantial number of small entities. In addition, they do not constitute major regulations for the purpose of Executive Order 12291. To the extent that the revision of § 116.11(c) could have a significant economic impact or constitute a major rule, the statement above as to its potential effect is provided as a regulatory analysis for the purposes of the Regulatory Flexibility Act and E.O. 12291.

List of Subjects in 13 CFR Part 116

Flood insurance, Flood plains, Lead poisoning, Small businesses, Veterans.

Accordingly, pursuant to the authority of § 5(b)(6) of the Small Business Act (15 U.S.C. 631 *et seq),* Subparts B and D of Part 116, Chapter 1, Title 13 of the Code of Federal Regulations are proposed to be amended as follows:

Subpart B

PART 116—[AMENDED]

Section 116.10 would be revised to read as follows:

§ 116.10 Purpose and scope.

This subpart is established by the SBA to implement the Agency's responsibilities under section 102(a) of the Flood Disaster Protection Act of 1973, which prohibits Federal financial assistance for acquisition or construction purposes in special flood hazard areas (as designated by the Federal Emergency Management Administration, formerly by the Secretary of Housing and Urban Development), when persons in such areas are eligible for flood insurance which has been made available under the National Flood Insurance Act of 1968, and have not obtained such insurance. The following programs are subject to the legislation: 7(a) Business loans, 7(b) disaster loans, Sections 501, 502 and 503 development company loans, lease guarantees, small business investment companies and pollution control guarantees.

Section 116.11 would be amended by revising paragraphs (a), (b) and (c) to read as follows:

§ 116.11 Requirements.

(a) *General.* Flood insurance is required of a recipient of SBA direct or indirect assistance for construction purposes as defined in paragraph (d) of this section on the basis of its availability at the time of approval of a loan.

(b) *Community Participation in Insurance Program.* On and after July 1, 1975, no financial assistance will be authorized by which SBA would provide direct or indirect assistance to an applicant located in an identified special hazard area, including an area of mudslides and flood-related erosion as defined in Title 44, Code of Federal Regulations, § 59.1, unless (1) the community in which said applicant is located is participating in the flood insurance program or (2) less than a year has elapsed since the community was formally notified of the identification of a special flood hazard area within its boundaries.

(c) *Amount of coverage required.* The amount of flood insurance required is the maximum flood insurance available under the National Flood Insurance Act of 1968, as amended, but not to exceed the insurable value of the property.

* * * * *

Section 116.12 would be revised to read as follows:

§ 116.12 Related regulations.

It is the intent of the SBA that this Subpart B be administered in a manner consistent with regulations issued by the Federal Emergency Management Agency (44 CFR Parts 59–77).

Subpart D

Section 116.32 would be amended by removing from paragraph (a)(6) thereof: "$300,000" and inserting in place thereof "$500,000".

(Catalog of Federal Domestic Assistance Programs No. 59.008, Physical Disaster Loans)

Dated: April 1, 1983.

James C. Sanders,

Administrator.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Parts 4 and 11

[Docket No. RM83-13-000]

Annual Charges for Use of Government Dams and Other Structures Under Part I of the Federal Power Act; Extension of Time for Comments

May 5, 1983.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of proposed rulemaking; extension of comment period.

SUMMARY: On March 31, 1983, the Commission issued a Notice of Proposed Rulemaking involving annual charges for use of government dams and other structures under Part I of the Federal Power Act (48 FR 15134, April 7, 1983). The comment period is being extended at the request of the Annual Charges Policy Group and Idaho Power Company.

DATE: Comments must be submitted on or before July 15, 1983.

ADDRESS: Submit comments to: Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC. 20426.

FOR FURTHER INFORMATION CONTACT:

Kenneth F. Plumb, Secretary, (202) 357–8400.

Kenneth F. Plumb,

Secretary.

Annual Charges for the Use of Government Dams and Other Structures Under Part I of the Federal Power Act; Docket No. RM83–13–000; notice of extension of time.

May 5, 1983.

On April 15, 1983 and April 28, 1983, the Annual Charges Policy Group (ACPG) and Idaho Power Company (Idaho) filed respective motions for an extension of time to file comments in response to the Commission's Notice of Proposed Rulemaking issued March 31, 1983, in the above-docketed proceeding. The ACPG's motion states that because of the complexity of the issues involved in this proceeding, the ACPG requires additional time to perform a comprehensive analysis of the proposed rule and also to review data and information developed at the technical conference which was recently held in this proceeding. The ACPG's motion further states that the National Water Resources Association supports this extension request. Idaho's motion states that the company requires additional time in order to analyze the proposed rule.

Upon consideration, notice is hereby given that an extension of time for the filing of comments is granted to and including July 15, 1983.

[FR Doc. 83-12495 Filed 5-9-83; 8:45 am]

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 158

[Docket No. 83-0110]

Quick Frozen Cauliflower; Advance Notice of Proposed Rulemaking on the Possible Establishment of a Standard

AGENCY: Food and Drug Administration.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Food and Drug Administration (FDA) is offering to interested persons an opportunity to review the Codex Standard for Quick Frozen Cauliflower (Codex standard) developed by the Codex Alimentarius Comission and to comment on the desirability and need for a U.S. standard for this food. The Codex standard was submitted to the United States for consideration for acceptance. If the comments received do not support the need for a U.S. standard for the food, FDA will not propose a standard.

DATE: Comments by July 11, 1983.

ADDRESS: Written comments, data, or other information to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

F. Leo Kauffman, Bureau of Foods (HFF–214), Food and Drug Administration, 200 C Street, SW., Washington, D.C. 20204, 202–245–1164.

SUPPLEMENTARY INFORMATION: The Food and Agriculture Organization (FAO) and the World Health Organization (WHO) jointly sponsor the Codex Alimentarius Commission, which conducts a program for developing worldwide food standards. The program has developed a large number of Codex standards, among which is that for quick frozen cauliflower.

As a member of the Codex Alimentarius Commision, the United States is under treaty obligation to consider all Codex standards for acceptance. The rules of procedure of the Codex Alimentarius Commission state that a Codex standard may be accepted by a participating country in one of three ways: full acceptance, target acceptance, or acceptance with specified deviations. A commitment to acceptance at a designated future date constitutes target acceptance. A country's acceptance of a Codex standard signifies that, except as provided for by specified deviations, a product that complies with the Codex standard may be distributed freely within the accepting country. A participating country that concludes that it will not accept a Codex standard is requested to inform the Codex Alimentarius Commission of this fact and the reasons therefor, the manner in which similar foods marketed in the country differ from the Codex standard, and whether the country will permit products complying with the Codex standard to move freely in that country's commerce.

For the United States to accept some or all of the provisions of a Codex standard for any food to which the Federal Food, Drug, and Cosmetic Act (the Act) applies, it is necessary either to establish a standard under the authority of section 401 of the act (21 U.S.C. 341) Or to revise an existing standard to incorporate the provisions within the U.S. standard. At present, there is no U.S. standard for quick frozen cauliflower. Ther are only voluntary grade standards for marketing frozen cauliflower, including identity and quality requirements, developed by the U.S. Department of Agriculture.

Under the procedure prescribed in § 130.6(b)(3) (21 CFR 130.6(b)(3)), FDA is providing an opportunity for review and informal comment: (1) On the need for and desirability of, a standard for this food, (2) on the specific provisions of the Codex standard (Codex standard 111–1981) and any modifications that should be included in a U.S. standard, if established, and (3) on any other pertinent points.

FDA advises that if the comments received do not support the need for a U.S. standard for this food, no U.S. standard will be proposed. If this decision is reached, FDA will inform the Codex Alimentarius Commission that an imported food that complies with the requirements of the Codex standard may move freely in interstate commerce in this country providing it complies with applicable U.S. laws and regulations.

Owing to the large number of countries, often with diverse food regulations, that are associated with Codex, certain provisions found in Codex standards may not be in keeping with aspects of U.S. policy and regulations. Codex standards customarily include hygiene requirements, limits on contaminants, certain basic labeling requirements, and other factors. These factors are not considered a part of food standards under section 401 of the act. Rather, they are dealt with under other sections of the act and are not included in a proposed U.S. standard.

In addition, the Codex standard for quick frozen cauliflower specifies analytical methods by which compliance with certain provisions is to be determined. As stated in 21 CFR 2.19, FDA uses the methods published in the latest edition of "Official Methods of Analysis of the Association of Official Analytical Chemists," when these are available in preference to other methods. FDA will adhere to this policy in any U.S. standard proposed under this notice.

Under § 130.6(c), all persons who wish to submit comments are encouraged and requested to consult with different interested groups (consumers, industry, the academic community, professional organizations, and others) in formulating their comments, and to include a statement of any meetings or discussions that have been held with other groups.

List of Subjects in 21 CFR Part 158

Food standards, Frozen vegetables, Vegetables.

The Codex standard under consideration is as follows:

Codex STAN 111-1981—Codex Standard for Quick Frozen Cauliflower Worldwide Standard

1. *Scope.*

This standard shall apply to quick frozen cauliflower of the species *Brassica oleracea* L. *var. botrytis* L. as defined below and offered for direct consumption without further processing, except for re-packing, if required. It does not apply to the product when indicated as intended for further processing or for other industrial purposes.

2. *Description.*

2.1 *Product Definition.*

Quick frozen cauliflower is the product prepared from fresh, clean, sound heads of the cauliflower plant conforming to the characteristics of the species *Brassica oleracea* L. *var. botrytis* L., which heads may be trimmed and separated into parts, and which are washed and sufficiently blanched to ensure stability of colour and flavour during normal marketing cycles.

2.2 *Process Definition.*

VOL 48 ISS 91 MY 10 1983

2.2.1 Quick frozen cauliflower is the product subjected to a freezing process in appropriate equipment and complying with the conditions laid down hereafter. This freezing operation shall be carried out in such a way that the range of temperature of maximum crystallization is passed quickly. The quick freezing process shall not be regarded as complete unless and until the product temperature has reached −18°C (0°F) at the thermal centre after thermal stabilization.

2.2.2 The recognized practice of re-packing quick frozen products under controlled conditions is permitted.

2.3 *Handling Practice.*

The product shall be handled under such conditions as will maintain the quality during transportation, storage and distribution up to and including the time of final sale. It is recommended that during storage, transportation, distribution and retail, the product be handled in accordance with the provisions in the *Recommended International Code of Practice for the Processing and Handling of Quick Frozen Foods* (Ref. No. CAC/RCP 8–1976).

2.4 *Presentation.*

2.4.1 *Style.*

(a) Whole—the whole, intact head, which is trimmed at the base and which may have attached small, tender, modified leaves.

(b) Split—the whole head, cut vertically into two or more sections.

(c) Florets [1]—segments of the head, which may have a portion of the secondary stem attached, measuring at least 12 mm across the top in the greatest dimension. A maximum tolerance of 20 percent m/m is permitted for units in which the greatest dimension across the floret is more than 5 mm and less than 12 mm. Small, tender modified leaves may be present or attached to the units.

2.4.2 *Other Styles.*

Any other presentation of the product shall be permitted provided that it:

(a) is sufficiently distinctive from other forms of presentation laid down in this standard;

(b) meets all other requirements of this standard;

(c) is adequately described on the label to avoid confusing or misleading the consumer.

2.4.3 *Sizing.*

2.4.3.1 Quick frozen cauliflower florets may to presented sized or unsized.

2.4.3.2 If presented as size graded they shall conform to the following specifications:

(a) *Large florets*—segments of head measuring at least 30 mm across the top in the greatest dimension and of which a portion of secondary stem may be attached. Small tender modified leaves may be present or attached to the unit.

(b) *Small florets*—segments of head measuring at least 12 mm but less than 30 mm across the top in the greatest dimension and to which a small portion of secondary stem may be attached. Small tender modified leaves may be present or attached to the unit.

2.4.4 *Tolerances for Sizes.*

2.4.4.1 When cauliflower is presented as sized, a tolerance of 20 percent by weight is permitted as not conforming to the size indicated on the package.

2.4.4.2 *Standard Sample Size.*

The standard sample size shall be 500 g.

2.4.5 *Definition of "Defective" for Presentation.*

Any sample unit which fails to comply with the sizing requirements of Section 2.4.4. shall be regarded as defective.

2.4.6 *Lot Acceptance for Presentation Factors.*

A lot will be considered acceptable with respect to sizing when the number of "defectives" as defined in section 2.4.5 does not exceed the acceptance number (c) for the appropriate sample size as specified in the *FAO/WHO Codex Alimentarius Sampling Plans for Prepackaged Foods* (Ref. No. CAC/RM 42–1969).

3. *Essential Composition and Quality Factors.*

3.1 *Optional Ingredients.*

Salt (sodium chloride);

Condiments, such as spices and herbs.

3.2 *Quality Factors.*

3.2.1 *General Requirements.*

Quick frozen cauliflower shall be:

—of reasonably uniform white to dark cream colour over the tops of the units which may be slightly dull and have a tinge of green, yellow or pink. The stem or branch portions may be light green or have a tinge of blue;

—free from foreign flavour or odour, taking into consideration any added optional ingredients;

—clean, free from sand, grit and other foreign material;

and with respect to Visual Defects or Other Defects subject to a tolerance shall be:

—reasonably free from discoloured areas confined essentially to the surface;

—reasonably free from damaged or blemished areas;

—reasonably free from fibrous stems;

—reasonably free from poorly trimmed units;

—reasonably free from fragments;

—reasonably compact and reasonably well-developed;

—reasonably free from coarse green leaves;

for floret styles:

—practically free from loose stems.

3.2.2 *Definition of Visual Defects.*

(a) Discolouration—grey, brown, green or similar discolouration confined essentially to the flower surface of the unit and which materially detracts from the appearance of the product. Branches or stems with a bluish or greenish tinge are not to be considered as discoloured.

Light—the discolouration disappears almost entirely upon cooking.

Dark—the discolouration does not disappear upon cooking.

(b) *Blemished*—A unit affected by pathological or insect injury, and which may extend into the cauliflower.

Minor—the appearance of the unit is only slightly affected.

Major—the appearance of the unit is materially affected.

Serious—the appearance of the unit is objectionally affected to such an extent that it would customarily be discarded under normal culinary preparation.

(c) *Mechanically damaged.*

Major—A unit in which more than 50 percent of the curd has been mechanically damaged or is missing (for split and floret styles).

Major—A unit in which more than 25 percent of the curd has been mechanically damaged or is missing (for whole style).

(d) *Fibrous.*

Major—A unit which possesses tough fibres that are quite noticeable and materially affect the eating quality.

Serious—A unit which possesses tough fibres that are objectionable and of such nature that it would be customarily discarded.

(e) *Poorly trimmed*—A unit which has deep-knife gouges or a ragged appearance.

(f) *Leaves*—coarse green leaves or parts thereof whether or not attached to the unit.

(g) *Fragments*—portion of the floret 5 mm or less across the greatest dimension.

(h) *Not compact*—A unit in which the florets are spreading, or the flowerhead has a "ricey" appearance of the flowerhead is very soft or mushy.

(i) *Loose stem*—Each piece of stem exceeding 2.5 cm in length detached from a cauliflower unit.

3.2.3 *Standard Sample Size.*

[1] The term "clusters" is used as an alternative to "florets" in some English speaking countries.

(i) Whole style—The minimum number of heads weighing in total at least 500 grammes.

(ii) Split sections—500 grammes.

(ii) Florets—500 grammes.

(iv) Other styles—500 grammes.

3.2.4 *Tolerance for Visual Defects.*

For *tolerances* based on the standard sample sizes indicated in section 3.2.3, visual defects shall be assigned points in accordance with the appropriate Table in this Section. The maximum number of defects permitted is the Total Allowable Points rating indicated for the respective categories Minor, Major and Serious or the Combined Total of the foregoing categories.

3.3 *Definition of "defective" for Quality Factors.*

Any sample unit taken in accordance with the FAO/WHO Codex Alimentarius Sampling Plans for Prepackaged Foods (AQL-6.5) (Ref. No. CAC/RM 42-1969) shall be regarded as a "defective" for the respective characteristics when:

(a) it fails to meet the general requirements given in section 3.2.1.

(b) It exceeds the "maximum total points" in any one or more of the defect categories in Table 1 or Table 2, as appropriate for the style given in section 3.2.4.

3.4. *Lot Acceptance for Quality Factors.*

A lot will be considered acceptable with respect to Quality Factors when the number of "defectives" as defined in section 3.3 does not exceed the acceptance number (c) for the appropriate sample size as specified in the *FAO/WHO Codex Alimentarius Sampling Plans for Prepackaged Foods (Ref. No. CAC/RM 42–1969).*

TABLE 1—WHOLE STYLE

Defect	Unit of measurement	Defect categories			
		Minor	Major	Serious	Total
Discolouration:					
Light	Each area or combined area of 8 sq. cm.	1			
Dark	Each area or combined area of 4 sq. cm.		2		
Blemished:					
Minor	Each head	1			
Major	do		2		
Serious	do			4

Major	do		2		
Fibrous:					
Major	do		2		
Serious	do			4	
Poorly trimmed	do		2		
Leaves	Each 2 sq. cm		2		
Not compact	Each area of combined area of 12 sq. cm.		2		
Total allowable points		10	6	4	10

TABLE 2—SPLIT, FLORETS AND OTHER STYLES

Defect	Unit of measurement	Defect categories			
		Minor	Major	Serious	Total
Discolouration:					
Light	Each area or combined area of 8 sq. cm.	1			
Dark	Each area or combined area of 4 sq. cm.		2		
Blemished:					
Minor	Each unit	1			
Major	do		2		
Serious	do			4	
Mechanically damaged:					
Major	do		2		
Fibrous:					
Major	do		2		
Serious	do			4	
Poorly trimmed	do	1			
Leaves	Each 2 sq. cm		2		
Fragments	Each 3 percent m/m		2		
Not compact	Each area or combined area of 12 sq. cm.		2		
Loose stem	Each piece	1			
Total allowable points		25	16	4	25

4. *Food Additives.*

4.1 Citric acid or malic acid, as processing aids for use in the blanching or cooling water in accordance with GMP.

4.2 *Carry-Over Principle.*

"Section 3" of the "Principle relating to the Carry-Over of Additives Into Foods" as set forth in Volume I of the Codex Alimentarius shall apply.

5. *Hygiene.*

It is recommended that the product covered by the provisions of this standard be prepared in accordance with the International Code of Practice—General Principles of Food Hygiene (Ref. No. CAC/RCP 1–1969, Rev. 1) recommended by the Codex Alimentarius Commission.

6. *Labelling.*

In addition to sections 1, 2, 4 and 6 of the *Codex General Standard for the Labelling of Prepackaged Foods* (Ref. No. CODEX STAN 1–1981), the following specific provisions apply:

6.1 *The Name of the Food.*

6.1.1 The name of the food as declared on the label shall include "cauliflower". The words "quick-frozen" shall also appear on the label except that the term "frozen" [2] may be applied in countries where this term is customarily used for describing the product processed in accordance with section 2.2 of the standard.

6.1.2 The name of the food shall also include the style, as appropriate: "whole", "split" or "florets" [3] in accordance with sections 2.4.1 and 2.4.3.

6.1.3 If the product is produced in accordance with Section 2.4.2 the label shall contain in close proximity to the word cauliflower such additional words or phrases that will avoid misleading or confusing the consumer.

6.1.4 When any ingredient other than salt, has been added which imparts to the food the distinctive flavour of the ingredient, the name of the food shall be accompanied by the term "with X" or "X flavoured", as appropriate.

6.1.5 If a term designating the size of the florets is used:

(a) the words "large florets" or "small florets" as appropriate, and/or

(b) by a correct representation on the label of the size range to which the florets predominantly conform, and/or

(c) the customary method of declaring size in the country in which the product is sold.

6.2 *List of Ingredients.*

A complete list of ingredients shall be declared in descending order of proportion in accordance with section 3.2(c) of the *Codex General Standard for the Labelling of Prepackaged Foods* (Ref. No. CODEX STAN 1–1981), except that the food additives present in the

[2] "Frozen": This term is used as an alternative to "quick frozen" in some English-speaking countries.

[3] The term "clusters" is used as an alternative to "florets" in some English-speaking countries.

UMI

UMI

product in accordance with sections 4.1 and 4.2 need not be declared.

6.3 *Net Contents.*

The net contents shall be declared by weight in either the metric system ("Systeme international" units) or avoirdupois or both systems of measurement as required by the country in which the food is sold.

6.4 *Name and Address.*

The name and address of the manufacturer, packer, distributor, importer, exporter or vendor of the food shall be declared.

6.5 *Country of Origin.*

The country of origin of the product shall be declared if its omission would mislead or deceive the consumer.

6.6 *Lot Identification.*

Each container shall be embossed or otherwise permanently marked, in code or in clear, to identify the producing factory and the lot.

6.7 *Additional Requirements.*

The packages shall bear clear directions for keeping from the time they are purchased from the retailer to the time of their use, as well as directions for cooking.

6.8 *Bulk Packs.*

In the case of quick frozen cauliflower in bulk, the information required in Sections 6.1 to 6.5 shall either be placed on the container or be given in accompanying documents, except that the name of the food accompanied by the words "quick frozen" (the term "frozen" may be used in accordance with section 6.1.1. of this standard) and the name and address of the manufacturer or packer shall appear on the container.

7. *Packaging.*

Packaging used for quick frozen cauliflower shall:

(a) protect the organoleptic and quality characteristics of the product;

(b) protect the product from microbiological and other contamination;

(c) protect the product from dehydration and, where appropriate, leakage as far as technologically practicable; and

(d) not pass on to the product any odour, taste, colour or other foreign characteristics, throughout the processing (where applicable) and distribution of the product up to the time of final sale.

8. *Methods of Examination, Analysis and sampling.*

8.1 *Sampling.*

8.1.1 *Sampling for presentation and visual defects:*

For those provisions detailed in sections 2.4 and 3.2 of this standard, sampling shall be carried out in accordance with the FAO/WHO Codex Alimentarius Sampling Plans for Prepackaged Foods (AQL 6.5) (Ref. No. CAC/RM 42–1969).

8.1.2 *Sampling for net weight:* Shall be carried out in accordance with the FAO/WHO Sampling Plans for the Determination of Net Weight (under elaboration by the Codex Committee on Methods of Analysis and Sampling).

8.1.3 *Sampling for Analytical Requirements:* Sampling Plans to be eleborated.

8.2 *Thawing Procedure.*

FAO/WHO Codex Alimentarius Standard Procedure for Thawing of Quick Frozen Fruits and Vegetables (Ref. No. CAC/RM 32–1970).

8.3 *Cooking Procedure.*

FAO/WHO Codex Alimentarius Standard Procedure for Cooking of Quick Frozen Vegetables (Ref. No. CAC/RM 33–1970). The cooking time for the quick frozen cauliflower varies according to the style and variety characteristics. The following figures should be considerd as guidelines:

Style and variety	Cooking time—(minutes)
Whole and split	10–20
Florets	3–8

8.4 *Determination of Net Weight.*

FAO/WHO Codex Alimentarius Standard Procedure for Determination of Net Weight of Frozen Fruits and Vegetables (Ref. No. CAC/RM 34–1970); also contained in the *Codex Standard for Quick Frozen Peas,* (Codex STAN 41–1981, Section 8.3).

Interested persons may, on or before July 11, 1983 submit to the Dockets Management Branch (address above), written comments regarding this notice. Two copies of any comments are to be submitted, except that individuals may submit one copy. Each comment should identify the title of the Codex standard and the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Executive Order 12291 does not apply to regulations issued in accordance with the formal rulemaking provisions of the Administrative Procedure Act (5 U.S.C. 556, 557). Food standards promulgated under 21 U.S.C. 341 and 371(e) fall under this exemption. However, any comments submitted in support of establishing a U.S. standard for this food should be supported by appropriate information and data regarding impact on small business consistent with the requirements of the Regulatory Flexibility Act (Pub. L. 96–354).

Dated: April 29, 1983.

Sanford A. Miller,

Director, Bureau of Foods.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[LR–82–82]

Calculation of Over-Issuance and Cumulative Cash Flow Deficit Under the Arbitrage Bond Regulations; Public Hearing on Proposed Regulations.

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed regulations relating to amendments proposed to clarify and correct the arbitrage bond regulations relating to over-issuance and cumulative cash flow deficit.

DATES: The public hearing will be held on Thursday, June 9, 1983, beginning at 10:00 am. Outlines or oral comments must be delivered or mailed by Thursday, May 26, 1983.

ADDRESS: The public hearing will be held in the I.R.S. Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, N.W., Washington, D.C. The requests to speak and outlines of oral comments should be submitted to the Commissioner of Internal Revenue, Attn: CC:LR:T (LR–82–82), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT: Lou Ann Craner of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, Washington, D.C. 20224, 202–566–3935, not a toll-free call.

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under section 103(c) of the Internal Revenue Code of 1954. The proposed regulations appeared in the **Federal Register** for Tuesday, March 29, 1983 (48 FR 13051).

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit, not later than Thursday, May 26, 1983, an outline of the oral comments to be presented at the hearing and the time they wish to devote to each subject.

Each speaker will be limited to 10 minutes for an oral presentation exclusive of the time consumed by questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue.

George H. Jelly,

Director, Legislation and Regulations Division.

BILLING CODE 4830–01–M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 905

Surface Mining and Reclamation Operations Under a Federal Program for California

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Cancellaton of Promulgation Process for a Federal Program for California.

SUMMARY: The Office of Surface Mining (OSM) is announcing the withdrawal of the proposed Federal program to regulate surface coal mining and reclamation operations for California because it is highly unlikely there will be any mining of coal on non-Federal and non-Indian lands in that State in the forseeable future.

DATES: None.

FOR FURTHER INFORMATION CONTACT: James M. Kress, Branch of Regulatory Programs, Office of Surface Mining, U.S. Department of the Interior, 1951 Constitution Avenue NW., Washington, D.C. 20240, Telephone: (202) 343–5866.

SUPPLEMENTARY INFORMATION: On July 26, 1982, the Office of Surface Mining published a proposed Federal program for California in the **Federal Register** to regulate coal exploration and surface coal mining and reclamation operations on non-Federal and non-Indian lands in that State (47 FR 32686). On August 12, 1982, OSM postponed the scheduled public hearing and extended the comment period indefinitely (47 FR 35011). During the comment period, OSM was informed by the California Division of Mines and Geology that all known coal deposits in California were too small and of too poor quality for commercial recovery in the forseeable future.

The Surface Mining Control and Reclamation Act in Sections 503 and 504 (30 U.S.C. 1253 and 1254), and OSM's regulations (30 CFR 736.11), require that there be an approved State or Federal regulatory program in States having coal reserves on non-Federal or non-Indian lands and in which there is a likelihood of either coal exploration or development before June 1985. Since development of California's known coal reserves on non-Federal and non-Indian lands is extremely unlikely, a regulatory program is not required. Therefore, the proposed regulatory program for California is being withdrawn and the promulgation process cancelled. Should information come to light which indicates an increased likelihood of coal exploration or surface coal mining on non-Federal and non-Indian lands within the State, promulgation of the required program will be reinitiated by subsequent rulemaking notice.

Dated: May 3, 1983.

William B. Schmidt,

Assistant Director, Program Operations and Inspection Office of Surface Mining.

[FR Doc. 83–12454 Filed 5–9–83; 8:45 am]

BILLING CODE 4310–05–M

VETERANS ADMINISTRATION

38 CFR Part 21

Vocational Rehabilitation Amendments

AGENCY: Veterans Administration.

ACTION: Proposed rules.

SUMMARY: The Veterans Administration is publishing proposed regulations to implement provisions of the Veterans' Rehabilitation and Education Amendments of 1980. Title 1 of these amendments updates and expands the vocational rehabilitation program. This revision of chapter 31 of title 38, United States Code, the first since its establishment for veterans of World War II, improves the vocational rehabilitation program, and helps to assure that service-disabled veterans will benefit from the latest concepts and methods developed in the field of rehabilitation. The revision of the law requires a corresponding revision of regulations governing the program. The regulations contained herein implement provisions of the law dealing with the process of measuring the rate at which a rehabilitation program is being pursued, approving and authorizing payment of subsistence allowance for training and rehabilitation services appropriate to the rate of pursuit, and approving leaves of absence during a rehabilitation program. These regulations will better acquaint eligible veterans, educational institutions and the public at large with the way the provisions will be implemented.

DATES: Comments must be received on or before July 6, 1983. It is proposed that these regulations be made effective on the same dates as the provisions of law on which they are based. Following this principle, provisions for approval and authorization of subsistence allowance generally would be effective October 1, 1980, as would be provisions for measurement of the rate at which training is pursued. Regulations implementing provisions which establish new categories of service under the rehabilitation program or modify existing policy generally would be effective April 1, 1981. Provisions for approval of leaves of absence also would be effective April 1, 1981.

ADDRESS: Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW, Washington, D.C. 20420. All written comments will be available for public inspection at the above address only between the hours of 8 a.m. and 4:30 p.m. Monday through Friday (except holidays) until July 20, 1983.

FOR FURTHER INFORMATION CONTACT: Jeffrey T. Goetz, Assistant Director for Policy and Program Development, Vocational Rehabilitation and Counseling Service, Department of Veterans Benefits (202) 389–2886.

SUPPLEMENTARY INFORMATION: The Veterans Administration published a portion of the proposed regulations implementing some of the provisions of the Veterans' Rehabilitation and Education Amendments of 1980 in the **Federal Register** on April 29, 1982, at pages 18382 to 18386. The second portion of the proposed regulations was published in the **Federal Register** on September 15, 1982, at pages 40650 to 40659. These proposals constitute an additional portion of the regulations to be proposed for this purpose. Specifically, these regulations contain policy for determining the rate at which

VOL 48 ISS 91 MY 10 1983

a rehabilitation program is being pursued, approval and authorization of payment of subsistence allowance in accordance with the rate of pursuit, authorization and payment of training and rehabilitation services, and approval of leaves of absence during a rehabilitation program.

These proposed regulations do not meet the criteria for major rules as contained in Executive Order 12291. There will be no new reporting or recordkeeping requirements, or other compliance costs, to business or educational institutions caused by this proposal. The proposal will not affect other agencies. However, this proposal may induce some veterans to train under chapter 31, title 38, U.S.C., who would not have done so otherwise. Furthermore, these proposed regulations will affect every veteran who is eligible to train under chapter 31, title 38, U.S.C. However, these effects of the law do not place the proposed regulations in the category of major rules. Since these proposed regulations are not major rules they do not require a regulatory analysis. They will not have an annual effect of $1 million on the economy. They will not create major increases in costs or prices. They will not impose major recordkeeping burdens on anyone and they will not cause major additional costs to recipients of federal assistance. Accordingly, the Veterans Administration has not prepared an analysis of these proposed regulations.

The Administrator has certified that these proposed rules will not, if promulgated, have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b), these proposed rules are therefore exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604. The reason for this certification is that the proposed rules simply incorporate the requirements of Pub. L. 96–466 for authorization and payment for services and support being provided during a rehabilitation program. These rules will therefore have no significant impact on small entities.

The Catalog of Federal Domestic Assistance Number is 64.116.

List of Subjects In 38 CFR Part 21

Civil rights, Claims, Education, Grant programs, Loan programs, Reporting requirements, Schools, Veterans, Vocational education, Vocational rehabilitation.

Approved: March 21, 1983.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

38 CFR Part 21, "Vocational Rehabilitation and Education," is amended as follows:

1. Section 21.260 and the center heading preceding the section are revised as follows:

Monetary Assistance Services

§ 21.260 Subsistence allowance.

(a) *General.* A veteran in a rehabilitation program under chapter 31 will receive a monthly subsistence allowance at the rates specified in paragraph (b), unless he or she has elected to receive payment at the rate of the monthly educational assistance allowance payable under chapter 34 for similar training. See § 21.264 and § 21.4136. (38 U.S.C. 1506(a))

(b) *Rate of payment.* Subsistence allowance is paid at the following rates effective October 1, 1980.

Type of program	Monthly rate of subsistence allowance			
	No dependents	One dependent	Two dependents	Additional amount for each dependent over two
Institutional: [1]				
Full-time	$262	$349	$411	$30
¾ time	212	262	308	23
½ time	141	175	206	15
Nonpay on-job training or experience in a federal agency; training in the home; vocational course in a rehabilitation facility or sheltered workshop; independent instructor: Full time only	262	349	411	30
Farm cooperative; apprenticeship or other on-job training: [2] Full time only	246	297	343	22
Combination (institutional and OJT) (Full time only):				
Institutional ½ time or more	262	349	411	30
OJT ½ time or more	246	297	343	22
Non-farm cooperative (Full time only):				
Institutional	262	349	411	30
On-job	246	297	343	22
Improvement of rehabilitation potential: Full time only	262	349	411	30
Extended evaluation: [3]				
Independent living:				
Full time	262	349	411	30
¾ time	212	262	308	23
½ time	141	175	206	15
¼ time	71	87	103	8

[1] Measurement of rate of pursuit (§§ 21.4270–21.4275).
[2] For on-job training, subsistance allowance may not exceed the difference between the monthly training wage, exclusive of overtime, and the entrance journeyman wage for the veteran's objective.
[3] Rates for extended evaluation effective April 1, 1981.

(c) *Subsistence allowance precluded.* A subsistence allowance may not be paid for any period during which the only authorized services being furnished to the veteran by the VA are:

(1) Initial evaluation;

(2) Employment services; or

(3) Counseling. (38 U.S.C. 1508(a))

§ 21.261 [Removed]

2. Section 21.261 is removed.

3. Section 21.262 is revised as follows:

§ 21.262 Reimbursement of costs for training and rehabilitation services.

(a) *General.* The use of facilities and services shall be provided through contract, agreement of other cooperative arrangement between the VA and the vendor. (38 U.S.C. 1515(b))

(b) *VA Procurement Regulations.* Payment of charges for training and rehabilitation services authorized under chapter 31 are subject to the provisions of applicable VA Procurement Regulations especially 41 CFR Part 8–15 and Subpart 8–95.2. (38 U.S.C. 1515(a))

§ 21.263 [Removed]

4. Section 21.263 is removed.

5. Section 21.264 is revised as follows:

§ 21.264 Election of payment at the chapter 34 educational assistance rate.

(a) *Eligibility.* A veteran who applies for and is found entitled to training or education under chapter 31, may elect to receive payment at the educational allowance rate and other assistance furnished under chapter 34, for similar training in lieu of a subsistence allowance, provided the following criteria are met:

(1) The veteran has remaining eligibility for and entitlement to educational assistance under chapter 34;

(2) The veteran enrolls in a program of education or training approved for benefits under chapter 34;

(3) The program of education is part of an IWRP (Individualized Written Rehabilitation Plan) approved by the VA. (38 U.S.C. 1508)

(b) *Reelection of subsistence allowance.* Reelection of payment of benefits at the chapter 31 subsistence allowance rate may be made only after completion of a term, quarter, semester, or other period of instruction unless:

(1) Chapter 34 eligibility or entitlement ends earlier;

(2) Failure to approve immediate reelection would prevent the veteran from continuing in the rehabilitation program. (38 U.S.C. 1508(b))

(c) *Services precluded.* A veteran entitled to vocational rehabilitation training or education who elects payment at the educational assistance rate payable under chapter 34 shall be provided the same training and rehabilitation services as other veterans under chapter 31, but may not be provided:

(1) Subsistence allowance;

(2) Loans from the revolving fund loan;

(3) Payment of costs for:

(i) Vocational and other training services;

(ii) Supplies; or

(iii) Individualized tutorial assistance. (38 U.S.C. 1508(f))

(d) *Chapter 34 provisions applicable.* A veteran who has elected payment at the chapter 34 educational assistance rate must meet the same terms and conditions as other veteran pursuing similiar training under chapter 34. (38 U.S.C. 1508(f))

§ 21.265 [Removed]

6. Section 21.265 is removed.

7. Section 21.266 is revised as follows:

§ 21.266 Payment of subsistence allowance under special conditions.

(a) *Hospitalized veteran or serviceperson.* A veteran pursuing a VA rehabilitation program under chapter 31 while hospitalized in a VA medical center or in any other hospital at VA expense may receive a subsistence allowance. The subsistence allowance will be paid at the rates specified in § 21.260, except:

(1) The amount of subsistence allowance or the allowance provided under § 21.264 that may be paid to a veteran pursuing a rehabilitation program for any month for which the veteran receives compensation at the rate prescribed in § 3.401(h) of this title, as the result of hospital treatment (not including post-hospital convalescence) or observation at the expense of the VA may not exceed, when added to any compensation to which such veteran is entitled for the month, an amount equal to the greater of:

(i) The sum of: (A) the amount of monthly subsistence or the allowance payable under § 21.264, and (B) the amount of monthly disability that would be paid to the veteran if he or she was not receiving compensation at the temporary 100 percent rate as the result of such hospital treatment or observation, or

(ii) The amount of monthly disability compensation payable under § 3.401(h) of this title.

(2) A veteran pursuing a rehabilitation program while in post-hospitalization convalescence (§3.401(h)) will be paid the regular rate of subsistence allowance.

(3) A serviceperson pursuing a rehabilitation program under chapter 31 will not receive a subsistence allowance if he or she is hospitalized in a medical facility under the jurisdiction of the Secretary of Defense pending final discharge from the armed forces. (38 U.S.C. 1508(h))

(b) *Specialized rehabilitation facility.* (1) A veteran in a specialized rehabilitation facility will be paid the regular rate of subsistence allowance. The VA may pay the cost of room and board in lieu of subsistence allowance when:

(i) The specialized rehabilitation facility requires that similarly circumstanced persons pay the same charges for room and board, and

(ii) The case manager finds and the veteran agrees that it is to the veteran's advantage for the VA to pay the cost of room and board.

(2) Even though the VA pays the cost of room and board, the veteran will be paid that portion of subsistence allowance otherwise payable for dependents. (38 U.S.C. 1508(e)).

(c) *Non-pay work experience or training in a federal agency.* A veteran in an on-job program or being provided work experience in a federal agency at no or nominal pay shall receive subsistence allowance at the institutional rate. (38 U.S.C. 1508(c))

(d) *Extended evaluation and independent living program.* A veteran in a program of extended evaluation or independent living service program shall be paid subsistence allowance for full or part-time participation at the rate specified for institutional training in § 21.260. If an extended independent living program is pursued on a less than a quarter-time basis, the VA will only pay established charges for services furnished. (38 U.S.C. 1508(h))

(e) *On-job training.* A veteran in an on-job training program will be paid subsistence allowance at the rate provided under § 21.260(b), except that subsistence allowance may not exceed the difference between the monthly training wage, exclusive of overtime, and the entrance journeyman wage for the veteran's objective. (38 U.S.C. 1508(c)

§ 21.267 [Removed]

8. Section 21.267 is removed.

9. Section 21.268 is revised as follows:

§ 21.268 Employment adjustment allowance.

(a) *General.* A veteran who completes a period of rehabilitation and reaches the point of employability will be paid an employment adjustment allowance for a period of two months at the full-time subsistence allowance rate for the type of program the veteran was last pursuing. (38 U.S.C. 1508(a))

(b) *Reelection of subsistence allowance.* A veteran who has elected payment at the chapter 34 educational assistance allowance rate may be paid an employment adjustment allowance only if he or she reelects subsistence allowance not later than the date following completion of the period of rehabilitation to the point of employability. (38 U.S.C. 1508(f))

(c) *Special programs.* An employment adjustment allowance will be paid at the institutional rate of subsistence allowance for veterans in any of the following programs:

(1) On-job training at no or nominal pay in a federal agency;

(2) Training in the home program;

(3) Independent instructor program;

(4) Cooperative program; or

(5) Self-employment program. (38 U.S.C. 1508(a))

(d) *Combination program.* A veteran who has pursued a combination program will be paid an employment adjustment allowance at the full-time rate for the type of training the veteran was actually pursuing at the completion of the period of rehabilitation to the

1983 UMI

VOL 48 ISS 91 MY 10 1983 UMI

point of employability. (38 U.S.C. 1508(a))

(e) *Subsequent payments of employment adjustment allowance.* If a veteran has ever received an employment adjustment allowance following rehabilitation to the point of employability, he or she may, nevertheless, receive it again when completing an additional rehabilitation program to the point of employability if:

(1) The prior determination of rehabilitation to the point of employability is set aside; and

(2) The veteran is reinducted into a new vocational rehabilitation program as provided in § 21.280. (38 U.S.C. 1508(a))

(f) *Employment adjustment allowance not charged against entitlement.* An employment adjustment allowance will not be charged against the veteran's basic entitlement. (38 U.S.C. 1508(a))

10. Section 21.270 and 21.272 are added as follows:

§ 21.270 Payment of subsistence allowance during leave and between periods of instruction.

(a) *Payment during leave.* The VA will pay an eligible veteran a subsistence allowance during any period of approved leave including a veteran:

(1) Receiving medical or rehabilitation services on an outpatient basis at a VA medical center, and who provides his or her own room and board;

(2) Receiving service department retirement or retained pay while not on active duty;

(3) Hospitalized at a VA medical center while on approved leave. If the veteran becomes eligible for payment of disability compensation at the temporary 100 percent rate, under § 3.401(h) of this title due to hospitalization, payment will be made under provisions of § 21.266(a). (38 U.S.C. 1510)

(b) *Payment for intervals between periods of instruction.* Subsistence allowance will be paid to a veteran for the following periods unless the case manager and the veteran jointly determine that such payment is not in the veteran's interest:

(1) A period between consecutive terms within an enrollment period that does not exceed 1 full calendar month;

(2) A period between consecutive school terms, when the veteran, as part of his or her approved program of vocational rehabilitation, transfers from one educational institution to another for the purpose of enrolling in, and pursuing, the same objective at the second institution, provided the period does not exceed 30 days;

(3) A period which does not exceed 30 days, between a semester, term, or quarter, when the educational institution certifies the enrollment of the veteran on an individual semester, term, or quarter basis. (38 U.S.C. 1780(a))

(c) *Payment for other periods.* Subsistence allowance will be paid for:

(1) Weekends and legal holidays, or customary vacation periods associated with them;

(2) Periods in which the school is closed temporarily under emergency conditions described in § 21.4138(f). (38 U.S.C. 1510, 1780(a))

§ 21.272 Veteran-student services.

(a) *Eligibility.* Veterans who are pursuing full-time programs of education or training under chapter 31 are eligible to receive a work-study allowance. (38 U.S.C. 1504(a)(4))

(b) *Selection criteria.* Whenever feasible, the VA will give priority to veterans with service-connected disabilities rated at 30 percent or more disabling in selection for this allowance. The VA shall consider the following additional selection criteria:

(1) Need of the veteran to augment the subsistence allowance or payment made at the chapter 34 rate;

(2) Motivation of the veteran; and

(3) Compatibility of the work assignment with the veteran's physical condition. (38 U.S.C. 1504(a)(4), 1685)

(c) *Utilization.* Veteran-student services may be utilized in connection with:

(1) The VA outreach services program as carried out under the supervision of a VA employee;

(2) Preparation and processing of necessary VA papers and other documents at educational institutions, regional offices or other VA facilities;

(3) Hospital and domiciliary care and medical treatment at VA facilities; and

(4) Any other appropriate activity of the VA. (38 U.S.C. 1504(a)(4), 1685)

(d) *Rate of payment.* (1) In return for the veteran's agreement to perform services for the VA totaling 250 hours during an enrollment period, the VA will pay an allowance in an amount equal to the higher of:

(i) The amount of the hourly minimum wage in effect under section 6(a) of the Fair Labor Standards Act of 1938 times 250; or

(ii) $837.50.

(2) The VA will pay a proportionately smaller allowance to a veteran who agrees to perform a lesser number of hours of services. (38 U.S.C. 1504(a)(4), 1685)

(e) *Payment in advance.* The VA shall pay in advance an amount equal to 40 percent of the total amount payable under the contract. (38 U.S.C. 1504(a)(4), 1685(a))

(f) *Veteran reduces rate of pursuit.* In the event the veteran ceases to be a full-time student before completing an agreement, the veteran may, with the approval of the Director, or designee, of the VA field station, be permitted to complete the portion of the agreement that remains. The veteran must complete the remaining portion of the agreement in the same term, quarter or semester in which the veteran ceases to be a full-time student or within three months thereafter. (38 U.S.C. 1504(a)(4), 1685)

(g) *Veteran terminates training.* If the veteran terminates all training before completing an agreement, the VA:

(1) Will permit him or her to complete the portion of the agreement represented by the sum of money the VA has advanced to the veteran for which he or she has not performed any services; but

(2) Will not permit him or her to complete that portion of an agreement for which no advance has been made. (38 U.S.C. 1504(a)(4), 1685)

(h) *Indebtedness for unperformed service.* (1) If the veteran has received an advance for hours of unperformed service that remain after application of paragraphs (f) and (g) of this section, that advance:

(i) Will be a debt due the United States; and

(ii) Will be subject to recovery in the same manner as any other debt due the United States;

(2) For each hour of unperformed service, the amount of indebtedness shall equal the hourly wage upon which the contract was made. (38 U.S.C. 1504(a)(4), 1685)

(i) *Survey.* The VA will conduct an annual survey of its regional offices to determine the number of veterans whose services can be utilized effectively. (38 U.S.C. 1504(a)(4), 1685)

11. Section 21.274 is revised as follows:

§ 21.274 Revolving fund loan.

(a) *Establishment of revolving fund loan.* A revolving fund is established to provide advances to veterans who would otherwise be unable to begin or continue in a rehabilitation program without such assistance. (38 U.S.C. 1512)

(b) Definition. The term "advance" means a non-interest loan from the revolving fund. (38 U.S.C. 1512)

(c) *Eligibility.* A veteran is eligible for an advance if the following conditions are present:

(1) An Individualized Written Rehabilitation Plan, Individualized Extended Evaluation Plan, or Individualized Independent Living Plan has been prepared; and

(2) The veteran and VA staff agree on the terms and conditions of the plan. (38 U.S.C. 1512)

(d) *Advance conditions.* (1) An advance may be approved when the following conditions are met:

(i) The purpose of the advance is clearly and directly related to beginning, continuing, or reentering a rehabilitation program;

(ii) The veteran would otherwise be unable to begin, continue or reenter his or her rehabilitation program;

(iii) The advance does not exceed either the amount needed, or twice the monthly subsistence allowance for a veteran without dependents in full-time institutional training; and

(iv) The veteran has elected, or is in receipt of, subsistence allowance.

(2) An advance may not be made to a veteran who meets conditions described in paragraph (d)(1) of this section if the veteran:

(i) Has not fully repaid an existing advance;

(ii) Does not agree to the terms and conditions for repayment; or

(iii) Will not be eligible in the future for payments of pension, compensation, subsistence allowance, educational assistance, or retired pay. (38 U.S.C. 1512).

(e) *Determination of the amount of the advance.* (1) If the conditions described in paragraphs (c) and (d) of this section are met, a counseling psychologist or vocational rehabilitation specialist in the VR&C Division will:

(i) Document the findings; and

(ii) Determine the amount of the advance.

The advance may not exceed the amount needed by the veteran, and shall not exceed twice the monthly subsistence allowance for a veteran in full-time institutional training.

(2) Loans will be made in multiples of $10. (38 U.S.C. 1512)

(f) *Repayment.* (1) *Offset possible.* The amount advanced will be repaid in monthly installments from future VA payments for compensation, pension, subsistence allowance, educational assistance or retired pay.

(i) Repayment will begin on the earlier of the following dates:

(A) The first day of the month following the month in which the advance is granted; or

(B) The first day of the month after receipt of the advance in which the veteran receives a subsistence allowance.

(ii) The VR&C staff person who approves the advance will determine the rate of repayment.

(iii) The monthly rate of repayment may not be less than 10 percent of the amount advanced unless the monthly benefit against which the advance is being offset is less than that amount. (38 U.S.C. 1512)

(2) *Offset not possible.* If the amount advanced cannot be repaid from the benefits cited in paragraph (f)(1) of this section because the veteran is not in receipt of any of these benefits, collection of the amount due will be made in the same manner as any other debt payable to the VA. (38 U.S.C. 1512)

12. Section 21.276 is added as follows:

§ 21.276 Incarcerated veterans.

(a) *General.* The provisions contained in this section describe the limitations on payment of subsistence allowance and charges for tuition and fees for:

(1) Incarcerated veterans;

(2) Formerly incarcerated veterans in halfway houses; and

(3) Incarcerated and formerly incarcerated veterans in work release programs (38 U.S.C. 1508(g), 1780(a))

(b) *Definition.* The term "incarcerated veterans" means any veteran incarcerated in a Federal, State, or local prison, jail, or other penal institution for either:

(1) A felony (convicted or unconvicted); or

(2) A misdemeanor (convicted or unconvicted). (38 U.S.C. 1508(g), 1780(a))

(c) *Subsistence allowance not paid to an incarcerated veteran.* A subsistence allowance may not be paid to any incarcerated veteran, as that term is described in paragraph (b) of this section, if:

(1) Tuition and fees are paid by a non-VA Federal, State, or local government; or

(2) There are no charges for tuition and fees. (38 U.S.C. 1780(a))

(d) *Felony conviction.* A subsistence allowance may not be paid to an incarcerated veteran convicted of a felony, but the VA may pay all or part of the veteran's tuition and fees. (38 U.S.C. 1508(g))

(e) *Half-way house.* A subsistence allowance may not be paid to a veteran pursuing a rehabilitation program while residing in a halfway hosue as a result of a felony conviction when all of the veteran's living expenses are paid by a non-VA Federal, State, or local government program. (38 U.S.C. 1780(a))

(f) *Work-release program.* A subsistence allowance may not be paid to a veteran in a work release program as a result of a felony conviction if all of the veteran's living expenses are being paid by a non-VA Federal, State, or local government program. (38 U.S.C. 1508(g), 1780(a))

(g) *Subsistence allowance paid.* When the conditions described in paragraphs (c) thorugh (f) of this section do not preclude the payment of a subsistence allowance, the veteran will be paid at the rate applicable to the the type of program and rate of pursuit of the program. (38 U.S.C. 1508(g))

(h) *Payment of tuition, fees, and other charges.* The VA may not pay tuition, fees, and other course costs if there are no charges for the course, but may pay tuition, fees, and other course costs to the extent these costs are not paid by a non-VA Federal, State or local government program for similarly circumstanced non-veterans. (38 U.S.C. 1508(g), 1780(a))

(i) *Services.* The VA may provide other appropriate services including but not limited to medical, reader service, and tutorial assistance necessary for the veteran to pursue his or her rehabilitation program. (38 U.S.C. 1508(g), 1780(a))

(j) *Apportionment.* (1) *Felony conviction.* Apportionment of subsistence allowance may be continued or made to dependents of an incarcerated veteran convicted of a felony if:

(i) The apportionment began before October 17, 1980, or

(ii) The convicted felon is in a halfway house or in a work-release program, and all of his or her living expenses are not being paid by a governmental agency other than the VA.

(2) *Not convicted of a felony.* Apportionment to dependents of a veteran not convicted of a felony may be made under § 21.330 if the veteran meets conditions for payment of subsistence allowance described in paragraphs (c) and (d) of this section. (38 U.S.C. 1508(g), 1780(a))

(k) *Payment of allowances at the rates paid under chapter 34.* An incarcerated veteran, or a veteran in a halfway house or work release program who elects payment at the educational assistance rate paid under chapter 34 shall be paid in accordance with the provisions of law applicable to other incarcerated veterans training under chapter 34. (38 U.S.C. 1780(a))

§§ 21.278 and 21.279 [Removed]

13. Sections 21.278 and 21.279 are removed.

14. New §§ 21.310 through 21.350, are added as follows:

Rate of Pursuit

Authorization of Subsistance Allowance and Training and Rehabilitation Services

21.320 Awards for subsistence allowance and authorization or rehabilitation services.
21.322 Commencing dates of subsistence allowance.
21.324 Reduction or termination dates of subsistence allowance.
21.326 Authorization of employment services.
21.328 Two veteran cases—dependents.
21.330 Apportionment.
21.332 Payments of subsistence allowance.
21.334 Election of payment at the chapter 34 rate.

Leaves of Absence

21.340 Leaves of absence.
21.342 Leave accounting policy.
21.344 Facility offering training or rehabilitation services.
21.346 Facility temporarily not offering training or rehabilitation services.
21.348 Leave following completion of a period of training or rehabilitation services.
21.350 Unauthorized absences.

Rate of Pursuit

§ 21.310 Rate of pursuit of a rehabilitation program.

(a) *Programs offered at educational institutions.* This section provides policy for determining the full-time and part-time rate of pursuit of a rehabilitation program by a veteran whose ability to pursue a program has not been reduced by the effects of disability.

(1) The VA will measure the full-time and part-time rate of pursuit of training offered at educational institutions according to the criteria found in §§ 21.4270 through 21.4275, except as provided in paragraphs (a) (2) and (3) of this section.

(2) *Independent study course.*

(i) For certain seriously disabled veterans described in subdivision (i)(A) of this subparagraph the VA may measure the veteran's enrollment:

(A) In an independent study course as half-time or greater training, or

(B) Both in independent study subjects and subjects requiring class attendance on the basis of the combined training load when the number of credit hours of independent study equals or exceeds the number of other credit hours.

(ii) To qualify for measurement described in paragraph (a)(2)(i) of this section:

(A) The seriously disabled veteran must have a disability or circumstances which preclude regular attendance at an institution of higher learning, and

(B) Independent study must be a sound method for providing the training necessary for restoring the veteran's employability.

(iii) In all other cases the VA will measure independent study according to the provisions of § 21.4270(b), footnote 7. (38 U.S.C. 1508(d))

(3) *Special school.* If training is pursued in a special school, such as those for persons with visual or hearing disabilities, the rate of pursuit will be measured under §§ 21.4270 through 21.4275 unless it is the established policy of the school to measure the rate of pursuit for full-time or a particular level of part-time training based upon fewer semester, credit, or clock hours of attendance than prescribed in those regulations.

(4) *Farm cooperative.* If training in a farm cooperative program is provided by an educational institution, the rate of pursuit is determined under § 21.4270.

(5) *Courses offered under contract.* When a school or other entity furnishes all or part of a vocational rehabilitation program under contract with another school, the VA will measure the course or courses as appropriate for the school or other entity actually providing the training. (38 1508(d))

(b) *Education or training not furnished by an educational institution.* The following types of training which are not furnished by an educational institution (§ 21.35(k)(iii)) may only be pursued full-time:

(1) *On-job training.* Full-time training in an on-job program is the lesser of the number of hours in the prevailing workweek for:

(i) Journeyman employees in the same job categories at the establishment where training is being provided;

(ii) Other persons in on-job training for the same or similar occupations at the facility where the veteran is training or at other facilities in the locality.

(2) *Farm cooperative training.* If training in a farm cooperative program is provided by an individual instructor, the full-time rate of pursuit is assessed under § 21.126.

(3) *Independent instructor.* The full-time rate of pursuit for a veteran in an independent instructor program is assessed under § 21.146.

(4) *Training in the home.* The full-time rate for a training program provided in the veteran's home is assessed under § 21.156.

(5) *Vocational course in a rehabilitation facility or sheltered workshop.* A vocational course of training offered by a rehabilitation facility or sheltered workshop (21.35(k)), will be measured under provisions of § 21.4270(b), unless it is the established policy of the facility to measure the rate of pursuit for full-time or a particular level of part-time training based upon fewer clock hours of attendance than provided in that regulation. (38 U.S.C. 1508(d))

(c) *Combination and cooperative programs.* The rate of pursuit of a program which combines institutional training and on-the-job training will be measured as follows:

(1) The institutional part will be assessed under §§ 21.4270 through 21.4275, and

(2) The on-the-job part will be assessed under § 21.310(b). (38 U.S.C. 1508(d))

(d) *Rehabilitative services.* Measurement of the rate of pursuit for veterans in programs consisting primarily of services designed to evaluate and improve physical and psychological functioning will be assessed under this paragraph.

(1) The services assessed under this paragraph include:

(i) Evaluation and improvement of the rehabilitation potential of a veteran for whom attainment of a vocational goal is reasonably feasible;

(ii) Extended evaluation to determine whether attainment of a vocational goal is reasonably feasible; or

(iii) A program of independent living services to enable a veteran to function more independently in his or her family and community when attainment of a vocational goal is not reasonably feasible.

(2) Measurement of the rate of pursuit for services and programs named in paragraph (d)(1) of this section will be:

(i) As provided in paragraph (a) of this section for services furnished by educational institutions; or

(ii) According to the noneducational facility's customary criteria for full-time and part-time pursuit. If the facility does not have established criteria for full-time and part-time pursuit, or services are being provided by more than one facility the rate of pursuit will be assessed in the following manner:

Rate of pursuit	Clock hours per month
Full-time	120 or more.
Three-quarter time[1]	90–119.
Half-time[1]	60–89.
Quarter-time[1]	30–59.

[1] Extended evaluation and independent living. (38 U.S.C. 1508(d))

§ 21.312 Reduced work tolerance.

(a) *General.* The VA will consider that a veteran with reduced work tolerance is pursuing a rehabilitation program full-time when the amount of time the veteran is devoting to his or her program is as great as the effects of his or her disability (service and nonservice-connected) will permit. (38 U.S.C. 1508(d))

(b) *Pursuit of a program.* A veteran with reduced work tolerance may pursue a rehabilitation program when the following conditions are met:

(1) Reduced work tolerance has been determined;

(2) Achievement of the goals of the program are reasonably feasible;

(3) The IWRP (Individualized Written Rehabilitation Plan) or other plan provides for completion of the program under chapter 31, or the conditions described in § 21.82(b) for completion of a plan are met. (38 U.S.C. 1508(d))

(c) *Redetermination of work tolerance.* As necessary, but not less than once yearly, the veteran's work tolerance will be reevaluated. The rate of pursuit required to meet the standard of full-time pursuit will be modified if there is either an increase or decrease in the work tolerance of the veteran. (38 U.S.C. 1508(d))

(d) *Payment of allowance.* A veteran with a reduced work tolerance will be paid a subsistence allowance, at the full-time rate for the type of program being pursued when the veteran meets the standard for full-time pursuit established for him or her. (38 U.S.C. 1508(d))

(e) *Determining work tolerance.* A VA physician will make all determinations and redeterminations of work tolerance. (38 U.S.C. 1508(d))

§ 21.314 Pursuit of training under special conditions.

A veteran is generally required to pursue a rehabilitation program at a rate which meets the requirement for full or part-time participation described in §§ 21.310 and 21.312. However a veteran may pursue a rehabilitation program at a lesser rate if such pursuit is a part of the veteran's plan. Subsistence allowance is not payable during such periods except for emergency conditions described under provisions of § 21.4138(b). (38 U.S.C. 1508(d))

Authorization of Subsistence Allowance and Training and Rehabilitation Services

§ 21.320 Awards for subsistence allowance and authorization of rehabilitation services.

Awards providing for payment of a subsistence allowance and authorization of services necessary for rehabilitation may be prepared when an IWRP (Individualized Written Rehabilitation Plan) or other plan has been completed and other requirements for entrance or reentrance into a rehabilitation program have been met.

(a) *Commencing date of subsistence allowance.* The commencing date of an award of subsistence allowance will be determined under the provisions of § 21.322. (38 U.S.C. 1508(a))

(b) *Commencing date of authorization of training and rehabilitation services.* The commencing date for authorization of training and rehabilitation services is the same as the effective date for awards for subsistence allowance under provisions of § 21.322 except when:

(1) The commencing date for authorization of a program of employment services is determined under provisions of § 21.326;

(2) An earlier commencement date is established in the veteran's plan;

(3) The veteran elects payment at the educational assistance allowance rate, the commencing date of payment is determined under provisions applicable to commencement of payment under chapter 34. (38 U.S.C. 1508(a))

(c) *Ending date of subsistence allowance.* The ending date of an award for subsistence allowance will be the earliest of the following dates:

(1) The ending date provided in the veteran's IWRP or other plan;

(2) The ending date of a period of enrollment as certified by a training or rehabilitation facility;

(3) The ending date specified in § 21.324. (38 U.S.C. 1508)

(d) *Ending date for training and rehabilitation services.* The ending date of training and rehabilitation services will be the same as the termination date for subsistence allowance under paragraph (c) of this section except when:

(1) The ending date for a period of employment services is determined under provisions of § 21.326;

(2) A later termination date is established in the veteran's plan;

(3) A veteran has elected payment at the educational assistance rate paid under chapter 34 the ending date of the award is determined under regulations applicable to termination of training under chapter 34. (38 U.S.C. 1508(a))

§ 21.322 Commencing dates of subsistence allowance.

(a) *General.* The VA will determine the commencing date of an award or increased award of subsistence allowance under this section. The VA will not authorize subsistence allowance for any period prior to the earliest date for which disability compensation is payable or would be payable except for the veteran's receipt of retired pay. (38 U.S.C. 1508, 3013)

(b) *Entrance or reentrance into vocational rehabilitation, extended evaluation, independent living services.* The earlier of:

(1) The date the facility requires the veteran to report for prescribed activities; or

(2) The date training or rehabilitation services begin. (38 U.S.C. 1508)

(c) *Increase for dependents.* (1) The date of the entrance or reentrance if:

(i) The VA receives the claim for the increase within 1 year of the date of entrance or reentrance, and

(ii) The VA receives any necessary evidence within 1 year of its request.

(2) The date the VA receives notice of the dependent's existence if:

(i) The VA receives the claim for the increase more than 1 year after the date of the entrance or reentrance, and

(ii) The VA receives any necessary evidence within 1 year of its request. (38 U.S.C. 1508)

(d) *Correction of military records.* In accordance with the facts found, but not earlier than the date the change, correction, or modification was made by the service department, if eligibility of a veteran arises as the result of correction or modification of military records under 10 U.S.C. 1552, or change, correction or modification of a discharge or dismissal under 10 U.S.C. 1553, or other competent military authority. (38 U.S.C. 1503(b))

(e) *Bar to benefits removed by the VA.* In accordance with the facts found, but not earlier than the date the change was made by the VA if eligibility of a veteran arises as the result of review of the evidence of record regarding the character of discharge by the VA when the veteran's discharge or dismissal was a bar to benefits under 38 U.S.C. 3101. (38 U.S.C. 1503(b))

(f) *Incarcerated veterans.* (1) Date of release from Federal, State, or local penal institution of a veteran incarcerated for conviction of a felony.

(2) Earlier of the following dates in the case of a veteran residing in a half-way house or participating in a work-release program as a result of a felony conviction.

(i) Date of release from the half-way house or work-release program, or

(ii) Date a veteran becomes obligated to pay part of his or her living expenses.

(3) Date a veteran who is incarcerated for other than a felony conviction in a Federal, State or local prison ceases to have all of his or her tuition and fees paid by a non-VA government agency or is first required to pay tuition and fees in a course for which no charges were made. (38 U.S.C. 1508(g), 1780(a))

(g) *Temporary 100 percent award terminated.* Date of reduction of a temporary award of disability compensation at the 100 percent rate because of hospitalization. (38 U.S.C. 1508(h))

VOL
48
ISS
91
MY
10

UMI

(h) *Liberalizing laws and VA issues.* In accordance with facts found, but not earlier than the date of the act or administrative issue. (38 U.S.C. 3013)

§ 21.324 Reduction or termination dates of subsistence allowance.

(a) *General.* The effective date of reduction of the amount paid or termination of payment of subsistance allowance will be the earliest of the dates specified in this section. If an award is reduced, the reduced rate will be effective the day following the date of termination of the greater benefit. (38 U.S.C. 3013)

(b) *Death of a veteran.* Date of death, if death occurs while the veteran is in attendance or authorized leave status; otherwise date of last attendance. (38 U.S.C. 3013)

(c) *Death of dependent.* Last day of the calendar year in which death occurred unless the veteran's program is terminated earlier under other provisions. (38 U.S.C. 3013)

(d) *Divorce.* Last day of the calendar year in which divorce occurs unless the veterans's program is terminated earlier under the provisions. (38 U.S.C. 3013)

(e) *Child.* (1) *Marriage.* Last day of the calendar year in which the marriage occurs unless the veteran's program is terminated earlier under other provisions.

(2) *Age 18.* Day preceding the child's 18th birthday.

(3) *School attendance.*

(i) Last day of the month in which the child ceases attending school; or

(ii) The day preceding the child's 23rd birthday, whichever is earlier.

(4) *Helplessness.* Last day of the month in which 60 days has passed from the VA's noticed to the payee that the child's helplessness has ceased. (38 U.S.C. 3013)

(f) *Interrupted, rehabilitation to the point of employability, independent living program completed, and extended evaluation completed status.* Last day of attendance, or approved leave status, whichever is applicable. (38 U.S.C. 3013)

(g) *Discontinued.* Last day of attendance or approved leave status, whichever is applicable, except as follows:

(1) If the VA places the veteran in "discontinued" status following the veterans's withdrawal from all courses with nonpunitive grades or following his or her completion of all courses with nonpunitive grades and the case manager does not find mitigating circumstances, the VA will terminate subsistance allowance effective:

(i) The first date of the term, or

(ii) December 1, 1976, whichever is later.

(2) If the VA places the veteran in "discontinued" status following a term in which the grades the veteran receives include both those that count in the grade point average and nonpunitive grades, and the case manager does not find mitigating circumstances:

(i) The VA will terminate subsistance allowance for courses in which the veteran receives nonpunitive grades effective the first day of the term or December 1, 1976, whichever is later.

(ii) The VA will terminate subsistance allowance for courses in which the veteran receives grades that will count in the grade point average effective the veteran's last day of attendance or approved leave status, whichever is applicable. (38 U.S.C. 1780(a))

(h) *Wages or salary received in apprentice or on the-job training.* (1) If the sum of the training wage plus the schedular subsistence allowance is more then the journeyman wage when the training commences, the subsistence allowance will be decreased by the VA effective the first day of the second month following the month in which the veteran enters on job-training.

(2) Subsequent adjustments will be effective the first day of the second month following the month in which wages or salary changes are made which justify the adjustment under provisions of § 21.266(e). (38 U.S.C. 1506)

(i) *Reduction in rate of pursuit of the program.* End of month in which reduction occurs, except that if the rate of pursuit is reduced as a result of the veteran's withdrawal from a unit course with nonpunitive grade(s) or as a result of the veteran's completion of a unit course or courses with nonpunitive grade(s) (§ 21.4200(j)), the VA will reduce subsistence allowance as follows:

(1) If it is determined that there are mitigating circumstances:

(i) Withdrawal with nonpunitive grades: The end of the month or the end of the term in which the veteran withdraws, whichever is earlier; if the reduction occurs at the beginning of the term benefits will be reduced the first day of the term in which the veteran withdraws or December 1, 1976, whichever is the later.

(ii) Completion with nonpunitive grades. No reduction required.

(2) If it is determined there are no mitigating circumstances the VA will reduce the veteran's subsistance allowance effective the first day of the term in which the veteran withdraws of which the veteran completes with nonpunitive grades or December 1, 1976, whichever is later. (38 U.S.C. 1780(a))

(j) *Severance of service connection.* Last day of the month in which the severance becomes final. (38 U.S.C. 3013)

(k) *Fraud.* The later of the following dates:

(1) The beginning date of the award of subsistence allowance, or

(2) The day preceding the date of the fraudulent act. (38 U.S.C. 3503(a))

(l) *Error.* (1) *Payee error.* Effective date of the award of subsistence allowance or day preceding the act, whichever is later, but not prior to the date the veteran's entitlement ceases, on an erroneous award based on an act of commission or omission by a payee with his or her knowledge.

(2) *Administrative error.* Except as provided in paragraph (j) of this section, date of last payment on an erroneous award based solely on administrative error or an error in judgment by a VA employee. (38 U.S.C. 3013)

(m) *Treasonable acts subversive activities.* The later of the following dates:

(1) Beginning date of the award of subsistence allowance, or

(2) Day preceding the date of commission of the treasonable act or subversive activities for which the veteran is convicted. (38 U.S.C. 3013)

(n) *Incarceration in prison or jail.* (1) *Felony conviction.* If a veteran's subsistence allowance must be reduced because of incarceration for a felony conviction under provisions of § 21.276 his or her rate of payment will be reduced the later of:

(i) The date of his or her incarceration in a prison or jail; or

(ii) The commencing date of his or her award as determined by § 21.322.

(2) *Non-felony incarceration.* If a veteran's subsistence allowance must be reduced because of incarceration for reasons other than a felony conviction under provisions of § 21.276, his or her rate will be reduced the date a non-VA government program either begins paying or would normally begin paying the tuition and fees which are required to be paid for similarly circumstanced nonveterans.

(3) *Half-way house or work-release program.*

(i) The subsistence allowance of a veteran in a half-way house or work-release program as a result of conviction of a felony will be reduced under the provisions of § 21.276 the latest of the following dates:

(A) The date the veteran enters the half-way house;

(B) The commencing date of the award, as determined by § 21.322; or

(C) The date on which the Federal government, or a State or local government, pays all the veteran's living expenses.

(ii) The subsistence allowance of a veteran incarcerated for reasons other than conviction of a felony will be reduced the date on which the Federal government pays:

(A) All of the veteran's living expenses, and

(B) All of the veteran's tuition and fees; or

(C) None of the veteran's tuition and fees. (38 U.S.C. 1508(a), 1780(a))

(o) *Specialized rehabilitation facility.* Date payment for room and board by VA begins, reduce the rate paid to the amount payable for dependents. (38 U.S.C. 1508(i))

(p) *Termination of subsistence allowance while hospitalized at VA expense.* Date before the beginning date of the increased disability compensation award if a veteran in a rehabilitation program is awarded disability compensation at the 100 percent rate while hospitalized at VA expense. (38 U.S.C. 1508(h))

§ 21.326 Authorization of employment services.

(a) *General.* Authorization of employment services shall be based upon the services identified and goals established in an IEAP (Individualized Employment Assistance Plan) under provisions of § 21.88. The effective dates for the commencement, or termination of such services will be determined under this section. (38 U.S.C. 1507(a))

(b) *Commencing date.* The commencing date authorizing a period of employment services will be the later of:

(1) The date following completion of the period of rehabilitation to the point of employability;

(2) The date of the original IEAP. (38 U.S.C. 1507, 1517(a))

(c) *Termination of the authorization of employment services.* Authorization for employment services will be terminated the earliest of:

(1) The last day employment services are provided under the terms of an IEAP when employment services are interrupted, discontinued, or the veteran is rehabilitated;

(2) The date the award is found to be erroneous because of an act of omission or commission by the veteran, or with his or her knowledge;

(3) The last day of the month in which severance of service connection becomes final;

(4) The day preceding the date of a fraudulent act;

(5) The date preceding the commission of a treasonable or subversive act for which the veteran in convicted. (38 U.S.C. 1508, 3013)

§ 21.328 Two veteran cases—dependents.

If both partners in a marriage are veterans, and if each is receiving either subsistence allowance for a vocational rehabilitation program or an eductional assistance allowance under another VA program, each is entitled to receive the additional allowances payable for each other and for their children. (38 U.S.C. 1508(a))

§ 21.330 Apportionment.

(a) *General.* Where in order, the VA will apportion subsistence allowance in accordance with § 3.451 of this title, subject to the limitations of § 3.458 of this title. (38 U.S.C. 3107(c))

(b) *Effective date.* The effective date of apportionment will be as prescribed in §3.400(e) of this title. (38 U.S.C. 3107(c))

(c) *Child adopted out of family.* Where evidence establishes that a veteran is the natural parent of a child or children legally adopted outside of the veteran's family, the VA will apportion in favor of the child or children only that additional amount of subsistence allowance payable on account of the existence of the child or children. The veteran is not entitled in his or her own right to the additional amount of subsistence allowance payable for the child because of the existence of the child unless the veteran is contributing to the child's support. (38 U.S.C. 3107(c))

(d) *Veteran convicted of a felony.* The subsistence allowance of a veteran in a rehabilitation program after October 17, 1980, may not be apportioned if the veteran is incarcerated because of conviction for a felony. (38 U.S.C. 1508(g))

§ 21.332 Payments of subsistence allowance.

(a) *Eligibility.* The VA shall pay subsistence allowance at the rates specified in § 21.260 to an eligible veteran enrolled in a rehabilitation program at the end of the month for the type of program pursued during the month unless advance payment is approved. The VA will continue payments during those intervals described in § 21.270. (38 U.S.C. 1508)

(b) *Advance payment criteria.* The VA will make an advance payment of subsistence allowance only when:

(1) The veteran specifically requests an advance payment; and

(2) The educational institution at which the veteran is accepted or enrolled has agreed to, and can carry out, satisfactorily the provisions of 38 U.S.C. 1780(d)(4) and (5) pertaining to:

(i) Receipt, delivery or return of advance checks; and

(ii) Certifications of delivery and enrollment. (38 U.S.C. 1780(d))

(c) *Advance payment.* (1) The amount of advance payment is not to exceed:

(i) The veteran's subsistence allowance for the month or part of a month in which his or her course will begin; plus

(ii) The veteran's subsistence allowance for the following month.

(2) Upon application and completion of arrangements for enrollment of a veteran who meets the criteria for an advance payment, the VA shall mail a check payable to the veteran to the institution for delivery to the veteran upon registration.

(3) An institution shall not deliver an advance payment check to a veteran more than 30 days in advance of commencement of his or her program. (38 U.S.C. 1780(d))

(d) *Certification for advance payment.* The VA will authorize advance payment upon receipt of the institution's certification of the following information:

(1) The veteran is eligible for benefits;

(2) The institution has accepted the veteran or he or she is eligible to continue his or her training;

(3) The veteran has notified the institution of his or her intention to attend or to reenroll;

(4) The number of semester or clock hours the veteran will pursue; and

(5) The beginning and ending dates of the enrollment period. (38 U.S.C. 1780(d))

(e) *Time of advance payment.* The VA will authorize advance payment only:

(1) At the beginning of an ordinary school year; or

(2) At the beginning of any other enrollment period which begins after a break in enrollment of one full calendar month or longer. (38 U.S.C. 1780(d))

(f) *Other payments.* (1) The VA will make all payments other than advance payments at the end of the month for the veteran's training during that month.

(2) The VA may withhold final payment until:

(i) The VA receives certification that the veteran has completed his or her course; and

(ii) The VA makes all necessary adjustments in the veteran's award resulting from that certification. (38 U.S.C. 1780(g))

(g) *Payments for courses which are repeated.* The VA may pay subsistence allowance to a veteran who repeats a course under conditions described in § 21.132. (38 U.S.C. 1780(a))

VOL 48 ISS 91 MAY 10 1983 UMI

§ 21.334 Election of payment at the chapter 34 rate.

(a) *Election.* When the veteran elects payment at the chapter 34 rate, the effective dates for commencement or reduction and termination shall be in accordance with §§ 21.4130 through 21.4135. (38 U.S.C. 1508, 1780)

(b) *Election of payment at the chapter 34 rate subsequent to induction into a rehabilitation program.* Election of payment at the chapter 34 rate subsequent to induction into training is permissible under provisions of § 21.262(a) and (b). The effective date of the election is the latest of the following dates:

(1) The commencing date of the program under provisions of § 21.4131;

(2) The day following the end of period for which the VA paid tuition, fees or other program charges under this chapter. (38 U.S.C. 1508(f))

(c) *Reelection of subsistence allowance subsequent to induction.* If a veteran reelects subsistence allowance under provisions of § 21.262(c), the effective date of the change is earliest of the following:

(1) The date following completion of the term, semester, quarter, or other period of instruction in which the veteran is curently enrolled;

(2) The veteran's chapter 34 delimiting date;

(3) The day after exhaustion of chapter 34 entitlement; or

(4) The day following the date of a VA detemination that failure to approve reelection would prevent the veteran from continuing the rehabilitation program. (38 U.S.C. 1508(f))

(d) *Election or reelection during leave or between periods of instruction.* (1) *Payment at the chapter 34 rate.* If an otherwise eligible veteran elects payment at the chapter 34 rate during a period of authorized leave or between periods of instruction the effective date of the election shall be the first day of the next period of instruction.

(2) *Subsistence allowance.* If an otherwise eligible veteran reelects subsistence allowance during leave or between periods of instruction following election of payment at the chapter 34 rate, the effective date of the change will be the date of the reelection or the beginning of the next period of training, whichever is to the veteran's benefit. (38 U.S.C. 1508(b))

Leaves of Absence

§ 21.340 Introduction.

(a) *General.* The VA may approve leaves of absence under certain conditions. During approved leaves of absence a veteran shall be considered to be pursuing a rehabilitation program. Leave may be authorized for a veteran during a period:

(1) Rehabilitation to the point of employability;

(2) Extended evaluation; or

(3) Independent living services. (38 U.S.C. 1510)

(b) *Election of subsistence allowance.* If a veteran elects to receive subsistence allowance and payment of rehabilitation services by the VA, he or she may be authorized leave of absence under §§ 21.342 through 21.350. (38 U.S.C. 1510)

(c) *Election of payment at the chapter 34 rate.* If a veteran elects to receive an allowance and other assistance equivalent to that provided under chapter 34, the effect of absences is determined under provisions of §§ 21.4204 and 4205. (38 U.S.C. 1510)

§ 21.342 Leave accounting policy.

(a) *Amount of leave.* A veteran pursuing one of the programs listed in § 21.340(a) may be authorized up to 30 days of leave by the case manager during a twelve-month period. The beginning date of the first twelve-month period is the commencing date of the original award, and the ending date is twelve months from the beginning date with subsequent consecutive twelve-month periods thereafter. (38 U.S.C. 1510)

(b) *Additional leave under exceptional circumstances.* A veteran in a program offered by an institution of higher learning which leads to a standard college degree may be authorized up to 15 additional days of leave by the case manager under exceptional circumstances such as extended illness or family problems. (38 U.S.C. 1510)

(c) *Absence.* For the purpose of determining when a leave of absence may be authorized, a veteran who elects subsistence allowance shall be considered absent during any period in which he or she is:

(1) Not in attendance under the rules and regulations of the educational institution, rehabilitation center, or sheltered workshop;

(2) Not considered at work under the rules of the training establishment;

(3) Not present at a scheduled period of individual instruction. (38 U.S.C. 1510)

(d) *System of records.* An educational institution, training establishment, rehabilitation center, or other facility or individual providing training and rehabilitation services under chapter 31 may utilize the same system of records to determine absence as the one used for similarly circumstanced nonveterans. (38 U.S.C. 1510)

(e) *Change in rate of pursuit.* The amount of approved leave is not affected by the veteran's rate of pursuit of a rehabilitation program, rather one day of leave is charged for each day, or part of a day of absence. (38 U.S.C. 1510)

(f) *Charging leave.* The VA shall charge 1 day for each day of approved leave used by the veteran. (38 U.S.C. 1510)

(g) *Limitation on carrying leave over to another period.* The veteran may not carry over unused days of leave from one twelve-month period to another. (38 U.S.C. 1510)

(h) *Responsibility for approving leave.* The case manager shall approve leaves of absence. (38 U.S.C. 1510)

§ 21.344 Facility offering training or rehabilitation services.

(a) *Approval of leaves of absence required.* Leaves of absence must normally be approved in advance by the VA when the facility offering training or rehabilitation services arranges for the leave. The approval of the case manager is required:

(1) During periods in a rehabilitation program identified in § 21.342(c); or

(2) A period of hospitalization at VA expense during one of the periods identified in § 21.341(c). (38 U.S.C. 1510)

(b) *Responsibility of the veteran in obtaining leave.* The VA will not authorize leave without a verbal or written request by the veteran, and the approval of the facility. (38 U.S.C. 1510)

(c) *Conditions permitting approval of leaves of absence.*

(1) The case manager may approve leaves of absence up to a total of 30 days during a twelve-month period if the facility certifies that the use of the leave does not interfere materially with the veteran's progress;

(2) An additional period of up to 15 days of leave in the same twelve-month period under exceptional circumstances may be approved by the case manager for a veteran in a program leading to a standard college degree if failure to approve leave will:

(i) Result in personal hardship, or

(ii) Adversely affect the veteran's ability to continue in his or her rehabilitation program. (38 U.S.C. 1510)

§ 21.346 Facility temporarily not offering training or rehabilitation services.

(a) *Approval of leave of absence not required.* A veteran may receive subsistence allowance during a period when the facility temporarily is not offering services without the veteran's seeking an approved leave of absence or being charged with leave when:

(1) The facility is closed temporarily under an executive order of the President or due to an emergency situation;

(2) The veteran is pursuing on-the-job training and he or she receives holidays established by Federal or State law;

(3) The veteran is pursuing farm cooperative training and incurs:

(i) Routine absences from the farm required in the ordinary day-to-day conduct of farm business; or

(ii) Absences from that part of a farm cooperative course which is given at the educational institution; or

(4) The veteran is pursuing a standard college degree; and

(i) There is an interval between consecutive semesters, terms, quarters or periods of instruction *within a certified enrollment period* which does not exceed a full calendar month;

(ii) There is an interval, which does not exceed a full calendar month between semesters, terms or quarters when the educational institution only certifies enrollment on a semester, term, or quarter basis;

(iii) There is an interval, which does not exceed 30 days, when the veteran, as part of his or her approved program of vocational rehabilitation, transfers from one educational institution to another for the purpose of enrolling in and pursuing a similar program at the second institution;

(iv) A period of up to 5 days per twelve-month period during which a school offering non-college-degree courses is not operating, because instructors are attending professional meetings.

(5) The case manager may disapprove leave under paragraph (a)(4) of this section if:

(i) Approval would result in or lead to use of more than 48 months of entitlement under chapter 31, alone; or

(ii) Approval would require extension of the scheduled completion date of the veteran's program. (38 U.S.C. 1510)

(b) *Approval of leaves of absence required.* A veteran, who wishes to receive subsistence allowance while the facility temporarily is not offering training under conditions other than those identified in paragraph (a) of this section, must seek an approved leave. (38 U.S.C. 1510)

§ 21.348 Leave following completion of a period of training or rehabilitation services.

(a) *Leave following completion of training or rehabilitation services.* Leave may not be approved following completion of a period of service described in § 21.340(a). (38 U.S.C. 1510)

(b) *Postponement of the date of completion of a period of rehabilitation services prohibited.* The date of completion of the veteran's program may not be extended for the purpose of allowing the veteran to use leave. (38 U.S.C. 1510)

§ 21.350 Unauthorized absences.

A veteran who is unable to obtain an unauthorized leave of absence in advance may seek to have the unauthorized absence excused.

(a) *Excusing unauthorized absences.* The VA may excuse an unauthorized absence and make proper charges against the veteran's leave when:

(1) The veteran has absented himself or herself under conditions which make his or her obtaining advance approval from the VA impracticable; and

(2) Conditions for approval of leave are otherwise met. (38 U.S.C. 1510)

(b) *Unexcused, unauthorized absences.* When an unauthorized absence is not satisfactorily explained, the VA will take necessary action, including forfeiture of subsistence allowance for that period of absence. (38 U.S.C. 1510)

POSTAL SERVICE

39 CFR Part 10

Proposed On-Demand International Express Mail Service to Brazil

AGENCY: Postal Service.

ACTION: Proposed on-demand international express mail service to Brazil.

SUMMARY: Pursuant to an agreement with the postal administration of Brazil, the Postal Service proposes to begin On-Demand International Express Mail Service to Brazil at postage rates indicated in the table below. The proposed service is scheduled to begin on July 15, 1983.

DATE: Comments must be received on or before June 9, 1983.

FOR FURTHER INFORMATION CONTACT: Leon W. Perlinn, (202) 245-4414.

ADDRESS: Written comments should be directed to the General Manager, Rate Development Division, Office of Rates, Rates and Classification Department, U.S. Postal Service, Washington, D.C. 20260. Copies of all written comments will be available for public inspection and photocopying between 9 a.m. and 4 p.m., Monday through Friday, in room 8620, 475 L'Enfant Plaza West, SW., Washington, D.C. 20260.

SUPPLEMENTARY INFORMATION: The International Mail Manual is incorporated by reference in the **Federal Register**, 39 CFR 10.1. Additions to the manual needed to introduce the proposed new service, including the rate table reproduced below, will be made in due course. Accordingly, although 39 U.S.C. 407 does not require advance notice and the opportunity for submission of comments on international service, and the provisions of the Administrative Procedure Act regarding proposed rulemaking (5 U.S.C. 553) do not apply, (39 U.S.C. 410(a)), the Postal Service invites interested persons to submit written data, views or arguments concerning the proposed On-Demand International Express Mail Service to Brazil at the rates indicated in the table below.

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

[Docket No. FEMA-6514]

National Flood Insurance Program; Proposed Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations and proposed modified base flood elevations listed below for selected locations in the nation. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety (90) days following the second publication of the proposed rule in a newspaper of local circulation in each community.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: Dr. Brian R. Mrazik, Acting Chief, Engineering Branch, Natural Hazards Division, Federal Emergency Management Agency, Washington, D.C. 20472 (202) 287-0230.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the proposed determinations of base (100-year) flood elevations and modified base flood elevations for selected locations in the nation, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR 67.4(a).

These elevations, together with the flood plain management measures required by § 60.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

Pursuant to the provisions of 5 U.S.C. 605(b), the Associate Director, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that the proposed flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. A flood elevation determination under section 1363 forms the basis for new local ordinances, which, if adopted by a local community, will govern future construction within the flood plain area. The elevation determinations, however, impose no restriction unless and until the local community voluntarily adopts flood plain ordinances in accord with these elevations. Even if ordinances are adopted in compliance with Federal standards, the elevations prescribe how high to build in the flood plain and do not proscribe development. Thus, this action only forms the basis for future local actions. It imposes no new requirement; of itself it has no economic impact.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

The proposed modified base flood elevations for selected locations are:

PROPOSED MODIFIED BASE FLOOD ELEVATIONS

State	City/town/county	Source of flooding	Location	#Depth in feet above ground. *Elevation in feet (NGVD) Existing	Modified
California	City of Ontario (San Bernardino County)	Cucamonga Creek	Intersection of Hellman Avenue and Francis Street.	#1	Depths less
			200 feet east of the intersection of Hellman Avenue and Fourth Street.	#1	than 1 foot
		Deer Creek	Intersection of Fourth Street and Turner Avenue.	#1	Depths less than 1 foot

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 22

[CC Docket No. 83-372; FCC 83-141]

Deregulation of Mobile Customer Premises Equipment

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this Notice, the Commission proposes to deregulate all mobile telephone customer premises equipment (CPE). In the Second Computer Inquiry, the Commission directed common carriers to offer CPE on a nontariffed basis separate from their transmission offerings. However, the Commission expressly excluded mobile CPE from the scope of its decision. In this proceeding, the Commission will consider whether to conform the treatment of mobile CPE with its treatment of all other CPE.

DATE: Comments must be received on or before May 20, 1983, and reply Comments must be received on or before June 20, 1983.

ADDRESS: Secretary's Office, Rm. 222, FCC, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: William F. Adler (202) 632-6400.

List of Subjects in 47 CFR Part 22

Communications common carriers, Mobile radio service.

Proposed Rulemaking

In the matter of deregulation of mobile customer premises equipment; CC Docket No. 83-372.

Adopted April 7, 1983.
Released: April 28, 1983.

By the Commission: Commissioner Fogarty absent; Commissioner Rivera issuing a separate statement.

1. In the *Second Computer Inquiry*,[1] we decided, among other things, that regulation of carrier-provided CPE (customer premises equipment) as part of a common carrier service is no longer warranted.[2] We therefore required that CPE provided by common carriers be offered on a nontariffed basis separate from their common carrier transmission offerings, pursuant to the bifurcated approach set forth in *Further Reconsideration* 88 FCC 2d 518-24 (1981). Several types of equipment were not included in the ultimate decision to deregulate CPE, one of which was mobile telephone equipment.[3] We here turn our attention to mobile telephone equipment.

2. In deciding not to include mobile telephone equipment within the definition of CPE, we observed that the status of this equipment was in issue in another rulemaking proceeding in CC Docket No. 79-318, *Cellular Communications Systems*.[4] Accordingly, in *Computer II* we did not deregulate carrier-provided mobile telephone equipment used in conjunction with either conventional or cellular mobile radio communications systems, even though other mobile radio equipment was deregulated. We did not alter this determination on reconsideration.[5] Several months later in our cellular *report and Order*, 86 FCC 2d 469 (1981), we ordered that mobile telephone equipment provided in conjunction with cellular systems, which telephone equipment had not yet been produced or marketed commercially,[6] be deregulated from the outset. Of particular consequence is our ultimate finding that there is "no compelling reason to treat cellular mobile equipment differently from landline customer premises equipment."[7] We affirmed that determination in our *Order on Reconsideration*, 89 FCC 2d 58, 85 (1982).

3. At this point, the mobile telephone used in conventional common carrier mobile radio services constitutes the only piece of two way voice terminal equipment that is accorded disparate treatment. In this proceeding, we propose to deregulate that equipment, thereby conforming our treatment of it with our treatment of all other CPE. To the extent that we have preempted state regulation of other CPE in the *Second Computer Inquiry*, we would also preempt state regulation of mobile CPE. Our proposal applies to mobile telephone equipment used in all services licensed under Part 22 of the Rules: domestic public land mobile radio service (including airborne), rural radio service and offshore telecommunications service.[8] Rather than recite in detail the rationale for deregulating this mobile CPE, we rely on, and incorporate by reference, the relevant portions of the *Second Computer Inquiry* and *Cellular Communications Systems*. Interested persons should examine specifically the following: *Second Computer Inquiry*, 77 FCC 2d at 438-457, *reconsideration* 84 FCC 2d at 61-67; and *Cellular Communications Systems*, Notice of Inquiry and Notice of Proposed Rulemaking, 78 FCC 2d 984, 995-96 (1980), Report and Order, 86 FCC 2d at 497. We expect comments to be limited to specific reasons why this particular terminal equipment should not be deregulated; parties are cautioned not to address the general issue of whether CPE (including cellular CPE) should be deregulated.[9]

Regulatory Flexibility Act—Initial Analysis

4. *Reasons for action and objective.* This is a policy of general applicability being proposed to conform the regulations of mobile customer premises equipment with the regulation of other telephone customer premise equipment. The objectives are to encourage the competitive provision of mobile CPE, to remove advantages accruing to carriers over other vendors of mobile CPE, and to foster an environment in which consumers will have the maximum array of choices.

5. *Legal basis.* The authority for this proposed rulemaking is contained in Sections 4, 303 and 403 of the Communications Act of 1934, as amended.

6. *Small entities affected and potential impact.* The proposed policy is expected to affect (a) most telephone companies and radio common carriers providing mobile telephone service, (b) manufacturers of mobile CPE, and (c) retail and wholesale vendors of mobile CPE. The potential impact would be measured only in terms of revenues from the provision, manufacture or sale of equipment. It is anticipated that, overall, the impact will be favorable.

7. *Relevant federal rules which overlap, duplicate or conflict with this action.* None.

8. *Reporting, record-keeping and compliance requiements.* None.

9. *Alternatives that would lessen impact.* The only alternative is retention of the status quo.

10. Interested persons are invited to participate in this proceeding by submitting comments in accordance with Section 1.419 of the Commission's Rules, 47 CFR 1.419. Comments must be filed by June 6, 1983, and reply comments by July 5, 1983.

11. For purposes of this non-restricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rulemaking until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, and *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. See generally, Section 1.1231 of the Commission's Rules, 47 CFR 1.1231. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

12. The Secretary of the Commission shall serve a copy of this Notice of Proposed Rulemaking upon each state public utilities regulatory commission.

13. Authority for this action is contained in Sections 4(i), 303(r) and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 303(r) and 403, and Section 553 of the Administrative Procedure Act, 5 U.S.C. 553.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Separate Statement of Commissioner Henry M. Rivera

In the Matter of: Deregulation of Mobile Customer Premises Equipment.

I write separately to emphasize that mobile customer premises equipment (CPE) utilized in the rural radio service is included within this proceeding.[1] That service is an important means of communications in rural America—vital to its economy and to the safety of property and life. I am concerned that deregulation of rural radio mobile CPE could adversely affect the viability and availability of that service. Before the Commission acts, it should have a clear understanding of the possible effects that deregulation of this mobile CPE may have on the viability of the rural radio service.[2] Therefore, I hope that state regulatory bodies, industry and users address this issue in their comments.

[FR Doc. 83-12475 Filed 5-9-83; 8:45 am]

BILLING CODE 6712-01-M

[1] Amendment of Section 64.702 of the Commission's Rules and Regulations (Second Computer Inquiry), 77 FCC 2d 384 (1980) (Final Decision), *reconsideration*, 88 FCC 2d 512 (1981), *aff'd sub nom.* CCIA v. FCC, 693 F.2d 198 (D.C. Cir. 1982).

[2] Final Decision, *Id.* at 447.

[3] Final Decision, *Id.* at 447, n. 57; 84 FCC 2d at 70; 88 FCC 2d at 513, n. 1.

[4] Final Decision, *Id.* at 447, n. 57.

[5] 84 FCC 2d at 70.

[6] At least three manufacturers had produced mobile units which were then being used by Illinois Bell in its cellular developmental system in Chicago.

[7] Report and Order at 497, n. 65.

[8] While we reserved judgment in the Second Computer Inquiry regarding deregulation of mobile telephone CPE, we expressed no such reservation with respect to common carrier paging receivers. To the extent that there is any ambiguity, we here confirm that paging receivers were included in the generic categories of CPE deregulated in the Second Computer Inquiry.

[9] The requirements of the Second Computer Inquiry relating to the structure under which AT&T and its affiliates provide deregulated CPE would apply to the provision of conventional mobile telephone CPE. In CC Docket 83-115, FCC 83-71, release March 4, 1983, however, we are examining whether the Bell Operating Companies should be subject to structural separation in a post divestiture environment.

[1] See paragraph 3 of the Notice of Proposed Rulemaking.

[2] For example, because of the importance of the rural radio service, state regulatory bodies may be permitting cross-subsidization of that service in order to keep the charges for the service and equipment affordable. The proposed deregulation may restrict the states' flexibility to continue such subsidies.

[MM Docket No. 83-406; RM-4385]

FM Broadcast Stations in Hilo, Hawaii; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign FM Channel 224A to Hilo, Hawaii, in response to a petition filed by Mid Pacific Broadcasting Company. The proposed assignment could provide a fourth FM service to that community.

DATES: Comments must be filed on or before June 13, 1983, and reply comments on or before June 28, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mark N. Lipp, Mass Media Bureau (202) 634-6530.

Proposed Rule Making

In the Matter of: Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Hilo, Hawaii); MM Docket No. 83-406, RM-4385.

Adopted: April 20, 1983.
Released: April 29, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making was filed by Mid-Pacific Broadcasting Company ("petitioner"), requesting the assignment of Channel 240A to Hilo, Hawaii, as its fourth FM channel. Petitioner expressed its interest in applying for the channel, if assigned.

2. Channel 204A in Hilo, Hawaii, would be short spaced to Channel 240A in Paaiulo, Hawaii. However, Channel 224A is available in Hilo and meets all spacing requirements.

3. In view of the fact that the proposed assignment of Channel 224A could provide a fourth FM broadcast service to Hilo, Hawaii, the Commission believes it is appropriate to propose amending the FM Table of Assignments, § 73.202(b) of the Commission's Rules, with respect to the following community:

City	Channel No.	
	Present	Proposed
Hilo, Hawaii	234, 246, 250	224A, 234, 246, 250

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 13, 1983, and reply comments on or before June 28, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do*

Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in § 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[MM Docket No. 83-406; RM-4388]

FM Broadcast Stations in Clintonville, Manitowoc and New Holstein, Wisconsin; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign Channel 221A to New Holstein, Wisconsin, as that community's first FM allocation, in response to a petition filed by WMBE, Incorporated. The assignment requires a channel substitution and modification of license at Manitowoc, Wisconsin, and the addition of a site restriction on an existing assignment at Clintonville, Wisconsin, to accomodate the proposal.

DATES: Comments must be filed on or before June 13, 1983, and reply comments must be filed on or before June 28, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

Proposed Rule Making and Order To Show Cause

In the Matter of: Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations (Clintonville, Manitowoc and New Holstein, Wisconsin); MM Docket No. 83–406, RM–4388.

Adopted: April 20, 1983.
Released: April 29, 1983.

By the Chief, Policy and Rules Division.

1. Before the Commission is a petition for rule making filed February 15, 1983, by WMBE, Incorporated ("petitioner") seeking the assignment of FM Channel 221A to New Holstein, Wisconsin, as that community's first FM allocation. Petitioner states that if the channel is assigned, it will apply for authority to build and operate a station.

2. As petitioner acknowledges in its petition, the instant proposal requires that certain site restrictions be imposed on Channel 221A to New Holstein, if assigned, and on Channel 221A to Clintonville, Wisconsin,[1] previously assigned. Additionally, the substitution of Channel 257A for existing Channel 221A in Manitowoc, Wisconsin, is required to accommodate petitioner's proposal. Channel 221A (Station WKKB), Manitowoc, Wisconsin, is presently licensed to Cub Radio, Inc.

3. Specifically, the site restrictions and channel substitution are necessary since the distance between New Holstein and Clintonville is 61 miles, and between New Holstein and Manitowoc, 20 miles, whereas § 73.207 of the Commission's Rules requires a separation of 65 miles between co-channel Class A assignments to avoid short spacing. The proposed substitution of Channel 257A for 221A at Manitowoc can be accomplished in conformity with the minimum distance separation requirements.

4. A staff engineering study for New Holstein and Clintonville reveals that in order to avoid short spacing to each other, the ultimate permittee at New Holstein would be required to locate its transmitter 6.8 miles east of the community, while the Clintonville applicant would be required to specify a transmitter site 4.4 miles north of Clintonville. If Channel 221A is ultimately assigned to New Holstein, Clintonville Broadcasting, Inc. would be permitted to amend its application to specify a new transmitter site for Channel 221A. Its cut-off protection would be retained to prevent any delay in processing its application. We wish to hear from Clintonville Broadcasting, Inc. as to whether a move of its proposed transmitter site could not be accomplished.

5. Whenever an existing licensee would have to switch frequencies in order to accommodate a new assignment, we require that the proponent of the new assignment make a commitment that it would reimburse the affected station for the costs incurred in changing frequencies. Therefore, petitioner should indicate whether it would be willing to reimburse Station WKKB, Manitowoc, Wisconsin, for its costs in changing frequencies to Channel 257A.

6. In view of the fact that the proposed assignment could provide a first FM service at New Holstein, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules, as follows:

City	Channel No.	
	Present	Proposed
Manitowoc, Wisconsin	221A, 272A	257A, 272A
New Holstein, Wisconsin		221A

7. *It is ordered*, That pursuant to § 316(a) of the Communications Act of 1934, as amend, Cub Radio, Inc., licensee of Station WKKB, Manitowoc Wisconsin, *shall show cause* why its license should not be modified to specify operation on Channel 257A in lieu of Channel 221A.

8. Pursuant to § 1.87 of the Commission's Rules, Cub Radio, Inc. may, not later than June 13, 1983, request that a hearing be held on the proposed modification. If the right to request a hearing is waived, Cub Radio, Inc. may not later than June 13, 1983, file a written statement showing with particularity why its license should not be modified as proposed in the *Order to Show Cause*. In this case, the Commission may call on Cub Radio, Inc. to furnish additional information, designate the matter for hearing, or issue, without further proceedings, an *Order* modifying the license as provided in the *Order to Show Cause*. If the right to request a hearing is waived and no written statment is filed by the date referred to above, Cub Radio, Inc. will be deemed to have consented to the modification as proposed in the *Order to Show Cause* and a final Order will be issued by the Commission, if the above-mentioned channel modification is ultimately found to be in the public interest.

9. *It is further ordered*, That the Secretary of the Commission *shall send* by Certified Mail, Return Receipt Requested, a copy of this *Order* to the following:

Clintonville Broadcasting, Inc., P.O. Box 192, Rice Lake, Wisconsin 54868;

Cub Radio, Inc., P.O. Box 98, Manitowoc, Wisconsin 54220.

10. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

11. Interested parties may file comments on or before June 13, 1983, and reply comments on or before June 28, 1983, and are advised to read the Appendix for the proper procedures.

12. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

13. For further information concerning this proceeding, contact Nancy V. Joyner, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceedings.

(a) Counterproposals advanced in this proceeding itself will be considered, if

[1] An application has been filed for Channel 221A at Clintonville by Clintonville Broadcasting, Inc. (File No. BPH–820929BC).

VOL 48 ISS 91 MY 10 1983 UMI

advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the Provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

Proposed Rule Making

In the matter of; Amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (Bainbridge, Georgia); MM Docket No. 83-407, RM-4364.

Adopted: April 20, 1983.
Released: April 29, 1983.

By the Chief, Policy and Rules Division.

1. The commission herein considers a petition for rule making filed January 31, 1983, by Mr. and Mrs. Sam M. Griffin, Jr. ("petitioners") proposing the assignment of UHF Television Channel 49 to Bainbridge, Georgia, as its first television assignment. The channel can be assigned in compliance with the minimum distance separation requirements and other technical criteria.

2. Bainbridge (population 10,553) [1], seat of Decatur County (population 25,495), is located in southwest Georgia, approximately 315 kilometers (197 miles) south of Atlanta.

3. Petitioners submitted information in support of their proposal and expressed their interest in applying for the channel, if assigned.

4. In view of the fact that Bainbridge could receive its first television service, we shall seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) with respect to the following city:

City	Channel No.	
	Present	Proposed
Bainbridge, Georgia		49

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before June 13, 1983, and reply comments on or before June 28, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexility Act Do Not Apply to Rule Making to Amend § 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau (202)634-6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Section 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.61, 0.204(b) and 0.283 of the Commission's Rules, *It is proposed to amend* the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in § 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties must file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties may be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, brief, or other documents shall be funished the Commission.

6. *Public Inspection of Filing.* All finding made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

Proposed Rule Making

In the matter of; Amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (Oklahoma City, Oklahoma) MM Docket No. 83-405, RM-4296.

Adopted: April 20, 1983.
Released: April 29, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed January 6, 1983, by David Allen Crabtree ("petitioner"), as its tenth television assignment. The channel can be assigned in compliance with the minimum distance separation requirements and other technical criteria. Petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned.

2. Oklahoma City (population 403,213) [1], seat of Oklahoma County (population 568,933) and capital of the state of Oklahoma, is located in the central portion of the state.

3. In view of the fact that Oklahoma City could receive its tenth local television service, we shall seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) with respect to the following city:

City	Channel No.	
	Present	Proposed
Oklahoma City, Oklahoma	4-, 5, 9-, *13, 14-, 25-, 34-, 43+, 52.	4-, 5, 9-, *13, 14-, 25-, 34-, 43+, 52, 61

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note:—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 13, 1983, and reply comments on or before June 28, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 Fed. Reg. 11549, published February 9, 1981.

[MM Docket No. 83-404; RM-4335]

TV Broadcast Stations in Roanoke, Virginia; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein proposes to assign UHF Television Channel 60 to Roanoke, Virginia, as its sixth television assignment in response to a petition filed by David Allen Crabtree.

DATES: Comments must be filed on or before June 13, 1983, and reply comments on or before June 28, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mark N. Lipp, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Proposed Rule Making

Television broadcasting.

In the Matter of; Amendment of § 73.606(b), Table of Assignments, TV Broadcast Stations (Roanoke, Virginia) MM Docket No. 83-404, RM-4335.

Adopted: April 20, 1983.
Released: April 29, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed January 6, 1983, by David Allen Crabtree ("petitioner"), seeking the assignment of UHF Television Channel 60 to Roanoke, Virginia. The petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned. A site restriction of 8.7 miles north of Roanoke is required to avoid short spacing to WJTM–TV (Channel 45), Winston-Salem, North Carolina.

2. Roanoke (population 100,427)[1] is located in southwestern Virginia, approximately 225 kilometers (140 miles) west of Richmond, Virginia.

3. In view of the fact that Roanoke could receive its sixth local television broadcast service, the Commission finds that it would be in the public interest to seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) for the following community:

City	Channel No.	
	Present	Proposed
Roanoke, Virginia	7–, 10, *15+, 27+, 38–.	7–, 10, *15+, 27+, 38–, 60

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 13, 1983, and reply comments on or before June 28, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration, or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

Television broadcasting.

Proposed Rule Making

In the matter of; Amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations (Seattle, Washington) MM Docket No. 83-409, RM-4286

Adopted: April 20, 1983.
Released: May 3, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making was filed December 29, 1982, by William V. Johnson ("petitioner"), seeking the assignment of UHF television Channel 45 to Seattle, Washington, as that community's seventh television allocation. Petitioner indicates that he, or an entity of which he is a part, will apply for the channel, if assigned.

2. Seattle (population 493,846)[1], the county seat of King County (population 1,269,749), is located on Puget Sound in northwest Washington. At the present time, Seattle is served by commercial television stations (KOMO–TV, Channel 4; KING–TV, Channel 5; KIRO–TV, Channel 7; and Channel 22 (applied for)), as well as by noncommercial educational Station KCTS–TV (Channel * 9). Additionally, one other noncommercial educational channel (* 62) is unoccupied and unapplied for at the present time.

3. A staff engineering study reveals that Channel 45 could be assigned to Seattle, Washington, in compliance with the requirements of § 73.610 of the

[1] Population figures are extracted from the 1980 U.S. Census, Advance Reports.

VOL 48 ISS 91 MY 10 1983 UMI

Commission's Rules. Since Seattle is located within 402 kilometers (250) miles) of the common U.S.-Canadian border, the Commission must obtain Canadian concurrence in the proposal.

4. In view of the foregoing and the fact that the proposed assignment would provide a seventh television allocation to Seattle, Washington, the Commission believes it appropriate to propose amending the Television Table of Assignments, § 73.606(b) of the Commission's Rules as follows:

City	Channel No.	
	Present	Proposed
Seattle, Washington	4, 5+, 7, *9, 22+, *62.	4, 5+, 7, *9, 22+, 45+, *62

5. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

6. Interested parties may file comments on or before June 17, 1983, and reply comments on or before July 5, 1983, and are advised to read the Appendix for the proper procedures.

7. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

8. For further information concerning this proceeding, contact Nancy V. Joyner, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303).

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, *it is proposed to amend* the TV Table of Assignments, § 73.606(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in Sections 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set fourth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

FM Broadcast Stations in Soldotna, Alaska; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes a second FM assignment to Soldotna, Alaska, in response to a petition filed by King County Broadcasters.

DATES: Comments must be filed on or before June 17, 1983, and reply comments on or before July 5, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554

Notice of Proposed Rule Making

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Soldotna, Alaska) (MM Docket No. 83–410, RM–4389).

Adopted: April 20, 1983.
Released: May 3, 1983.

By the Chief, Policy and Rules Division.

1. King County Broadcasters ("petitioner") submitted a petition for rule making on February 16, 1983, seeking the assignment of Class C Channel 247 to Soldotna, Alaska. Petitioner stated its intention to apply for Channel 247, if assigned to Soldotna.

2. In support of the proposal, petitioner submitted population and economic information. However, in view of the action taken in *Revision of FM Policies and Procedures*, 90 FCC 2d 88 (1982), these issues are no longer a requirement to justify a non-conflicting proposal. Petitioner alleges that it intends to provide new and diverse programming to the Kenai Peninsula Borough (of which Soldotna is a community). According to the petitioner's engineering study, Channel 269A (assigned to Soldotna) is in use by Station K269AU, a translator rebroadcasting the programming of Station KSKA, Anchorage, Alaska.

3. In view of the fact that the proposal could provide a second local broadcast service to Soldotna, the Commission proposes to amend the FM Table of Assignments, § 73.202(b) of the Rules, with regard to the following community:

City	Channel No.	
	Present	Proposed
Soldotna, Alaska	269A	247, 269A

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 17, 1983, and reply comments on or before July 5, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showing Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial coments, so that parties may coment on them in reply comments. They will not be considered if advanced in reply comment. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

Notice of Proposed Rulemaking

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (Ouray, Colorado) (MM Docket No. 83-412, RM-4377)

Adopted: April 20, 1983.

Released: May 3, 1983.

By the Chief, Policy and Rules Divisions.

1. Kristi R. Westfall ("petitioner") filed a petition for rule making on February 8, 1983, seeking to assign Channel 285A to Ouray, Colorado. The proposed assignment could provide for a first FM service to Ouray. Peititioner stated her intention to apply for the channel, if assigned.

2. In support of the proposal the petitioner submitted population and economic data. However, in view of the action taken in the *Revision of FM Assignment Policies and Procedures*, 90 FCC 2d 88 (1982), this information is no longer relevant to a non-conflicting proposal. Channel 285A can be assigned to Ouray in conformity with the minimum distance separation requirements.

3. In view of the fact that Ouray could receive its first local FM service, we shall seek comments on the proposal to amend the FM Table of Assigments (§ 73.202(b) of the Rules) with respect to the following city:

City	Channel No.	
	Present	Proposed
Ouray, Colo.		285A

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A Showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 17, 1983, and reply comments on or before July 5, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of Secion 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

FM Broadcasting Station in Kankakee, and Crete, Illinois; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign Channel 224A to Kankakee, Illinois, in response to a petition filed by Edward J. Wilk and Joseph F. Wilk. The proposal could provide a second FM service to that community. Also proposed is the reassignment of Channel 272A from Kankakee to Crete, Illinois, to reflect its actual use at Crete.

DATES: Comments must be filed on or before June 17, 1983, and reply comments must be filed on or before July 5, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

Notice of Proposed Rule Making

In the matter of amendment of § 73.202(b), Table of Assignments, FM Broadcasting Stations. (Kankakee, and Crete, Illinois) (MM Docket No. 83-411, RM-4378).

Adopted: April 20, 1983.

Released: May 3, 1983.

By the Chief, Policy and Rules Division.

1. A petition for rule making was filed February 8, 1983, by Edward J. Wilk and Joseph F. Wilk ("petitioners") seeking the assignment of Channel 224A to Kankakee, Illinois, as its third FM assignment. Petitioners submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned. The channel can be assigned in compliance with the minimum distance separation requirements.

2. Channel 272A, now assigned to Kankakee, is actually used at Crete, Illinois, pursuant to the 10-mile rule, § 73.203(b) of the Commission's Rules. Therefore, we also propose herein to reassign the channel to Crete to reflect its actual use there.

3. In view of the fact that the proposed Kankakee assignment could provide a second FM service, the Commission believes that it is appropriate to propose amending the FM Table of Assignments, § 73.202(b) of the Commission's Rules, with respect to the following communities:

City	Channel No.	
	Present	Proposed
Crete, Ill		272A
Kankakee, Ill	260, 272A	224A, 260

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 17, 1983, and reply comments on or before July 5, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

Notice of Proposed Rulemaking

In the matter of Amendment of § 73.202(b), table of Assignments, FM broadcast stations. (Williston, North Dakota) (MM Docket No. 83-413, RM-4358).

Adopted: April 20, 1983.
Released: May 4, 1983.

By the Chief, Policy and Rules Division:

1. A petition for rule making was filed January 21, 1983, by Dianna L. Simpson ("Petitioner") proposing the assignment of Class C Channel 266 to Williston, North Dakota, as its third FM assignment. Petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned. The channel can be assigned in compliance with the minimum distance separation requirements.

2. Since the proposed assignment of Channel 266 to Williston, North Dakota, is within 320 kilometers (200 miles) of the U.S.-Canadian border, Canadian concurrance must be obtained.

3. In view of the fact that the proposed assignment could provide a third local FM broadcast service to Williston, North Dakota, the Commission believes it is appropriate to propose amending the FM Table of Assignment, § 73.202(b) of the Commission's Rule, with respect to the following community:

City	Channel No.	
	Present	Proposed
Williston, N.Dak.	241,253	241,235, and 266.

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.— A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 20, 1983, and reply comments on or before July 6, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment to which the reply is directed constitutes an *ex parte* presentation and shall not be considered in the proceeding.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303)

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, N.W., Washington, D.C.

TV Broadcast Stations in Jacksonville, Florida; Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to assign UHF Television Channel 69 to Jacksonville, Florida, as its eighth television assignment, in response to a petition filed by David Allen Crabtree.

DATES: Comments must be filed on or before June 20, 1983, and reply comments on or before July 6, 1983.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

Notice of Proposed Rule Making

In the matter of amendment of § 73.606(b), table of assignments, TV broadcast stations. (Jacksonville, Florida) (MM Docket No. 83-415, RM-4301).

Adopted: April 20, 1983.
Released: May 4, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed January 6, 1983, by David Allen Crabtree ("petitioner"), seeking the assignment of UHF Television Channel 69 to Jacksonville, Florida, as its eighth television assignment. The channel can be assigned in compliance with the minimum distance separation requirements and other technical criteria. Petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned.

2. Jacksonville (population 540,898),[1] seat of Duval County (population 570,981), is located in northeast Florida, approximately 500 kilometers (320 miles) north of Miami.

3. In view of the fact that Jacksonville could receive its eighth local television broadcast service, we shall seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) with respect to the city of Jacksonville, Florida, as follows:

City	Channel No.	
	Present	Proposed
Jacksonville, Fla.	4+, *7, 12+, 17, 30+, 47—, and *59.	4+, *7, 12+, 17, 30+, 47—, *59, and 69.

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 20, 1983, and reply comments on or before July 6, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's Rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530. However, members of the public should not that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Notice of Proposed Rulemaking

In the matter of amendment of § 73.606(b), table of assignments, TV broadcast stations. (Lebanon, Tennessee) (MM Docket No. 83-414, RM-4297).

Adopted: April 20, 1983.
Released: May 4, 1983.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed January 6, 1983, by Peggy Ann Rothchild ("petitioner") seeking the assignment of UHF Television Channel 66 to Lebanon, Tennessee, as its first television assignment.

2. Lebanon (population 11,872),[1] seat of Wilson County (population 56,064), is located in north central Tennessee, approximately 42 kilometers (26 miles) east of Nashville. Petitioner submitted information in support of the proposal and expressed an interest in applying for the channel, if assigned. The channel can be assigned consistent with the minimum distance separation requirements and other technical criteria.

3. In view of the fact that Lebanon could receive its first local television broadcast service, the Commission finds that it would be in the public interest to seek comments on the proposal to amend the Television Table of Assignments (§ 73.606(b) of the Commission's Rules) for the following community:

City	Channel No.	
	Present	Proposed
Lebanon, Tenn.		66-

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 20, 1983, and reply comments on or before July 6, 1983, and are advised to read the Appendix for the proper procedures.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's Rules. See, *Certification that Sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend Sections 73.202(b), 73.504 and 73.606(b) of the Commission's Rules,* 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Mark N. Lipp, Mass Media Bureau, (202) 634-6530.

[1] Population figures are taken from the 1980 U.S. Census Advance Report.

However, members of the public should note that from the time a *Notice of Proposed Rule Making* is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making other than comments officially filed at the Commission or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Roderick K. Porter,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and § 0.61, 0.204(b) and 0.283 of the Commission's Rules, it is proposed to amend the TV Table of Assignments, § 73.606)(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix as attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of fillings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice,* they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set put in §§ 1.415 and 1.420 of the Commission's Rule and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's Rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's Rules and Regulations, and original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its Headquarters, 1919 M Street, N.W., Washington, D.C.

Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Meeting

AGENCY: Advisory Council on Historic Preservation.

ACTION: Notice.

SUMMARY: Notice is hereby given in accordance with Section 800.6(d)(3) of the Council's regulations, "Protection of Historic and Cultural Properties" (36 CFR Part 800), that the Advisory Council on Historic Preservation will meet at the Old Post Office, 1100 Pennsylvania Avenue, NW., West Conference Room, Washington, D.C. The meeting is open to the public.

The Council was established by the National Historic Preservation Act of 1966 (16 U.S.C. Section 470) to advise the President and Congress on matters relating to historic preservation and to comment upon Federal, federally assisted, and federally licensed undertakings having an effect upon properties listed in or eligible for inclusion in the National Register of Historic Places. The Council's members are the Architect of the Capitol, the Secretaries of the Interior, Agriculture, Housing and Urban Development, Treasury, Transportation; the General Services Administrator; the Chairman of the National Trust for Historic Preservation; the President of the National Conference of State Historic Preservation Officers; a Governor, a Mayor, and eight non-Federal members appointed by the President.

The Agenda for the meeting includes the following:

Call to order
Chairman's Welcome
Order of Business
Consideration of Minutes of April 12, 1983, Meeting
I. Report of the Executive Director
II. Report of the General Counsel
  A. Regulations Review
  B. Tax Study
III. Report of the Office of Cultural Resource Preservation
  A. Status of Section 106 Cases
IV. New Business

DATE: The meeting will begin at 9:00 a.m., Wednesday, June 1, 1983.

FOR FURTHER INFORMATION CONTACT: Additional information concerning either the meeting agenda or the submission of oral and written statements to the Council is available from the Executive Director, Advisory Council on Historic Preservation, 1522 K Street NW., Suite 430, Washington, D.C. 20005; 202–254–3967.

Dated: May 5, 1983.

John M. Fowler,
Acting Executive Director.

BILLING CODE 4310-10-M

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

1983 Tobacco Price Support Levels

AGENCY: Commodity Credit Corporation (CCC), Department of Agriculture.

ACTION: Notice of proposed determination of 1983 Tobacco Price Support Levels.

SUMMARY: The purpose of this Notice of Proposed Determination is to request comments with respect to levels of price support which are required to be determined for all eligible kinds of tobacco for the 1983 marketing year in accordance with the Agricultural Act of 1949, as amended. The public is invited to submit written comments, views and recommendations concerning the proposed determinations.

DATE: Comments must be received on or before June 9, 1983 in order to be assured of consideration.

ADDRESS: Written comments should be sent to the Director, Analysis Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013. All written submissions made pursuant to this notice will be made available for public inspection from 8:15 a.m. to 4:45 p.m. Monday through Friday, in Room 3741, USDA South Building, 14th and Independence Avenue, SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Robert H. Miller (202) 447–8839 or Robert Tarczy (202) 447–5167.

A Preliminary Regulatory Analysis Statement describing the options considered in developing this notice and the impact of implementing each option is available on request from Mr. Tarczy.

SUPPLEMENTARY INFORMATION: This notice has been reviewed under USDA procedures established in accordance with Executive Order 12291 and Secretary's Memorandum 1512–1, and has been classified as "not major." The provisions of this notice will not result in: (1) An annual effect on the economy of $100 million or more, (2) a major increase in costs or prices for consumers, individual industries, Federal, State or local governments, or geographical regions, or (3) significant adverse effects on competition, employment, investment, productivity, innovation, the environment, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The title and number of the Federal Assistance Program that this notice applies to are: Title—Commodity Loan and Purchases, Number—10.051, as set forth in the Catalog of Federal Domestic Assistance.

It has been determined that the Regulatory Flexibility Act is not applicable to this notice since the Commodity Credit Corporation (CCC) is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject of this notice.

Price suport is required to be made available for each crop of a kind of tobacco for which quotas are in effect or for which marketing quotas have not been disapproved by producers at a level which is determined in accordance with a formula prescribed in Section 106 of the Agricultural Act of 1949, as amended (7 U.S.C. 1445). Under Section 106(b), the level of support for such tobacco is determined by multiplying the support level for the 1959 crop of such kind of tobacco by the ratio of the average of the index of prices paid by farmers, including wage rates, interest, and taxes (collectively referred to as the "parity index") for the three previous calendar years to the average index of such prices paid by farmers, including wage rates, interest, and taxes for the 1959 calendar year.

Section 106(d) of the 1949 Act further provides that if the Secretary determines that the supply of any grade of any kind of tobacco of a crop for which marketing quotas are in effect or are not disapproved by producers will likely be excessive, the Secretary, after prior consultation with the association through which price support for the grade and kind of tobacco is made available to producers, may reduce the support rate which would otherwise be established for such grade of tobacco after taking into consideration the effect such reduction may have on the supply and price of other grades of other kinds of quota tobacco. However, the weighted average of the support rates for all eligible grades of such kind of tobacco must reflect, after such reduction, not less than: (1) 65 percent of the increase in the support level for such kind of tobacco which would otherwise be established under section 106, if the support level therefore is higher than the support level for the preceding crop, or (2) the support level for such kind of tobacco established under this section, if the support level therefore is not higher than the support level for the preceding crop. In determining whether the supply of any grade of any kind of tobacco of a crop will be excessive, the Secretary is required to take into consideration the domestic supply, including domestic inventories, the amount of such tobacco pledged as security for price support loans, and anticipated domestic and export demand, based on the maturity, uniformity and stalk position of such tobacco.

For the 1982 crop year, the Secretary of Agriculture reduced the level of support for flue-cured, types 11–14, burley, type 31, Virginia fire-cured, type 21, dark air-cured, types 35–36, cigar binder, types 51–52, and Puerto Rican, type 46, to the maximum extent permitted by Section 106(d) of the 1949 Act. However, no such adjustment in the levels of support was made for Kentucky-Tennessee fire-cured, tupes 22–23, Virginia sun-cured, type 37, and cigar filler and binder, types 42–44, 54–55.

In determining the levels of price support for the 1983 crops of various kinds of tobacco, the average parity indexes for the three previous crop years are: 1980=950, 1981=1035, 1982=1071. The 3-year average is 1,019. The ratio of the 1980–82 average parity index (1,019) to the 1959 average parity index (298) is 3.42. Accordingly, the support level for the 1983 crop of each eligible kind of tobacco prior to any adjustments (i.e., basic support level) is 342 percent of the 1959 level as shown in the following table:

Kind and type of tobacco	Adjustment factor (number)	Support level (cents per pound) 1959	Support level (cents per pound) 1983
Flue-cured, types 11–14	3.42	55.5	189.8
Burley, type 31	3.42	57.2	195.6
Virginia fire-cured, type 21	3.42	38.8	132.7
Kentucky-Tennessee fire-cured, types 22–23	3.42	38.8	132.7
Dark air-cured, types 35–36	3.42	34.5	118.0
Virginia sun-cured, type 37	3.42	34.5	118.0
Cigar binder, types 51–52	3.42	39.6	135.4
Cigar filler and binder, types 42–44, 53–55	3.42	28.6	97.8
Puerto Rican, type 46	3.42	29.7	101.6

The increase in the basic support level from the 1982 year to the 1983 crop year is shown in the following table, which also shows the increase multiplied by 65 percent.

[Cents per pound]

Kind and type	Basic support level 1982	Basic support level 1983	Increase in 1983 from 1982 Unadjusted	Increase in 1983 from 1982 Adjusted [1]
Flue-cured, types 11–14	175.9	189.8	13.9	9.0
Burley, type 31	181.3	195.6	14.3	9.3
Virginia fire-cured, type 21	123.0	132.7	9.7	6.3
Kentucky-Tennessee fire-cured, types 22–23	123.0	132.7	9.7	6.3
Dark air-cured, types 35–36	109.4	118.0	8.6	5.6
Virginia sun-cured, type 37	109.4	118.0	8.6	5.6
Cigar binder, types 51–52	125.5	135.4	9.9	6.4
Cigar filler and binder, types 42–44, 54–55	90.7	97.8	7.1	4.6
Puerto Rican, type 46	94.1	101.6	7.5	4.9

[1] 65 percent of total increase.

The increases in 1983 from 1982 (unadjusted and adjusted) when added to the 1982 effective supprot level result in the following minimum and maximum adjusted support levels for the 1983 crops of various kinds of tobaccos:

[Cents per pound]

Kind and type	Minimum	Maximum
Flue-cured, types 11–14	178.9	183.8
Burley, type 31	184.4	189.4
Virginia fire-cured, type 21	125.1	128.5
Kentucky-Tennessee fire-cured, types 22–23	129.3	132.7
Dark air-cured, types 35–36	111.3	114.3
Virginia sun-cured, type 37	115.0	118.0
Cigar binder, types 51–52	127.6	131.1
Cigar filler and binder, types 42–44, 54–55	95.3	97.8
Puerto Rican, type 46	95.8	98.4

The supplies of all kinds of tobacco for the 1982 crop year for which price support is made available are in excess of their respective reserve supply levels, i.e., the supply deemed adequate to meet domestic use and export needs. During the 1982 crop year, the percentage of the 1982 crop which was pledged as collateral for CCC price support loans ranged from 7 percent for Virginia fire-cured (type 21) to nearly 100 percent for Puerto Rican filler (type 46).

As of February 1, 1983, the tobacco loan associations held stocks (redried weight) of 842.9 million pounds (773.5 million of which were uncommitted) representing 1975 through 1982 crops of various kinds of tobacco.

Despite marketing quota reductions, the projected supplies of the various kinds of tobacco for the 1983 crop year will remain in excess of the respective reserve supply level as indicated in the following table:

Kind and type	1982/83 Total supply [1]	1982/83 Reserve supply level	1983/84 Total supply [1]	1983/84 Reserve supply level
	Million Pounds			
Flue-cured, types 11–14	3,135	2,588	3,035	2,550
Burley, type 31	1,851	1,678	1,881	1,672
Virginia fire-cured, type 21	14.4	12.6	14.5	13.6
Kentucky-Tennessee fire-cured, types 22–23	108.1	95.9	105.6	98.7
Dark air-cured, types 35–36	58.5	52.0	54.9	51.4
Virginia sun-cured, type 37	2.3	2.0	2.4	2.2
Cigar binder, types 51–52	10.2	8.0	10.3	9.1
Cigar filler and binder, types 42–44, 54–55	87.6	82.1	83.7	79.3
Puerto Rican, type 46	8.0	[2] 3.6	7.5	[2] 3.6

[1] Projected in Final Regulatory Impact Analyses for Quota Determinations.
[2] Three times annual disappearance past 3 marketing years.

Proposed Determinations

Accordingly, the Secretary of Agriculture proposes to determine and announce with respect to the kinds of 1983-crop tobacco set forth in the following table and adjusted price support level within the ranges indicated. Comments are requested with respect to the appropriate level of price support within these ranges for the various kinds of tobacco.

VOL 48 ISS 91 MY 10 1983 UMI

[Cents per pound]

Kind and type of tobacco	Average price support level
Flue-cured, type 11–14	178.9 - 183.8
Burley, type 31	184.4 - 189.4
Virginia fire-cured, type 21	125.1 - 128.5
Kentucky-Tennessee fire-cured, types 22–23	129.3 - 132.7
Dark air-cured, types 35–36	111.3 - 114.3
Virginia sun-cured, type 37	115.0 - 118.0
Cigar binder, types 51–52	127.6 - 131.1
Cigar filler and binder, types 42–44, 54–55	95.3 - 97.8
Puerto Rican, type 46	95.8 - 98.4

Signed at Washington, D.C. on May 5, 1983.

Everett Rank,

Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410-05-M

Forest Service

Northeastern Area-State and Private Forestry; Decision Notice and Finding of No Significant Impact; Cooperative Federal-State Spruce Budworm; Suppression Project, Vermont, 1983

An environmental assessement (EA) that discusses the 1983 proposed Cooperative Suppression Project for spruce budworm in Vermont has been prepared. In this project, the Vermont Department of Forests, Parks and Recreation in cooperation with the USDA Forest Service proposes to apply *Bacillus thuringiensis* (Bt) on about 4,000 acres and Sevin 4 Oil on about 1,000 acres in Caledonia, Essex, Lamoille, Orleans, and Washington Counties.

Decision Notice

It is my decision to provide Federal financial assistance for Vermont's proposed 1983 Spruce Budworm Cooperative Suppression project. As required by the National Environmental Policy (NEPA) reglations, this decision is based on an environmental analysis. The 1983 proposed project meets USDA Forest Service environmental, biological, economic and Federal role criteria for financial assistance. Mitigation measures and specific requirements are described in the EA and are adopted as minimum precautions.

Finding of No Significant Impact

I have determined that the proposed project based on the analysis described in the environmental Assessment, is not a major Federal action and will not cause any significant environmental impacts or adverse effects. Therefore, an environmental impact statement will not be prepared. This determination considered these factors: (a) EPA has approved Bt and Sevin 4 Oil for the proposed use; (b) all applications will comply with State and Federal laws; (c) management requirements, constraints and mitigation measures ensure against significant adverse effects; and (d) physical and biological effects are limited to planned treatment areas; there will be on adverse effects on any endangered plants or animals known to inhabit the affected environment; and (e) there are no apparent adverse cumulative or secondary effects.

Copies of the Environmental Assessment are available for public review at the following offices:

Agency of Environmental Conservaton, Department of Forests, Parks and Recreation, Montpelier, Vermont 05602;

USDA Forest Service, Northeastern Area, State and Private Forestry, Louis C. Wyman Forestry Sciences Laboratory, P.O. Box 640, Durham, New Hampshire 03824; or

USDA Forest Service, Northeastern Area, State and Private Forestry, 370 Reed Road, Broomall, PA 19008.

Implementation may take place immediately after the date of this decision. This decision is not subject to administrative review (appeal) pursuant to 36 CFR Part 211.19.

Dated: May 2, 1983.

Thomas N. Schenarts,

Area Director, Northeastern Area.

BILLING CODE 3410-11-M

Mount St. Helens Scientific Advisory Board, Gifford Pinchot National Forest, Vancouver, Washington; Meeting

The Mount St. Helens Scientific Advisory Committee will meet at 9:00 a.m., May 26, 1983, at the Gifford Pinchot National Forest, Forest Supervisor's Office, 500 West 12th Street, Vancouver, Washington 98660, to develop scientific advice and recommendations relative to:

1. Corps of Engineers' planning process for Spirit Lake, Toutle, and Cowlitz Rivers.

2. On-going research project in the Mount St. Helens National Volcanic Monument.

3. Interpretation from the Congressional Record of "unimpeded" terminology in the Act.

4. Open discussion of topics of interest to the advisory board.

The meeting will be open to the public. Persons who wish to attend should notify Dr. Jack E. Wenjum, Chairperson, c/o Gifford Pinchot National Forest, Forest Supervisor's Office, 500 West 12th Street, Vancouver, WA 98660, 206-696-7570. Written statements may be filed with the committee before or after the meeting.

Dated: May 4, 1983.

Robert D. Tokarczyk,

Forest Supervisor.

Draft Environmental Impact Statement for a Regional Plan for the Lake Tahoe Basin, Tahoe Regional Planning Agency; South Lake Tahoe, California; Correction Notice

A draft environmental impact statement for a regional plan for the Lake Tahoe Basin was distributed to the public February 24, 1983, by the Tahoe Regional Planning Agency. In cooperation with the Planning Agency, the Forest Service published a notice of availability of the EIS in the **Federal Register** on March 31, 1983 (FR Vol. 48, No. 63, p.13470).

Pub. L. 95-557 was inadvertently quoted as the Compact that established the Tahoe Regional Planning Agency. The law that actually established the planning agency was Pub. L. 95-551.

All other information contained in the notice remains the same.

Dated: April 21, 1983.

David E. Ketcham,

Director of Environmental Coordination, USDA-Forest Service.

BILLING CODE 3410-11-M

Interchange of Army Lands and National Forest Lands

In the matter of; Joint Interchange Order Between Department of the Army and Department of Agriculture; Interchange of Administrative Jurisdiction of Department of the Army Lands and National Forest Lands.

This is a notice of an interchange order which describes the interchange of administrative jurisdiction on 763.84 acres of land within the boundaries of the Jefferson National Forest, Virginia, from the Department of Agriculture to the Department of the Army and the interchange of administrative jurisdiction of 5,087 acres of land within the Jefferson National Forest, Virginia, from the Department of the Army to the Department of Agriculture.

The interchange order describes the tracts briefly. Legal descriptions are on file in the Office of the District Engineer, Huntington District, Corps of Engineers, Huntington, West Virginia, and the Office of the Forest Supervisor, Jefferson National Forest, Roanoke, Virginia. The publication of this order will complete the interchange. Therefore, the order is published as follows:

R. Max Peterson,

Chief.

May 4, 1983.

Department of the Army

Department of Agriculture

North Fork of Pound Lake and John W. Flannagan Dam and Reservoir Projects; Virginia

Joint Order Interchanging Administrative Jurisdiction of Department of the Army Lands and National Forest Lands.

By virtue of the authority vested in the Secretary of the Army and in the Secretary of Agriculture by the Act of July 26, 1956 (70 Stat. 656; 16 U.S.C. 505a, 505b), it is ordered as follows:

(1) The lands under the jurisdiction of the Department of the Army described in Exhibit A attached hereto and made a part hereof, which lands are within the exterior boundaries of the Jefferson National Forest, Virginia, are hereby transferred from the jurisdiction of the Secretary of the Army to the jurisdiction of the Secretary of Agriculture, subject to outstanding rights or interests of record and to such continued use by the Corps of Engineers of all of these lands which are necessary for the operation and maintenance of the North Fork of Pound River Lake project for its intended purpose of flood control; including, but not limited to the right to flooding of the area, to construct and maintain transmission lines, utilities, access roads, and to make improvements in the aid of navigation, and the right to prohibit construction and placing of fill material below spillway crest elevation 1644', except as approved in writing by the District Engineer. The Secretary of Agriculture will assume administration of all assignable outgrants and leases now existing on the North Fork of Pound River Lake project lands hereby transferred.

(2) The National Forest lands described in Exhibit B, attached hereto and made a part hereof, which are a part of the Jefferson National Forest, Virginia, are hereby transferred from the jurisdiction of the Secretary of Agriculture to the jurisdiction of the Secretary of the Army, subject to outstanding rights or interests of record.

(3) Pursuant to Section 2 of the aforesaid Act of July 26, 1956, the National Forest lands transferred to the Secretary of the Army by this order are hereafter subject only to the laws applicable to the Department of the Army lands comprising the John W. Flannagan Dam and Reservoir Project. The Department of the Army lands transferred to the Secretary of Agriculture by this order are hereby subject to the laws applicable to lands acquired under the Act of March 1, 1911 (38 Stat. 961), as amended.

Dated: February 24, 1983.

John O. Marsh, Jr.,

Secretary of the Army.

Dated: March 22, 1983.

John R. Block,

Secretary of Agriculture.

Exhibit A: Lands Transferred From the Secretary of the Army to the Secretary of Agriculture

Land under the jurisdiction of the Department of the Army for or in connection with the North Fork of Pound Lake project located in Wise County, Virginia, as follows:

BILLING CODE 3410-11-M

CIVIL AERONAUTICS BOARD

[Order 83-5-21, Docket 41455]

Applications, etc.: Order To Show Cause; Alsair Vacations Canada Ltd. et al.; Order To Show Cause

AGENCY: Civil Aeronautics Board.

ACTION: Notice of order to show cause.

SUMMARY: The Board proposes to cancel the section 402 foreign air carrier permits of certain indirect foreign air carriers of passengers.

Dockets: 41455 and 38487.

Basis for Decision: The section 402 permit procedures for granting the necessary economic authority to indirect foreign air carriers of passengers has been replaced by a simple registration procedure (see SPR-179, 46 FR 56605, November 18, 1981 and SPR-183, 47 FR 5204, February 4, 1982). Ample time—over one year—has been provided for such permit holders to register under the new procedures. Thus, the foreign air carrier permits now held by the 18 such indirect foreign air carriers (see attachment to this notice) are duplicative and unnecessary, and should be cancelled. In addition a pending renewal application of Deutsches Reiseburo GmbH (Germany) d/b/a Der Travel Services has been dismissed as moot.

VOL 48 ISS 91 MY 10 1983 UMI

Objections: All interested persons having objections to the Board's tentative findings and conclusions that these permits should be cancelled, as described in the order cited above, shall, no later than June 24, 1983, file a statement of such objections with the Civil Aeronautics Board (20 copies) and mail copies to the indirect foreign air carriers listed in the attachment to the order cited above, the Department of Transportation, and the Department of State. A statement of objections must cite the docket number and must include a summary of testimony, statistical data, or other such supporting evidence.

If no objections are filed, the Secretary of the Board will enter an order which will make final the Board's tentative findings and conclusions to cancel the foreign air carrier permits of the indirect foreign air carriers listed on the attachment to this notice.

ADDRESSES:

For Objections: Docket 41455, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428.

Addresses for the foreign indirect air carriers are listed in the attachment to the order cited above.

To Get a Copy of the Complete Order: Request it from the C.A.B. Distribution Section, Room 100, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428. Persons outside the Washington metropolitan area may send a postcard request.

FOR FURTHER INFORMATION CONTACT: Contact Regis P. Milan, Jr., Regulatory Affairs Division, Bureau of International Aviation, Civil Aeronautics Board; (202) 673–5878.

By the Civil Aeronautics Board: May 3, 1983.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6320–01–M

DEPARTMENT OF COMMERCE

International Trade Administration

Applications for Duty-Free Entry of Scientific Instruments; University of California et al.

The following are notices of the receipt of applications for duty-free entry of scientific instruments published pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897) and the regulations issued pursuant thereto (15 CFR Part 301 as amended by 47 FR 32517).

Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the instrument is intended to be used is being manufactured in the United States. Comments must be filed in accordance with § 301.5(a) (3) and (4) of the regulations. They are to be filed in triplicate with the Director, Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230, within 20 calendar days after the date on which this notice of application is published in the **Federal Register**.

A copy of each application is on file in the Department of Commerce, and may be examined between 8:30 a.m. and 5:00 p.m., Monday through Friday, Room 1523, 14th and Constitution Avenue, NW., Washington, D.C. 20230

Docket No.: 83–91. Applicant: University of California, Lawrence Livermore National Laboratory, P.O. Box 808, Livermore, CA 94550. Instrument: Excimer Laser, Model EMG 101E and Accessories, Manufacturer: Lambda Physik GmbH and Co., West Germany. Intended use of instrument: The instrument will be used for studies of tritium recovery surface physics and chemistry, and other laser photophysics and chemistry applications. In the tritium studies, the ultraviolet laser output will be used to produce gas-phase radicals to study reaction kinetics. It will also be used as a CO_2 laser to pump an ammonia laser, which will be used for tritium recovery. In the surface studies, its wide range of available ultraviolet wavelengths, high pulse energy, and long gas fill lifetime will permit studies of surface cleaning, doping and metal and insulator deposition on semiconductors.

Application received by Commissioner of Customs: April 21, 1983.

Docket No.: 83–173. Applicant: National Institutes of Health, Radiation Oncology Branch/Division of Cancer Treatment/National Cancer Institute, 9000 Rockville Pike, Building 10, Room B3B69, Bethesda, MD 20205. Instrument: Medical Linear Accelerator (Microtron). Manufacturer: Acanditronix, Sweden. Intended use of instrument: The instrument is intended to be used for studing the use of intraoperative radiation. Application received by Commissioner of Customs: April 19, 1983.

Docket No.: 83–175. Applicant: University of Florida/Shands Hospital, Inc., Division of Surgical Pathology, Box J–275, JHMHC, Gainesville, FL 32610. Instrument: Electron Microscope, Model 109 with Accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of instrument: The instrument is intended to be use to examine the ultrastructure of human and other animal tissues during experiments which require the identification of the pathologic metabolism, malignant transformation and virus infection. In addition, the instrument will be used in teaching graduate students, medical students, and pathology residents in the courses: Basic Pathology, Surgical Pathology, Masters and Doctoral Thesis and Dissertation and Pathology Residency. Application Received by Commissioner of Customs: April 19, 1983.

Docket No.: 83–177. Applicant: University of California, San Diego, Department of Physics, B–019, La Jolla, CA 92093. Instrument: Superconducting Magnet with Gradient Coils and Accessories. Manufacturer: Cryogenic Consultants Ltd., United Kingdom. Intended use of instrument: The instrument is intended to be used for research involving the characterization of magnetic and superconducting materials to work towards an understanding of the mechanism underlying these phenomena. Future work includes continuing studies of ternary rare earth magnetic superconductors, valence fluctuations in various rare earth compounds and the effect of pressure on these and other substances. An important property in any of these investigations is the magnetic susceptibility as a function of temperature. The instrument will also be used to train four graduate students in physics research in the operation of the Faraday balance susceptometer and the associated low temperature apparatus. Application received by Commission of Customs: April 19, 1983.

Docket No.: 83–178. Applicant: Michael Reese Hospital and Medical Center, Lake Shore Drive at 31st Street, Chicago, IL 60616. Instrument: Therac 20/Saturne Liner Accelerator, Model G2900C with Accessories. Manufacturer: Atomic Energy of Canada Ltd., Canada. Intended use of instrument: The instrument is intended to be used for the following neutron versus photon plus electron studies:

1. A randomized study of neutrons and conventional radiotherapy in malignant inoperable, recurrent, and resectable head and neck tumors;

2. Non-randomized study of the value of radiation therapy using neutrons alone or in combination with surgery for the treatment of clinical stage B_2 or C or D_1 bladder carcinoma;

3. The value of radiation therapy using neutrons alone or in combination with photons in the treatment of clinical stage C adenocarcinoma of the prostate;

4. Neutron therapy in the treatment of squamous cell carcinoma of uterine cervix;

5. Treatment of squamous cell carcinoma of the oral cavity, pharynx and larynx using neutron therapy as the only planned modality;

6. Neutron therapy in the treatment of potentially operable patient with squamous cell carcinoma of the oral cavity, pharynx and larynx;

7. Efficacy of a supplementary neutron boost following irradiation of squamous cell carcinoma of the oral cavity, pharynx and larynx;

8. A randomized study of neutron therapy in the treatment of non-resectable adenocarcinoma of the pancreas;

9. A pilot study of the use of neutron beam therapy combined with Misonidazole in the treatment of high grade astrocytomas of the brain;

10. A non-randomized study of the efficacy of neutron beam therapy followed by systemic chemotherapy in the treatment of non-resectable epidermoid cancers of the lung;

Additional cooperative protocol studies not entailing the use of neutrons include:

11. A phase II protocol for the evaluation of Misonidazole combined with radiation in the treatment of patients with advanced pelvic malignancy;

12. A randomized phase III protocol for the evaluation of Misonidazole combined with radiation in the treatment of patients with brain metastases;

13. Evaluation of Misonidazole combined with radiation in the treatment of non-resectable carcinomas of the esophagus.

In addition, the instrument is intended to be used in the training of physicians. Application received by Commissioner of Customs: April 20, 1983.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

Frank W. Creel,

Acting Director, Statutory Import Programs Staff.

BILLING CODE 3510–25–M

Fiber Optic Subcommittee of the Telecommunications Equipment Technical Advisory Committee; Closed Meeting

AGENCY: International Trade Administration, Department of Commerce.

SUMMARY: The Telecommunications Equipment Technical Advisory Committee was initially established on October 23, 1973, and rechartered on September 18, 1981, in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act. The Subcommittee was established on October 5, 1981, pursuant to the charter of the Committee.

The Fiber Optic Subcommittee was formed to study fiber optic communications equipment with the goal of making recommendations to the Department of Commerce relating to the appropriate parameters for controlling exports for reasons of national security.

Time and place: May 24, 1983, at 10:00 a.m. The meeting will take place at the Main Commerce Building, Room 5611, 14th Street and Constitution Avenue, NW., Washington, D.C.

The Subcommittee will meet only in executive session to discuss matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 29, 1981, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In The Sunshine Act, Pub. L. 94–409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in

VOL 48 ISS 91 MY 10 1983 UMI

5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12356.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, telephone: 202–377–4217.

FOR FURTHER INFORMATION CONTACT: Mrs. Margaret A. Cornejo, Committee Control Officer, Office of Export Administration, Room 2613, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202–377–2583.

Dated: April 29, 1983.

Milton Baltas,

Director of Technical Programs, Office of Export Administration.

BILLING CODE 3510–25–M

Telecommunication Equipment Technical Advisory Committee; Closed Meeting

AGENCY: International Trade Administration, Department of Commerce.

SUMMARY: The Telecommunications Equipment Technical Advisory Committee was initially established on October 23, 1973, and rechartered on September 18, 1981, in accordance with the Export Administration Act of 1979 and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration with respect to questions involving: (A) Technical specifications and policy issues relating to those specifications which are of concern to the Department, (B) worldwide availability of products and systems, including quantity and quality, and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to telecommunications equipment or technology, and (D) exports of the aforementioned commodities subject to unilateral and multilateral controls which the United States establishes or in which it participates including proposed revisions of any such controls.

Time and place: May 25, 1983, at 10:00 a.m. The meeting will take place at the Main Commerce Building, Room 1851, 14th Street and Constitution Avenue, NW., Washington, D.C. The committee will meet only in executive session to discuss matters properly classified under Executive Order 12356, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

SUPPLEMENTARY INFORMATION: The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 29, 1981, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In The Sunshine Act, Pub. L. 94–409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1) and are properly classified under Executive Order 12356.

A copy of the Notice of Determination to close meetings or portions thereof is available for public inspection and copying in the Central Reference and Records Inspection Facility, Room 6628, U.S. Department of Commerce, telephone: 202–377–4217.

BILLING CODE 3510–25–M

Petitions by Producing Firms for Determinations of Eligibility To Apply for Trade Adjustment Assistance; Northwest Equipment Co., Inc., et al.

Petitions have been accepted for filing from the following firms: (1) Northwest Equipment Company, Inc., P.O. Box 10473, Yakima, Washington 98909, producer of farm implements, packing equipment, conveyors and parts (accepted April 12, 1983); (2) Homestead Woolen Mills, Inc., West Swanzey, New Hampshire 03469, producer of fabrics (accepted April 12, 1983); (3) Interstate Drop Forge Company, Milwaukee, Wisconsin 53216, producer of steel forgings and dies (accepted April 12, 1983); (4) Moore Clear Company, P.O. Box 42248, Portland, Oregon 97242, producer of iron castings (accepted April 12, 1983); (5) Progressive Furniture Company, Inc., N.W. Corner 32nd & Reed Streets, Philadelphia, Pennsylvania 19146, producer of dinette furniture (accepted April 12, 1983); (6) Wall Industries, Inc., P.O. Box 560, Elkin, North Carolina 28621, producer of cordage (accepted April 12, 1983); (7) Rielly Company, Inc., 109 River Street, Valatie, New York 12184, producer of women's and girls' apparel tops (accepted April 12, 1983); (8) Springfield Foundry Company, Inc., 295 Pasco Road, Indian Orchard, Massachusetts 01151, producer of iron castings (accepted April 12, 1983); (9) The Lightning Group, Inc., P.O. Box 8, Duncannon, Pennsylvania 17020, producer of juvenile furniture, toys and games (accepted April 12, 1983); (10) BGW Systems, Inc., 13130 South Yukon Avenue, Hawthorne, California 90250, producer of audio equipment (accepted April 12, 1983); (11) Houck Industries, Inc., 437 North M Street, Tulare, California 93274, producer of metal drawer slides (accepted April 12, 1983); (12) Arrow Huss, Inc., 5600 Butler Lane, Scotts Valley, California 95066, producer of amusement park rides (accepted April 13, 1983); (13) Terex Corporation, 5405 Darrow Road, Hudson, Ohio 44236, producer of bulldozers, haulers, loaders and scrapers (accepted April 13, 1983); (14) The L. N. Gross Company, 701 Beta Drive, Mayfield Village, Ohio 44143, producer of women's jackets, skirts, blouses and slacks (accepted April 14, 1983); (15) Nicole Originals, Ltd., 3701 N. Ravenswood Avenue, Chicago, Illinois 60613, producer of women's dresses (accepted April 14, 1983); (16) Chromex Chemical Corporation, 19 Clay Street, Brooklyn, New York 11222, producer of writing instruments and parts, ink and cosmetics (accepted April 14, 1983); (17) Macalloy Corporation, P.O. Box 130, Charleston, South Carolina 29402, producer of ferrochromium (accepted April 15, 1983); (18) Tru-Cut, Inc., 28 W. 020 Commercial Avenue, Barrington, Illinois 60010, producer of drill bits (accepted April 15, 1983); (19) Chapman Farms, R.D. No. 1, Cassville, New York 13318, producer of potatoes, peas, carrots and oats (accepted April 15, 1983); (20) Rainbow Dyeing & Finishing, Inc., 20–21 Wagaraw Road, Fair Lawn, New Jersey 07401, producer of fabric (accepted April 18, 1983); (21) Volco Brass and Copper Company, 801 Kenilworth Boulevard, Kenilworth, New Jersey 07033, producer of wire (accepted April 18, 1983); (22) Kolet Industries Company, Inc., P.O. Box 1701, Lahaina, Hawaii 96761, producer of hats (accepted April 18, 1983); (23) Tiny Folks, Inc., 135 West 29th Street, New York, New York 10001, producer of children's jumpers, skirts, blouses; overalls and pants (accepted April 19, 1983); (24) Pumice Products Company, Inc., 1300 East Franklin Road, Meridian, Idaho 83642, producer of concrete building blocks (accepted April 19, 1983); (25) Leo's Quality Foods, Inc., 1850 W. Slauson Avenue, Los Angeles, California 90047, processor of meat (accepted April 19, 1983); (26) El Paso Brick Company, Inc., P.O. Box 12336, El Paso, Texas 79912, producer of brick and tile (accepted April 20, 1983); (27) The Arkansas Company, Inc., 185 Foundry Street, Newark, New Jersey 07105, producer of chemicals (accepted April 21, 1983); (28) Tipco Sportswear, Inc., 1676 Atlanta Road, S.E., Smyrna, Georgia 30080, producer of women's slacks and shorts (accepted April 22, 1983); (29) Whitin Roberts Company, P.O. Box 1889, Charlotte, North Carolina 28233, producer of textile machinery and parts (accepted April 22, 1983); (30) Michael Berkowitz International, Inc., 180 Madison Avenue, New York, New York 10016, producer of men's and women's sleepwear and robes; women's lingerie, blouses and dresses; and disposable face masks (accepted April 26, 1983); (31) Omega Fashions, Ltd., 387 Park Avenue South, New York, New York 10016, producer of women's belts (accepted April 27, 1983); (32) All Fab Corporation, Building C–19, Paine Field, Everett, Washington 98204, producer of airplane parts (accepted April 27, 1983); (33) I. D. Watch Case Company, Inc., 137–11 90th Avenue, Jamaica, New York 11435, producer of watch cases and bands (accepted April 27, 1983); and (34) Suisan Fruit Processing Company, Inc., 1965 Kamehameha Avenue, Hilo, Hawaii 96720, processor of fruit (accepted April 29, 1983);

The petitions were submitted pursuant to Section 251 of the Trade Act of 1974 (Pub. L. 93–618) and § 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315). Consequently, the United States Department of Commerce has initiated separate investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Director, Certification Division, Office of Trade Adjustment Assistance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business of the tenth calendar day following the publication of this notice.

The Catalog of Federal Domestic Assistance official program number and title of the program under which these petitions are submitted is 11.039, Trade Adjustment Assistance. Inasfar as this notice involves petitions for the determination of eligibility under the Trade Act of 1974, the requirements of Office of Management and Budget Circular No. A–95 regarding review by clearinghouses do not apply.

Jack W. Osburn, Jr.,

Director, Certification Division, Office of Trade Adjustment Assistance.

BILLING CODE 3510–25–M

Minority Business Development Agency

Solicitation of Applications

May 3, 1983.

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: The Minority Business Development Agency (MBDA) announces that it is soliciting applications under its Minority Business Development Center (MBDC) program to operate one project for a 12-month period beginning September 1, 1983 in the Orlando, Florida SMSA. The cost of the project is estimated to be $187,000. The maximum Federal participation amount is $168,300. The minimum amount required for non-Federal participation is $187,000. The award number will be 04–10–83010–01.

Applicants shall be required to contribute at least 10% of the total program costs through non-Federal funds. Cost sharing contributions can be in the form of cash contributions, fee for services or in-kind contributions.

CLOSING DATE: June 3, 1983.

ADDRESS: Atlanta Regional Office, Minority Business Development Agency (Appropriate Address).

FOR FURTHER INFORMATION CONTACT: Gordon Anderson/Karen Davis, Telephone 404–881–3094.

SUPPLEMENTARY INFORMATION:

A. Scope and Purpose of this Announcement.

Executive Order 11625 authorizes MBDA to fund projects which will provide technical and management assistance to eligible clients in areas related to the establishment and operation of businesses. The MBDC program is specifically designed to assist those minority businesses that have the highest potential for success. In order to accomplish this, MBDA supports MBDC programs that can: coordinate and broker public and private sector resources on behalf of minority individuals and firms; offer them a full range of management and technical assistance; and serve as a conduit through which and from which information and assistance to and about minority businesses are funneled.

B. Eligible Applicants.

Awards shall be open to all individuals, non-profit organizations, for-profit firms, local and state governments, American Indian tribes and educational institutions.

C. Evaluation Process.

All proposals received as a result of this announcement will be evaluated by a MBDA review panel.

D. Evaluation Criteria for Minority Business Development Center Applications.

The evaluation criteria is designed to facilitate an objective evaluation of competitive applications for the Minority Business Development Center program.

MBDA reserves the right to reject any or all applications, including the application receiving the highest evaluation, and will exercise this right when it is determined that it is in the best interest of the Government to do so (e.g., the apparent successful applicant has serious unresolved audit issues from current or previous grants, contracts or cooperative agreements with an agency of the Federal Government).

Evaluation of proposals will employ the following criteria:

I. *Capability and Experience of Firm/Staff*—provide information that demonstrates the organization's capabilities and prior experiences in addressing the needs of minority business individuals and firms. Provide information that demonstrates the staff's capabilities and prior experiences in providing management and technical assistance to minority individuals and firms. Indicate previous experience in MBE community to be served in terms of: inventorying resources and opportunities; the brokering thereof; and providing management and technical assistance.

The following are key factors to be considered in this section:

Firm

—the organization's receptivity in the MBE community to be served, i.e., business contacts in the public and private sector; leadership responsibilities; and expereience in assisting MBE business persons and firms. (References from clients assisted are pertinent.)

—background credentials and references for the owners of the organization and a capability

VOL 48 ISS 91 MY 10 1983 UMI

statement of what the organization can do.

—knowledge of the geographic area to be served in terms of the needs of minority businesses and past ongoing relationships with local, public and private—entities that can possibly enhance the BDC program effort—i.e., Chambers of Commerce, trade associations, venture capital organizations, banks, SBA, HUD, state, city and county government agencies, etc.

Staff

—List personnel to be used. Indicate their salaries, educational level and previous experience. Provide resumes for all professional staff personnel.

—Demonstrate competence among staff to effectuate mergers, acquisitions, spin-offs and joint-ventures.

—Provide organizational chart, job descriptions and qualification standards involving all professional staff persons to be utilized on the project.

—If any contractors are to be utilized, identify and indicate areas and level of experience. *Primary consideration will be given to inhouse capability.*

Note.—All contracting proposed should be in accordance with procurement standards in Attachment O of OMB Circulars A–110 or A–102.

II. *Techniques and Methodology*—specify plans for achieving the goals and objectives of the project. This section should be developed by using the outline of the Work Requirements and the MBDC responsibilities as *guides* and will become part of the award document. Include start-up plan and example of work plan format. Fully explain the procedures for: outreach, screening, assisting and monitoring clients; maintaining the profile inventory of minority businesses; and brokering of new business ownership, market and capital opportunities and prevention of business failures. In summary, address how, when and where work will be done and by whom. Include level of performance.

III. *Resources*—address technical and adminsitrative resources, i.e., computer facilities, voluntary staff time and space; and financial resources in terms of meeting MBDA's 10% cost-sharing requirement and including a fee for services for assistance provided clients. A fee for services in the amount of 10% of the cost of assistance will be charged to all clients receiving management and technical assistance.

Cost-sharing is that portion of project costs not borne by the Federal Government. The composition and amount of cost-sharing are key factors that will be considered in determining the merit of this section. The cost sharing requirement can be met through the following order or priority: (1) cash contributions; (2) fee for services; and (3) in-kind contributions.

A. *Cash contribution*—means cash that is contributed or donated by the recipient, and other non-Federal sources, i.e., public agencies and institutions, private organizations, corporations and individuals.

B. *Fee for services*—is a charge to a client for assistance provided by the MBDC for M&TA and/or SCS.

C. *In-Kind contribution*—represents the value of non-cash contributions provided by the recipient and other non-Federal sources. The order of priority for in-kind contributions are: high technology systems to be utilized to achieve program objectives; top level staff personnel and real and personal property donated by other public agencies, institutions and private organizations. Property purchased with Federal funds will not be considered as the recipient's in-kind contribution. Under no circumstances can the in-kind contribution exceed 50% of the total non-Federal contribution.

IV. *Costs*—demonstrate in narrative format that costs being proposed will give the minority business client and the government the most effective program possible in terms of quality, quantity, timeliness and efficiency.

Include the principal costs involved for achieving work plan under Cooperative Agreement by completing Part III—the Budget Information Section of the Request for Application.

Provide cost-sharing plan information in terms of methodology and format for billing the costs of management and technical assistance and specialized consulting services to clients.

Total project cost will be evaluated in terms of:

—clear explanations of all expenditures proposed, and

—the extent to which the applicant can leverage Federal program funds and operate with *economy* and *efficiency*.

In conclusion, the applicant's schedule for start of the MBDC operation should be included in Part II. Part II will be known as the applicant's plan of operation and will be incorporated into the Cooperative Agreement Award.

A detailed justification of all proposed costs is required for Part III and each item must be fully explained.

The failure to supply information in any given category of the criteria will result in the application being considered non-responsive and dropped from competitive review.

All information submitted is subject to verification by MBDA.

E. Disposition of Proposals.

Notification of awards will be made by the Grants Officer, U.S. Department of Commerce (DOC). Organizations whose proposals are unsuccessful will be advised by MBDA, DOC.

F. Proposal Instructions and Forms.

This program is subject to OMB Circular A–95 requirements.

Questions concerning the proceeding information, copies of application forms, and applicable regulations can be obtained at the above address.

Nothing in this solicitation shall be construed as committing MBDA to divide available funds among all qualified applicants.

G. A pre-application conference to assist all interested applicants will be be held at the above address on May 19, 1983 at 1:00 p.m.

(11.800 Minority Business Development Catalog of Federal Domestic Assistance)

Dated: May 3, 1983.

Stanley W. Tate,

Regional Director.

BILLING CODE 3510–21–M

National Oceanic and Atmospheric Administration

National Marine Fisheries Service; Receipt of Application for Permit; Mystic Marinelife Aquarium

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and IMporting of Marine Mammals (50 CFR Part 216).

1. Applicant: Mystic Marinelife Aquarium (P13"0") Mystic, Connecticut 06355.

2. Type of Permit: Public Display.

3. Name and Number of Animals: Gray seals (*Halichoerus grypus*) (2).

4. Type of Take: To take for permanent maintenance.

5. Location of Activity: Canadian, Nova Scotia, waters.

6. Period of Activity: Three (3) years.

The arrangement and facilities for transporting and maintaining the marine mammals requested in the above described application have been inspected by a licensed veterinarian, who has certified that such arrangement and facilities are adequate to provide for the well-being of the marine mammals involved.

Concurrent with the publication of this notice in the **Federal Register**, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, N.W., Washington, D.C.; and

Regional Director, National Marine Fisheries Service, Northeast Region, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930.

Dated: May 4, 1983.

R. B. Brumsted,

Acting Chief, Protected Species Division, National Marine Fisheries Service.

BILLING CODE 3510–22–M

DEPARTMENT OF DEFENSE

Crops of Engineers, Department of the Army

Intent To Prepare Draft Supplement to the Final Environmental Impact Statement (EIS) of the Eastern Rapides and South-Central Avoyelles Parishes, Louisiana, Project

AGENCY: *Lead Agency:* Army Corps of Engineers, DOD.

Cooperating Agency: Soil Conservation Service, USDA.

ACTION: Notice of intent to prepare a draft supplement to the final EIS.

SUMMARY: 1. *Proposed Action.* The proposed work to be analyzed in this statement consists of actions by both the Soil Conservation Service (SCS) and the Corps of Engineers (COE). The SCS portion consists of two separate watershed projects within Rapides, Avoyelles, and St. Landry parishes to provide major drainage laterals which were developed under the authority of Pub. L. 83–566. The COE portion consists of improvements to provide for an adequate outlet for the watershed projects to be implemented. The authorized improvements consist of clearing and snagging or channel enlargement of the Chatlin Lake Canal, Bayou du Lac, Bayou des Glaises, and the Bayou des Glaises diversion channel from the vicinity of Alexandria in Rapides Parish to Darbonne Bay near Courtableau in St. Landry Parish. At Darbonne Bay a gated drainage structure and associated works would provide for the diversion of floodflows through the west Atchafalaya Basin protection levee to the West Atchafalaya Floodway, and an outlet channel would convey floodflows from the structure to low land in the floodway. An additional outlet channel would be provided through the Butte LaRose ridge in the Atchafalaya Basin Floodway near Butte LaRose, Louisiana, in St. Martin Parish. The acquisition and development for waterfowl and crawfish of the 3,700 acre Lake Pearl area in Avoyelles Parish is included as a mitigative feature of the project.

2. *Alternatives.* a. Two COE action alternatives other than the proposal were considered in the final array of alternatives. Although these final two alternatives have been eliminated due to excessive costs they are identified for the record.

(1) Plan 1 proposed the construction of a new channel from approximately Long Bridge to Hamburg and a pumping station to evacuate the floodflows from the basin. All features above Long Bridge would be similar to the proposed action. There would be no improvements to watercourses or other construction below this area.

(2) Plan 2 proposed the implementation of all channel improvement features from Chatlin Lake Canal to just north of Hwy. U.S. 190. Beginning downstream of the weirs just below Hwy. 190, the landside borrow pit adjacent to the protection levee would be enlarged to Lake Fausse Point. Additional enlargement of the Charenton Drainage Canal would be accomplished to allow the passage of floodflows to West Cote Blanche Bay and the Gulf of Mexico.

b. The alternative of no action is also being considered.

VOL 48 ISS 91 MY 10 1983 UMI

3. *Scoping Process.* a. The initial public meeting was held in November 1964 in connection with the survey study which resulted in the authorization for flood control improvements in the area. Public meetings were held on June 16 and 17, 1976, in Marksville and Opelousas, at which the proposal and ten alternatives were presented to the public for consideration. Various informal meetings have been held with federal and state agencies regarding evaluation of the project upon fish and wildlife resources.

b. Significant issues to be addressed in the draft supplemental EIS include effects on the following resources: agricultural lands, bottom land hardwood forests, aquatic resources, Henderson Lake, Lake Pearl, wildife resources, threatened and endangered species, cultural resources, water quality, recreation resources, and socioeconomic resources.

c. The U.S. Fish and Wildlife Service will provide a draft Coordination Act Report to accompany the draft supplemental EIS.

d. Coordination will be maintained with the U.S. Fish and Wildlife Service, the Louisiana Department of Wildlife and Fisheries, and any other interested agency as the study progresses.

4. *Availability.* A definite schedule has not been established for the availability of the draft supplemental EIS. Funds are not available in FY 84 for report preparation. If funds are available in FY 85, the draft supplemental EIS should be available by January, 1985.

ADDRESS: Questions concerning the proposed action and the draft supplemental EIS should be addressed to Mr. William C. Wilson (LMNPD–RE), U.S. Army Corps of Engineers, P.O. Box 60267, New Orleans, LA 70160, telephone (504) 838–2527.

Dated: May 2, 1983.

Robert C. Lee,

Colonel, Corps of Engineers, District Engineer.

BILLING CODE 3710–GX–M

DEPARTMENT OF EDUCATION

National Advisory Council on Women's Educational Programs; Meeting

AGENCY: National Advisory Council on Women's Educational Programs, Education Department.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a meeting of the National Advisory Council on Women's Educational Programs, and its Executive, Civil Rights, Federal Policies, Practices, and Programs, and Women's Educational Equity Act Program Committees. This notice also describes the functions of the Council. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATES:

June 1, 1983, 1:00 p.m. to 5:00 p.m.
June 2, 1983, 7:30 a.m. to 9:30 a.m., 10:00 a.m. to 12:30 p.m. and 2:00 p.m. to 5:00 p.m.
June 3, 1983, 9:00 a.m. to 12:00 p.m., and 1:30 p.m. to 3:30 p.m.

ADDRESS: The meetings will be held at Hotel Washington, Pennsylvania Avenue at 15th Street, N.W. and also at the Council offices at 425 13th Street, N.W., Suite 416, Washington, D.C. (See details below for exact location and times of meetings.)

FOR FURTHER INFORMATION CONTACT: Sharon Petersen, Administrative Assistant to the Executive Director, National Advisory Council on Women's Educational Programs, 425 13th Street, N.W., Suite 416, Washington, D.C. 20004; (202) 376–1038.

SUPPLEMENTARY INFORMATION: The National Advisory Council on Women's Educational Programs is established pursuant to Pub. L. 95–561. The Council is mandated to: (a) Advise the Secretary on matters relating to equal education opportunities for women and policy matters relating to the administration of the Women's Educational Equity Act of 1978; (b) make recommendations to the Secretary with respect to the allocation of any funds pursuant to the Act, including criteria developed to insure an appropriate geographical distribution of approved programs and projects throughout the Nation; (c) recommend criteria for the establishment of program priorities; (d) make such reports as the Council determines appropriate to the President and Congress on the activities of the Council; and (e) disseminate information concerning the activities of the Council.

The meeting of the Executive Committee meeting will take place on June 2, 1983, at the Hotel Washington, Pennsylvania Avenue at 15th Street, N.W. from 7:30 a.m. to 9:30 a.m. The agenda will include committee reports, personnel, the annual report and 1984 budget.

The meetings of the Civil Rights Committee, Women's Educational Equity Act Program Committee and the Federal Policies, Practices and Programs Committee will take place on June 1, 1983 from 1:00 p.m. to 5:00 p.m. at the Council offices, 425 13th Street, N.W., Suite 416, Washington, D.C.

The agenda of the Civil Rights Committee will include a review of the status of the Ambassadorship videotape, discussion of the menu of services and election of vice-chair.

The agenda of the Federal Policies, Practices and Programs Committee will include a report on Re-entry/Career Fulfillment Conferences and the report to the Council on these proposals.

The agenda of the Women's Educational Equity Act Program Committee will include revision of the site visit evaluation form:

The meeting of the National Advisory Council on Women's Educational Programs will take place June 2, 1983, from 10:00 a.m. to 12:30 p.m. and from 2:00 p.m. to 5:00 p.m. and June 3, 1983, from 9:00 a.m. to 12:00 p.m. and from 1:30 p.m. to 3:30 p.m. at the Hotel Washington, Pennsylvania Avenue at 15th Street, N.W.

The agenda will include committee reports, personnel, the Annual Report and the 1984 budget.

The meeting of the Council will be open to the public. Records will be kept of the proceedings and will be available for public inspection at the office of the National Advisory Council on Women's Educational Programs, 425 13th Street, N.W., Suite 416, Washington, D.C. 20004.

Signed at Washington, D.C. on May 5, 1983.

Rosemary Thomson,

Executive Director.

[FR Doc. 83–12531 Filed 5–9–83; 8:45 am]

BILLING CODE 4000–01–M

National Advisory Council on Continuing Education; Meeting

AGENCY: National Advisory Council on Continuing Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a meeting of the National Advisory Council on Continuing Education. It also describes the functions of the Council. Notice of meetings is required under Section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATES: June 1, 2, and 3, 1983.

ADDRESS: College of Saint Mary, 1901 South 72nd Street, Omaha, Nebraska 68124.

FOR FURTHER INFORMATION CONTACT: Dr. William G. Shannon, Executive Director, National Advisory Council on Continuing Education, 425 Thirteenth Street, NW.; Suite 529, Washington, D.C. 20004, telephone: (202) 376–8888.

SUPPLEMENTARY INFORMATION: The National Advisory Council on Continuing Education is established under Section 117 of the Higher Education Act (20 U.S.C. 1009), as amended. The Council is established to advise the President, the Congress, and the Secretary of the Department of Education on the following subjects:

(a) An examination of all federally supported continuing education and training programs, and recommendations to eliminate duplication and encourage coordination among these programs;

(b) the preparation of general regulations and the development of policies and procedures related to the administration of Title I of the Higher Education Act; and

(c) activities that will lead to changes in the legislative provisions of this title and other federal laws affecting federal continuing education and training programs.

The meetings of the Council are open to the public. However, because of limited space, those interested in attending are asked to call the Council's office beforehand.

The Council meeting will be held from 2:00 p.m. until 5:00 p.m., and from 7:00 p.m. until 9:00 p.m. on June 1; from 9:00 a.m. until 5:00 p.m., and from 7:00 p.m. until 9:00 p.m. on June 2; and from 9:00 a.m. until 12:00 Noon on June 3, 1983.

The proposed agenda includes:

—*Panel discussion:* Developing partnerships between the corporate sector and higher education.
—*Review of draft statements:*
"The Federal Government and Student Financial Assistance",
"The Federal Government and Aid to Postsecondary Institutions",
"Building Partnerships", and
"Federal Policy on Continuing Education and Training".
—*Planning annual report for 1982–1983*
—*Other Council business*

Records are kept of all Council proceedings and are available for public inspection at the office of the National Advisory Council on Continuing Education, 425 Thirteenth Street, NW.; Suite 529, Washington, D.C.

Signed at Washington, D.C. on May 4, 1983.

William G. Shannon,

Executive Director.

[FR Doc. 83–12450 Filed 5–9–83; 8:45 am]

BILLING CODE 4000–01–M

National Board of the Fund for the Improvement of Postsecondary Education; Meeting

AGENCY: National Board of the Fund for the Improvement of Postsecondary Education.

ACTION: Notice of closed meeting.

SUMMARY: This notice sets forth the proposed agenda of a forthcoming meeting of the National Board of the Fund for the Improvement of Postsecondary Education. This notice also describes the functions of the Board. Notice of this meeting is required under the Federal Advisory Committee Act (Pub. L. 92–463, Section 10(a)(2)).

DATE: June 5, 1983 at 5:00 p.m. through June 7, 1983 at 2:00 p.m.

ADDRESS: Marriott's Hunt Valley Inn, Hunt Valley, Maryland.

FOR FURTHER INFORMATION CONTACT: Sven Groennings, Director, Fund for the Improvement of Postsecondary Education, 7th & D Streets, SW., Washington, D.C. 20202 (202–245–8091).

SUPPLEMENTARY INFORMATION: The National Board of the Fund for the Improvement of Postsecondary Education is established under Section 1001 of the Higher Education Amendments of 1980, Title X (20 U.S.C. 1135a–1). The National Board of the Fund is established to "advise the Secretary and the director of the Fund for the Improvement of Postsecondary Education * * * on the selection of projects under consideration for support by the Fund in its competitions."

The meeting of the National Board is closed to the public. The meeting is for the sole purpose of reviewing and evaluating grant applications submitted to the Fund under the Comprehensive Program.

The meeting of the National Board of the Fund will be closed to the public from 5:00 p.m., June 5 until the conclusion of the agenda, approximately 2:00 p.m., June 7 for review, discussion or consideration of proposals submitted to the Fund for grant awards. The meeting will be closed under the authority of Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. Appendix I) and under exemptions (4) and (6) of Section 552(c) of the Government in the Sunshine Act (Pub. L 94–409; 5 U.S.C. 552(c) (4) and (6)). Discussions of the applications and the qualifications of proposed staff will disclose commercial or financial information obtained from applicants which is confidential or disclose information of a personal nature where disclosure of such matters to the public would consititute a clearly unwarranted invasion of personal privacy if conducted in open session.

A summary of the activities at the closed session and related matters which are informative to the public consistent with the policy of Title 5, U.S.C. 552(c) will be available to the public within fourteen days of the meeting.

Records are kept of all Board proceedings, and are available for public inspection at the Fund for the Improvement of Postsecondary Education, Room 3100, Regional Office Building, 7th and D Streets, SW., Washington, D.C. 20202 from the hours of 8:00 a.m. to 4:30 p.m.

Dated: May 4, 1983.

Edward M. Elmendorf,

Assistant Secretary for Postsecondary Education.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Energy Information Administration

Petroleum Supply Reporting System Forms; Solicitation of Comments and Notice of Public Hearing

AGENCY: Energy Information Administration, Department of Energy.

ACTION: Solicitation of comments and notice of public hearing.

SUMMARY: The Energy Information Administration (EIA) of the Department of Energy solicits comments concerning proposed changes to the Petroleum Supply Reporting System forms. In an effort to maximize public participation in the discussion of revisions to these forms, the EIA will conduct a public hearing on Friday, June 10, 1983 in Room 1E245 of the Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, beginning at 9:00 a.m. (e.d.t.)

DATES: Those wishing to provide oral testimony at the public hearing must request to speak at the hearing by 4:30 p.m. Monday, May 23, 1983 and must submit a copy of their presentation to the EIA by 4:30 p.m. Tuesday, May 31, 1983.

Those wishing to provide written comments only must submit a copy of their comments to the EIA by 4:30 p.m. Friday, June 3, 1983.

ADDRESS: Send comments, requests to speak at the hearing, and written presentation to: Special Projects Manager, EI–422, Mail Stop 2H–058, Office of Oil and Gas, Energy

VOL 48 ISS 91 MY 10 1983 UMI

Information Administration, Washington, D.C. 20585.

For Further Information or Copies of Proposed Changes Contact: Paul Chapman, EI–422, Mail Stop 2H–058, Office of Oil and Gas, Energy Information Administration, Washington, D.C. 20585, Telephone: 202–252–8384.

SUPPLEMENTARY INFORMATION:

I. Background
II. Comments and Public Hearing Procedures

I. Background

In accordance with provisions of the Department of Energy (DOE) Organization Act (Pub. L. No. 95–91), the Energy Information Administration (EIA) is responsible for carrying out comprehensive national energy data programs including the compilation and dissemination of economic and statistical information. In keeping with DOE's mandated responsibilities and in an effort to minimize respondent burden, the EIA proposes changes in the following petroleum supply data collection forms:

Monthly Refinery Report (Form EIA–810)

Monthly Bulk Terminal Stocks Report (Form EIA–811)

Monthly Product Pipeline Report (Form EIA–812)

Monthly Natural Gas Liquids Report (Form EIA–816)

Annual Sales of Liquefied Petroleum Gases (Form EIA–174)

Annual Refinery Report (Form EIA–820)

The proposed changes and modifications are designed to reduce respondent burden.

The proposed changes are summarized below:

1. Form EIA–810 (Monthly Refinery Report)—

a. Mixed liquefied petroleum gases (LPG) products (E–P mix, B–P mix, and unfractionated stream) would no longer be reported as individual commodities. Respondents would include the components of mixes with the appropriate products (i.e. BP mix would no longer be reported; the propane in BP mix would be included with propane entries elsewhere on the reporting forms).

b. Natural gasoline, isopentane, and plant condensate would be combined into a single reporting category.

c. Still gas categories for petrochemical and other use would be combined.

d. Petrochemical use and other use categories for liquefied refinery gases (LRG) would be combined.

2. Forms EIA–811 (Monthly Bulk Terminal Report) and EIA–812 (Monthly Product Pipeline Report)—

a. Mixed LPG products (E–P mix, B–P mix, and unfractionated stream) would no longer be reported as individual commodities. Respondents would report the component products separately.

b. Natural gasoline, isopentane, and plant condensate would be combined into a single reporting category.

3. Form EIA–816 (Monthly Natural Gas Liquids Report)—

a. Mixed and intermediate products E–P mix, B–P mix, and unfractionated stream) would no longer be reported as individual commodities. Respondents would report the component products separately.

b. Natural gasoline, isopentane and plant condensate would be combined into a single reporting category.

c. Report items for finished petroleum products would be eliminated. Facilities which produce finished petroleum products would be required to file Form EIA–810 (Monthly Refinery Report) instead of Form EIA–816 (Monthly Natural Gas Liquids Report).

d. An "inputs" column would no longer be included on the form. A facility would only report production of liquids derived from natural gas streams. Liquids received from other facilities would be reflected in receipts, shipments and inventory entries, but not production entries.

4. Form EIA–174 (Sales of Liquefied Petroleum Gases—

a. Butane-propane mix would no longer be reported as a commodity. Respondents would report the butane and propane in B–P mix with the entries for butane and propane.

5. Form EIA–820 (Annual Refinery Report)—

a. Instructions on storage capacity would be revised to be consistent with the proposed changes to the monthly reporting of mixes and unfractionated streams.

II. Comments and Public Hearing Procedures

A. Written Comments

EIA invites the public to comment on these proposed changes and provides the following guidelines to assist in preparation of responses.

If you are a possible data provider:

(1) How many hours, including time for research, computation, preparation and administrative review, will it take your firm to change from current reporting procedures to the proposed procedures during the first year of reporting?

(2) How many hours will your firm save in subsequent years of reporting?

(3) Estimate the initial cost of modifying the forms, including direct and indirect cost associated with the data collection. Direct costs should include all one-time and recurring costs, such as development, assembly, equipment, ADP and other administrative costs.

(4) Estimate the cost savings in subsequent years of reporting.

(5) Do you agree with each of the proposed changes? Are there additional changes that you would recommend?

If you are a data user:

(1) Do you need data at the levels of aggregation that would be available using the modified (new) forms; that is: do the products, frequency, market categories and geography reflect your needs?

(2) Do you need any of the elements of information that would be eliminated by this proposal? For what purposes would you use these data?

(3) How could the form be improved to better meet your specific data needs?

Comments will be summarized and provided in EIA's submission to the Office of Management and Budget and will become a matter of public record.

B. Public Hearings

1. *Procedures for Requests to Make Oral Presentation.* The time and place for the hearing are indicated in the "Dates" and "Addresses" sections above.

The EIA invites any interested person wishing to provide oral testimony on these forms to request to speak at the hearing no later than 4:30 p.m. Monday, May 23, 1983 and to provide a copy of the presentation to the EIA by 4:30 p.m. Tuesday May 31, 1983. Such a presentation should include the interest concerned, if appropriate, a statement indicating why the individual is a proper representative of a class of persons that has such an interest, and a telephone number where this individual may be contacted during the day. The EIA will notify each person selected to speak at the hearing by Wednesday June 1, 1983. Persons selected should bring 25 copies of their written presentations to the hearing.

2. *Conduct of the Hearing.* The EIA will schedule the presentations and establish the procedures governing the conduct of the hearing. Any person desiring to present oral testimony will be allowed to do so, time permitting. Although time constraints may limit the number of persons who will be allowed to speak, the EIA will consider all comments submitted. Likewise, the length of each presentation may be limited based on the number of persons requesting to be heard. An EIA official will preside at the hearing. This will not be a judicial or evidentiary-type hearing. Questions immediately following a presentation may be asked only at the discretion of those conducting the hearing, and there will be no cross-examination of persons presenting statements.

Any other procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer. A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained in the EIA and made available for inspection at the DOE Freedom of Information Office, Room 1E–190, 1000 Independence Avenue, S.W., Washington, D.C., 20585, between the hours of 8:30 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcript from the reporter.

Issued in Washington, D.C. on May 5, 1983.

J. Erich Evered,

Administrator, Energy Information Administration.

[FR Doc. 83–12541 Filed 5–9–83; 8:45 am]

BILLING CODE 6450–01–M

Federal Energy Regulatory Commission

[Docket No. OR83–2–000]

Coastal States Marketing, Inc., et al.; Petition for Issuance of an Order Directing Compliance With the Interstate Commerce Act

May 3, 1983.

Take notice that on April 25, 1983, Coastal States Marketing, Inc. (CSMI) and Coastal States Trading, Inc. (CSTI) filed a petition requesting the Commission to issue an order directing Texas-New Mexico Pipeline Co. and the Texas Pipeline Company (T–NMPLCo.) to continue the pre-existing practices in connection with the receipt and further transportation on a commingled basis of West Coast Sweet (WCSW) crude oil from the Four Corners Pipeline Company until appropriate tariff filings have been made and approved. CSMI and CSTI contend that T–NMPLCo. cannot change their historic practices or tariffs without filing an amended tariff on 30 days statutory notice in accordance with the provisions of the Interstate Commerce Act (ICA) Section 6(3) and 49 CFR 1300.14(a). Therefore, CSMI and CSTI further request that the Commission issue an order directing T–NMPLCo. to file any proposed changes in practices, services or tariffs in accordance with the provisions of ICA, Section 6(3) and 49 CFR 1300.14(a).

CSMI and CSTI (petitioners) state that T–NMPLCo. has changed an existing practice without properly proposing and noticing a change in its tariff. CSMI and CSTI state that the pipeline has established a sulphur content level by weight in order to commingle WCSW crude oil into the fungible stream. the petitioners state that they cannot meet the new standard, and therefore the WCSW is being "batched". The petitioners state that the result is that they are precluded from reaching their traditional markets.

A copy of the filing has been served on T–NMPLCo.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 13, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–12435 Filed 5–9–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. TA83–2–45–000 (PGA 83–2)]

Inter-City Minnesota Pipelines Ltd., Inc.; PGA Filing and Request for Waiver of Regulations

May 4, 1983.

Take notice that on April 22, 1983, Inter-City Minnesota Pipelines Ltd., Inc. (Minnesota Pipelines) tendered for filing Eighteenth Revised sheet No. 4 to Original Volume No. 1 of Minnesota Pipelines' FERC Gas Tariff. Minnesota Pipelines has requested that the sheet be suspended only for such time as is necessary to allow an effective date of May 1, 1983 for the rates set out therein.

Minnesota Pipelines represents that Eighteenth Revised Sheet No. 4 will effect the recent 54¢/MMBtu reduction in Canadian border prices applicable to gas purchased by Minnesota Pipelines for sale in its Western Zone. No change was made by the national Energy Board of Canada to the price of gas imported for sale in Minnesota Pipelines' Eastern Zone.

Minnesota Pipelines requests that the Commission waive § 154.38(d)(4)(iv)(a) of its regulations that prescribes that Minnesota Pipelines shall make only a single PGA filing effective and Minnesota Pipelines' tariff be waived to allow an effective date of May 1 for the proposed rates.

Any person desiring to be heard or to make any protest with reference to said PGA filing and request for waiver should on or before May 9, 1983 file with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceedings. Any person wishing to become a party therein must file a petition to intervene in accordance with the Commission's Rules.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83–12436 Filed 5–9–83; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. TA83–2–5–000 (PGA83–2)]

Midwestern Gas Transmission Co.; Rate Filing

May 4, 1983.

Take notice that on April 21, 1983, Midwestern Gas Transmission Company (Midwestern) tendered for filing Seventh Revised Sheet No. 6 to Original Volume No. 1 and Eighth Revised Sheet No. 37 to Original Volume No. 2 of its FERC Gas Tariff to be effective April 11, 1983.

Midwestern states that the sole purpose of the revised tariff sheets is to simultaneously reduce its Northern System rates to reflect the rate charged to Midwestern by its Canadian supplier, TransCanada PipeLines Ltd., from $4.94 per MMBtu to $4.40 per MMBtu. Midwestern requests waiver to make its filing effective as proposed and states that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of

VOL 48 ISS 91 MY 10 1983 UMI

Practice and Procedure. All such petitions or protests should be filed on or before May 9, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 83-12437 Filed 5-9-83; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ER83-196-002]

Missouri Edison Co.; Order Denying Rehearing

May 4, 1983.

On April 4, 1983, the City of Clarksville, Missouri (Clarksville) requested rehearing of an order issued on March 4, 1983, in which the Commission denied a prior request for rehearing of an order issued on December 30, 1982. The original order in this proceeding accepted for filing rates for service to Clarksville by Missouri Edison Company (Edison) and permitted the rates to become effective as of December 31, 1982, subject to the outcome of proceedings pending in Docket Nos. ER81-450-000 and ER81-461-000.

Clarksville noted in its first request for rehearing that, in addition to eliminating an 80% demand ratchet consistent with a settlement agreement in Docket No. ER81-461-000, Edison's filing increased its prior demand charge to $7.51 per month per kW. Clarksville argued that this increase in the demand charge could have no relationship to the removal of the demand ratchet because Edison had agreed in the earlier settlement agreement to eliminate the ratchet retroactive to July, 1981, without reserving the right to redesign the rate by increasing the demand charge to offset elimination of the ratchet. The Commission stated in its March 4 order that Clarksville's characterization of the settlement was incorrect. We noted that the settlement agreement provided for elimination of the demand ratchet, but contained no restriction on the level of the unit demand charge except that such charge when applied to the billing determinants excluding the ratchet would be equal to the Staff's cost of service rather than the revenue level originally proposed by Edison. We further noted that any other reading of the settlement would prove illogical since the resulting revenues would not be "in accordance with Staff's cost of service" as the agreement provided.[1]

In its April 4, 1983 pleading, Clarksville contends that the Commission's interpretation of the settlement agreement was in error because it would render meaningless the retroactive elimination of the ratchet as of July 9, 1981. Clarksville maintains that allowing the demand charge to increase nullifies any gain achieved by the retroactive elimination of the demand ratchet. Clarksville requests that the Commission reject the filing insofar as it proposes to increase the demand charge for the prior period and to initiate proceedings to determine the justness and reasonableness of a prospective application of Edison's demand charge increase. Alternatively, Clarksville asks that we remand the case to determine the parties' intent with respect to the settlement agreement.

Discussion

Upon consideration of Clarksville's request for rehearing, we conclude that the March 4 order was correct. We shall therefore deny rehearing.

Clarksville argues that if it is subjected to the increased demand charge in order that Edison may recover the same level of revenue there is no gain or loss associated with a retroactive elimination of the ratchet (Reh. App. at 4-5). The premise underlying Clarksville's contention is that the purpose of eliminating the demand ratchet retroactively was to reduce the demand charge and that the Agreement should not be construed in a manner which will defeat the purpose of this provision. However, this premise is inconsistent with the clear language of the settlement. As noted in the March 4 order, while the settlement agreement provided for elimination of the ratchet, the sole restriction on the level of the unit demand charge was that such charge would produce revenues equal to Staff's cost of service rather than the higher revenue level originally proposed by Edison. In this sense, we view the settlement agreement as a dollar settlement with all provisions being applied as of the date that the rates originally took effect. However, Edison would not be able to recover the level of revenues specified in the settlement agreement if the company could not revise the unit charge upward once the demand ratchet was eliminated. We shall therefore deny rehearing.

We shall also deny Clarksville's request to initiate proceedings to determine the justness and reasonableness of a prospective application of the revised demand charge inasmuch as it was agreed in the parties' settlement that the wholesale rate to Clarksville, which necessarily includes the demand charge component of the rate, would be in accordance with Staff's cost of service. Had the agreed upon rate been subject to further reduction as a result of elimination of the demand ratchet, then the parties could not have been agreeing to Staff's cost of service but to a lower revenue level. Because we find that the settlement provisions providing for settlement at the Staff's recommended revenue level are clear and unambiguous, there is no need for a hearing to determine the intent of the parties.

The Commission orders:

(A) Clarksville's request for rehearing is hereby denied.

(B) The Secretary shall promptly publish this order in the **Federal Register.**

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA83-2-59-000]

Northern Natural Gas Co.; Purchased Gas Cost Adjustment Rate Change

May 4, 1983.

Take notice that on April 21, 1983, Northern Natural Gas Company (Northern) tendered for filing, as part of Northern's F.E.R.C. Gas Tariff, Third Revised Volume No. 1 and Original Volume No. 2, the following tariff sheets:

Third Revised Volume No. 1:
Twentieth Revised Sheet No. 4b

Original Volume No. 2:
Thirtieth Revised Sheet No. 1c

These tariff sheets reflect reduced rates resulting from the decrease in purchased gas costs Northern will experience as a result of the decrease in the Canadian Border export price from $4.94 per Mmbtu to $4.40 per Mmbtu effective April 11, 1983. Northern states that these tariff sheets reflect a decrease in the Commodity Component of its Market Area sales rates of 4.49¢ per Mcf at 1000 Btu per cubic foot and a decrease of 4.53¢ per Mcf in its field area sales rate.

Northern requests any waiver of the Commission's regulations to the extent, if any, required to effectuate the tariff sheets on April 27, 1983.

The Company states that copies of the filing have been mailed to each of the Gas Utility customers, interested State Commissions, and all parties to Docket Nos. RP82-71 and TA83-1-59.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 9, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP83-75-000]

Northwest Central Pipeline Corp.; Proposed Changes in FERC Gas Tariff

May 4, 1983.

Take notice that on April 22, 1983 Northwest Central Pipeline Corporation (Northwest Central) tendered for filing Second Revised Sheet No. 6 and Original Sheet Nos. 96 through 99 to Original Volume No. 1 and First Revised Sheet No. 91 and First Revised Sheet No. 219 to Original Volume No. 2 of its FERC Gas Tariff to be effective on May 23, 1983.

Northwest Central states that the filing proposes an increase above its presently effective rates which reflects an increase in revenues of $19,030,347 inclusive of transportation services, based on the test period (the twelve months ended February 28, 1983, adjusted for known changes through November 30, 1983). Northwest Central states that the increased rates are required to reflect an overall rate of return of 14.63 percent; increases in wages and benefits; increases in administrative expenses; increases in prepayments for gas; increases in plant and related cost of service items; and reduced sales volumes.

Northwest Central's filing also proposes for inclusion in the General Terms and Conditions of Original Volume No. 1 of its FERC Gas Tariff a new Article 25 containing a prepayments rate adjustment provision.

Northwest Central states that this filing was served on each of its customers and affected states commissions pursuant to § 154.16(b) of the Commission's Regulations.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 9, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. TA83-2-35-000 and RP83-76-000]

Peoples Natural Gas Company, Division of InterNorth, Inc.; Rate Change and Proposal To Change Purchased Gas Cost Adjustment Provision

May 4, 1983.

Take notice that on April 25, 1983, Peoples Natural Gas Company, Division of InterNorth, Inc., (Peoples) tendered for filing as part of its FERC Gas Tariff, Original Volume No. 4 the following tariff sheets:

Thirtieth Revised Sheet No. 3a
Second Revised Sheet No. 21a
Second Revised Sheet No. 21b

Thirtieth Revised Sheet No. 3a is being filed to reflect reductions in rates received from the Colorado Interstate Gas Company. Peoples proposes to make these reductions effective to its Volume No. 4 customers on June 1, 1983.

Peoples is also proposing in this filing to change its Volume No. 4 PGA Procedures to reflect that the market area served under Volume No. 4 is potentially supplied from multiple sources rather than "a sole source of supply" as specified in the currently effective tariff.

Copies of the filing were served upon the Gas Utility Customers and interested State Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such petitions or protests should be filed on or before May 9, 1983. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

Oil Pipeline; Tentative Valuation

May 9, 1983.

The Federal Energy Regulatory Commission by order issued February 10, 1978, established an Oil Pipeline Board and delegated to the Board its functions with respect to the issuance of valuation reports pursuant to Section 19a of the Interstate Commerce Act.

Notice is hereby given that a tentative annual valuation is under consideration for the common carrier by pipeline listed below:

1981 Annual Report

Valuation Docket No. PV-1466-000
Tomahawk Pipe Line Company, P.O. Box 376, Tulsa, Oklahoma 74101

On or before June 16, 1983, persons other than those specifically designated in Section 19a(h) of the Interstate Commerce Act having an interest in this valuation may file, pursuant to rule 214 of the Federal Energy Regulatory Commission's "Rules of Practice and Procedure" (18 CFR 385.214), an original and three copies of a petition for leave to intervene in this proceeding.

If the petition for leave to intervene is granted the party may thus come within the category of "additional parties as the FERC may prescribe" under Section 19a(h) of the Act, thereby enabling it to file a protest. The petition to intervene must be served on the individual company at its address shown above and an approporiate certificate of

---

[1] The settlement agreement states:

"(3) At the conclusion of Docket No. ER81-450-000 when permanent rates are known and refunds, if any, are ordered by the Commission to be paid by Union Electric Company to Missouri Edison Company, MEC will adjust the wholesale rate to Clarksville retroactive to July 9, 1981, the date the increased rates in Docket No. ER81-461-000 went into effect subject to refund, determining such permanent rate and refund, if any, without a demand ratchet and in accordance with Staff's cost of service and the permanent rates allowed in Docket No. ER81-450-000."

VOL 48 ISS 91 MAY 10 1983 UMI

service must be attached to the petition. Persons specifically designated in Section 19a(h) of the Act need not file a petition; they are entitled to file a protest as a matter of right under the statute.

Francis J. Connor,

Administrative Officer, Oil Pipeline Board.

ENVIRONMENTAL PROTECTION AGENCY

[WH-FRL 2361-1]

Availability of Report; *Monitoring Results and Environmental Impact on the Gulf of Mexico Incineration Site from the Incineration of PCB's under Research Permit HQ 81-002;* April 1983.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Availability and Summary Report.

SUMMARY: EPA is today announcing the availability of a report entitled: *Monitoring Results and Environmental Imapct on the Gulf of Mexico Incineration Site from the Incineration of PCB's under Research Permit HQ 81-002. April 1983.*

FOR FURTHER INFORMATION CONTACT: Alan B. Rubin (WH-585), U.S. EPA, Criteria and Standards Division, 401 M Street, SW, Washington, DC 20460 (202) 245-3030.

SUPPLEMENTARY INFORMATION:

Background

Two trial burns of PCB-laden wastes were conducted in 1981-1982 onboard the incinerator vessel VULCANUS I at the designated Ocean Incineration Site in the Gulf of Mexico under research permit HQ 81-002 issued by EPA under Section 102 of the Marine Protection, Research, and Sanctuaries Act. The purpose of these trial burns was to determine the incinerability of PCB's on this vessel by calculating the material's destruction efficiency (DE) and observing incinerator operating conditions. A public meeting and a public hearing were conducted in Brownsville, Texas, on May 20, 1982 and August 31, 1982, respectively, to discuss preliminary results from the two burns and receive comment.

EPA is today announcing the availability of the final technical report on these two trial burns. The report consisting of six studies and conclusions, presents results on incinerator stack gas and environmental monitoring conducted for both burns. A summary of this report follows (attachment). The full report is available for inspection at several locations identified at the end of the report summary.

Dated: May 3, 1983.

Frederic A. Eidsness, Jr.,

Assistant Administrator.

Summary of Report Entitled: Monitoring Results and Environmental Impact on the Gulf of Mexico Incineration Site from the Incineration of PCB's under Research Permit HQ 81-002

April 1983

Abstract

From December 22, 1981 to January 2, 1982, 698,500 U.S. gallons of PCB-laden wastes were incinerated aboard the VULCANUS I. Monitoring data showed that overall waste combustion efficiency (CE) exceeded the permit requirement of 99.9%. The destruction efficiency (DE) of PCB's calculated from data obtained from the one valid sample of stack emissions was greater than the permit requirement of 99.9%. However, problems with the incinerator stack gas sampling equipment prevented the securing for analysis of more than one valid stack gas sample. Consequently, a second research burn was authorized in order to gather additional information of DE for PCB-laden wastes incinerated on the VULCANUS.

From August 15-31, 1982, an additional 800,000 gallons of liquid PCB-laden wastes were incinerated on the VULCANUS I. CE averaged 99.99%. The calculated DE for PCB's exceeded 99.99%. Environmental monitoring in the vicinity of the VULCANUS I showed no impact.

Based upon the monitoring results and incinerator performance data, EPA concludes that the operating and performance parameters under EPA research permit HQ 81-002 were met.

Executive Summary

Pursuant to reasarch permit HQ 81-002, issued under the Marine Protection, Research, and Sanctuaries Act by EPA to Chemical Waste Mangement and Ocean Combustion Service (the Permittees), the incinerator vessel VULCANUS I incinerated 698,500 U.S. gallons of liquid PCB wastes from December 22, 1981 to January 2, 1982, at the Gulf of Mexico incineration site. A second burn of an additional 800,000 U.S. gallons of these wastes occurred at the site from August 15 to August 31, 1982.

The first burn was monitored by TNO, Dutch scientific consulting organization hired by the Permittees, and these monitoring activities were observed by EPA personnel serving as shipriders. In addition, an EPA contractor, TRW, evaluated TNO's overall monitoring activities and verified their incinerator parameter measurements and their calculation of incinerator performance (CE and DE). Monitoring results showed that overall waste combustion efficiency (CE) varied between 99.916% and 99.999% (permit requirement for CE was equal to or greater than 99.9%). The wall temperatures of both incinerators varied between 1270 and 1320° C (flame temperature 1470 to 1520° C). The permit requirement for minimum wall termperature was 1200° C. A destruction eficiency (DE) for Report PCB's of greater than 99.92% was tentatively determined. TRW verified this result by analysis of a split stack gas sample. However, problems with the incinerator stack gas sampling apparatus prevented TNO from obtaining more than one valid sample to conclusively determine a scientifically supportable DE for PCB's. Monitoring data and results for the other major incinerator operational and performance parameters (temperature, carbon monoxide, excess oxygen, CE, residence time) demonstrated that the other permit requirements were met or exceeded. Permit requirements for excess oxygen in the stack gas and residence time of the waste in the incinerator were 3% minimum and 1 second or longer, respectively.

On May 20, 1982, a public meeting was held in Brownsville, Texas, to discuss these preliminary results. Several comments received at this meeting indicated that the preliminary information obtained from this burn was not sufficient and/or of a quality to demonstrate adequate incinerability of PCB's aboard the vessel. In addition, both TNO and EPA shiprider reported several minor operating difficulties during this burn. Therefore, it was decided to authorize a second burn under the permit in order to gather additional information for PCB DE calculation.

From August 15-31, 1982, an additional 800,000 gallons of liquid PCB wastes were incinerated on the vessel at the Gulf site. EPA had total control over the emissions and environmental monitoring of this burn. EPA designed, installed, and supervised the operation of the sampling train used in the determination of DE's for PCB's, chlorinated benzenes, and tetrachlorodibenzofuran isomers. In addition, EPA utilized the ocean survey vessel ANTELOPE to conduct environmental monitoring in the vicinity of the VULCANUS. The State of Texas conducted onshore monitoring for possible remnants of the incineration plume.

The various measures of incinerator performance again met or exceeded requirements of the permit. Incinerator wall temperatures averaged 1303°C (permit requirement 1200°C minimum). Excess oxygen in the incinerator stack gas averaged 10.1% (permit requirement 3% minimum). CE averaged 99.99% (permit requirement 99.9% minimum).

The Agency monitored for PCB's, chlorobenzenes, TCDF's and TCDD's in the incinerator stack gas and in the raw wastes. PCB content in the raw wastes ranged from 13.2% to 25.3% with a mean of 19.3%. Chlorobenzene content was approximately 8%. TCDF content in the waste ranged from 25 to 80 ppb. One sample of raw waste contained 0.83 ppb TCDD. None of the first two compounds were found in stack gas concentrations above detecable limits of the analytical method. On that basis, DEs for these first two compounds were calculated to be greater than 99.9906% and greater than 99.996%, respectively (permit requirement for PCB DE was 99.9% minimum). TCDF's were found in some but not all of the stack gases. TCDF DE was calculated to be greater than 99.93%.

Trace amounts of 2,3,7,8-TCDD (dioxin) were found in one of the incinerator stack gas samples. The maximum concentration of dioxin emitted was approximately 2.6% of the concentration found acceptable for emissions from land-based municipal waste resource recovery incinerators.

Environmental monitoring in the vicinity of the VULCANUS showed no impact. No effect on water chemistry or on biota exposed to the plume in the vicinity of the vessel was detected. An increase in ambient water background concentrations of organochlorines was not detected. Organochlorines in the ambient air in the immediate vicinity of the vessel were not detected.

In summary, the monitoring results obtained from the two burns of PCB wastes executed under research permit HQ 81-002 demonstrated that VULCANUS I incinerator operational and performance requirements were met or exceeded. Finally, there were no apparent environmental impacts from incineration of PCB's under these operating and performance conditions.

Summaries of Studies and Conclusions

The following section summarizes the six appendices of the report.

Appendix I—*Monitoring of Combustion Efficiency, Destruction Efficiency and Safety During the Test Incineration of PCB Waste, Carried out in the Gulf of Mexico under EPA Permit HQ 81-002—"Research", from December 22, 1981 to January 2, 1982 on the Incineration Vessel VULCANUS. Part I: Combustion and Destruction.* Report Written by H. Compaan. TNO Delft, Netherlands. 1982

From December 22, 1981 to January 2, 1982, approximately 3300 metric tons (698,500 U.S. gallons) of chemical wastes, containing PCB's were incinerated on the M/T VULCANUS I at the Gulf of Mexico incineration site.

The PCB content of the waste as specified by Chemical Waste Management, Inc., varied between 5.6 and 26.3% (w/w) per tank; the chlorine content as measured by TNO varied between 29 and 66% (w/w) per tank. Other important components of the waste were: hexachlorobutadiene, trichlorobenzene, hexachlorobenzene, hexachloroethane and fuel oil.

The incineration was carried out smoothly and there were no major problems. Minor problems encountered were vibrations of the incinerators, probably caused by the high energy content of part of the waste, and the repeated activation of the automatic shut-off valves by the ultra high frequency radio transmitter signals.

The wall temperatures of both incinerators varied between 1270 and 1320° C, which means that the flame temperatures varied from about 1470 to 1520° C. The calculated average residence times varied from 0.91 to 1.46 seconds. The combustion efficiency was monitored continuously by feeding the signals from the CO and CO_2 monitors into a microcomputer and calculating and printing the results. The combustion efficiency was never lower than 99.916% and normally varied between 99.940% and 99.999%. The stack gas monitors were calibrated three of four times a day.

In order to determine destruction efficiencies of selected waste components, three stack sampling boxes, each containing 8 sampling trains were installed on the catwalk near the top of the ovens. The stack samples were taken through one quartz tube, mounted in a water cooled stainless steel jacket, for each set of 8 sampling trains. Two of these sets could be used, the third one was lost, probably due to plugging of the quartz sampling probe by solid material coming from the brick lining of the incinerators. This may have been caused by incinerator vibrations mentioned above. The recovery factors for the sampling trains were determined in two separate experiments and varied between about 60 and 10% for different substances. The destruction efficiencies for hexachlorobutadiene, different chlorobenzenes and a number of PCB isomers were greater than 99.92% for the one valid stack gas sample obtained.

A number of stack samples were taken through the long heat traced PTFE lines, carrying the stack gases to the stack gas monitors. However, a recovery experiment showed that such a sampling line causes losses of the less volatile PCB components. Traces of PCB's were found in the samples taken through the PTFE line, but these results have not been used for the calculation of destruction efficiencies. Small amount of TCDF were found in the quartz sampling probes and in the condensate flasks.

Appendix II—*A Summary of Events, Communications, and Technical*

VOL 48 ISS 91 MY 10 1983 UMI

Data Related to the At-Sea Incineration of PCB—Containing Wastes Onboard the M/T VULCANUS, December 20, 1981 to January 4, 1982. Report Written by J. F. Metzger and D. G. Ackerman, TRW Inc., Energy and Environmental Division. Redondo Beach, California 90278. March, 1983.

This section was prepared by an EPA contractor and EPA representative who served as shipriders on VULCANUS for the first incineration cruise. It confirms TNO's findings of CE, DE, and other incinerator operational parameters. However, it reports a number of minor problems encountered during the voyage. While these problems did not affect overall ship operations, they did contribute to problems in obtaining sufficient valid measurements to allow EPA to conclude that the DE of PCB wastes was adequate.

- Routing radio transmissions interfered with operation of the camera in the "black box", and portions of the film were not properly exposed.
- The same transmissions interfered with the control electronics of ther waste feed system causing an automatic switch from waste to gasoil feed, thereby also increasing consumption of gasoil. The length of the voyage was increased.
- The fixed-position probe in the port incinerator which supplied gas to the on-line monitoring instrumentation system became plugged. The combustion gas monitors were switched to TNO's probe, but it too became plugged. Thereafter, no combustion gas measurements were possible for the port incinerator. The corresponding probe in the starboard incinerator remained functional
- Continuous and severe vibration occurred during burning of waste material having a heating value in excess of 12,000 Btu/lb. The waste injection systems did not have sufficient turndown, and all other attempts to eliminate the vibration were similary not effective.
- Sampling problems were evidenced by the loss of impinger solution. No fully adequate explanation could be advanced, but the losses for Test 3 were particularly severe and were believed to have been caused by back pressure surges occurring when the probe became plugged. Additionally, the condensate from Test 3 was colorless rather than the green expected. The pressure surges were possibly responsible for this as well, expelling liquid from the downstream impingers into the condensate trap. Test 3 was therefore judged totally invalid.
- Also during the test periods, TNO's CO analyzer was rendered inoperable by the vibration. The calibration electronics of the ship's standard CO analyzer were likewise damaged, but otherwise this instrument seemed to remain functional. It was believed that all subsequent CO readings were high by a value of 9 to 10 ppm. Erroneously high readings such as these lead to calculated combustion efficiency values that are erroneously low.

Appendix III—*Audit of the VULCANUS Incineration Ship Pior to the August 1982 PCB Burn, Mobile, Alabama.* Report Written by F.W. Sexton and D.E. Lentzen. Environmental Quality Assurance Department, Systems and Measurements Division, Research Triangle Institute, Research Triangle Park, North Carolina 27709. October, 1982.

This section describes the procedures by EPA to calibrate instruments on the VULCANUS I used to calculate overall PCB waste C.E. for the second incineration voyage permitted under research permit HQ 81–002.

Appendix IV—*At-Sea Incineration of PCB Containing Wastes Onboard the M/T VULCANUS* (August 15–31, 1982). Report Written by D.G. Ackerman, J.F. McGaughey, and D.E. Wagoner. TRW, Inc., Energy and Environmental Division. Redondo Beach, California 90278. February, 1983.

This report describes the testing that was performed during the incineration at sea of 3,523 metric tons of wastes (800,000 U.S. gallons) containing PCB's onboard the incineration ship M/T VULCANUS from August 15–31, 1982 (2nd burn authorized under research permit HQ 81–002).

EPA contracted the Energy and Environmental Division of TRW, Inc., Redondo Beach, CA, to sample and monitor the incineration process and analyze the samples in order to determine compliance with the operating and safety requirements of the permit. A representative from EPA, (the Task Officer) was onboard during the testing, and a technician-employee of EPA assisted the TRW Test Team.

A standard EPA-specified sampling train was used to acquire samples of the effluent combustion gases. A fixed-position, water-cooled probe was mounted in the starboard incinerator and directed stack gas to the train. A total of 10 stack gas monitoring tests were performed. Samples of the waste were also taken during each test. Samples thus acquired were analyzed on land for PCB's by TRW, and other possible compounds of concern in either the waste or the stack gas, tetrachlorodibenzofurans (TCDF's) and tetrachlorodibenzo-p-dioxins (TCDD's), were analyzed by the University of Nebraska Chemistry Department and EPA's Environmental Monitoring Systems Laboratory, Research Triangle Park, North Carolina.

Other test-relate activities included wipe-sampling and onboard analysis of these samples to determine compliance with the health and safety plan, acquisition of samples of work space air in the incineration control room and the dining room, and acqusition of pertinent process-related data (e.g., temperatures in the incinerators and concentrations of carbon dioxide (CO_2), oxygen (O_2), and carbon monoxide (CO) in the combustion gas).

The various measures of incinerator performance met or exceeded requirements of the permit. Incinerator wall temperatures averaged 1303° C, oxygen 10.1%, carbon dioxide 9.1%, carbon monoxide 8 ppm, and combustion efficiency 99.99%.

The Agency monitored for PCB's, chlorobenzenes, TCDF's and TCDD's in the incinerator stack gas to determine DE's of these compounds (permit requirement for PCB DE was 99.9% minimum). None of the first two compounds were present in stack gas concentrations above detectable limits of the analytical method. On that basis, DE's for these first two compounds were calculated to be greater than 99.9906% and greater than 99.996%, respectively. TCDF's were found in some but not all of the stack gases. TCDF DE was calculated to be greater than 99.93%.

Minute amounts of TCDD were found in one waste and one stack gas sample. Since the two samples did not come from the same test, no DE conclusions could be derived. The amount of TCDD found in the waste (0.83 ppb) was well below levels of TCDD found in Agent Orange incinerated during earlier burns (2.0 ppm). The amount of TCDD found in the one stack gas sample corresponded to an emission concentration of 0.09 ng/m³ whereas EPA's—*Interim Evaluation of Health Risks Associated with Emissions of Tetrachlorinated Dioxins from Municipal Waste Resource Recovery Facilities—November 1982,* allows TCDD emission up to 3.5 ng/m³.

Appendix V—*Biological Monitoring of PCB Incineration at the Designated Site in the Gulf of Mexico.* Report Written by TerEco Corporation, College Station, Texas 77841. October, 1982.

This section details environmental monitoring for changes in water chemistry and toxicity effects on marine organisms as a result of incineration plume exposure.

During July 1982, TerEco personnel conducted a 4-day baseline or preburn cruise to the Gulf Ocean Incineration Site to check upon environmental conditions at the site to the incineration of PCB wastes and to launch two pelagic biotal ocean monitors (P–BOM's). In August they participated in a 5-day monitoring cruise during which time they launched five P–BOM's, three of which were impacted by the fallout plume of M/T VULCANUS, and two of which served as controls. Three species of marine organisms were exposed in each BOM and were processed for laboratory analyses while still aboard the OSV ANTELOPE.

Laboratory analyses involved determinations of concentrations of PCB's in the surface waters, in collectors placed on each P–BOM, in neuston, and in the tissues of *Menidia beryllina* and *Fundulus grandis* (both finfish). No increase in ambient water background levels of organochlorines was detected from the incineration. Results show that *Fundulus* and *Menidia* did not accumulate additional PCB's above their background levels. The core of the monitoring effort centered in determining the adenylate energy charge (AEC) of test (exposed to fallout plume) and control individuals of the above species and the grass shrimp *Palaemonetes pugio.* Although the results of AEC calculations revealed that all three species suffered some stress during their stay on the ship and their exposure in the P–BOM's, it was concluded that plume contact from the incineration of PCB wastes could not have caused this physiological reaction. More likely as a cause is the long delay in deciding upon ship departure and the related long period that test organisms had to stay in crowded conditions. Metabolic enzyme analyses carried out on *Fundulus* tissues compare favorably with results obtained by TerEco in other environmental studies. No evidence was generated that related any metabolic change in test animals directly to the incineration process.

Appendix VI—*Ambient Air Monitoring of the August 1982, M/T VULCANUS PCB Incineration at the Gulf of Mexico Designated Site.* Report Written by Michael A. Guttman, Norman W. Fynn, and Robert F. Shokes. JRB Associates. La Jolla, California 92038. January, 1983.

This section reports on ambient air monitoring in the immediate vicinity (0.5–15 miles) of the incinerator vessel conducted onboard EPA's ocean research vessel, the ANTELOPE. Plume contract was demonstrated by HCl readings significantly higher than background levels. Organochlorines were not detected for the incineration of PCB wastes.

During July and August, 1982, scientists from the U.S. Environmental Protection Agency and JRB Associates conducted preburn baseline and incineration monitoring surveys at the Gulf of Mexico designated incineration site. Data on ambient air background concentrations of HCl and organochlorines were obtained on the baseline cruise. The August 1982 incineration was a controlled PCB wate burn conducted by the M/T VULCANUS. Using the government's survey vessel, OSV ANTELOPE, as a sampling platform to track the incineration plume and collect ambient air samples for polychlorinated biphenyl (PCB) measurement, the primary objective was to determine if any detectable amounts of fugitive PCB's or organochlorine residues from the incineration process could be found in the atmosphere. Using a dispersion model (Turner, 1970) to predict plume location and guide the sampling, a secondary objective was to check the model's validity using hydrogen chloride (HCl) from the incineration process as a tracer.

Results from the baseline survey indicate only very trace amounts of airborne organic materials, and no organochlorines. By comparison during the incineration monitoring, significantly higher amounts of airbrne organics were measured, but again no PCB's or other organochlorines were detected. Presumably, the elevated airborne organics were generated by combustion on the VULCANUS, either from the waste incineration or from the vessel's propulsion engines. Real-time HCl monitoring assured that the incineration emission plume generated by the VULCANUS was being sampled. Although there were discrepancies between measured airborne HCl levels and distributions predicted by the model, agreement between the two was relatively good considering the uncertainties involved in modeling atmospheric stabiltiy.

Supplemental Reports

Presently, two supplemental reports are still in preparation. They will be made available for public inspection within the next thirty days at the locations identified below.

The first supplemental report is being prepared by the State of Texas. This report will furnish monitoring data for incineration plume remnants at several shore locations. Preliminary results indicate no detectable increase in ambient air organochlorine or HCl concentrations. These results are expected since ambient air monitoring in the immediate vicinity of the VULCANUS yielded no detectable concentrations of organochlorines and only ppm concentrations of HCl.

The second supplemental report is being prepared by EPA and will present descriptive worst case scenarios for spillage of a full shipload of PCB wastes over commercially and recreationally important Gulf Coast fishing and shrimping grounds as well as spillage at the Gulf of Mexico incineration site. Probabilities of such occurrences will also be stated. This report will also describe a worst case meteorological scenario for plume remnant transport to landfall, indicating PCB concentrations reching land. These concentrations will be compared to ambient background PCB concentrations and several OSHA and NIOSH standards. Total PCB exposure due to contact with plume remnants under worst case meteorological conditions will be compared to PCB exposure from other routes such as diet. As with worst case spillages, a probability or occurrence frequency of such worst case meteorological conditions will be stated.

Full Report Availability

All appendices in this report are on file at the following locations for inspection during normal business hours:

United States Environmental Protection Agency, Criteria and Standards Division, 401 M Street, SW., Washington, DC 20460, Attn: Dr. Alan B. Rubin, 2818 Mall, (202) 245–3030

United States Environmental Protection Agency, Library, Room 2404 Mall, 401 M Street, SW., Washington, D.C. 20460

U.S. Army Corps of Engineers Brownsville, Room 508, Boca Chica Towers, 2100 Boca Chica Blvd., Brownsvill, Texas

United States Environmental Protection Agency, Region VI, 1201 Elm Street, Dallas, Texas 75270, Attn: Bob Vickery

Appendix IV to this report is also identified as EPA Report No. 600/7–83–024, April, 1983 and may be ordered from the National Technical Information

Telecommunications Industry Advisory Group Income and Other Accounts Subcommittee

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), notice is hereby given of a meeting of the Telecommunications Industry Advisory Group (TIAG) Income and Other Accounts Subcommittee scheduled for Wednesday and Thursday, June 8 and 9, 1983. The meeting will begin on June 8 at 9:30 a.m. in the offices of AT&T, Conference Room A (10th Floor), 1120 20th Street NW., Washington, D.C., and will be open to the public. The agenda is as follows:

I. General Administrative Matters
II. Discussion of Assignments
III. Other Business
IV. Presentation or Oral Statements
V. Adjournment

With prior approval of Subcommittee Chairman Glenn L. Griffin, oral statements, while not favored or encouraged, may be allowed at the meeting if time permits and if the Chairman determines that an oral presentation is conducive to the effective attainment of Subcommittee objectives. Anyone not a member of the Subcommittee and wishing to make an oral presentation should contact Mr. Griffin (214/659–3484) at least five days prior to the meeting date.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Review Schedule Under OMB Circular A–76 for FEMA In-House Commercial Activities

AGENCY: Federal Emergency Agency.

ACTION: Notice.

The following is a listing of the Federal Emergency Management Agency (FEMA) in-house commercial activities that are scheduled for an A–76 review in fiscal year 1983. The information is provided in accordance with OMB Circular No. A–76, Revised, "Policies for Acquiring Commercial or Industrial Products and Services Needed by the Government," dated March 29, 1979. Information identifies the function, location of work performance, manpower required to perform the work, and the date that the activity review is to be completed.

1. Transportation Services; Emmitsburg, MD; 4 workyears; July 31, 1983.
2. Audiovisual Products/Services; Washington, DC; 2 workyears; July 31, 1983.
3. Audiovisual Products/Services; Emmitsburg, MD; 4.75 workyears; August 31, 1983.
4. Guard Protection Services; Thomasville, GA; 3 workyears; September 30, 1983.

Inquiries concerning the reviews should be addressed to the FEMA A–76 contact, Gail Kercheval, (202) 287–0293, 500 C Street SW, Washington, DC 20472.

Dated: May 4, 1983.

Walter A. Girstantas,

Assistant Associate Director, Office of Administrative Support.

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and may request a copy of each agreement and the supporting statement at the Washington, D.C. Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit protests or comments on each agreement to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 20 days after the date of the **Federal Register** in which this notice appears. The requirements for comments and protests are found in § 522.7 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Any person filing a comment or protest with the Commission shall, at the same time, deliver a copy of that document to the person filing the agreement at the address shown below.

Agreement No. T–4109.

VOL 48 ISS 91 MY 10 1983 UMI

Title: Georgia Ports Authority/ Japanese Lines Volume Incentive Agreement

Parties: Georgia Ports Authority (Authority), Japan Lines, Ltd., Kawasaki Kisen Kaisha, Ltd., Mitsui O.S.K. Lines, Ltd., Nippon Yusen Kaisha Yamashita-Shinnihon Steamship Co., Ltd. (Japanese Lines)

Synopsis: Agreement No. T-4109 is a three year agreement between the Authority and the Lines guaranteeing minimum wharfage payment and providing for incremental savings to the Lines in exchange for their nonexclusive use of the facilities.

Filing Party: Robert W. Goethe, Assistant Executive Director, Georgia Ports Authority, P.O. Box 2406, Savannah, Georgia 31402.

Agreement No. 2744-50.

Title: Atlantic and Gulf/West Coast of South America Conference.

Parties: Chilean Line (Compania Sud-Americana De Vapores), Delta Steamship Lines, Inc., Flota Mercante Grancolombiana, S.A., Peruvian State Line (Compania Peruana De Vapores), Lykes Bros. Steamship Co., Inc., Transnave (Transportes Navieros Equatorianos).

Synopsis: The scope of the basic agreement would be amended to add U.S. intermodal authority.

Filing Party: Nathan J. Bayer, Esquire, Freehill, Hogan & Mahar, 80 Pine Street, New York, N.Y. 10005.

Agreement Nos. 3868-30 and 3868-31.

Title: United States Atlantic and Gulf/ Panama Freight Conference.

Parties: Delta Steamship Lines, Inc., Lykes Bros. Steamship Co., Inc., Sea-Land Service Inc. and United States Lines, Inc.

Synopsis: The basic agreement would be amended (1) to provide that the members may agree upon and file proportional rates and (2) to add authority for alternate port service.

Filing Party: Nathan J. Bayer, Esquire, Freehill, Hogan & Mahar, 80 Pine Street, New York, N.Y. 10005.

By Order of the Federal Maritime Commission.

Dated: May 5, 1983.

Francis C. Hurney,

Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Acquisition of Bank Shares by a Bank Holding Company

The company listed in this notice has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire voting shares or assets of a bank. The factors that the are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated. With respect to the application, interested persons may express their views in writing to the address indicated. Any comment on the application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Board of Governors of the Federal Reserve System** (William W. Wiles, Secretary) Washington, D.C. 20551:

1. *First City Bancorporation of Texas, Inc.*, Houston, Texas; to acquire 100 percent of the voting shares or assets of First City Bank-Forum, N.A., San Antonio, Texas, a *de novo* institution. This application may be inspected at the offices of the Board of Governors or the Federal Reserve Bank of Dallas. Comments on this application must be received not not later than June 3, 1983.

Board of Governors of the Federal Reserve System, May 4, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-12409 Filed 5-9-83; 8:45 am]

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed De Novo Nonbank Activities

The organizations identified in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to these applications, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any comment that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated. Comments and requests for hearing should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than the date indicated.

A. **Federal Reserve Bank of Kansas City** (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *Omaha National Corporation*, Omaha, Nebraska (mortgage lending activities; Kansas and Missouri): To engage through its subsidiary, Realbanc, Inc., in mortgage lending activities; including the extension of residential mortgage loans for sale to permanent investors, the extension of construction loans and the performance of local collection and inspection activities related thereto. These activities will be conducted from an office in Kansas City, Missouri, and will serve the States of Missouri and Kansas. Comments on this application must be received not later than June 3, 1983.

2. *American Commerce Bancshares, Inc.*, Oklahoma City, Oklahoma (mortgage financing; Oklahoma): To engage directly in making residential mortgage loans for sale into the secondary real estate market. These activities would be performed in Oklahoma City, Oklahoma serving Oklahoma County, Cleveland County and Canadian County in the State of Oklahoma. Comments on this application must be received not later than June 3, 1983.

B. **Federal Reserve Bank of San Francisco** (Harry W. Green, Vice President) 400 Sansome Street, San Francisco, California 94120:

1. *Security Pacific Corporation*, Los Angles, California (mortgage and servicing activities; Colorado): To engage through its subsidiary, Security Pacific Mortgage Corporation, in the origination and acquisition of mortgage loans, including development and construction loans on multi-family and commercial properties for Security Pacific Mortgage Corporation's own account or for sale to others; and the servicing of such loans for others. These activities would be conducted from an office of Security Pacific Mortgage Corporation in Arvada, Colorado, serving the State of Colorado. Comments on this application must be received not later than June 3, 1983.

2. *Security Pacific Corporation*, Los Angeles, California (mortgage and servicing activities; California): To engage through its subsidiary, Security Pacific Mortgage Corporation, in the origination and acquisition of mortgage loans, including development and construction loans on multi-family and commercial properties for Security Pacific Mortgage Corporation's own account or for sale to others; and the servicing of such loans for others. These activities would be conducted from an office of Security Pacific Mortgage Corporation in Los Angeles, California, serving the State of California. Comments on this application must be received not later than June 3, 1983.

3. *Woodburn Bancorp*, Woodburn, Oregon (leasing activities; Oregon): To establish a *de novo* subsidiary, Woodburn Bancorp Leasing, Inc., to engage in leasing real and personal properties and servicing such leases in accordance with the Federal Reserve Board's Regulation Y. These activities would be conducted from an office of Woodburn Bancorp in Woodburn, Oregon, serving Woodburn and the surrounding rural area. Comments on this application must be received not later than June 2, 1983.

VOL 48 ISS 91 MY 10 1983 UMI

Board of Governors of the Federal Reserve System, May 4, 1983.

James McAfee,

Associate Secretary of the Board.

[FR Doc. 83-12410 Filed 5-9-83; 8:45 am]

BILLING CODE 6210-01-M

Formation of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become bank holding companies by acquiring voting shares or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated for that application. With respect to each application, interested persons may express their views in writing to the address indicated for that application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Independent Banks of Virginia, Inc.*, Norfolk, Virginia; to become a bank holding company by acquiring 100 percent of the voting shares of Heritage Bank & Trust, Norfolk, Virginia. Comments on this application must be received not later than May 27, 1983.

B. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *Alexander City Bancshares, Inc.*, Alexander City, Alabama; to become a bank holding company by acquiring 100 percent of the voting shares of Alexander City Bank, Alexander City, Alabama. Comments on this application must be received not later than May 25, 1983.

Board of Governors of the Federal Reserve System, May 4, 1983.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Center for Disease Control

Health Risks in Information Processing; Open Meeting

The following meeting will be convened by the National Institute for Occupational Safety and Health (NIOSH) of the Centers for Disease Control and will be open to the public for observation and participation, limited only by space available:

Date: May 20, 1983.
Time: 9:30 a.m.
Place: Robert A. Taft Laboratory, 4676 Columbia Parkway, Cincinnati, Ohio 45226.
Purpose: To review and discuss a research protocol for validating:
(1) a questionnarie instrument developed to measure aspects of information proceesing load, and
(2) a physiological approach, involving heart rate recording, to assessing information processing demands.

Additional information may be obtained from: Joseph J. Hurrell, Jr., Ph.D., Applied Psychology and Ergonomics Branch, Division of Biomedical and Behavioral Science, Mail Stop C-24, 4676 Columbia Parkway, Cincinnati, Ohio 45226, Telephone: 513/684-8293.

Dated: May 4, 1983.

William C. Watson, Jr.,

Acting Director, Centers for Disease Control.

[FR Doc. 83-12483 Filed 5-9-83; 8:45 am]

BILLING CODE 4160-19-M

Food and Drug Administration

[Docket No. 82N-0373]

Clinical Studies of Effects of Orphan Products; Grants

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) announces the availability of funds for fiscal year 1983 for awarding grants to support clinical trials on safety and effectiveness of orphan products. FDA expects to award approximately 15 to 30 grants ranging from $20,000 to $70,000 each. FDA will consider larger grants if they extend over a 2- or 3-year period.

DATE: Applications must be received by 4 p.m. on July 11, 1983. The earliest beginning date for awards is September 12, 1983.

FOR FURTHER INFORMATION CONTACT: Benjamin P. Lewis, Office of Orphan Products Development (HF-35), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857; 301-443-4903.

SUPPLEMENTARY INFORMATION: FDA will support the clinical studies covered by this notice under section 301 of the Public Health Service Act (42 U.S.C. 241). FDA's research program is described in the Catalog of Federal Domestic Assistance, No. 13.103.

I. Background

FDA has established an Office for Orphan Products Development to identify and facilitate the availability of orphan products. Orphan products are drugs, biologics, medical devices (including in vitro diagnostics), foods for medical purposes, and veterinary products that may be useful in an uncommon or common disease but lack committed commercial sponsorship because they are not considered commercially attractive for marketing. A subcategory of orphan products are those marketed products with suggestive evidence of usefulness in an uncommon, serious disease but which are not labeled for that disease because definitive evidence is lacking.

One way to make orphan products more easily available is to support research to determine whether the products are safe and effective. FDA has allocated funds to support such research.

II. Research Goals and Objectives

FDA will consider only clinical studies for determining whether the products are safe and effective for premarket approval under the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.), including the addition of new uses to marketed drugs. Ordinarily, there should already be available at least some preliminary clinical research suggesting effectiveness and relative safety, though FDA will also consider applications where persuasive pharmacologic evidence is available that a product has a reasonable possibility of being effective even though no clinical trials have yet been performed. All studies subject to requirements for clinical investigations under the Federal Food, Drug, and Costmetic Act are to be conducted in accordance with those requirements in addition to the requirements of the request for application (RFA).

Because funds are relatively limited, FDA cannot consider large research projects involving many patients and long-term followup. The typical study considered for support may involve up to several dozen patients and will be well controlled and directed to providing substantial evidence of the product's safety and effectiveness. Pharmacokinetic studies will also be considered if they are necessary to determine safe and effective doses in patients with serious organ disease that might affect drug disposition. But pharmacokinetic studies will be considered only if they are part of studies for determining effectiveness of a drug or are proposed as disirable information to obtain for drugs that are already shown to be effective. In designing a well-controlled study, the investigator should keep in mind that historical controls or use of the patient as his/her own control are generally less desirable and reliable than active control or, when ethical, placebo controls.

III. Reporting Requirements

Financial status reports will be required at the end of each budget period.

IV. Mechanism of Support

A. *Ward Instrument.* Support will be in the form of grant awards. These awards will be subject to all policies and requirements that govern the research grant programs of the Public Health Service including the provisions of 42 CFR Part 52, 45 CFR Part 74, and requirements for cost sharing.

B. *Eligibility.* These grants are available to any public or private nonprofit entity (including State and local units of government) and any for-profit entity.

C. *Length of Support.* The length of support will depend upon the nature of the study and may extend beyond 1 year. For studies where the expected date of completion is more than 1 year, however, continuation of support beyond the first year will be based upon review of performance during the preceding year and availability of funds.

D. *Funding plan.* The number of studies funded will depend on the quality of the applications received and the availability of funds.

V. Review Procedure and Criteria

A. *Review Method.* Applications will undergo initial review by experts in the field relative to the specific application. The experts will review and evaluate each application based on its scientific merit. The applications will be subject to a second-level review to evaluate them based on their relevance to the aims of the Orphan Products Development Program. Applications will also be reviewed prior to an FDA grant award to ensure to the extent practicable that proposed studies are consistent with requirements for approval under the Federal Food, Drug, and Cosmetic Act.

B. *Review Criteria.* Applications must be responsive to this request for applications. Those judged not to be responsive will be referred to the Division of Research Grants, National Institutes of Health (NIH), for review and consideration as unsolicited applications. Applications that are judged to be unresponsive will not be considered for funding under this RFA. Applications will be reviewed according to the following criteria.

1. Responsiveness to the RFA.
2. The soundness of the rationale for the study.
3. The appropriateness of the study design to answer the question posed.
4. The evidence presented by the applicant that he/she will be able to recruit the proposed number of patients and complete the study during the allotted period.
5. The plans for complying with regulations for protection of human subjects as applicable to the proposed study.
6. The research experience, training, and competence of the principal investigator and the support staff.

VI. Format for Application

Applications must be submitted on Form PHS 398, Public Health Service Grant Application. The face page of the application must reflect the RFA number RFA-FDA-OP-83-1. To ensure confidentiality of individual salary information, applicants may choose to include that information on the original application only. All copies of the application should reflect only a total amount for salaries and fringe benefits. the copies of the application will be distributed to the reviewers when the application is received. No action will be taken by the funding agency to delete confidential information. Data included in the application, if restricted with the legend specified below, may be entitled to confidential treatment as trade secret or confidential commercial information within the meaning of the Freedom of Information Act (5 U.S.C. 552(b)(4)) and the regulations of the Food and Drug Administration implementing the Act (21 CFR 20.61).

The collection of information requested on the PHS Form 398 and the instructions have been submitted by the Public Health Service (PHS) to the Office of Management and Budget (OMB), and were approved and assigned OMB control number 0925-0001.

Legend

Unless disclosure is required by the Freedom of Information Act, 5 U.S.C. 552, as amended (the act) as determined by the Freedom of Information (FOI) Officials of the Department of Health and Human Services, data contained in the portions of this application with have been specifically identified by page number, paragraph, etc., by the applicant as containing restricted information shall not be used or disclosed except for evaluation purposes.

The original and six copies of the completed application should be delivered to, and application kits are available from, Helen M. Crown, Chief, State Contracts and Assistance Agreement Branch (HFA-520), Food and Drug Administration, Rm. 12A-27, 5600 Fishers Lane, Rockville, MD 20857; 301-443-6170.

Label the outside of the mailing package and the top of the application face page "Response To RFA-FDA-OP-83-1."

Applications must be received by 4 p.m. on July 11, 1983. Those received later will be considered in a second round of review if unobligated funds remain in the program. If there are no funds remaining, late applications will be referred to the Division of Research Grants, National Institutes of Health, for review as unsolicited applications.

Dated: May 3, 1983

Arthur Hull Hayes, Jr.,

Commissioner of Food and Drugs.

[FR Doc. 83-12445 Filed 5-9-83; 8:45 am]

BILLING CODE 4160-01-M

Eastern Shore Labs., Inc.; Aquamycin Soluble Powder; Withdrawal of Approval of NADA

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of a new animal drug application (NADA) sponsored by Eastern Shore Labs., Inc., providing for use of Aquamycin Soluble Powder (tetracycline hydrochloride) for making medicated drinking water used in chickens, turkeys, calves, and swine for preventing and treating certain diseases. The firm requested withdrawal of approval.

EFFECTIVE DATE: May 20, 1983.

FOR FURTHER INFORMATION CONTACT: Howard Meyers, Bureau of Veterinary Medicine (HFV-218), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857; 301-443-4093.

SUPPLEMENTARY INFORMATION: Eastern Shore Laboratories, Inc., Laurel, DE 19956, is sponsor of NADA 65-095, which provides for use of Aquamycin Soluble Powder (tetracycline hydrochloride) for making medicated

VOL 48 ISS 91 MY 10 1983 UMI

drinking water used in chickens, turkeys, calves, and swine for preventing and treating certain diseases.

The product was originally approved on August 26, 1969. Approval of this NADA has not been codified in the Code of Federal Regulations. This firm, in its submission of October 29, 1982, to FDA's Bureau of Veterinary Medicine, requested withdrawal of approval of the NADA without prejudice and waived opportunity for a hearing (see 21 CFR 514.115(d)) because the product is not being manufactured.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345–347 (21 U.S.C. 360b(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10) and redelegated to the Bureau of Veterinary Medicine (21 CFR 5.84), and in accordance with § 514.115 Withdrawal of approval of applications (21 CFR 514.115), notice is given that approval of NADA 65–095 and all supplements for Aquamycin Soluble Powder is hereby withdrawn, effective May 20, 1983.

Dated: May 2, 1983.

Lester M. Crawford,

Director, Bureau of Veterinary Medicine.

[FR Doc. 83-12446 Filed 5-9-83; 8:45 am]

BILLING CODE 4160-01-M

[Docket No. 83N-0061]

Codex Standard for Dried Edible Fungi

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is publishing the Codex Standard for Dried Edible Fungi (Codex Standard 39–1981) (Codex standard) developed by the Codex Alimentarius Commission and announcing that no U.S. standard will be established for dried edible fungi based on the Codex standard.

FOR FURTHER INFORMATION CONTACT: F. Leo Kauffman, Bureau of Foods (HFF–214), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–245–1164.

SUPPLEMENTARY INFORMATION: The Food and Agriculture Organization (FAO) and the World Health Organization (WHO) jointly sponsor the Codex Alimentarius Commission, which conducts a program for developing worldwide food standards. As a member of the Codex Alimentarius Commission, the United States is obligated to consider all Codex standards for acceptance. The rules of procedure of the Codex Alimentarius Commission state that a codex standard may be accepted by a participating country in one of three ways: full acceptance, target acceptance, or acceptance with specified deviations. A commitment to accept at a designated future date constitutes target acceptance. A country's acceptance of Codex standard signifies that, except as provided for by specified deviations, a product that complies with the codex standard may be distributed freely within the accepting country. A participating country which concludes that it will accept a Codex standard is requested to inform the codex Alimentarius Commission of this fact and the reasons therefor, the manner in which similar foods marketed in the country differ from the Codex standard, and whether the country will permit products complying with the Codex standard to move freely in that country's commerce.

The United States can accept some or all of the provisions of a Codex standard for any food to which the Federal Food, Drug, and Cosmetic Act (the act) applies by establishing a standard under the authority of section 401 of the act (21 U.S.C. 341), or by revising an existing standard appropriately to incorporate the Codex provisions within the U.S. standard. However, section 401 of the act states that no definition and standard of identity and no standard of quality shall be established for dried vegetables. Therefore, there are no U.S. standards for dried edible fungi.

Although no U.S. standard for dried edible fungi can be established, FDA is publishing the Codex standard, as set forth below, in accordance with 21 CFR 130.6. Because FDA cannot establish a standard for dried edible fungi, no comments are solicited in response to this notice. The Codex Alimentarius Commission will be informed that an imported food which complies with the requirements of the Codex standard may move freely in interstate commerce in this country providing it complies with applicable U.S. laws and regulations.

The Codex standard for Dried Edible Fungi is as follows:

Codex Stan. 39–1981—Codex Standard For Dried Edible Fungi [1]

World-wide Standard

1. *Scope*

This standard applies to dried fungi (including freeze-dried fungi), whole or sliced, of all edible species, after preparation and packaging.[2]

[1] Formerly CAC/RS 39–1970.

[2] This standard also covers dried fungus Shii-ta-ke.

2. *Description*

2.1 *Definitions of products*

2.1.1 "Whole dried fungi" means the product obtained from cleaned and dried edible fungi. Their stalks may be shortened.

2.1.2 Whole caps without stems.

2.1.3 "Cut dried fungi" means the product obtained from whole edible fungi sliced and dried, the thickness of individual slices being 1–4 mm.

2.2 *Definitions of defects*

2.2.1 "Damaged fungi" means whole fungi, with more than ¼ of the cap missing, or, in the case of cut fungi, means fungi with more than ⅓ of the total surface of the slice missing.

2.2.2 "Carbonized fungi" means whole or cut dried fungi with traces of carbonization on their surface.

2.2.3 "Maggot damaged fungi" means fungi having holes caused by maggots.

2.2.4 "Seriously maggot damaged fungi" means fungi having four or more holes caused by maggots.

2.2.5 "Crushed fungi" means parts of mushrooms passing through a sieve having a 5x5 mm mesh.

2.2.6 "Fallen-off stalks" means stalks separated from the caps.

2.2.7 "Organic impurities of vegetable origin" means admixtures of other edible fungi, parts of plants such as leaves, pine needles, etc.

2.2.8 "Mineral impurities" means those substances which, after ashing, remain as insoluble residues in hydrochloric acid.

2.3 *Main Species*

All edible fungi permitted for sale by the competent authorities in the consuming countries.

Essential Quality Factors

3.1 *Raw Material*

The raw material used for the production of dried edible fungi shall meet the general requirements set out in the General Standard for Edible Fungi and Fungus Products (CAC/RS 38–1970)

3.2 *End Product*

3.2.1 Dried Edible Fungi shall be healthy, i.e. not spoiled; of a colour, flavour and taste appropriate for the species; clean, i.e. free of organic and mineral impurities; free, as far as possible, from maggot damage and damage caused by insects; undamaged.

3.2.2 Dried Edible Fungi shall be properly dried and conform with the following:

Product	Maximum water content (percent m/m)
Freeze-dried fungi	6
Dried (other than freeze-dried) fungi	12

Product	Maximum water content (percent m/m)
Dried Fungus *Shii-ta-ke*	13

3.3 *Tolerances for Defects*

3.3.1 A maximum of 25% m/m of fungi not satisfying the end-product requirements specified in sub-section 3.2.1 is allowed.

3.3.2 Within the tolerance, provided for in subsection 3.2.1, the following individual tolerances shall apply:

Defects	Tolerance
Mineral impurities	Not more than 2% m/m.
Organic impurities of vegetable origin.	Not more than 0.02% m/m except for Shii-ta-ke mushrooms for which the maximum shall be 1% m/m.
Maggot damaged fungi:	
Wild growing fungi	Not more than 20% m/m of total damage including serious damage.
Cultivated fungi	Not more than 1% m/m of total damage including not more than 0.5% m/m of serious damage.
Crushed fungi	Not more than 6% m/m.
Carbonized fungi	Not more than 2% m/m.
Damaged fungi	Not more than 20% m/m.

fallen-off stalks shall be equal in number to caps, i.e. 1:1.

4. Hygiene.

It is recommended that the products covered by this standard be prepared in accordance with the Code of Hygienic Practice for Dehydrated Fruits and Vegetables including Edible Fungi recommended by the Codex Alimentarius Commission (Ref. No. CAC/RCP 5–1971).

5. Packaging and Presentation.

5.1 *Uniformity*

Packages (cartons, polyethylene bags, boxes) in a lot shall each contain fungi of the same commercial type, and shall have a uniform net weight.

5.2 *Packaging*

Cartons, bags and boxes shall be such as to ensure adequate protection against humidity during storage and transport of the product. Any paper or other material used inside the package shall be new, waterproof and harmless to human health. Fungi shall not come into contact with printed inscriptions on the package.

5.3 Fungi shall be loosely packed in packing units.

6. *Labeling*

In addition to Sections 1, 2, 4 and 6 of the General Standard for the labelling of Prepackaged Foods (Ref. CODEX STAN. 1–1981) the following specific provisions apply:

6.1 *The Name of the Food*

Products complying with the definitions and other requirements of this standard shall be so designated as to specify:

6.1.1 The common and scientific name of the species of fungus used, but the terms "fungus" and fungi" may be replaced by terms which have customarily been used to describe the genus or species concerned in the country in which the product is intended to be sold, e.g. "mushroom" or "mushrooms" for the genus *Agaricus;*

6.1.2 The type of product: "dried fungi" or "freeze-dried fungi";

6.1.3 The style: "whole", "caps" or "sliced".

6.2 *Net Contents*

The net contents shall be declared by weight in either the metric ("Système International" units) or avoirdupois or both systems of measurement, as required by the country in which the product is sold.

6.3 *Name and Address*

The name and address of the manufacturer, packer, distributor, importer, exporter or vendor of the product shall be declared.

6.4 *Country of Origin*

6.4.1 The country of origin of the product shall be declared.

6.4.2 When the product undergoes processing in a second country which changes its nature, the country in which the processing is performed shall be considered to be the country of origin for the purposes of labelling.

7. *Methods of Analysis and Sampling.*

(To be developed).

Dated: April 29, 1983.

Sanford A. Miller,

Director, Bureau of Foods.

Health Professional Organization Participation; Open Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing a forthcoming meeting with health professional organizations to be chaired by Arthur Hull Hayes, Jr., M.D., Commissioner of Food and Drugs.

DATE: The meeting will be held from 3 p.m. to 5 p.m., Monday, May 23, 1983.

ADDRESS: The meeting will be held in Rm. 503A–529, Hubert H. Humphrey Bldg., 200 Independence Ave., SW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Kenneth Flieger, Special Assistant to the Associate Commissioner for Health Affairs (HFY–1) Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–6143.

SUPPLEMENTARY INFORMATION: The Commissioner of Food and Drugs meets periodically with executives of the health professional organizations to share mutual concerns and facilitate dissemination of FDA proposals and decisions affecting the country's health care. The agenda item for discussion at the May 23, 1983, meeting will be direct-to-consumer advertising of prescription drugs.

Dated: May 2, 1983.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4140–01–M

Board of Scientific Counselors; Division of Cancer Treatment; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Board of Scientific Counselors, Division of Cancer Treatment, National Cancer Institute, June 9–10, 1983, Building 31, C Wing, Conference Room 10, National Institutes of Health, Bethesda, Maryland 20205. The meeting will be open to the public on June 9, from 8:30 a.m. to 12:00 noon, and again from 3:30 p.m. to recess, and on June 10, from 8:30 a.m. to adjournment, to review program plans, contract recompetitions and budget for the DCT program. In addition, there will be a review of the Radiation Research Program, including new initiatives for 1984. Attendance by the public will be limited to space available.

In accordance with provisions set forth in Section 552B(c)(6), Title 5, U.S.C. and Section 10(d) of Pub. L. 92–463, the meeting will be closed to the public on June 9, from 1:00 p.m. to approximately 3:00 p.m., for the review, discussion and evaluation of individual programs and projects conducted by the National Institutes of Health, including consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A–06, National Institutes of Health, Bethesda, Maryland 20205 (301/496–5708) will provide summaries of the meeting and rosters of committee members, upon request.

Dr. Bruce A. Chabner, Director, Division of Cancer Treatment, National Cancer Institute, Building 31, Room 3A–52, National Institutes of Health, Bethesda, Maryland 20205 (301/496–4291) will furnish substantive program information.

Dated: April 29, 1983.

BILLING CODE 4140–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[F–19155–13]

Alaska Native Claims Selection; Doyon Ltd.

On September 27, 1982, a Decision to Issue Conveyance (DIC) was issued to Doyon, Limited and published September 29, 1982, in the **Federal Register** (47 FR 42824–42825).

The navigability maps attached to the DIC of September 27, 1982, identified the navigable water bodies as recommended in the Alaska State Director (SD). BLM memorandum dated August 31, 1982, concerning final easements and navigability determinations for Doyon, Limited, in the vicinity of Evansville.

On April 15, 1983, an amendment to the SD memorandum was issued which contained an administrative redetermination of certain unnamed, double-lined sloughs, along the Koyukuk River, South Fork Koyukuk River and John River in the following described lands:

Fairbanks Meridian, Alaska (Surveyed)

T. 23 N., 17 W.,
Secs. 13, 31, 32, and 33.
T. 22 N., 18 W.,
Secs. 12, 13, and 24.
T. 23 N., R. 19 W.,
Secs. 8, 20, 21, 26, 29, and 33.
T. 25 N., R. 19 W.,
Secs. 16, 20, 21, and 36.

The navigable water bodies in the areas listed above are identified on the attached navigability maps, the original of which will be found in easement case file F–21779–13.

The DIC of September 27, 1982, approved for conveyance the surface and subsurface estates of the beds of the above-mentioned unnamed sloughs to Doyon, Limited. As these water bodies are now considered navigable, the submerged lands beneath them are not public lands and are not available to the Native corporation under the Alaska Native Claims Settlement Act of December 18, 1971 (43 CFR 2650.0–5(g)).

Therefore, the DIC of September 27, 1982, is hereby modified to exclude the submerged lands beneath the above-described water bodies from the approval for conveyance to Doyon, Limited. Approximately 156 acres will not be charged toward the regional corporation's entitlement.

This modified decision consititutes the final administrative determination of the Bureau of Land Management concerning navigability of water bodies.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks in the Tundra Times.

Except as modified by this decision, the decision of September 27, 1982, stands as written.

B. LaVollo Black,

Section Chief, Branch of ANCSA Adjudication.

[FR Doc. 83–12485 Filed 5–9–83; 8:45 am]

BILLING CODE 4310–84–M

[F–19328–A; F–19328–B]

Alaska Native Claims Selection; Evansville, Inc.

On September 27, 1982, a Decision to Issue Conveyance (DIC) was issued to Evansville, Inc., and published September 29, 1982 in the **Federal Register** (47 FR 42816).

The navigability maps attached to the DIC of September 27, 1982, identified the navigable water bodies as recommended in the Alaska State Director (SD), BLM memorandum dated August 31, 1982, concerning final easements and navigability determinations for lands in the vicinity of Evansville.

On April 15, 1983, an amendment to the SD memorandum was issued which contained an administrative redetermination of certain unnamed, double-lined sloughs along the Koyukuk River and the John River in the following described lands:

Fairbanks Meridian, Alaska (Surveyed)

T. 25 N., R. 17 W.,
Secs. 3, 4, and 9.
T. 24 N., R., 19 W.
Secs. 2, 20, 21, 28, 29, 32, and 33.

The navigable water bodies in the areas listed above are identified on the attached navigability maps, the original of which will be found in easement casefile F–19328–EE.

The DIC of September 27, 1982 approved for conveyance the surface estate of the beds of the above-described sloughs to Evansville, Inc., and conveyance of the subsurface estate of the same lands to Doyon, Limited. As these water bodies are now considered navigable, the submerged lands beneath them are not public land and are not available for conveyance to the Native corporations under the Alaska Native Claims Settlement Act of December 18, 1971 (43 CFR 2650.0–5(g)).

Therefore, the DIC of September 27, 1982, is hereby modified to exclude the submerged lands beneath the above-described water bodies from the approval for conveyance to Evansville, Inc. and Doyon, Limited. Approximately 191 acres will not be charged against the corporation's entitlement.

Evansville, Inc., is entitled to conveyance of 69,120 acres of land selected pursuant to Sec. 12(a) of ANCSA, as amended. The total acreage conveyed or approved for conveyance is now approximately 63,737 acres instead of 63,928 acres, as shown in the amended DIC dated November 8, 1982. The remaining entitlement of approximately 5,383 acres will be conveyed at a later date.

This modified decision constitutes the final administrative determination of the Bureau of Land Management concerning navigability of water bodies.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the **Federal Register** and once a week, for four (4) consecutive weeks in the *Tundra Times*.

Except as modified by this decision and the decision of November 8, 1982, the decision of September 27, 1982, stands as written.

B. LaVelle Black,

Section Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310–84–M

Utah and Colorado; Availability of Draft Uinta-Southwestern Utah Coal EIS, Public Hearings

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, notice is hereby given that the Bureau of Land Management (BLM), Department of the Interior, has prepared a Draft Uinta-Southwestern Utah Coal Regional Environmental Impact Statement (EIS) which analyzes a second round of proposed competitive leasing of Federal coal in the Uinta-Southwestern Utah Coal Production Region.

Four coal leasing alternatives are considered: (1) Lease 27 tracts containing 1.907 billion tons of in-place coal, (2) lease 22 tracts containing 1.668 billion tons of in-place coal, (3) lease 20 tracts containing 1.316 billion tons of in-place coal, and (4) no competitive Federal leasing (No Action). The tracts are located in central Utah (20 tracts), southern Utah (5 tracts) and west-central Colorado (2 tracts). Alternative Two is the preferred alternative.

Because all tracts proposed for surface mining have Federal surface, no surface owner consent will be required.

DATE: Written comments on the Draft EIS should be submitted by July 6, 1983. Hearing dates are listed below.

ADDRESS: Bureau of Land Management, University Club Building, 136 East South Temple, Salt Lake City, Utah 84111. ATTN: Mr. Ronald Bolander (933).

FOR FURTHER INFORMATION CONTACT: Mr. Ronald Bolander, EIS Team Leader, at the above address. Telephone (801) 524–4257.

SUPPLEMENTARY INFORMATION: A limited number of copies of the Draft EIS are available upon request from Mr. Bolander at the above address, or from BLM offices at the following locations:

—Bureau of Land Management, Office of Public Affairs, Main Interior Building, 18th and C Streets NW., Washington, D.C. 20240

VOL 48 ISS 91 MY 10 1983 UMI

—Bureau of Land Management, Moab District Office, 125 West 2nd South, P.O. Box 970, Moab, Utah 84532
—Bureau of Land Management, Cedar City District Office, 1579 North Main, P.O. Box 724, Cedar City, Utah 84720
—Bureau of Land Management, Richfield District Office, 150 East 900 North, P.O. Box 763, Richfield, Utah 84701
—Bureau of Land Management, Price River Resource Area Office, 900 North 7th East, P.O. Box AB, Price, Utah 84501
—Bureau of Land Management, Kanab Resource Area Office, 320 North 1st East, P.O. Box 458, Kanab, Utah 84741
—Uncompahgre Basin Resource Area Office, Bureau of Land Management, 336 South 10th, P.O. Box 1269, Montrose, Colorado 81401
—Bureau of Land Management, Colorado State Office, 1037 20th Street, Denver, Colorado 80202

Public hearings will be held as scheduled below to announce and discuss the results of the ranking and selection process and the potential impacts, including mitigation measures, as presented in the Draft EIS. The State Director, Utah State Office, invites oral and written comments at that time.

June 6, 1983, 7:00 p.m.
Delta Middle School Cafeteria, Delta, Colorado
June 7, 1983, 7:00 p.m.
Emery County Courthouse, Castle Dale, Utah
June 8, 1983, 7:00 p.m.
BLM Kanab Area Office, 320 North First East, Kanab, Utah
June 9, 1983, 7:00 p.m.
Salt Palace, Room 220, Salt Lake City, Utah

Written and oral comments concerning the adequacy of the Draft EIS will receive consideration in preparation of the Final Environmental Impact Statement.

Dated: April 20, 1983.
Signed:

James M. Parker,
Acting Director, Bureau of Land Management.

Dated: April 29, 1983.
Approved:

David G. Houston,
Acting Assistant Secretary for Land and Water Resources.

Wyoming; Rawlins District Advisory Council Meeting

AGENCY: Rawlins District Office, Rawlins, Wyoming.

ACTION: Notice of meeting of the Rawlins District Advisory Council.

SUMMARY: Notice is hereby given in accordance with Pub. L. 94-579 that a meeting of the Rawlins District Advisory Council will be held.

DATE: June 16, 1983.

ADDRESS: Rawlins District Office, 1300 N. Third Street, Rawlins, Wyoming.

FOR FURTHER INFORMATION CONTACT: David Walter, District Manager, Rawlins District, Bureau of Land Management, P.O. Box 670, Rawlins, Wyoming 82301; (307) 324-7171.

SUPPLEMENTARY INFORMATION: The meeting will begin at 9 a.m. in the conference room of the Rawlins District Office. The agenda for this meeting will include:

(1) Introduction and orientation.
(2) BLM/on-shore minerals management merger in the Rawlins District.
(3) Adobe Town/Ferris Mountains EIS and wilderness study.
(4) Coal leasing program.
(5) Asset management.
(6) Sportsman's Park Inc. public access program.
(7) Public comment period.
(8) Election of officers.

The meeting is open to the public. Interested persons may make oral statements to the council at 3:30 p.m. or file written statements for the council's consideration. Anyone wishing to make an oral statement must notify the District Manager on or before June 9, 1983. Depending on the number of persons wanting to make statements, a time limit may be established.

David J. Walter,
District Manager.

Bakersfield District Advisory Council; Meeting

SUMMARY: Notice is hereby given in accordance with Pub. L. 94-579 and 43 CFR Part 1780 that the Bakersfield District Advisory Council to the Bureau of Land Management, U.S. Department of the Interior, will meet formally Friday, June 10 and Satruday, June 11, 1983, in the City Council Chambers of the Bishop City Hall, 377 West Line Street, Bishop, California. The meetings will be held from 8 a.m. to 5 p.m. on Friday, and from 8 a.m. to 2 p.m. on Satruday.

SUPPLEMENTARY INFORMATION: The agenda for the meeting will include:

(1) The effects of illegal marijuana cultivation on multiple-use resource management.

(2) The preliminary wilderness recommendations proposed in the Draft Environmental Impact Statement for the Benton-Owens Valley/Bodie-Coleville Study Areas.

(3) A field trip, scheduled for Saturday morning, to tour the Mono Lake area and to review on-site the current status of legislation and resouce management issued concerning that area. Transportation for this trip is provided for staff and Council members only. Public participants are invited to join the tour, but must provide their own transportation and meals.

The meeting is open to the public, with time allotted for oral comments at 4 p.m. Friday, June 10. If written comments will be presented for the Council's consideration, they must be submitted before the close of the meeting.

Summary minutes of the meeting will be maintained in the Bakersfield District Office and will be available for public inspection and reproduction (during regular business hours) within 30 days following the meeting.

FOR FURTHER INFORMATION CONTACT: Marth Witt, Public Affairs Officer, Bureau of Land Management, Bakersfield District, 800 Truxtun Avenue, Room 302, Bakersfield, CA 93301; (805) 861-4191.

Dated: May 4, 1983.

National Park Service

Golden Gate National Recreation Area Advisory Commission; Hearing

Notice is hereby given in accordance with the Federal Advisory Committee Act that a hearing of the Golden Gate National Recreation Area Advisory Commission will be held at 7:30 p.m. (P.s.t.) on Wednesday, June 1, 1983, at Building 101, Fort Funston, San Francisco, California.

The Advisory Commission was established by Pub. L. 92-589 to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on problems pertinent to the National Park Service systems in Marin, San Francisco, and San Mateo counties.

Members of the Commission are as follows:

Mr. Frank Boerger, Chairman
Ms. Amy Meyer, Vice Chair
Mr. Ernest Ayala
Mr. Richard Bartke
Mr. Fred Blumberg
Ms. Margot Patterson Doss
Mr. Jerry Friedman
Ms. Daphne Greene
Mr. Peter Haas, Sr.
Mr. Burr Heneman
Mr. John Jacobs
Ms. Gimmy Park Li
Mr. John Mitchell
Mr. Merritt Robinson
Mr. John J. Spring
Dr. Edgar Wayburn
Mr. Joseph Williams

The major agenda item for this hearing will be draft Land Protection Plan for Golden Gate National Recreation Area. The Commission will be receiving public testimony on the draft plan.

The hearing is open to the public. Any member of the public may file with the Commission a written statement concerning the matter to be discussed.

Persons wishing to receive further information on this hearing or who wish to submit written statements may contact John H. Davis, General Superintendent of the Golden Gate National Recreation Area, Fort Mason, San Francisco, California 94123; telephone (415) 556-2920.

Minutes of this hearing will be available for public infomation by July 11, 1983 in the Office of the Superintendent, Golden Gate National Recreation Area, Fort Mason, San Francisco, California 94123.

Dated: April 29, 1983.
John Cherry,
Acting Regional Director, Western Region.

BILLING CODE 4310-70-M

Bureau of Reclamation

Coordinated Operating Agreement for the Central Valley Project and the State Water Project in California; Intent To Prepare a Draft Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior proposes to prepare, in coordination with the California State Department of Water Resources, a joint draft environmental statement-environmental impact report (DES–EIR) on the proposed Coordinating Operating Agreement for the Central Valley Project (CVP) and the State Water Project (SWP).

The purpose of the Federal CVP and the SWP is to manage water resources in California for the benefit of agricultural, industrial, municipal and other beneficial uses. To a large extent much of the project water from the Federal and State facilities in the Central Valley is transported in the same river or conveyance facility. Consequently, much of the water is intermingled.

Both the State and Federal Governments properly regard their project water as a valuable product of their planning and development efforts. Coordination of the CVP SWP operations is essential to assure that each project obtains its appropriate share of the water available especially since the water of one project is physically indistinguishable from that of the other. Close coordination of project operations is necessary to obtain the most effective use of project water. Also, coordination is necessary to make sure that each agency, State and Federal, bears an appropriate share of the obligations to protect the water-related environment.

The DES–EIR will identify all viable options to and the impacts which result from renegotiation of the present draft agreement between the State and Federal Governments for the coordinated operation of the CVP and the SWP.

Since 1979, formal negotiating sessions have been held which were open to the public. However, there will be one or more scoping sessions at which information will be solicited from all interested public entities and persons to assist in scoping the issues to be addressed and to identify other significant issues related to the proposed action. The time and place of this scoping session will be announced not later than 30 days after the publication of this notice.

For this DES–EIR, the contact person will be: Roderick M. Hall, Office of Environmental Quality, Bureau of Reclamation, 2800 Cottage Way, Sacramento, CA 95825, telephone (916) 484–4792.

Dated: May 4, 1983.

R. N. Broadbent,

Commissioner.

[FR Doc. 83-12455 Filed 5-9-83; 8:45 am]

BILLING CODE 4310-09-M

Office of the Secretary

Montana; Amendment of Wilderness Inventory Decisions

AGENCY: Office of the Secretary, Interior.

ACTION: Amendment of Wilderness Inventory Decisions.

SUMMARY: This notice designates 15 areas totaling 52,361 acres for wilderness consideration pursuant to Section 202 of the Federal Land Policy and Management Act of 1976 or for consideration of other forms of protective management. This notice also amends previous wilderness inventory decisions by the Bureau of Land Management for lands in Montana, deleting all or part of 5 wilderness study areas. The total area deleted from wilderness study area status under Section 603 of the Act by this decision is 23,116 acres.

EFFECTIVE DATE: May 10, 1983.

FOR FURTHER INFORMATION CONTACT: Montana State Director, Bureau of Land Management, 222 North 32nd Street, Post Office Box 30157, billings, Montana 59107, telephone (406) 657–6090.

Amendment of Wilderness Inventory Decisions

This notice completes the action necessary with respect to Bureau of Land Management wilderness study areas in Montana to bring the Bureau's wilderness review into compliance with recent decisions of the Interior Board of Land Appeals. Previous action on this subject was published in the **Federal Register** on December 30, 1982 (47 FR 58372).

Section 1. Consideration for Protective Management

The 15 areas listed in Table 1, totaling 52,361 acres, have been designated for wilderness consideration pursuant to Section 202 of the Federal Land Policy and Management Act of 1976 or for consideration for other forms of protective management. These areas were formerly identified as wilderness study areas under Section 603 of the Act. They were either deleted from that category on December 30, 1982, or they are being deleted by Sections 2 and 3 of this decision.

Section 2. Areas Under 5,000 Acres

The wilderness study areas listed in Table 2 are modified to delete roadless areas smaller than 5,000 acres, effective upon publication of this decision in the **Federal Register**. These roadless areas were improperly identified as parts of wilderness study areas under Section 603 of the Federal Land Policy and Management Act of 1976. Only the acreages listed in Table 2 as "acres deleted" are deleted from wilderness study; the remainder of the wilderness study area remains under wilderness study, and the deletions do not affect the Bureau of Land Management's previously adopted conclusions as to the presence of wilderness characteristics in the remaining wilderness study area.

Section 3. Split-Estate Lands

A. "Split-estate" lands are lands where the Federal Government owns the surface but where the subsurface mineral estate is nonfederally owned. Split-estate lands were improperly identified for wilderness study under Section 603 of the Federal Land Policy and Management Act of 1976. That error is corrected by this decision.

B. With the deletion of split-estate lands from the wilderness study areas listed in Table 3, there are no roadless areas in these listed wilderness study areas having 5,000 acres or more of contiguous public lands. Therefore, the areas listed in Table 3 are deleted in their entirety from the status of wilderness study areas, effective upon publication of this decision in the **Federal Register**.

C. The boundary and acreage of the following wilderness study area is modified, effective upon publication of this decision in the **Federal Register**, to delete split-estate lands and an isolated tract of public land which is separated from the wilderness study area by the deleted split estate. This isolated tract no longer qualifies for wilderness study under section 603 because it is smaller than 5,000 acres. Only the indicated acreage is deleted from wilderness study. The remainder of the wilderness study area remains under wilderness study, and the boundary change does not affect the Bureau of Land Management's previously adopted conclusions as to the presence of wilderness characteristics in the remaining wilderness study area.

Wilderness Study Area Name: Terry Badlands
Number: MT–024–684
Old Wilderness Study Area Acreage: 43,450
Split Estate Acres Deleted: 215
Non-Split Estate Acres Deleted: 70
Revised Wilderness Study Area Acreage: 43,165
Counties: Prairie and Custer

Section 4. Management of Deleted Lands

All lands in Montana deleted from wilderness study status by this decision in Tables 2 and 3, in section 3(C) above, and by the decision issued on December 30, 1982, (47 FR 58372) and not designated for further wilderness consideration in Table 1 of this notice are hereby released from management restrictions to protect their wilderness suitability. Of these lands, 6,922 acres are being considered for designation as Areas of Critical Environmental Concern, Natural Areas, or Recreation Lands and will be managed to protect the identified natural or recreational values. The remaining 12,930 acres will be managed for the full range of multiple uses other than wilderness and in conformance with existing land use plans and regulations for those areas.

This is a final decision of the Department of the Interior and is not subject to appeal under 43 CFR Part 4.

May 3, 1983.

Garrey E. Carruthers,

Assistant Secretary.

Privacy Act of 1974—Deletion of System of Records

Pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a), notice is hereby given that the Department of the Interior proposes to delete a system of records notice from its inventory of records subject to the Act. The records system notice is titled: "Audit Files—Interior, Office of Inspector General–1" and was last published in the **Federal Register** on November 30, 1981 (46 FR 58200). The records maintained in the audit files of the Department's Office of Inspector General are not retrieved by the name of an individual or by any number, symbol, or other identifying particular assigned to an individual.

In conjunction with the foregoing deletion, the Office of Inspector General system of records notice titled "Management Information—Interior, Office of Inspector General–3," previously published in the **Federal Register** on November 30, 1981 (46 FR 58201), is re-numbered to become "Management Information-Interior, Office of Inspector General–1."

As provided in 5 U.S.C. 552a(e)(11), written comments on this proposal can be addressed to the Department Privacy Act Officer, Office of the Secretary (PIR), U.S. Department of the Interior, Washington, D.C. 20240. Comments received within 30 days of publication in the **Federal Register** will be considered. The proposal shall become effective June 9, 1983 unless comments are received which would result in a contrary determination.

Dated: May 2, 1983.

Richard R. Hite,

Deputy Assistant Secretary of the Interior.

BILLING CODE 4310-10-M

Transfer of Emergency Preparedness Functions

Notice is hereby given that the Secretary of the Interior, Secretary of Defense, and the Director, Federal Emergency Management Agency have signed an agreement providing for the transfer of certain emergency preparedness functions related to water.

The agreement, published in its entirety below, transfers all water and water resource responsibilities assigned to the Secretary of the Interior by Part 7 and related sections of Executive Order 11490, as amended, to the Secretary of Defense, acting through the Secretary of the Army. The effective date of the agreement is April 27, 1983.

Dated: May 3, 1983.

Garrey E. Carruthers,

Assistant Secretary of the Interior.

Transfer Agreement of Responsibilities and Functions Assigned Under Executive Order 11490

Whereas, the President, by Executive Order 11490, October 28, 1969, as amended, has directed the Secretary of the Interior to prepare national emergency plans and develop preparedness programs for water as defined in the Order; and

Whereas, Section 3013 of the Order provides that any emergency function, or parts thereof, may be transferred from one department or agency to another with the consent of the heads of the organizations involved and with the concurrence of the Director, Federal Emergency Management Agency; and

Whereas, the Secretary of the Interior desires to transfer all water and water resource responsibilities and functions assigned to him by Part 7 and related sections of the Order, including but not limited to, sections 102(c), 401(28), 701(5), 702(6), 703(3), 804(4), 902(6), 1552(1), 2701(2), and 2701(4), to the Secretary of Defense, acting through the Secretary of the Army; and

Whereas, the Secretary of Defense will accept said responsibilities and functions and, acting through the Secretary of the Army, will implement, in the event of an emergency, all appropriate plans developed under the responsibilities and functions being transferred; and

Whereas, it is the agreement of the Secretaries of the Interior and Defense to subsequently support an amendment to Executive Order 11490 in consonance with this Transfer Agreement;

Now therefore, be it agreed that the transfer of the above stated responsibilities and functions is accomplished, effective 30 days following concurrence herewith by the Director, Federal Emergency Management Agency.

Dated: February 3, 1983.

James G. Watt,

Secretary of the Interior.

Dated: March 8, 1983.

Caspar W. Weinberger,

Secretary of Defense.

Dated: March 28, 1983.

Louis O. Giuffrida,

Director, Federal Emergency Management Agency.

INTERSTATE COMMERCE COMMISSION

[Volume No. OP1-164]

Motor Carriers; Decision-Notice

Finance Applications

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by 49 CFR 1182.1 of the Commission's Rules of Practice. See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349*, 363 ICC 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register**. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1182.1. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1182.2(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questons involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decison is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice. To the extent that the authority sought below may duplicate an applicant's existing authority, the duplication shall not be construed as conferring more than a single operating right.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

By the Commission, Review Board No. 1, Members Parker, Chandler, and Fortier.

Agatha L. Mergenovich,

Secretary.

Please direct status inquires to Team 1, (202) 275–7992.

MC–F–15237, filed: April 13, 1983. DANIEL B. FRIEDMAN, Main Road, Dorrance, PA 18707, and MORTON FRANK, 58–60 Page Place, Maspeth, NY 11378—CONTINUANCE IN CONTROL—FRIEDMAN'S EXPRESS, INC. (Friedman's) P.O. Box 480, Wilkes-Barre, PA 18773; and KERI CORPORATION (Keri), 58–20 Borden Avenue, Maspeth, NY 11378. Representative: Maxwell A. Howell, 2554 Massachusetts Avenue, NW., Washington, DC 20008. Friedman's and Keri are controlled through majority stock ownership by Daniel B. Friedman and Morton Frank, as individuals, who, by this application, seek approval for continuance in control of Friedman's and Keri, upon the latter's institution of motor carriage operations. Friedman's has issued and outstanding 600 shares of common stock, of which Daniel B. Friedman owns 50 percent and Morton Frank owns 16 percent. Keri has not yet commenced operations; however, capital stock has been subscribed, of which Messrs. Friedman and Frank each own 50 percent. The controlling individuals are officers and directors of both companies. Friedman's is a motor carrier of property pursuant MC–60430 and sub-numbers thereunder, which has long been established under the "grandfather clause" of the Act. On February 23, 1983, the Commission issued an initial decision to Keri Corporation in MC–164060 authorizing the transportation of *general commodities,* with three exceptions, between points in 17 States and the District of Columbia, conditioned upon approval of the instant application.

Notes.—(1) This application is related to MC–164060. (2) No application for TA has been filed.

Motor Carriers; Decision Notice; Finance Applications

As indicated by the findings below, the Commission has approved the following applications filed under 49 U.S.C. 10924, 10926, 10931 and 10932.

We find;

Each transaction is exempt from section 11343 of the Interstate Commerce Act, and complies with the appropriate transfer rules.

This decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

Petitions seeking reconsideration must be filed within 20 days from the date of this publication. Replies must be filed within 20 days after the final date for filing petitions for reconsideration; any interested person may file and serve a reply upon the parties to the proceeding. Petitions which do not comply with the relevant transfer rules at 49 CFR 1181.4 may be rejected.

If petitions for reconsideration are not timely filed, and applicants satisfy the conditions, if any, which have been imposed, the application is granted and they will receive an effective notice. The notice will recite the compliance requirements which must be met before the transferee may commence operations.

Applicants must comply with any conditions set forth in the following decision-notices within 20 days after publication, or within any approved extension period. Otherwise, the decision-notice shall have no further effect.

It is ordered;

The following applications are approved, subject to the conditions stated in the publication, and further subject to the administrative

BILLING CODE 7035-01-M

Motor Carriers; Permanent Authority Decision; Decision-Notice

Motor Common and Contract Carriers of Property (fitness-only); Motor Common Carriers of Passengers (Fitness-Only); Motor Contract Carriers of Passengers; Property Brokers (other than household goods). The following applications for motor common or contract carriage of property and for a broker of property (other than household goods) are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** on December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common or contract carriage of passengers filed on or after November 19, 1982, are governed by Subpart D of the Commission's Rules of Practice. See 49 CFR Part 1160, Subpart D, Published in the **Federal Register** on November 24, 1982, at 49 FR 53271. For Compliance procedures, see 49 CFR 1160.86. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E.

These applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service or to comply with the appropriate statutes and Commission regulations.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. This presumption shall not be deemed to exist where the application is opposed. Except where noted, this decision in neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed applications involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce, over irregular routes unless noted otherwise. Applications for motor contract carrier authority are those where service in for a named shipper "under contract."

Please direct status inquiries to Team 1, (202) 275-7992.

BILLING CODE 7035–01–M

Motor Carriers; Permanent Authority Decisions; Decision-Notice

Motor Common and Contract Carriers of Property (except fitness-only); Motor Common Carriers of Passengers (public interest); Freight Forwarders; water Carriers; Household Goods Brokers. The following applications for motor common or contract carriers of property, water carriage, freight forwarders, and household goods brokers are governed by Subpart A of Part 1160 of the Commission's General Rules of Practice. See 49 CFR Part 1160, Subpart A, published in the **Federal Register** on November 1, 1982, at 47 FR 49583, which redesignated the regulations at 49 CFR 1100.251, published in the **Federal Register** December 31, 1980. For compliance procedures, see 49 CFR 1160.19. Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart B.

The following applications for motor common carriage of passengers, filed on or after November 19, 1982, are governed by Subpart D of 49 CFR Part 1160, published in the **Federal Register** on November 24, 1982 at 47 FR 53271. For compliance procedures, see 49 CFR 1160.86. Carriers operating pursuant to an intrastate certificate also must comply with 49 U.S.C. 10922(c)(2)(E). Persons wishing to oppose an application must follow the rules under 49 CFR Part 1160, Subpart E. In addition to fitness grounds, these applications may be opposed on the grounds that the transportation to be authorized is not consistent with the public interest.

Applicant's representative is required to mail a copy of an application, including all supporting evidence, within three days of a request and upon payment to applicant's representative of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings

With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated that it is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations.

We make an additional preliminary finding with respect to each of the folowing types of applications as indicated; common carrier of property—that the services proposed will serve a useful public purpose, responsive to a public demand or need; water common carrier—that the transportation to be provided under the certificate is or will be required by the public convenience and necessity; water contract carrier, motor contract carrier of property, freight forwarder, and household goods broker—that the transportation will be consistent with the public interest and the transportation policy of section 10101 of chapter 101 of Title 49 of the United States Code.

These presumptions shall not be deemed to exist where the application is opposed. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absencnce of legally sufficient opposition in the form of verified statements filed on or before 45 days from date of publication, (or, if the application later becomes unopposed) appropriate authorizing documents will be issued to applicants with regulated operations (except those with duly noted problems) and will remain in full effect only as long as the applicant maintains appropriate compliance. The unopposed application involving new entrants will be subject to the issuance of an effective notice setting forth the compliance requirements which must be satisfied before the authority will be issued. Once this compliance is met, the authority will be issued.

Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract." Applications filed under 49 U.S.C. 10922(c)(2)(B) to operate in intrastate commerce over regular routes as a motor common carrier of passengers are duly noted.

Motor Carriers; Permanent Authority Decisions; Restriction Removals; Decision-Notice

Decided: April 29, 1983.

The following restriction removal applications, are governed by 49 CFR Part 1165. Part 1165 was published in the **Federal Register** of December 31, 1980, at 45 FR 86747 and redesignated at 47 FR 49590, November 1, 1982.

Persons wishing to file a comment to an application must follow the rules under 49 CFR 1165.12. A copy of any application can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the restriction removal applications are not allowed.

Some of the applications may have been modified prior to publication to conform to the special provisions applicable to restriction removal.

Findings

We find, preliminarily, that each applicant has demonstrated that its requested removal of restrictions or broadening of unduly narrow authority is consistent with the criteria set forth in 49 U.S.C. 10922(h).

In the absence of comments filed within 25 days of publication of this decision-notice, appropriate reformed authority will be issued to each applicant. Prior to beginning operations under the newly issued authority, compliance must be made with the normal statutory and regulatory requirements for common and contract carriers.

By the Commission, Review Board No. 2, Members Carleton, Williams and Ewing.

Agatha L. Mergenovich,

Secretary.

Please direct status inquiries to Team 1, at (202) 275–7992.

MC 148561 (Sub-3)X, filed April 14, 1983. Applicant: BENETO, INC., P.O. Box 533, West Sacramento, CA 95691. Representative: Ronald C. Chauvel, 100 Pine St., Suite 2550, San Francisco, CA 94111, (415) 986–1414. Sub-No. 1 certificate: (1) remove restriction "except in bulk in tank vehicles", (2) broaden "petroleum oil and greases" to "petroleum and petroleum products", (3) broaden one-way authority to two-way radial authority, and (4) broaden Richmond, CA to Contra Cosa County, CA.

Motor Carriers: Proposed Exemptions

AGENCY: Interstate Commerce Commission.

ACTION: Notices of Proposed Exemptions.

SUMMARY: The motor carriers shown below seek exemptions pursuant to 49 U.S.C. 11343(e), and the Commission's regulations in Ex Parte No. 400 (Sub-No. 1), *Procedures for Handing Exemptions Filed by Motor Carriers of Property Under 49 U.S.C. 11343*, 367 I.C.C. 113 (1982), 47 FR 53303 (November 24, 1982).

DATE: Comments must be received within 30 days after the date of publication in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Warren C. Wood, (202) 275–7977.

SUPPLEMENTARY INFORMATION: Please refer to the petition for exemption, which may be obtained free of charge by contacting petitioner's representative. In the alternative, the petition for exemption may be inspected at the office of the Interstate Commerce Commission during usual business hours.

By the Commission, Heber P. Hardy, Director, Office of Proceedings.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035–01–M

[Finance Docket No. 29518 (Sub-No. 1); Finance Docket No. 29518 (Sub-No. 5)]

Rail Carriers; Midwestern Rail Properties, Inc., Subsidiary of Chicago and North Western Transportation Company—Purchase (Portion)—Chicago, Rock Island and Pacific Railroad Company, Debtor (William M. Gibbons, Trustee) and Soo Line Railroad Company—Purchase (Portion)—Chicago, Rock Island and Pacific Railroad Company, Debtor (William M. Gibbons, Trustee)—Lines in Minnesota, Iowa and Missouri

Decided: May 3, 1983.

By motion filed April 29, 1983, Midwestern Railroad Properties, Incorporated (MRPI), and Chicago and North Western Transportation Company (C&NW) request that the inconsistent applications [1] filed by Soo Line Railroad Company (Soo) to acquire lines of Chicago, Rock Island and Pacific Railroad, Debtor (William M Gibbons, Trustee) (Rock Island) be rejected. In the alternative, MRPI and C&NW request that, if the applications are not rejected, 30 days be allowed from the date that Soo's applications are accepted for written comments in support or opposition. Soo filed a reply.

On April 1, 1983, an application filed by MRPI, a subsidiary of C&NW, to acquire certain Rock Island Lines was accepted for consideration. That decision also set a procedural schedule requiring statements in support, opposing or seeking other relief to be filed by April 26th. Reply statements are due on May 6, 1983.

On April 26, Soo filed applications to acquire the lines sought by MRPI and C&NW and certain other short line segments. On May 3, 1983, the Soo applications were accepted and the same procedural schedule for the MRPI and C&NW proposal was adopted.

[1] The motion to reject also encompasses Soo's supplemental acquisition application in Finance Docket N. 29518 (Sub-No. 4).

MRPI and C&NW's motion to reject will be treated as an appeal to that decision.

MRPI and C&NW argue that Soo's applications should be rejected because, unlike the application filed by MRPI and C&NW, Soo's applications have not been approved by the bankruptcy court overseeing the sale of the Rock Island estate. MRPI and C&NW contend that sale by a debtor of a line of railroad can occur only upon approval of the bankruptcy judge and must be initiated upon petition to the court. MRPI and C&NW further argue that the Commission has no jurisdiction to consider eiher a proposal by Soo rejected by the bankruptcy court or a supplemental proposal by Soo never presented to the court.

We reject MRPI's and C&NW's arguments. There is no question that the sale of a rail line of a bankrupt carrier must be approved by the bankruptcy court. However, the Commission has, on other occasions, considered competing applications for lines where only one proposal had *preliminary* approval of the court. The Commission's mandate under section 17(b) of the Milwaukee Railroad Restructuring Act (49 U.S.C. 915) is to recommend to the court whether the proposal is in the public interest. The Commission has the power to approve, modify, condition or disapprove a proposal.

The Commission's reasoning has always been that this broad mandate requires that another proposal, which may be a better proposal than the one referred by the court, not be foreclosed. In *Continental Group, Inc.—Pur.—Chicago, R.I.& P.R. CO.*, 363 I.C.C. 822 (1980), the Commission considered five applications, only three of which had an agreement with the trustee or preliminary court approval. [2] Again in *St. Louis S. W. Ry.—Pur.—Rock Island (Tucumcari)*, 363 I.C.C. 319 (1980), the Commission considered the inconsistent application filed by Missouri Pacific Railroad Company (Finance Docket No. 29828) without preliminary court approval. [3]

Further, the argument by MRPI and C&NW that the bankruptcy court precluded consideration of Soo's application by referring only MRPI's application is without merit. Soo's supplemental application in Sub-No. 4, when coupled with its Sub-No. 5 application, presents a new proposal not yet reviewed by the court, and, incidentally, not specifically rejected. Just as in the *Tucumcari* case, here the Commission is free to consider Soo's new proposal prior to its submission to the bankruptcy court. Indeed, our procedural schedule in this proceeding provided for pleadings "seeking other relief". Accordingly, the appeal to the decision accepting Soo's application is denied.

MRPI and C&NW request, in the alternative, that they be allowed 30 days from the acceptance of Soo's applications for filing of written comments in support of or in opposition to Soo's proposal. Soo suggests a 10-day extension. Inasmuch as the bankruptcy court has allowed only until June 20, 1983, to reach a final decision, 30 days for comment cannot be allowed. However, the procedural schedule will be altered to allow comments to be filed by May 23, 1983, and responses to those comments by June 2, 1983.

It is ordered:

1. The appeal filed by MRPI and C&NW seeking rejection of Soo's application is denied.

2. The alternative request by MRPI and C&NW to allow 30 days for comments on Soo's applications is granted to the extent that the deadline for filing written comments in support of or in opposition to Soo's applications is extended to May 23, 1983, and the deadline for filing responses to those comments is extended to June 2, 1983.

3. This decision is effective on May 5, 1983.

By the Commission, Reese H. Taylor, Jr., Chairman.

Agatha L. Mergenovich,
Secretary.

DEPARTMENT OF JUSTICE

Proposed Revised Consent Decree in Action To Enjoin Discharge of Air Pollutants

In accordance with Departmental Policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on May 4, 1983, a proposed Revised Consent Decree in *United States of America* v. *National Steel Corporation*, Civil No. 61–00005–W(H), was lodged with the United States District Court for the Northern District of West Virginia.

The Revised Consent Decree replaces in its entirety the Consent Decree between the United States of America, State of West Virginia and National Steel Corporation applicable to National's Weirton Steel Division plant in Weirton, West Virginia, entered in the United States District Court for the Northern District of West Virginia on July 17, 1981. It represents settlement of the claims of the United States and the State of West Virginia for stipulated penalty amounts and other penalties as a result of National's violation of the July 17, 1981 Consent Decree and reflects the alternative emission control program required as a result of the plan revision (bubble) approved by the Administrator, EPA, and published in the **Federal Register** on December 9, 1982 (47 FR 55393), at the blast furnaces, basic oxygen furnace and sinter cooler. Under the Revised Consent Decree National Steel Corporation agrees to pay a civil penalty of $3.5 million for its past violations and to post a bond in the sum of $1.87 million to insure control of the sinter plant prior to any resumption of operation.

The Department of Justice will receive for thirty (30) days from the date of publication of this notice written comments related to the proposed Revised Consent Decree. Comments should be addressed to the Assistant

BILLING CODE 4410-01-M

Proposed Final Judgment (On Consent) In Action To Enforce the Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, 38 FR 19029, notice is hereby given that on April 28, 1983, a proposed final judgment (on consent) in *United States* v. *Quick Roll Leaf Manufacturing Company*, Civil Action No. 83-0349, was lodged with the United States District Court for the Eastern District of New York.

The proposed final judgment (on consent) enjoins defendant to comply with the volatile organic compounds standards of the New York State Clean Air Act Implementation Plan ("SIP"), establishes a schedule for the construction of pollution control equipment that will ensure defendant's compliance with the SIP, and requires defendant to pay a civil penalty of $11,000.

The Department of Justice will receive for a period of thirty (30) days from the date of this notice written comments relating to the proposed final judgment (on consent). Comments should be addressed to the Assistant Attorney General for the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *Quick Roll Leaf Manufacturing Company*, DOJ No. 90-5-2-1-566.

A copy of the proposed final judgment (on consent) may be examined at the offices of the United States Attorney, Eastern District of New York U.S. Courthouse, 225 Cadman Plaza East, Brookland, New York 11202; the Environmental Protection Agency, 26 Federal Plaza, New York, New York 10278; and the Environmental Enforcement Section, Land and Natural Resources Division, United States Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of the proposed final judgment (on consent) may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice.

Carol E. Dinkins,

Assistant Attorney General, Land and Natural Resources Division.

On May 19, 1983 from 1:00 p.m. to 6:00 p.m. and on May 20, 1983 from 9:00 a.m. to 1:00 P.m. the Advisory Board will conduct public hearings on the Costs of the Fear of Crime. Community and business representatives, criminal justice practitioners and state and local officials will present testimony on the social and economic costs arising from the fear of crime. The hearings will be conducted in Room 8544, Federal Building, 300 N. Los Angeles Street, Los Angeles, California. During the remaining sessions on May 19-21, the Advisory Board will conduct its regular business at the Hyatt on Sunset Hotel. Main items on the agenda will inlcude an update of National Institute program activities, a review of the FY 85 budget, a discussion of research recommendations in the adjudication area and reports for the Advisory Board subcommittees.

The meeting is open to the public. For further information please contact Betty M. Chemers, National Institute of Justice, U.S. Department of Justice (202-724-2953).

Dated April 26, 1983.

James K. Stewart,

Director.

BILLING CODE 4410-18-M

DEPARTMENT OF LABOR

Employment and Training Administration

Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance; Picoma Industries et al.

In accordance with Section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for adjustment assistance issued during the period April 25, 1983-April 29, 1983.

In order for an affirmative determination to be made and a certification of eligibility to apply for adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) That increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA-W-13,859; Picoma Industries, Picoma Products Plant, Martins Ferry, OH

TA-W-13,860; Picoma Industries, Pattons Run Plant, Martins Ferry, OH

TA-W-13,810; Prestolite Co., Jackson, KY

TA-W-14,211; Edgcomb Metals, Philadelphia, PA

TA-W-13,797; McGill Manufacturing Co., Inc., Valparaiso, IN

In the following cases the investigation revealed that criterion (3) has not been met. Increased imports did not contribute importantly to workers separations at the firm.

TA-W-13,809; Pioneer Video, Inc., Carson, CA

TA-W-13,841; Pacific Columbia Mills, Olympia Plant, Columbia, SC

TA-W-13,820; General Motors Corp., General Motors Assembly Div., Tarrytown, NY

TA-W-13,993; Babcock & Wilcox Co., Canton, OH

TA-W-13,903; Mississippi Lime Co., Peerless Div. and Peerless Rotary, Genevieve, MO

In the following cases the investigation revealed that criterion (3) has not been met for the reasons specified.

TA-W-13,802; Phillips Fibers Corp., Spartanburg, SC

Aggregate U.S. imports of all yarns did not increase as required for certification.

TA-W-13,819; General Motors Corp., General Motors Assembly Div., Lakewood, GA

Aggregate U.S. imports of subcompact automobiles did not increase as required for certification.

TA-W-13,944; Giberson Co., Brunswick, NJ

The worker's firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

Affirmative Determinations

TA-W-13,785; Jane Ann Fashions, Coaldale, PA

A certification was issued covering all workers separated on or after September 10, 1981.

TA-W-13,850; Conmold, Inc., Latrobe, PA

A certification was issued in response to a petition received on October 13, 1982 covering all workers separated on or after October 1, 1981 and before December 31, 1982.

TA-W-13,824; Goodyear Tire & Rubber Co., Shoe Products Div., Windsor, VT

A certification was issued in response to a petition received on September 24, 1982 covering all workers separated on or after September 21, 1981.

TA-W-13,855; Siberline Manufacturing Co., Inc., Lansford, PA

A certification was issued in response to a petition received on October 8, 1982 covering all workers separated on or before October 4, 1981.

TA-W-13,891; Ingersoll-Rand Co., Type 30 Small Compressor Div., Painted Post, NY

A certification was issued in response to a petition received on October 25, 1981 covering all workers separated on or before October 18, 1981.

TA-W-13,847; Kaiser Steel Corp., Fabricated Products Groups, Napa, CA

A certification was issued in response to a petition received on July 8, 1982 covering all workers separated on or before August 1, 1981.

TA-W-13,803; Xerox Corp., Reprographics Group, Webster, NY

A certification was issued covering all workers of Reprographics Group engaged in employment related to the production of low and mid volume photocopy machines at the firm separated on or after January 1, 1982.

TA-W-13,620; Wheeling-Pittsburgh Steel Corp., Steubenville, Facility, Follansbee, WV

A certification was issued covering all workers separated on or after June 21, 1981.

TA-W-13,814; American Stamping Co., Euclid, OH

A certification was issued covering all workers separated on or after September 17, 1981.

TA-W-13,621; Wheeling-Pittsburgh Steel Corp., Steubenville Facility, Steubenville, OH

A certification was issued covering all workers separated on or after June 21, 1981.

TA-W-13,619; Wheeling-Pittsburgh Steel Corp., Steubenville Facility, Mingo Junction ,OH

A certification was issued covering all workers separated on or after June 21, 1981.

TA-W-13,908; U.S. Steel Corp., Great Lakes Fleet, Inc., Duluth, MN

A certification was issued in response to a petition received on October 25, 1982 covering all workers separated on or after September 30, 1981.

TA-W-13,930; U.S. Steel Corp., Inc., Western Mining District, Wellington, UT

A certification was issued in response to a petition received on November 1, 1982 covering all workers separated on or after September 28, 1981.

TA-W-13,931; U.S. Steel Mining Corp., Inc., Western Mining District, East Carbon City, UT

A certification was issued in response to a petition received on November 1, 1982 covering all workers separated on or after September 28, 1981.

I hereby certify that the aforementioned determinations were issued during the period April 25, 1983-April 29, 1983. Copies of these determinations are available for inspection in Room 9120, U.S. Department of Labor, 601 D Street, NW. Washington, D.C. 20213 during normal business hours or will be mailed to persons who write to the above address.

Dated: May 3, 1983.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance; B. F. Walker Inc., et al.

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 20, 1983.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than May 20, 1983.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 601 D Street, NW., Washington, D.C. 20213.

Signed at Washington, D.C. this 29th day of April 1983.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

BILLING CODE 4510-30-M

Labor Surplus Area Classifications Under Executive Orders 12073 and 10582; Additions To Annual List of Labor Surplus Areas

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

DATE: The Additions to the annual list are effective on May 1, 1983.

SUMMARY: The purpose of this notice is to announce additions to the annual list of labor surplus areas.

FOR FURTHER INFORMATION CONTACT: James W. Higgins, United States Employment Service (Attention: TEEPA) 601 D Street, NW., Washington, D.C. 20213. Telephone: 202-376-6700.

SUPPLEMENTARY INFORMATION: Executive Order 12073 requires executive agencies to emphasize procurment set-asides in labor surplus areas. The Secretary of Labor is responsible under that Order for classifying and designating areas as labor surplus areas.

Under Executive Order 10582 executive agencies may reject bids or offers of foreign materials in favor of the lowest offer by a domestic supplier, provided that the domestic supplier undertakes to produce substantially all of the materials in areas of substantial unemployment as defined by the Secretary of Labor. The preference given to domestic suppliers under Executive Order 10582 has been modified by Executive Order 12260. Federal Procurement Regulations Temporary Regulation 57 (41 CFR Chapter 1, Appendix), issued by the General Services Administration on January 15, 1981 (46 FR 3519), implements Executive Order 12260. Exeucitve agencies should refer to Temporary Regulation 57 in procurements involving foreign businesses or products in order to assess its impact on the particular procurements.

The Department of Labor's regulations implementing Executive Orders 12073 and 10582 are set forth at 20 CFR Part 654, Subparts A and B. Subpart A requires the Assistant Secretary of Labor to classify jurisdictions as labor surplus areas pursuant to the criteria specified in the regulations and to publish annually a list of labor surplus areas. Pursuant to those regulations the Assistant Secretary of Labor published the annual list of labor surplus areas on June 4, 1982 (47 FR 24474).

Subpart B of Part 654 states that an area of substantial unemployment for purposes of Executive Order 10582 is any area classified as a labor surplus area under Subpart A. Thus, labor surplus areas under Executive Order 12073 are also areas of substantial unemployment under Executive Order 10582.

The areas described below have been classified by the Assistant Secretary of Labor as labor surplus areas pursuant to 20 CFR 654.5(c) (1982 ed.) and are added to the annual list of labor surplus areas, effective May 1, 1983. The following additions to the annual list of labor surplus areas are published for the use of all Federal agencies in directing procurement activities and locating new plants or facilities.

Signed at Washington, D.C. on April 27, 1983.

Albert Angrisani,
Assistant Secretary of Labor.

ADDITIONS TO THE ANNUAL LIST OF LABOR SURPLUS AREAS

[May 1, 1983]

Labor surplus area	Civil jurisdiction included
Minnesota: Duluth City	Duluth City in St. Louis County.
North Carolina: Montgomery County.	Montgomery County.
Oklahoma: Balance of Tulsa County.	Tulsa County less Tulsa City.

BILLING CODE 4510-30-M

Office of Pension and Welfare Benefit Programs

Advisory Council on Employee Welfare and Pension Benefit Plans; Meeting

Pursuant to Section 512 of the Employee Retirement Income Securtiy Act of 1974 (ERISA) 29 U.S.C. 1142, a meeting of the Advisory Council on Employee Welfare and Pension Benefit Plans will be held on Tuesday, June 14, 1983, in the Labor Auditorium, located in the Great Hall, U.S. Department of Labor Building, Third and Constitution Avenue, NW., Washington D.C.

The purpose of the meeting is to present a forum on the subject of Social Investment of Employee Benefit Fund Assets. It will consist of a morning session beginning at 9:30, at which invited guests will present their viewpoints, followed in the afternoon, at 1:30, by statements, limited to five minutes, from the public on this issue.

Individuals wishing to address the Council should submit written requests and copies of their statements on or before May 23 to Edward F. Lyaczek, Executive Secretary, ERISA Advisory Council, U.S. Department of Labor, Room S-4522, Third and Constitution Avenue NW., Washington, D.C. 20216. Telephone (202) 523-8753.

Papers on the subject of Social Investment are invited and will be accepted and included in the record of the meeting. Papers may be submitted at any time prior to the meeting date to the Executive Secretary of the Advisory Council at the above address.

Signed at Washington, D.C. this 20th day of April 1983.

Jeffrey N. Clayton,
Administrator, Pension and Welfare Benefit programs.

BILLING CODE 4510-29-M

Quain and Ramstad Clinic et al.; Grant of Individual Exemptions

AGENCY: Office of Pension and Welfare Benefit Programs, Labor.

ACTION: Grant of individual exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Notices were published in the **Federal Register** of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, D.C. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addition the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of pendency were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

Quain and Ramstad Clinic, P.C., Employees' Retirement Plan (the Plan) Located in Bismarck, North Dakota

[Exemption Application No. D-3700; Prohibited Transaction Exemption 83-82]

Exemption

The restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the loan (the Loan) of the lesser of $2 million or 25% of the fair market value of the Plan's assets as of the closing date of the Loan by the Plan to Quain and Ramstad Clinic, P.C. (the Employer), the sponsor of the Plan, provided that the terms of the transaction are at least as favorable to the Plan as those obtainable in an arm's length transaction with an unrelated party.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on December 21, 1982, at 47 FR 56940.

Written Comments and Hearing Requests: Three comments were received by the Department with regard to the proposed exemption. One commentator stated that the security to be used to secure the Loan, i.e. the accounts receivable of the Employer, currently fund obligations under a certain unfunded benefit plan maintained for the former partners of Quain and Ramstad Clinic prior to its incorporation. The applicant responded to this comment and stated that a security interest in the accounts receivable would defeat the tax deferral aspects of the unfunded plan, and therefore no such security interest exists. The commentator also stated that he was concerned about the use of accounts receivable as security for the Loan. The Department contacted the commentator, and after a discussion of the above issues, the commentator stated that he has no objection to the granting of an exemption.

Another commentator raised certain concerns involving the security for the Loan, and how the liquidity of the Plan will be affected by the Loan. The Department contacted the commentator and after explaining the protections afforded the plan by the terms of the exemption, including the role of the independent fiduciary, the commentator stated that he no longer had concerns with regard to the proposed exemption.

The appplicant also commented and requested a modification of the exemption application to provide that the Loan amount will not exceed the lesser of $2 million or 25% of the Plan's total assests as of the date of the closing of the Loan. The Northwestern National Bank of Minneapolis, the independent fiduciary with regard to the transaction, has considered the change and has determined that the Loan remains an appropriate and suitable investment for the Plan. The Department notes this change and has determined that such does not reflect on the merits of the exemption. The Department hereby incorporates such change into this final grant.

For Further Information Contact: Mr. David Stander of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

The Tarboro Clinic, P.A. Restated Money Purchase Pension Plan (the Money Purchase Plan) and the Tarboro Clinic, P.A. Restated Profit Sharing Plan (the Profit Sharing Plan; collectively, the Plans), Located in Tarboro, North Carolina

[Application Nos. D-3780 and D-3781; Prohibited Transaction Exemption 83-83]

Exemption

The restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the

VOL 48 ISS 91 MY 10 1983 UMI

application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the past purchases totaling 240 shares of the common stock of the Edgecombe Bank and Trust Company (Edgecombe) from Dr. Victor Herring III (Herring), by the individual accounts of Herring in the Plans provided that the price paid for such stock was not greater than the fair market value of the stock at the time of the transactions. Herring is a director of the Tarboro Clinic, P.A., the sponsor of the Plans and at the time of such purchases was a director of Edgecombe.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on March 11, 1983 at 48 FR 10499.

For Further Information Contact: Richard Small of the Department, telephone (202) 523–7222. (This is not a toll-free number.)

Drs. Weigler, Jacobsohn and Mollick, S.C. Amended and Restated Employees Pension Plan (the Plan) Located in Cadahy, Wisconsin

[Exemption Application No. D–3802; Prohibited Transaction Exemption 83–84]

Exemption

The restrictions of section 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the cash sale of certain art work by the Plan to Dr. Jordan M. Weigler, a party in interest with respect to the Plan, provided that the sales price for the artwork is at least equal to its fair market value at the time of sale.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on March 4, 1983 at 48 FR 9394.

For Further Information Contact: Alan H. Levitas of the Department, telephone (202) 523–8971. (This is not a toll-free number.)

Group Health Cooperative of Puget Sound Staff Pension Plan (the Plan) Located in Seattle, Washington

[Exemption Application No. D–3950; Prohibited Transaction Exemption 83–85]

Exemption

The restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to certain transactions involving the contribution, sale and purchase of "no-load" mutual fund shares (the "No-Load" Mutual Fund Shares) between the Plan and professional and administrative employees (the Participants) of the Group Health Cooperative of Puget Sound, provide all purchases and sales of the "No-Load" Mutual Fund Shares are conducted at fair market value and all Participant contributions of "No-Load" Mutual Fund Shares are valued at their fair market value on the date contributed.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on March 11, 1983 at 48 FR 10500.

For Further Information Contact: Ms. Jan D. Broady of the Department, telephone (202) 523– 8971. (This is not a toll-free number.)

Fox, Goldblatt & Singer, Inc. Employees Profit Sharing Plan (the Plan) Located in St. Louis, Missouri

[Exemption Application No. D–3978; Prohibited Transaction Exemption 83–86]

Exemption

The restrictions of section 406(a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the proposed purchase by each of the individually directed accounts (the Accounts) of Milton R. Fox, Samuel A. Goldblatt and Thomas M. Singer in the Plan of an equal undivided one-third interest in a certain parcel of improved real property from Fox, Goldblatt, Singer Investments, a Partnership, a party in interest with respect to the Plan, provided the terms and conditions of the purchase are at least as favorable to the Accounts in the Plan as those obtainable in an arm's length transaction with an unrelated party at the time of consummation of the transaction.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on April 1, 1983 at 48 FR 14083.

For Further Information Contact: Horace C. Green of the Department, telephone (202) 523– 8881. (This is not a toll-free number.)

Radiology of Tupelo, Professional Association Profit Sharing Plan (the Plan), Located in Tupelo, Mississippi

[Exemption Application No. D–3984; Prohibited Transaction Exemption 83–87]

Exemption

The restrictions of section 406(a) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the proposed sale by Dr. Douglas E. Clark, Jr., (Dr. Clark) of a parcel of unimproved real property located in Pontotoc County, Mississippi for $48,000 to the individual account of Dr. Clark in the Plan, provided that this price is not more than the fair market value of the property at the time of sale.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on April 1, 1983 at 48 FR 14083.

For Further Information Contact: Alan H. Levitas of the Department, telephone (202) 523–8971. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, D.C., this 5th day of May, 1983.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

[FR Doc. 83–12432 Filed 5–9–83; 8:45 am]

BILLING CODE 4510–29–M

Pension Plan for the Employees of David Meadows, et al.; Proposed Exemptions

AGENCY: Office of Pension and Welfare Benefit Programs, Labor.

ACTION: Notice of Proposed Exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption, unless otherwise stated in the Notice of Pendency, within 45 days from the date of publication of this **Federal Register** Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Office of Fiduciary Standards, Pension and Welfare Benefit Programs, Room C–4526, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N–4677, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of pendency of the exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Pension Plan for the Employees of C. David Meadows, M.D., P.A., the Money Purchase Pension Plan for the Employees of C. David Meadows, M.D., P.A. and the Profit Sharing Plan for the Employees of C. David Meadows, M.D., P.A. (collectively, the Plans) located in Arlington, Texas

[Application Nos. D–3530, D–3531 and D–3532]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of sections 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of sections 4974(c)(1) (A) through (E) of the Code, shall not apply to the participation of the Plans in a loan to Drs. C. David Meadows (Dr. Meadows) and Joseph T. Sams (Dr. Sams) and to the repurchase of the Plans' participation interests by the Plans' trustee, provided that the terms of the transaction are not less favorable to the Plans than those obtainable in an arm's length transaction with an unrelated party at the time of consummation of the transaction.

Summary of Facts and Representations

1. The Plans include a defined benefit pension plan, a money purchase plan and a profit sharing plan with 9, 1 and 9 participants respectively. As of June 30, 1982, the pension plan had $206,326 in assets, the money purchase plan $146,477 in assets and the profit sharing plan $192,176 in assets. The sponsor of the Plans is C. David Meadows, M.D., P.A. (the Employer), a professional association whose sole member is Dr. Meadows. The Plans' trustee is the Texas Commerce Bank-Arlington, Arlington, Texas (the Bank).

2. On January 29, 1983, Dr. Meadows and Dr. Sams (the Doctors) borrowed $484,871.82 from the Bank, the Doctors executing a promissory note (the Note) in favor of the Bank. The purpose of the loan was to renew and extend a previous construction loan which was used to finance construction of a medical office building located at 900 Wright Street, Arlington, Texas. The medical building is presently leased to the Employer and to Joseph T. Sams, M.D., P.A. On the day the Note was issued, Dr. Meadows purchased a 30% participation interest in the Note from the Bank.

3. Dr. Meadows' present interest in the Note is $145,461, with the Bank's interest presently equaling $339,410.20. The Note is a 20 year note, however, the Bank has the right to call the Note on the fifth, tenth and fifteenth anniversary date of the Note. The Note is payable in equal monthly installments of $6,000 which includes interest at the rate of the prime rate charged by the Bank plus ½%, adjusted whenever the Bank changes the prime rate charged to its borrowers. The Note is secured by a first lien on the medical office building.

4. The Bank as trustee for each of the plans proposes to purchase an undivided interest in the Note. Three participation certificates, each lasting for a 5 year period will be issued to the Plans. The first certificate in the amount of $43,000 will be issued to the money purchase plan, the second for $57,000 will be issued to the profit sharing plan and the third for $61,000 will be issued to the pension plan. The total participation of each Plan in the Note, however, will in no event exceed 20% of the total assets of each plan on the date the Plans enter into the transaction. Dr. Meadows represents that he will always

VOL 48 ISS 91 MAY 10 1983 UMI

hold at least a 30% interest in the Note. Further, the terms of the participation certificates require that the Bank, upon written demand, pay the plans all or any part of the unpaid indebtedness due on their participation interests including accrued interest. At the end of the 5 year period, the Bank bill in any case be required to repurchase the plans' interests in the Note for its unpaid principal balance plus accrued interest.

5. On April 19, 1982, the Property was appraised by Edward D. Holman, a staff appraiser for McClellan, Massey, Inc. of Dallas, Texas, as having a fair market value of $550,000 as of March 10, 1982. Since the Property's appraised value represents only approximately 113% of the outstanding balance of the Note, Dr. Meadows has agreed to subordinate his 30% interest in the Note to the Plans. Therefore, the Plans' participation in the Note will be effectively secured by property worth approximately $371,000 or in excess of twice the amount of the Note.

6. Mr. Michael Hunter, an attorney with the law firm of Godfrey, Decker, McMackin, Shipman, McClane & Bourland of Fort Worth, Texas, will be appointed to act as an independent fiduciary for the proposed transaction. Mr. Hunter represents that he is aware of his duties, responsibilities and liabilities as a fiduciary under the Act in connection with the proposed loan. Mr. Hunter further represents that he has no other relationships with any of the parties to the proposed transaction.

Mr. Hunter represents that after examining the terms of the proposed transaction, he has initially determined that it is appropriate and suitable for the Plans. Mr. Hunter will reexamine the terms of the proposed transaction immediately prior to its consummation and will confirm that it continues to be an appropriate and suitable transaction for the Plans. Mr. Hunter will also monitor the transaction to ensure that the terms and conditions of the Note are maintained.

7. In summary, the applicant represents that the proposed transaction meets the statutory criteria for an exemption under section 408(a) of the Act because

(a) the terms of the Note are the same as those required by the Bank;

(b) an independent fiduciary has determined that the transaction is in the best interests and protection of the plans and of their participants and beneficiaries; and

(c) Dr. Meadows has agreed to subordinate his interest in the Note to that of that Plans, thereby providing security on the Plans' investment in excess of twice the amount invested.

Allbright Machine Company, Inc. Employees' Profit-Sharing Plan and Trust (the Plan) Located in Odessa, Texas

[Application No. D–3674]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the lease of certain real property by the Plan to Allbright Machine Company, Inc. (the Employer) for a ten-year period, with the option to renew, provided the terms of the transaction are not less favorable to the Plan than those obtainable in an arm's-length transaction with an unrelated party.

Summary of Facts and Representations

1. The Plan is a defined contribution profit sharing plan which was initially adopted on September 31, 1965. As of July 1, 1982 there were eight participants in the Plan and total assets of $174,790. The trustee of the Plan is the Interfirst Bank of Odessa, N.A. (the Trustee). The Trustee has been trustee since the inception of the Plan. The Trustee is an independent Trustee with complete investment authority for the Plan.

2. The Employer is a Texas corporation engaged in the business of manufacturing oil field equipment. On March 15, 1969, the Plan acquired a building located at 4701 North Golder, Odessa, Texas (the Building). The Plan immediately began leasing the Building to the Employer pursuant to an oral agreement. The Plan received $350 from the Employer for its use of the Building, until April 1, 1969. This amount was for rent and utilities.

3. On April 1, 1969, a formal lease agreement (the Lease) was entered into between the Plan and the Employer for the Employer's use of the Building. The Lease was effective April 1, 1969 through March 31, 1974, with an option to renew for an additional 10 year period. Under the terms of the Lease, the Plan agreed to pay ad valorem taxes on the Building and the Employer agreed to pay all utilities and insurance. The Plan received $130 per month in rent from April 1, 1969 through February of 1970. The Lease provides that the Plan is to receive $200 per month from March 1, 1970 until the end of the Lease term including the optional renewal period. However, in July of 1978 the Employer began enlarging the Building's capacity and the rent was increased to $300 per month. In September of 1980, when the Building's capacity had effectively been doubled, the rent was increased to $500 per month and has remained at this level until the present.[1]

4. The Plan now proposes to enter a new lease to take effect upon the granting of the proposed exemption (the New Lease) with the Employer for a primary term of 10 years with an option to renew for another 10-year period upon the same terms and conditions as the New Lease except that monthly installment of rent shall be renegotiated in writing by the Trustee and the Employer. The rental fee is to be paid by the Employer at a rate of $500 per month. The rental rate will be adjusted every two years during the term of the New Lease to reflect the then fair rental value of the Building as determined by an independent appraisal. Under the terms of the New Lease, the Employer will pay all taxes and assessments covering the Building and will be responsible for maintaining property and liability insurance.

5. An appraisal performed by Mr. Curtis Sims of M. D. Shirley Associates, Inc., an independent real estate appraiser experienced in the appraisal of investment, residential and commercial real property, has determined, that the fair rental value of the Building is $440 per month as of June 24, 1982. This appraisal also establishes the fair market value of the Building at $40,000 as of this date.

6. The Trustee has approved the terms of the New Lease, and has determined that it is in the best interests of the Plan and its participants and beneficiaries. Further, in accordance with the powers granted to the Trustee by the Plan's Trust Agreement, it has agreed to enforce all of the terms and conditions of the New Lease.

7. In summary, the applicant represents that the statutory criteria of section 408(a) of the Act have been satisfied because:

[1] The applicant represents that the lease of the Building by the Plan to the Employer from January 1, 1975 to the present is encompassed by the transitional rules of section 414 of the Act. The Department expresses no opinion as to the applicability of section 414 of the Act with regard to the Lease.

(1) the terms of the New Lease can easily be determined from the proposed written lease agreement and can be easily monitored by the Plan's records;

(2) the Plan will receive the fair market rental value for its property as determined by an independent real estate appraiser;

(3) the independent Trustee, having reviewed all of the terms of the New Lease, has determined that it is in the interests of the Plan and its participants and beneficiaries; and

(4) the Trustee will enforce the terms and conditions of the New Lease.

For further information contact: Ms. Linda Hamilton of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

Neurological Associates, S.C., Profit Sharing Plan and Trust (the Plan) Located in Peoria, Illinois

[Application No. D–3856]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the proposed cash purchase of certain real property from Dr. Gaylord W. Bennett (Dr. Bennett), a party in interest with respect to the Plan, by Dr. Bennett's individual directed account under the Plan, provided that the purchase price does not exceed the fair market value of such property on the date of purchase.

Summary of Facts and Representations

1. The Plan is an individual account plan which permits all participants to direct the investment of their accounts under the Plan and provides that any income, expenses, gains, or losses attributable to the assets credited to each participant's account shall be allocated to that account only. As of October 13, 1982, the Plan covered 31 participants, including Dr. Bennett. As of April 12, 1983, the fair market value of Dr. Bennett's vested interest under the Plan was $79,580.

2. The real property in question is a parcel of undeveloped land (the Land) identified as Lot 2 of Highland Lake Estates, located in Woodford County, Illinois. Dr. Bennett did not acquire the Land from a party in interest with respect to the Plan. Dr. Bennett intends to use the Land for retirement purposes. Mr. Andrew L. Placher, a registered real estate broker licensed in the State of Illinois and associated with farm properties throughout Central Illinois for over 20 years, has examined the Land and estimated its fair market value on March 26, 1983 as $19,500. Mr. Placher certifies that he is not related to any person holding any title to the Land and has no personal interest therein whatsoever.

3. Dr. Bennett wishes to sell the Land to his individual account under the Plan because he believes the Land has good potential for appreciation. The proposed purchase price of the Land is $19,500, payable in cash at closing. Dr. Bennett will pay the selling fees and expenses incurred in effecting the proposed purchase.

4. In summary, the applicant represents that the proposed purchase satisfies the exemption criteria set forth in section 408(a) of the Act because (a) the proposed purchase price equals the fair market value of the Land as established by an independent appraiser, (b) the proposed purchase involves less than 25% of Dr. Bennett's vested interest under the Plan, (c) the Plan will not be charged with the fees and expenses incurred in effecting the purchase, (d) the only Plan assets involved in the proposed purchase are those credited to Dr. Bennett's individual account under the Plan so that he is the only Plan participant affected by the proposed transaction, and (e) Dr. Bennett believes the proposed purchase is in his best interest and wishes the purchase to be effected.

Notice to Interested Persons: Since the only Plan assets involved in the proposed transaction are those in Dr. Bennett's account under the Plan and he is the only Plan participant affected by the proposed transaction, it has been determined that there is no need to distribute the notice of proposed exemption to interested persons. Comments and hearing requests on the proposed exemption are due 30 days after the date of publication in the **Federal Register.**

The American Can Company Retirement Plan for Salaried Employees (the Salaried Plan); The Pension Plan for Canco USW Employees (the USW Plan); The General Pension Plan for Hourly Employees at Tampa, Florida, Chandler, Arizona and Deming, New Mexico (the MRI Plan); and The Pension Plan for Hourly Employees at the Seattle Plant (the Seattle Plan; Collectively, the Plans) Located in Greenwich, Connecticut

[Application Nos. D–4003, D–4004, D–4005 and D–4006]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(b)(2) of the Act shall not apply to the sale by the USW Plan, the MRI Plan and the Seattle Plan (together, the Hourly Plans) of their interests in Metropolitan Life Insurance Company Guaranteed Insurance Contract #1650 (GIC #1650) to the Salaried Plan, provided the consideration paid by the Salaried Plan for the interests in GIC #1650 is equal to the fair market value of the interests at the time the transaction is consummated.

Summary of Facts and Representations

1. The Plans are funded through the American Can Company Master Retirement Trust (the Master Trust) under an agreement (the Master Trust Agreement) between American Can Company (the Company) and Bankers Trust Company (the Trustee). The Plans provide pension benefits to eligible employees and their beneficiaries. The Salaried Plan covers all eligible salaried employees employed by the Company at included locations or by any subsidiary of the Company which participates in the Salaried Plan (other than employees covered by a collective bargaining agreement which does not provide for such participation). The Hourly Plans cover eligible employees of the Company who are in the bargaining units covered by the agreements between the Company and certain unions. As of January 1, 1982 there were approximately 13,500 participants in the Salaried Plan and approximately 15,000, 43 and 8 participants, respectively, in the USW Plan, the MRI Plan and the Seattle Plan. The Master Trust is a group trust in which designated plans maintained by the Company and its subsidiaries (the Participating Plans) participate and which is authorized to hold all or any portion of each Participating Plan's assets. The applicant represents that, to its best knowledge and belief, the Plans do not provide services to one another and are not otherwise parties in interest with respect to one another.

VOL 48 ISS 91 MY 10 1983

2. Under Section X of the Salaried Plan (which is comparable to the funding provisions set forth in the addendum to each Hourly Plan and the funding provisions of the other Participating Plans), assets held for the Salaried Plan in the Master Trust are generally to be invested by the Trustee in its discretion. However, certain powers with respect to the investment of the Salaried Plan's assets are reserved to a committee (the Investment Review Committee) composed of individuals appointed by the Board of Directors of the Company. The current members of the Investment Review Committee are Kenneth A . Yarnell, Jr., David I. Chemerow, Eugene C. Ecker, J. Andrew Hays, John G. Polk and Daniel E. Rubenstein. Each of the current members is an employee of the Company.

3. Included in the reserve powers of the Investment Review Committee is the power to direct the Trustee to enter into one or more group annuity contracts on behalf of a Participating Plan. Pursuant to this power, the Investment Review Committee directed the Trustee to hold certain group annuity contracts of a type known as guaranteed insurance contracts (the GICs) for certain of the Participating Plans.

4. Pursuant to the Master Trust Agreement, GICs held for the Participating Plans are credited for bookkeeping purposes to segregated investment pools (the Investment Pools), to separate them from the main pool of assets (the General Fund). The General Fund, in which all Participating Plans share, is invested primarily in marketable securities. Investment Pool 2, in which only the USW Plan and another plan for hourly employees (the IAM Plan) have an interest, holds five branches of GIC #1650 with Metropolitan Life Insurance Company (Metropolitan).[1] Investment Pool 6, which most of the Participating Plans share (including the Hourly Plans), holds the remaining four branches of GIC #1650 and several other GICs with various insurers. Shortly before the proposed transaction, the Company and the Investment Review Committee will direct the Trustee to split Investment Pool 6 into two separate pools, with a new pool (Investment Pool 10) holding the branches of GIC # 1650 previously held under Investment Pool 6 and with Investment Pool 6 continuing to hold the remaining GICs.

[1] While GIC #1650 is a single contract, to which contributions are to be made over a period of years, each year's contributions are subject to different interest rate guarantees. Accordingly, for accounting purposes, each year's contributions are segregated in a separate "branch" of the contract.

5. At the present time, approximately 69% of the assets of the Salaried Plan is invested in the General Fund. Only approximately 11% (based on book values) is invested in GICs and approximately 12% in an immunized bond portfolio. Almost all of the USW Plan's assets, however, are invested in GICs and an immunized bond portfolio (approximately 36% in GICs based on book values and approximately 60% in the bond portfolio). While the GICs and immunized bond portfolios offer valuable interest rate guarantees, the Company and the Investment Review Committee have determined that greater liquidity is needed for the USW Plan, and that the most practical way to achieve such liquidity is to dispose of the USW Plan's interest in GIC #1650. Disposing of any portion of the bond portfolio to increase liquidity under the USW Plan would be substantially detrimental to the Plan. Achievement of the overall goals of an immunized bond portfolio depends on maintaining a precise mix of maturity dates and interest yields. Sale of any significant portion of the portfolio would, thus, tend to defeat its investment purpose.

6. Greater liquidity is also needed for the remaining two Hourly Plans. These plans cover operations that have been sold by the Company as of April, 1982. Under the terms of the purchase agreement (the Purchase Agreement), the assets of each Plan are to be transferred to a trust established by the buyer, in connection with its assumption of the Plan. At the present time, the assets of these Plans are invested in the General Fund and Investment Pool 6. Upon receipt of Internal Revenue Service approval, the Company will be required to transfer liquid assets (cash or cash equivalents) to the respective buyers, necessitating the liquidation of each Plan's interest in Investment Pool 6.

7. It is proposed that such disposition of the Hourly Plans' interest in the GIC be accomplished through a sale by each Hourly Plan to the Salaried Plan of the Hourly Plan's interest in the GIC. Such sale would take the form of an exchange by (a) the USW Plan of its interests in investment Pool 2 and new Investment Pool 10 and (b) each other Plan of its interest in new Investment Pool 10 for a portion of the Salaried Plan's interest in the General Fund having the same value. The publicly traded securities in the General Fund are valued, at market, by the Trustee, using primarily daily pricing tapes from Telestat Systems, Inc. and Interactive Data Service Corp. any independently managed portfolios in the General Fund that invest in foreign securities are valued by the Trustee's Global Trust Group. The General Fund's real estate account is valued on the basis of information provided by the two collective real estate trusts in which the assets are invested.

8. Each Hourly Plan's interest in the respective branches of the GIC involved would be valued separately. Each branch would be valued for this purpose at a figure halfway between (a) the amount that the Salaried Plan would have to pay for the particular branch in order to have a yield (for the remaining period of the branch) on that branch equal to the yield that would be available if the Salaried Plan purchased a new GIC from Metropolitan and (b) the amount that would be paid to the Hourly Plan by Metropolitan if its share of that branch were cashed out. The amount that would be received by the Hourly Plan on a cash-out will in each case be smaller than the amount that the Salaried Plan would have to pay to receive the equivalent yield if it purchased a new GIC from Metropolitan, because of the manner in which Metropolitan computes its so-called "bid" and "asked" prices for such contracts. The applicable "bid" and "asked" figures for each branch of GIC #1650 are readily available from Metropolitan, and current figures could be obtained at the time of the transaction.

9. The Company and the Investment Review Committee believe that the proposed transaction would be of benefit to the Salaried Plan and the Hourly Plans. It would permit the Salaried Plan to acquire a secure investment, of a type commonly made by qualified pension plans, at a lower cost than would otherwise be possible and it would at the same time permit the Hourly Plans to dispose of their interests in GIC #1650 at a higher price than would otherwise be available.

10. Nothing in this subject transaction could have any impact on the Company's sale of operations described in Representation #6 above, as those operations were sold as of April, 1982. The Trustee's only obligation under the Purchase Agreement was to liquidate the GICs and deliver cash or cash equivalents to a trust being established by the buyer. The Company has no financial stake in the method used for liquidating the MRI and Seattle Plans' interests in the GICs, because the Purchase Agreement does not commit the Company to transfer any particular amount of assets in respect of the MRI and Seattle Plans. The Investment Review Committee made an independent determination on behalf of the Salaried Plan to purchase GIC #1650. There was no conflict of interest. The decision to buy the GIC was purely on the merits of the investment. The only matter that needed to be resolved was finding a fair and equitable method for pricing. The proposed pricing mechanism, which was suggested by the Company's outside counsel provides a favorable arrangement for all the Plans, based upon an objective standard.

11. In summary, the applicant represents that the proposed transaction will satisfy the criteria of section 408(a) of the Act because: (1) the transaction would permit the Salaried Plan to acquire a secure investment providing a guaranteed investment yield that as higher than would otherwise be available; (2) the transaction would permit each Hourly Plan to satisfy its liquidity needs without incurring the charges applicable on a cash-out with Metropolitan; (3) this will be a one-time transaction involving no extension of credit; (4) the asset value figures used as the basis for the exchange will be determined solely on quotas of (a) value figures received from an independent party, Metropolitan, in the case of the GIC and (b) market values furnished by independent fiduciaries (i.e., the Trustee and the trustees of certain collective real estate funds) in the case of the assets in the General Fund; and (5) the Investment Review Committee has determined that the proposed transaction is appropriate for the Plans and in the best interests of their participants and beneficiaries.

For Further Information Contact: Gary H. Lefkowitz of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

The Western Growers Pension Trust (the Plan) Located in Irvine, California

[Application No. D-4063]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406 (a), 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the loan by the Plan to WGA Service Corp. of the lesser of 12½% of the Plan's assets on the date of the loan or $2,500,000, under the terms described in this notice, provided such terms are not less favorable to the Plan than those obtainable in an arm's-length transaction with an unrelated party.

Summary of Facts and Representations

1. The Plan is a multi-employer pension plan which is administered by a board of trustees. As of September 1, 1982, the Plan had approximately 8,544 active participants, 1,020 retirees, and 32 beneficiaries. The Plan had $19,127,887 in total assets as of December 10, 1982.

2. The Plan was originally created under the guidance of the Western Growers Association (WGA), which is a non-profit trade association whose members are active growers and shippers of produce in the western United States and whose members, in large part pursuant to collective bargaining agreements, make contributions on behalf of their employees to the Plan. WGA Service Corp. is a profit corporation organized under the laws of the State of California. There are common directors and trustees among the Plan, WGA, and WGA Service Corp. All of the capital stock of WGA Service Corp. is owned by WGA.

3. WGA Service Corp. owns the building located at 17620 Fitch, Irvine, California (the Building), which houses the headquarters of the WGA. WGA Service Corp. leases part of the Building to WGA and also leases part of the Building to the Plan. The applicants represent that the lease to the Plan is exempt under section 408(b)(2) of the Act in that the lease is for office space in which the Plan conducts legal, accounting and other operations necessary for the operation of the Plan, and that no more than reasonable compensation is paid for the rental of the office space.[1]

4. The Plan proposes to loan to WGA Service Corp. an amount up to 12½% of the Plan's assets as of the date of the loan, not to exceed the sum of $2,500,000. The interest rate for the loan is to be a fixed rate which will be equal to the prevailing rate of interest charged for similar real estate loans in the Southern California area by major financial institutions at the time the loan is funded. The loan is to be amortized over 30 years, and will be completely due and payable in 10 years. The loan will be secured by a first deed of trust on the Building which will be recorded with the County Recorder for the County of Orange, State of California. The Building has been appraised by Mark Hasker Byer, M.A.I., an independent appraiser in Newport Beach, California, as having a fair market value of $4,500,000 as of May 16, 1982.

[1] The Department expresses no opinion in this proposed exemption as to whether the lease between WGA Service Corp. and the Plan is encompassed by section 408(b)(2) of the Act.

5. The Plan's trustees have delegated investment authority within specific guidelines to its independent investment counsel, Van Deventer & Hoch (V&H). V&H currently manages assets in excess of $200 million. In 1976 (V&H) merged with Chemical New York Corporation, the holding company for the Chemical Bank of New York. V&H has reviewed the terms of the proposed loan and has determined that the loan is appropriate for the Plan and in the best interests of the Plan's participants and beneficiaries. V&H will set the rate of interest at the outset of the loan. Mr. Harold Brown, who is legal counsel to the Plan, will monitor the loan and take whatever action is necessary to enforce the Plan's rights under the loan. Mr. Brown acknowledges his status as fiduciary to the Plan in connection with his responsibilities to monitor the loan. Mr. Brown represents that he is counsel only to the Plan and does not represent WGA or WGA Service Corp.

6. In summary, the applicants represent that the proposed loan transaction meets the criteria of section 408(a) of the Act because: (1) the loan will involve no more than 12½% of Plan assets; (2) the interest rate will be set by V&H and will be equal to the prevailing rate charged by major local financial institutions at the time of the funding of the loan; (3) the loan is to be secured by real property which has been appraised by an independent appraiser at a value 1.8 times the maximum amount of the loan; (4) V&H, the Plan's independent fiduciary, has determined that the loan is appropriate for the Plan; and (5) Harold Brown, the Plan's counsel, will serve as an independent fiduciary to monitor the loan and take whatever action is necessary to enforce the Plan's rights.

Notice of Interested Persons

Notice will be provided to interested persons in the manner agreed upon by the Department and the applicants within 21 days of the date of publication of this notice of proposed exemption. Comments and requests for a public hearing must be received by the Department within 55 days of the date of publication.

For Further Information Contact: Gary H. Lefkowitz of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

Employee's Retirement Plan and Trust Agreement of Affiliated Pathologists, P.A. (the Plan) Located in Denton, Texas

UMI

VOL
48
ISS
91
MY
10
1983

[Application No. D–4164]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the cash sale by the Plan of a 8.1302% interest in a joint venture to Affiliated Pathologists, P.A. (the Employer), a party in interest with respect to the Plan, provided that the amount paid to the Plan is not less than the fair market value at the time of sale.

Summary of Facts and Representations

1. The Plan, a defined contribution pension plan, has 9 participants and net assets as of March 31, 1982 of $806,262.42. The Employer is a professional medical corporation with offices in Texas and Oklahoma.

2. In 1973, the Plan purchased a 5% interest in a joint venture known as Metro-East Property III (Metro-East) for $6,232. Metro-East owns 440 acres of undeveloped land in the Dallas Metropolitan area. Metro-East purchased the land in 1973 for a price of approximately $615,000. In order to finance the purchase of the land, Metro-East borrowed $489,241.76 at an interest rate of 7%, payable over 10 years.[1] The loan was secured by a deed of trust on the land. The Plan in addition to its initial capital contribution was required under the terms of the joint venture agreement to make annual capital contributions to retire the underlying deed of trust.

3. Several investors have withdrawn from Metro-East because of the decline in the real estate market, thereby resulting in an increase in the ownership share and obligations of the remaining joint venturers, including the Plan. Between 1973 and 1982, the Plan made the following capital contributions and had the following ownership interest in Metro-East:

	Ownership (percent)	Capital contribution
1973	5	[1] $6,232
1974	5	4,200
1975	5.86	4,986
1976	7.52	4,163
1977	8.1302	4,881
1978	8.1302	4,872
1979	8.1302	4,870
1980	8.1302	4,771
1981	8.1302	4,922
1982	8.1302	4,719
		48,616

[1] Initial purchase price

If no further change in ownership in Metro-East takes place, the Plan can be expected to make payments over the next 4 years of $18,547.15.[2]

4. As a result of the declining real estate market, the Plan has attempted to sell its interest in Metro-East to the other joint venturers. These efforts have yielded only minimal interest.[3] The Plan proposes to sell its interest in Metro-East to the Employer for its fair market value as determined by an independent appraiser. Mr. J. B. Featherston of Merrill Lynch Realty Commercial Services, Dallas, Texas, an independent appraiser, has determined that the value of the Plan's interest in Metro-East as of June 15, 1982 was $35,800. The applicant represents that this appraisal will be updated at the time of sale and the Plan will receive the greater of $35,800 or the current appraisal. No sales commission will be paid by the Plan with respect to the proposed sale and any costs of sale will be borne by the Employer. In addition, the Employer will hold the Plan harmless from any future contingencies occurring after the sale which give rise to a liability of the Plan by reason of its previous ownership interest in Metro-East.

The applicant represents that if an exemption is not issued, the Plan will continue to make capital contributions pursuant to the joint venture agreement, without any current income return on this investment and with uncertainty as to any future appreciation.

5. In summary, the applicant represents that the proposed transaction meets the statutory criteria for an exemption under section 408(a) of the Act because:

(a) It will be a one time transaction for cash;

(b) All costs of sale for the transaction will be paid by the Employer;

(c) The Employer will hold the Plan harmless from any liabilities occurring after the sale which arose from the Plan's ownership in Metro-East;

(d) The Plan will receive the greater of $35,800 or the current appraised value of the Plan's interest in Metro-East on the date of sale; and

(e) The Plan trustees have determined that the proposed transaction is appropriate for the Plan and in the best interests of the Plan's participants and beneficiaries.

For Further Information Contact: Alan H. Levitas of the Department, telephone (202) 523–8971. (This is not a toll-free number.)

Visonik of America, Inc. Profit Sharing Plan and Trust (the Plan), Located in Orinda, California

[Application No. D–4208]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedures 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed cash sale of a limited partnership interest by the Plan to Visonik of America, Inc. (the Employer), a party in interest with respect to the Plan, provided that the amount paid to the Plan for its partnership interest is not less than fair market value at the time of sale.

Summary of Facts and Representations

1. The Plan is a profit sharing plan with 7 participants and net assets of $206,218.08 as of January 31, 1983. The Plan trustee is Mr. Henry G. Eberle (Mr. Eberle).

2. On August 8, 1980, the Plan purchased for $42,000 a 4.019% interest in Redding Development Associates (Redding), a California limited partnership.[1] Redding was formed on September 1, 1979, for the purpose of acquiring and reselling certain parcels of real property located in Contra Costa County, California. Redding was to exist for a period of 3 years or until the earlier sale of the partnership real estate.

3. Redding is now, and has been for many months, in a precarious financial position. In addition to adverse conditions in the real estate market which prevented an early sale of the partnership property, the general partners of Redding, Charles M. Southall and William H. Zepp, are represented to have violated various provisions of the partnership agreement to the detriment of the Plan and the other limited partners. In regard to these violations, a suit was filed by W. Barry Kannon, a limited partner, against the general partners in July 1982.

4. On August 26, 1982, the limited partners of Redding met and elected a new general partner, Ralph L. Aldrich, to undertake the management and sale of the partnership properties. Despite Mr. Aldrich's best efforts to salvage the partnership's property, it appears that foreclosures by lenders holding third and fourth deeds of trust on the partnership property may result in a loss to the Plan and the other limited partners in Redding of their capital contributions. The applicant represents that should current foreclosure proceedings continue, the Plan and the other limited partners will be left with only a claim against Charles M. Southall and William H. Zepp, the former general partners of Redding, for their losses. In a letter to the limited partners of Redding dated December 29, 1982, Mr. Aldrich stated that because of the precarious position Redding is in now, that the limited partners should discuss with their accountants the possibility of writing off this investment as a total loss.

5. The Employer has offered to purchase the Plan's 4.019% interest in Redding for a cash purchase price equal to the Plan's original acquisition cost plus simple interest at the rate of 15% per annum for the date of acquisition (purchase price would be $58,656.16 as of March 31, 1983). All costs of the transaction would be borne by the Employer. Further, the Employer and Mr. Eberle have agreed to hold the Plan harmless from any past or future losses arising from the Plan's ownership of the limited partnership interest in Redding.

6. The applicant represents that the sale of the limited partnership interest in Redding would relieve the Plan of the substantial risk involved in continuing to hold the limited partnership interest and of the costs that must necessarily be incurred in pursuing claims against the former general partners of the partnership. In addition, it will preserve the Plan's initial investment in the partnership interest and provide a return on that investment.

7. In summary, the applicant represents that the proposed transaction meets the statutory criteria for an exemption under section 408(a) of the Act because:

(a) It will be a one time transaction for cash;

(b) The Plan will be able to dispose of an otherwise worthless asset without suffering a loss;

(c) All costs of sale for the transaction will be paid by the Employer; and

(d) The Employer and Mr. Eberle will hold the Plan harmless from past and future losses arising from the Plan's ownership of the limited partnership interest in Redding.

Tax Consequences of Transaction

The Department of the Treasury has determined that if a transaction between a qualified employee benefit plan and its sponsoring employer (or affiliate thereof) results in the plan either paying less than or receiving more than fair market value such excess may be considered to be a contribution by the sponsoring employer to the plan and therefore must be examined under applicable provisions of the Code, including sections 401(a)(4), 404 and 415.

For Further Information Contact: Alan H. Levitas of the Department, telephone (202) 523–8971. (This is not a toll-free number).

Ray Tylander's Inc. Profit Sharing Plan Located in Palm Beach, Florida

[Application No. D–4220]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the temporary exemption is granted the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code shall not apply to the proposed construction loans, not to exceed the lesser of $350,000 or 25 % of the Plan's assets, for a period of ten years, by the Plan to certain qualified customers of Ray Tylander Inc. (the Employer), a party in interest with respect to the Plan, provided the terms of each transaction are no less favorable to the Plan than those available in an arm's length transaction with the unrelated party.

Temporary Nature of Exemption

If granted, the exemption will be temporary in nature and will expire 10 years after the date of grant.

Summary of Facts and Representations

1. The Plan is a profit sharing plan that had 83 participants and total assets of $560,454 as of June 30, 1982. The Plan's administrative committee (the Committee) directs all investments for the Plan. The individuals who comprise the Committee and make the investment decisions for the Plan are all officers and/or shareholders of the Employer.

2. The Employer is a State of Florida corporation that engages in the building materials business and, in connection therewith, manufacturers penalized home packages.

3. The applicant is requesting a temporary exemption, for ten years, which would permit the Plan to invest up to the lesser of 25% of $350,000 of its assets in Loans to certain qualified customers of the Employer. Each Loan would: (1) by limited to no more than 10% of the assets of the Plan; and (2) bear a floating interest rate 2 percent over the prime rate of Chase Manhattan Bank of New York City, with a floor of 8%, and would have a term of six months. Repayments will be made to the Plan upon the completion of each home by established mortgage lenders pursuant to their irrevocable permanent mortgage commitment letter to the Plan. It is represented that no Loans will be made to borrowers who are parties-in-interest to the Plan.

4. The Loans will be secured by a first mortgage on the property on which the house will be built. In addition the Loans will be secured by a third mortgage (the Third Mortgage) on a retail lumber yard owned by the Employer (the Property), located at 8333 Southern Boulevard, West Palm Beach, Florida, which is subject to a first mortgage (the First Mortgage) of approximately $163,441 held by the Florida Federal of St. Petersburg, Florida and two separate second mortgages (the Second Mortgages) of $75,000 each, held by Charles and Doris Carpenter and Mary Frances Hecht, respectively. An appraisal performed on January 11, 1983 by Arthur J. St. John (Mr. St. John), S.R.P.A. Broker, vice president of Ted

[1] The loan was renegotiated by Metro-East and the maturity date on the loan has been extended until 1988.

[2] In this proposed exemption, the Department expresses no opinion as to whether the Plan's acquisition or subsequent actions with respect to its ownership interest in Metro-East violated any provision of Part 4 of Title I of the Act.

[3] Plan received an offer to purchase its entire interest for $1,000. A second offer of $2,411.64 was eceived for a purchase of 3.654 Percent of the Plan's interest.

[1] The applicant represents that the principals in Redding are independent and unrelated to the Employer, the Plan and the Plan trustee.

UMI

VOL 48 ISS 91 MY 10 1983 UMI

Brown Real Estate, Inc., an independent appraiser, valued the Property at $1,040,000. In the opinion of Mr. St. John, the neighborhood, in which the Property is situated, is increasing steadily in value as demand for both vacant sites and improved industrial buildings increases. The Third Mortgage will be filed with the clerk of the Circuit Court of Palm Beach County, Florida, recording the Plan's secured interest in the Property. It is represented that the Plan will be added as a loss payee on the insurance policy (the Policy) insuring the Plan's secured interest in the Property against fire, casualty losses, etc. throughout the terms of the Loans upon the execution of the Third Mortgage. It is represented that the Policy reflects adequate coverage for the transaction. In addition, the Employer wil incur all costs necessary to maintain the Property, including, but not limited to, paying all taxes, assessments, insurance premiums, repairs, etc.

5. Maynard Hamblin (Mr. Hamblin) of West Palm Beach, Florida has been designated as the independent fiduciary with respect to the proposed transactions. Mr. Hamblin has 19 years of banking experience with First Federal Savings and Loan (the Bank) of Lake Worth, Florida. It is represented that during his employment with the Bank, he reviewed loan applications, security instruments, appraisals and credit applications for hundreds of applicants. As a member of the loan committee he was directly involved in the decision as to whether specific applications would be approved. In addition, he has administered several pension and profit sharing plans for the Bank, whose assets exceeded $1 million. Mr. Hamblin represents that he understands his fiduciary responsibilities under the Act. Mr. Hamblin represents that after considering proposed exemption and all supplementary information submitted, it is his opinion that the Loans described herein are of a desirable format, in the best interests to all concerned and clearly protective of the rights of the participants and their beneficiaries. In addition to reviewing the specific terms and conditions of the Loans, Mr. Hamblin has: (1) examined the overall Plan investment portfolio; (2) considered the cash flow needs of the Plan; (3) given consideration of the necessity of a sale of any Plan assets; (4) examined the diversification of Plan assets in light of the proposed investment in the Loans; and (5) reviewed the terms of the proposed Loans as such terms comport with the Plan's investment scheme. Mr. Hamblin will: (1) select certain Committee approved loan applications for Plan investment; (2) monitor all the terms and conditions of such Loans to ensure repayment; and (3) take appropriate actions in the event of default. Mr. Hamblin will require the Employer to provide additional collateral, when, in his opinion, the excess (the fair market value of the Property less the outstanding balances of the First Mortgage and the Second Mortgages) is less than 150% of the remaining balance of the Loans. In such instance Mr. Hamblin will be provided with an appraisal of such additional collateral so that the remaining balance of the Loans will always be 150 percent secured.

6. As a matter of procedure, the Employer's credit department would receive the application documents and verify the applicant's employment, banking and credit information. A real estate title search would be conducted of the subject property and a title policy issued by an independent title company. Certain completed applications will be sent to the Committee for their review for possible Plan investment. The following criteria would be used by the Committee, as a basis for selected approval of any loan application:

(a) receipt of an irrevocable permanent mortgage commitment letter from an established mortgage lender assuring payoff of the Loan/or Loans upon the completion of a home/or homes;

(b) evidence that the subject property/or properties on which the home/or homes will be built would be free and clear, insuring a first mortgage position, and of sufficient value to represent a minimum of 40% of the amount of the Loan/or Loans;

(c) receipt of a completed job estimate sheet evidencing sufficient monies for each completion; and

(d) evidence that extended insurance coverage is provided with loss payee in favor of the Plan.

All loans which are approved by the Committee will be sent to Mr. Hamblin for final selection of Loans for the Plan. Mr. Hamblin will make the final decision as to what Loans are selected for Plan investment.

7. In summary, the applicant represents that the Loans meet the statutory criteria for an exemption under section 408(a) of the Act because:

(a) Mr. Hamblin has determined that the transactions are appropriate for the Plan and are in best interests of the Plan's participants and beneficiaries;

(b) Mr. Hamblin will select the Loans and will monitor the terms and conditions of such Loans;

(c) each Loan will at all times be secured by a first mortgage on the subject property and a third mortgage on the Property; and

(d) each Loan will be limited to 10% of the Plan's assets and the aggregate outstanding balances of the Loans at no time will exceed the lesser of $350,000 or 25% of the fair market value of the assets of the Plan.

For further information contact: Horace C. Green of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

The Drs. Krumholtz and Lunsford, P.A. Employees' Profit Sharing Plan (the Profit Sharing Plan) and Drs. Krumholtz and Lunsford, P.A. Employees' Pension Plan (the Pension Plan; together, the Plans) Located in Boca Raton, Florida

[Application No. D–4281]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the code shall not apply to the sales by the Plans to Drs. Krumholtz and Lunsford of each Plan's 14.03065 percent interest in the KLMR partnership for $55,670.95, provided such amount is not less than the fair market value of each Plan's interest on the date of the sale.

Summary of Facts and Representations

1. The Pension Plan is a money purchase pension plan with 15 participants. The Profit Sharing Plan also has 15 participants. Each Plan owns a 14.03065 percent interest in a partnership called KLMR. The partnership was originally formed on January 19, 1970, and the Plans acquired their interests on November 16, 1973.

2. KLMR's sole asset is land located in Boca Raton, Florida. The size of the property is 72,142 square feet. On January 1, 1971, KLMR entered into a lease agreement for the land with a partnership called 600 Enterprises. Drs. Krumholtz and Lunsford, who are the Plans' trustees, are individual partners in 600 Enterprises.

3. By letter dated October 22, 1980, the Department's Miami Area Office informed the applicants that the Department believed that the lease constituted a prohibited transaction. The Department stated its belief that the lease was not covered by the transitional rules contained in sections 414 and 2003 of the Act because the lease is not as favorable to the Plans as an arm's-length transaction would be.

4. The Plans now wish to sell their partnership interests in KLMR to Drs. Krumholtz and Lunsford to end the prohibited transaction resulting from the lease. The proposed sales would enable the Plans to sell non-liquid assets for cash during a time when the market for such investments is totally inactive and depressed. The applicants represent that the proceeds from the sales can be invested in more liquid assests.

5. The applicants have represented that the price will be based upon a value of $5.50 per square foot for the partnership interests. Each Plan would thus receive $55,670.95 for its 14.03065 percent interest in KLMR. Mr. Salvatore J. Catalo of Carlen Apppraisal and Realty, Inc. of Boca Raton, Florida, an independent appraiser, represents that the fair market value of the land as of March 5, 1983 was $5.50 per square foot, for a total of approximately $396,000 for the entire parcel.

6. The applicants represent that they will pay all exicse taxes which are applicable under section 4975(a) of the Code by reason of the prior lease of the subject property within 60 days of the publication in the **Federal Register** of a final notice of the granting of the exemption proposed herein. In addition, the applicants represent that they will reimburse the Plans for their proportionate share of any lease payments that may be due resulting from a difference between the fair market value in 1973 of the long term lease that was entered into, and the amount actually paid during the period of the lease, including any interest that may be due thereon.

7. In summary, the applicants represent that the proposed transaction will satisfy the criteria contained in section 408(a) of the Act because: (1) the sale is a one-time transaction for cash; (2) the sale enables the Plans to dispose of an unmarketable, non-liquid asset; (3) the price is equal to the fair market value as established by an independent appraiser; and (4) with respect to the prior lease of the subject property, the applicants will fully comply with the excise tax provisions of section 4975 of the Code.

FOR FURTHER INFORMATION CONTACT: Gary H. Lefkowitz of the Department, telephone (202) 523–6881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, D.C., this 5th day of May 1983.

Alan D. Lebowitz,

Assistant Administrator for Fiduciary Standards, Pension and Welfare Benefit Programs, Labor-Management Services Administration, U.S. Department of Labor.

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Industrial Science and Technological Innovation; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, the National Science Foundation announces the following meeting.

Name: Advisory Committee for Industrial Science and Technological Innovation.

Date and time: June 2 and 3, 1983; 8:30 am–5:00 pm.

Place: National Science Foundation, 1800 G Street, NW., Washington, D.C. 20550, Room 540.

Type of meeting: Part open (6/2—8:30–12:00 and 6/3—1:30–5:00 open; 6/2—1:30–5:00 and 6/3—8:30–12:00 closed).

Contract person: Mr. Thomas M. Ryan, Program Specialist, Division of Industrial Science and Technological Innovation, Room 1250, National Science Foundation, Washington, DC 20550 (202) 357–7875.

Summary of minutes: May be obtained from the contact person at the above address.

Purpose of committee: To provide advice and recommendations concerning support for research in NSF programs administered by the Division of Industrial Science and Technological Innovation.

VOL 48 ISS 91 MY 10 1983 UMI

Agenda

June 2, 1983; 8:30 am–12 pm (Open)

Discussion of Industrial Science and Technological Innovation research program initiatives. Briefing on National Science Board report on industry/university research cooperation. Discussion of dissemination of NSF/ISTI research results and other matters.

June 2, 1983; 1:30 pm–5:00 pm (Closed)

Review and comparison of delcined proposals (and supporting documentation) with successful awards under the Division of Industrial Science and Technological Innovation, including review of peer review materials and other privileged materials. A report will be prepared on the Committee's findings and recommendations.

June 3, 1983; 8:30 am–12:00 pm (Closed)

Continuation of small group oversight review and appraisal of technical aspects of ISTI program management. Written report to be prepared within 90 days of the meeting.

June 3, 1983; 1:30 pm–5:00 pm (Open)

Small Business Innovation Research (SBIR) program issues. A plenary session devoted to general discussion and future meetings will terminate the meeting.

Reason for closing: The oversight portion of the meeting will deal with a review of grants and declinations in which the Committee will review materials containing the names of applicant institutions and principal investigators and privileged information from the files pertaining to the proposals. These sessions will also include a review of the peer review documentation pertaining to applicants. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Management Officer pursuant to provisions of Secion 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

Dated: May 5, 1983.

M. Rebecca Winkler,

Committee Management Coordinator.

Advisory Panel for Social and Economic Science; Subpanel on Measurement Methods and Data Resources; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Subpanel on Measurement Methods and Data Resources of the Advisory Panel for Social and Economic Science.

Date and time: June 3–4, 1983: 9:00 a.m. to 5:30 p.m.

Place: Room 338, National Science Foundation, 1800 G Street, NW, Washington, DC 20550.

Type of meeting: Closed—June 3–4, 1983: 9:00 a.m. to 5:30 p.m.

Contact person: Dr. Murray Aborn, Program Director, Measurement Methods and Data Resources, Room 312, National Science Foundation, Washington, DC 20550, Telephone (202) 257–7913.

Summary of minutes: May be obtained from the contact person Dr. Murray Aborn at the above address.

Purpose of subpanel: To provide advice and recommendations concerning support for research and research-related projects in Measurement Methods and Data Resources.

Agenda: Review and evaluation of research and research-related proposals as part of the award selection process.

Reason for closing: the proposals being reviewed include information of proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

Dated: May 5, 1983.

M. Rebecca Winkler,

Committee Management Coordinator.

Advisory Panel for Behavioral and Neural Sciences; Subpanel for Sensory Physiology and Perception; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Behavioral and Neural Sciences, Subpanel for Sensory Physiology and Perception.

Date & time: May 18, 1983, 10:00 p.m.–5:30 p.m., May 19, and 20, 1983, 9:00 a.m. to 5:00 p.m.

Place: Room 1240, at the National Science Foundation, 1800 G Street, N.W., Washintton, D.C. 20550.

Type of meeting: Part Open—Open 12:00 p.m.–2:00 p.m., May 18. Closed 9:00 a.m.–5:00 p.m., May 19 and 20.

Contact person: Dr. William A. Yost, Program Director, Sensory Physiology and Perception, Room 320, National Science Foundation, Washinton, D.C. 20550; telephone 202/357–7428.

Summary minutes: May be obtained from the Contact Person, Dr. William A. Yost at the address listed above.

Purpose of panel: To provide advice and recommendations concerning support for research in sensory physiology and perception.

Agenda: Open: May 18, 1983, 10:00–12:00 p.m. Discussion of Long Range Planning and the two panel review procedure. Closed: May 18, 19, to review and evaluate research proposals as part of the selection process for awards.

Reason for closing: The proposal being reviewed include information of a proprietary or confidential nature, including technical information, financial data, such as salaries, and personal information concerning individuals associated with the proposals. These matters are within exemption (4) and (6) of 5 U.S.C. 552b(C), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the director, NSF, on July 6, 1979.

Reason for late Notice: Oversight of originating office.

Dated: May 5, 1983.

Advisory Panel for Social and Economic Science Subpanel on Decision and Management Science Program; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Subpanel on Decision and Management Science of the Advisory Panel for Social and Economic Science.

Date/time: May 31, 1983–9:00 a.m. to 5:00 p.m. June 1, 1983–9:00 a.m. to 5:00 p.m.

Place: National Science Foundation, 1800 G St., N.W., Washington, D.C. 20550, May 31 and June 1, Room 338.

Type of meeting: Part Open. 5/31—9:00 a.m. to 5:00 p.m.—Closed. 6/1—9:00 a.m. to 10:00 a.m.—Closed. 6/1—10:00 a.m. to 12 noon—Open. 6/1—12:30 p.m. to 5:00 p.m.—Closed.

Contact person: Dr. Trudi C. Miller, Acting Program Director, National Science Foundation, Room 312—Phone (202) 357–7569.

Purpose of subpanel: To provide advice and recommendations concerning research in Decision and Management Science.

Agenda: *6/1—10:00 a.m. to 12:00 noon—Open session.* General discussion about the distinguishing characteristics of basic research in the field of Decision and Management Science and of high priority research areas.

5/31—9:00 a.m. to 5:00 p.m. and 6/1—9:00 a.m. to 10:00 a.m. and 6/1—12:00 to 5:00 p.m.—Closed session. To review and evaluate proposals.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

Dated: May 5, 1983.

BILLING CODE 7555–01–M

PENSION BENEFIT GUARANTY CORPORATION

Pendency of Request for Exemptions From Bond/Escrow, Requirement Relating To! Sale of Assets By an Employer That Contributes To a Multiemployer Plan: Libby, McNeill & Libby, Inc. (California Canners and Growers)

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Notice of pendency of request.

SUMMARY: This notice advises interested persons that the Pension Benefit Guaranty Corporation has received a request from Libby, McNeill & Libby, Inc. for an exemption from the bond/escrow requirement of section 4204(a)(1)(B) of the Employee Retirement Income Security Act of 1974. Section 4204(a)(1) provides that the sale of assets by an employer that contributes to a multiemployer pension plan will not constitute a complete or partial withdrawal from the plan if certain conditions are met. One of these conditions is that the purchaser post a bond or deposit money in escrow for a five plan year period beginning after the sale. The PBGC is authorized to grant individual and class exemptions from this requirement. Prior to granting an exemption, the PBGC is required to give interested persons an opportunity to comment on the exemption request. The effect of this notice is to advice interested persons of this exemption request and to solicit their views on it.

DATES: Comments must be submitted on or before June 24, 1983.

ADDRESSES: All written comments (at least three copies) should be addressed to: Assistant Executive Director for Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, Washington, D.C. 20006. The request for exemption and the comments received will be available for public inspection at the PBGC Public Affairs Office, Suite 7100, at the above address, between the hours of 9:00 a.m. and 4:00 p.m.

FOR FURTHER INFORMATION CONTACT: James M. Graham, Office of the Executive Director, Policy and Planning (140), Pension Benefit Guaranty Corporation, 2020 K Street, N.W., Washington, D.C. 20006; (202) 254–4862. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION:

Background

Section 4204 of the Employee Retirement Income Security Act of 1974, as amended by the Multiemployer Pension Plan Amendments Act of 1980, (ERISA) provides that a bona fide arm's-length sale of assets of a contributing employer to an unrelated party will not be considered a withdrawal if three conditions are met. These conditions, enumerated in section 4204(a)(1)(A)–(C), are that—

(A) The purchaser has an obligation to contribute to the plan for substantially the same number of contribution base units for which the seller was obligated to contribute;

(B) The purchaser obtains a bond or places an amount in escrow, for a period of five plan years after the sale, in an amount equal to the greater of the seller's average required annual contribution to the plan for the three plan years preceding the year in which the sale occurred or the seller's required annual contribution for the plan year preceding the year in which the sale occurred; and

(C) The contract of sale provides that if the purchaser withdraws from the plan within the first five plan years beginning after the sale and fails to pay any of its liability to the plan, the seller shall be secondarily liable for the liability it (the seller) would have had but for section 4204.

The bond or escrow described above would be paid to the plan if the purchaser withdraws from the plan or fails to make any required contributions to the plan within the first five plan years beginning after the sale.

Additionally, section 4204(b)(1) provides that if a sale of assets is covered by section 4204, the purchaser assumes by operation of law the contribution record of the seller for the plan year in which the sale occurred and the preceding four plan years.

Section 4204(c) of ERISA authorizes the Pension Benefit Guaranty Corporation ("PBGC") to grant individual or class variances or exemptions from the purchaser's bond/escrow requirement of section 4204(a)(1)(B) when warranted. The legislative history of section 42404 indicates a Congressional intent that the sales rules be administered in a manner that assures protection of the plan with the least practicable intrusion into normal business transactions. The granting of an exemption or variance from the requirements of section 4204(a)(1)(B) does not constitute a finding by PBGC that a particular transaction satisfies the other requirements of section 4204(a)(1).

Under § 2643.3(a) of the PBGC's regulation on procedures for variances for sales of assets, (46 FR 46127 (1981)), the PBGG shall approve a request for a variance or exemption if it determines that approval of the request is warranted, in that it—

(1) Would more effectively or equitably carry out the purposes of Title IV of the Act; and

(2) would not significantly increase the risk of financial loss to the plan.

Section 4204(c) of ERISA and § 2643.3(b) of the regulation requires the PBGC to publish a notice of the pendency of a request for a variance or exemption in the **Federal Register**, and to provide interested parties with an opportunity to comment on the proposed variance or exemption.

The Request

The PBGC has received a request from Libby, McNeill & Libby, Inc. ("Libby") for an exemption from the requirement of ERISA section 4204(a)(1)(B). The exemption request concerns a sale of certain assets by Libby to California Canners and Growers ("Cal Can"). In the request, Libby represents, among other things, that:

1. Effective June 17, 1982, Libby sold, in addition to other assets, its plants and facilities located at Yakima, Washington and Gridley, California to Cal Can. Effective on the same date, Libby leased its plant and facilities at Sunnyvale, California for a five-year period to Cal Can. (On December 17, 1982, Libby sold the Sunnyvale facility to Lincoln Mathilda Associates, Ltd., which took the facility subject to the lease to Cal Can.)

2. In connection with this sale and lease, Cal Can has assumed the responsibilities of Libby under the following collective bargaining agreements:

(a) Master Collective Bargaining Agreement between California Processors, Inc. and Teamsters California State Council of Cannery and Food Processing Unions, International

VOL 48 ISS 91 MAY 10 1983 UMI

Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers as adopted June 25, 1979;

(b) Collective Bargaining Agreement dated June 1, 1979 between Libby (Yakima, Washington) and Fruit & Vegetable Packers and Warehousemen International Brotherhood of Teamsters Local No. 760;

(c) Collective Bargaining Agreement dated July 1, 1981 between Libby (Gridley, California Factory Office) and the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, Local No. 849; and

(d) Collective Bargaining Agreement dated January 7, 1981 between Libby (Sunnyvale, California Factory Office) and the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers of America, Local No. 679.

These agreements obligate Cal Can to contribute to the Western States Food Processing Industry Employees Pension Plan ("Western States Plan") and the Western Conference of Teamsters Pension Trust Fund ("Western Conference Plan"). Libby or members of its controlled group are continuing as contributing employers to both plans. The purchased and leased operations represent at least 70 percent of Libby's contribution obligation to each plan. (PBGC takes no position as to whether there has been a complete or partial withdrawal with respect to the plans as a result of the transactions described above.)

4. In the purchase agreement, Libby agreed that, if the purchaser withdraws within five years of the date of the sale and fails to pay withdrawal liability, it would be secondarily liable for any withdrawal liability the seller would have had to the plan but for the operation of ERISA section 4204. The purchase agreement further provides that Cal Can will have an obligation to make contributions to the Western Conference Plan and the Western States Plan for substantially the same number of contribution base units for which Libby was obligated prior to the sale.

5. The following chart lists the two multiemployer plans for which an exemption is requested, the estimated amount of Libby's and Cal Can's withdrawal liability (excluding the liability attributable to the purchased operations from Libby), and the estimated amount of the bond/escrow that would be required under ERISA section 4204(a)(1)(B) with respect to each such plan:

Plan	Estimate of seller's liability	Estimate of purchaser's liability	Amount of bond/escrow
Western Conference Plan	$2,166,749	$5,405,918	[1] $434,558
Western States Plan	650,000	3,300,000	[2] 365,428
Total	2,816,749	8,705,918	799,986

[1] The amount represents the average annual contribution that Libby made to the Western Conference Plan for the three plan years preceding the plan year in which the sale occurred.

[2] The amount represents the annual contribution required to be made by Libby to the Western States Plan for plan year 1981.

6. Cal Can is a nonprofit agricultural cooperative association organized for the purpose of processing and marketing fruits and vegetables delivered by its members. According to its audited financial statement, Cal Can had total net assets for its fiscal year ended May 31, 1982 of approximately $42 million. It total unencumbered net assets for that year was $20.6 million, of which $7.7 million was in "trademarks and other" assets. Cal Can suffered losses in each of its fiscal years 1980–1982, with the average net loss for the three year period of about $14.9 million.

7. Cal Can has indicated that it concurs in the request for exemption submitted by Libby.

8. A copy of the request has been sent by Libby to the plans and the collective bargaining representatives of the seller's former employees.

Comment

All interested persons are invited to submit written comments on the pending class exemption to the above address, on or before June 24, 1983. All comments will be made a part of the record. Comments received, as well as the relevant information submitted in support of the application for exemption, will be available for public inspection at the address set forth above.

Issued at Washington, D.C. on this 5th day of May 1983.

Edwin M. Jones,

Executive Director, Pension Benefit Guaranty Corporation.

BILLING CODE 7708-01-M

POSTAL SERVICE

Privacy Act of 1974; System of Records

AGENCY: Postal Service.

ACTION: Interim notice of modification to an existing system of records.

SUMMARY: The purpose of this notice is to modify a routine use of a Postal Service system of records, system USPS 050.020, Finance Records—Payroll System. This change is necessary due to the FICA deduction information disclosure which must be made in compliance with the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA). System USPS 050.020 was last published in 48 FR 10971, dated March 15, 1983.

EFFECTIVE DATE: May 10, 1983. This notice is effective on an interim basis, in order to correspond with the implementation provisions of the TEFRA. However, interested persons are invited to submit written data, views, or arguments concerning the change in compliance with 5 U.S.C. 552a(e)(11). Comments must be received on or before June 13, 1983.

ADDRESS: Comments may be mailed to the Records Officer, U.S. Postal Service, 475 L'Enfant Plaza West, S.W., Washington, D.C. 20260, or delivered to Room 8121 at the above address between 8:15 a.m. and 4:45 p.m. Comments received may also be inspected during the above hours in Room 8121.

FOR FURTHER INFORMATION CONTACT: Martha J. Smith (202) 245–5568.

SUPPLEMENTARY INFORMATION: With the recent passage of the TEFRA, medicare coverage has been extended to postal employees who are participants of the Civil Service Retirement System. As a result, the wages of such employees are now subject to the hospital insurance portion of the FICA tax and routine use 6 of system USPS 050.020, Finance Records—Payroll System, must be modified as follows to describe the information disclosure that is necessary to administer this activity:

USPS 050.020, Finance Records—Payroll System

"6. FICA Deductions—The Social Security Act requires that FICA deductions be made for those employees not eligible to participate in the Civil Service Retirement System (casuals). In addition, the Tax Equity and Fiscal Responsibility Act of 1982 requires that contributions to the Medicare program be deducted from all employees' earnings. (These statutes do not apply to employees in the Trust Territories who are not U.S. citizens.) Accordingly, records of earnings (i.e., W–2 information) must be disclosed to the Social Security Administration in order that it may account for funds received and determine individual's eligibility for benefits. Information disclosed includes name, address, SSN, wages paid subject to withholding, Federal, state and local income tax withheld, total FICA wages paid and FICA tax withheld, occupational tax, life insurance premium and other information as reported on an individual's W–2 form."

A complete statement of the system as revised appears below:

USPS 050.020

SYSTEM NAME:

Finance Records—Payroll System, 050.020.

SYSTEM LOCATION:

Payroll system records are located and maintained in all Departments, facilities and certain contractor sites of the Postal Service. However, Postal Data Centers are the main locations for payroll information. Also, certain information from these records may be stored at emergency records centers.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Current and former USPS employees and postmaster relief/replacement employees.

CATEGORIES OF RECORDS IN THE SYSTEM:

Records contain general payroll information including retirement deduction, family compensations, benefit deductions, accounts receivable, union dues, leave data, tax withholding, allowances, FICA taxes, salary, name, social security number, payments to financial organizations, dates of appointment or status changes, designation codes, position titles, occupation code, addresses, records of attendance, and other relevant payroll information. Also includes automated Form 50 records.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

39 U.S.C. 401, 1003, 5 U.S.C. 8339.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Purpose—

1. Information within the system is for handling all necessary payroll functions and for use by employee supervisors for the performance of their managerial duties.

2. To provide information to USPS Management and executive personnel for use in selection decisions and evaluation of training effectiveness. These records are examined by the Selection committee and Regional Postmasters General.

3. To compile various lists and mailing lists, i.e., Postal Leader, Women's Programs, Newsletter, etc.

4. To support USPS Personnel Programs such as Executive Leadership, Non-Bargaining Positions Evaluations of Probationary Employees, Merit Evaluation, Membership and Identification Listings. Emergency Locator Listings, Mailing Lists, Women's Programs, and to generate retirement eligibility information and analysis of employees in various salary ranges.

Use—

1. Retirement Deduction—To transmit to the Office of Personnel Management a roster of all USPS employees under Title 5 U.S.C. 8334, along with a check.

2. Tax information—To disclose to Federal, State and local government agencies having taxing authority, pertinent records, relating to individual employees, including name, home address, social security number, wages and taxes withheld for other jurisdiction.

3. Unemployment Compensation Data—To reply to State Unemployment Offices at the request of separated USPS employees.

4. Employee Address File—For W–2 tax mailings and Postal mailing such as Postal Life, Postal Leaders, etc.

5. Salary payments and allotments to financial organizations—To provide pertinent information to organizations receiving salary payments or allotments as elected by the employee.

6. FICA Deductions—The Social Security Act requires that FICA deductions be made for those employees not eligible to participate in the Civil Service Retirement System (casuals). In addition, the Tax Equity and Fiscal Responsibility Act of 1982 requires that contributions to the Medicare program be deducted from all employees' earnings. (These statutes do not apply to employees in the Trust Territories who are not U.S. citizens.) Accordingly, records of earnings (i.e., W–2 information) must be disclosed to the Social Security administration in order that it may account for funds received and determine individual's eligibility for benefits. Information disclosed includes name, address, SSN, wages paid subject to withholding, Federal, state and local income tax withheld, total FICA wages paid and FICA tax withheld, occupational tax, life insurance premium and other information as reported on an individual's W–2 form.

7. Determine eligibility for coverage and payment of benefits under the Civil Service Retirement System, the Federal Employees' Group Life Insurance Program and the Federal Employees Health Benefits Program and transfer related records as appropriate.

8. Determine the amount of benefit due under the Civil Service Retirement System, the Federal Employees' Group Life Insurance Program and the Federal Employees Health Benefits Program and authorizing payment of the amount and transfer related records as appropriate.

9. Transfer to Office of Workers' Compensation Program Veterans Administration Pension Benefits Program, Social Security Old Age, Survivor and Disability Insurance and Medicare Programs, military retired pay programs, and Federal Civilian employee retirement systems other than the Civil Service Retirement System, when requested by that program or system or by the individual covered by this system of records, for use in determining an individual's claim for benefits under such system.

10. Transfer earnings information under the Civil Service Retirement System to the Internal Revenue Service as requested by the Internal Revenue Code of 1954, as amended.

11. Transfer information necessary to support a claim for life insurance benefits under the Federal Employees' Group Life Insurance, 4 East 24th Street, New York. NY 10010.

12. Transfer information necessary to support a claim for health insurance benefits under the Federal Employees' Health Benefits Program to a health insurance carrier or plan participating in the program.

13. To refer, where there is an indication of a violation or potential violation of law, whether civil, criminal or regulatory in nature to the appropriate agency whether Federal, State, or local, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

14. To request or provide information from or to a Federal, state, or local agency maintaining civil, criminal, or other relevant enforcement or other pertinent information, such as licenses, if necessary to obtain information relevant to an agency decision concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefits.

15. As a data source for management information for production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained, or for related personnel management functions or manpower studies; may also be utilized to respond to general requests for statistical information (without personal identification of individuals) under the Freedom of Information Act or to locate specific individuals for personnel

VOL 48 ISS 91 MY 10 1983 UMI

research or other personnel management functions.

16. May be disclosed to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A–19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

17. Certain information pertaining to Postal Supervisors may be transferred to the National Association of Postal Supervisors.

18. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

19. Disclosure may be made from the record of an individual, where pertinent, in any legal proceeding to which the Postal Service is a party before a court or administrative body.

20. Pursuant to the National Labor Relations Act, records from this system may be furnished to a labor organization upon its request when needed by that organization to perform properly its duties as the collective bargaining representative of postal employees in an appropriate bargaining unit.

21. Inactive records may be transferred to a GSA Federal Records Center prior to destruction.

22. To provide to the Office of Personnel Management (OPM) approximately 19 data elements (including SSAN, DOB, service computation date, retirement system, and FEGLI status) for use by OPM's Compensation Group. Data collected are not for the purpose of making determination about specific individuals but are used only as a means of ensuring the integrity of the active employee/annuitant data systems and for analyzing and statistically projecting Federal retirement and insurance system costs. The same data submission will be used to produce summary statistics for reports of Federal employment.

23. Information contained in this system of records may be disclosed to an authorized investigator appointed by the Equal Employment Opportunity Commission, upon his request, when that investigator is properly engaged in the investigation of a formal complaint of discrimination filed against the U.S. Postal Service under 29 CFR Part 1613, and the contents of the requested record are needed by the investigator in the performance of his duty to investigate a discrimination issue involved in the complaint.

24. Records in this system are subject to review by an independent certified public accountant during an official audit of Postal Service finances.

25. May be disclosed to a Federal or State agency providing parent locator services or the other authorized persons as defined by Pub. L. 93–647.

26. (Temp.) Disclosure of information about postal employees on the employment rolls of the Philadelphia, Pennsylvania, School District (PSD) may be made to the PSD for a one-time comparison with the PSD's time/attendance/payment files. (Note: this routine use will be in effect for a period of one year from its effective date.) (Proposed)

27. To union-sponsored insurance carriers for the purpose of determining eligibility for coverage and payment of benefits under union-sponsored, nonfederal insurance plans and transferring related records as appropriate. (Proposed)

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Preprinted forms, magnetic tape, microforms, punched cards, computer reports and card forms.

RETRIEVABILITY:

These records are organized by location, name and social security number.

SAFEGUARDS:

Records are contained in locked filing cabinets; are also protected by computer passwords and tape library physical security.

RETENTION AND DISPOSAL:

Records are retained and updated throughout employment with the Postal Service. Upon separation records become historical data, this data is retained at the local site for two years then forwarded to the Federal Records Center nearest the pay location.

SYSTEM MANAGER(S) AND ADDRESS:

APMG, Finance Department and APMG, Employee Relations Department at Headquarters.

NOTIFICATION PROCEDURE:

Request for information on this system of records should be made to the head of the facility where employed, giving full name and social security number. Headquarters employees should submit request to the System Manager.

RECORD ACCESS PROCEDURE:

See Notification above.

CONTESTING RECORD PROCEDURES:

See Notification above.

RECORD SOURCE CATEGORIES:

Information is furnished by employees, supervisors and the Postal Source Data System.

W. Allen Sanders,

Associate General Counsel, Office of General Law and Administration.

BILLING CODE 7710–12–M

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

SUMMARY OF PROPOSAL(S):

(1) Collection title: Application for Employee Annuity Under the Railroad Retirement Act.

(2) Form(s) submitted: AA–1, AA–1d, G–214, G–204.

(3) Type of request: Revision.

(4) Frequency of use: On occasion.

(5) Respondents: Applicants for annuities.

(6) Annual responses: 34,800.

(7) Annual reporting hours: 15,560.

(8) Collection description: The RRA provides for payment of age, disability and supplemental annuities to qualified employees. The application and related forms obtain information about the applicant's family, work history, military service, disability benefits from other government agencies and public or private pensions. The information is used to determine entitlement to and amount of annuity applied for.

(1) Collection title: Application for Spouse Annuity Under the Railroad Retirement Act.

(2) Form(s) submitted: AA–3.

(3) Type of request: Revision.

(4) Frequency of use: On occasion.

(5) Respondents: Applicants for Spouse Annuities Under RRA.

(6) Annual responses: 21,000.

(7) Annual reporting hours: 9,100.

(8) Collection description: The Railroad Retirement Act provides for the payment of annuities to spouses of railroad retirement annuitants who meet the requirements under the Act. The application will obtain information supporting the claim for benefits based on being a spouse of an annuitant. The information will be used for determining entitlement to and amount of annuity applied for.

(1) Collection title: Self-Employment Questionnaire.

(2) Form(s) submitted: AA–4.

(3) Type of request: New.

(4) Frequency of use: On occasion.

(5) Respondents: Applicants for employee or spouse annuities.

(6) Annual responses: 600.

(7) Annual reporting hours: 150.

(8) Collection description: Section 2 of the RRA provides for payment of annuities to qualified employees and their spouses. In order to receive an annuity, the applicant must stop all railroad work and all work for pay outside the railroad industry that is considered 'last person service' (LPS). This collection obtains information about the applicant's self-employment work to be used in making an LPS determination.

(1) Collection title: Applications for survivor annuities.

(2) Form(s) submitted: AA–17, AA–17b, AA–18, AA–19, AA–19a, AA–19s, AA–20, G–476c.

(3) Type of request: Revision.

(4) Frequency of use: On occasion.

(5) Respondents: Individuals applying for survivor annuities.

(6) Annual responses: 23,000.

(7) Annual reporting hours: 8,330.

(8) Collection description: The applications obtain information from widow(er)s, children and parents of deceased railroad workers to support claims for survivor benefits. The information will be used for determining entitlement to and amount of annuity applied for.

(1) Collection title: Notice of payment of separation allowance.

(2) Form(s) submitted: UI–13.

(3) Type of request: Extension.

(4) Frequency of use: On occasion.

(5) Respondents: Railroad employers.

(6) Annual responses: 1,500.

(7) Annual reporting hours: 375.

(8) Collection description: Under the Railroad Unemployment Insurance Act, a railroad employee who is paid a separation allowance is disqualified for unemployment and sickness benefits for the period of time the employee would have worked to earn the amount of a separation allowance. The notice will obtain the information needed for determining the disqualification period.

Additional information or comments: Copies of the proposed forms and supporting documents may be obtained from Pauline Lohens, the agency clearance officer (312–751–4692). Comments regarding the information collection should be addressed to Pauline Lohens, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Milo Sunderhauf (202–395–6880), Office of Management and Budget, Room 3201, New Executive Office Building, Washington, D.C. 20503.

William A. Oczkowski,

Director of Planning and Information Management.

BILLING CODE 7905–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 13211; 812–5488]

HVA Money Market Fund, Inc.; Filing of Application

May 3, 1983.

Notice is hereby given that HVA Money Market Fund, Inc. ("Applicant"), Hartford Plaza, Hartford, Connecticut 06115, an open-end, diversified management investment company registered under the Investment Company Act of 1940 ("Act"), filed an application on March 9, 1983, requesting an order of the Commission, pursuant to Section 6(c) of the Act, exempting Applicant from the provisions of Section 2(a)(41) of the Act and Rules 2a–4 and 22c–1 thereunder to the extent necessary to permit Applicant to maintain a $1.00 per share purchase, redemption and repurchase price for its shares by means of the amortized cost method of portfolio valuation. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the complete text of those provisions of the Act from which Applicant seeks an exemption.

According to the application, investments made by Applicant will be in money market securities with emphasis on obtaining a high level of current income, consistent with liquidity and preservation of capital. Applicant states that it will pursue its investment objective by investing in various instruments: obligations of the U.S. Government and its agencies and instrumentalities; money market instruments, such as bank certificates of deposit, finance company commercial paper, corporate commercial paper, bankers' acceptances and repurchase agreements; and corporate bonds, notes and other debt instruments.

Applicant represents that its assets will consist entirely of cash and investments having a stated maturity date of less than twelve months from the date of purchase and that some investments may have a stated term or maturity date as short as one day. Applicant represents further that the average maturity of the portfolio will vary according to the investment adviser's appraisal of money market conditions.

Prior to the filing of the application, the Commission expressed its view that, among other things, Rule 2a–4 under the Act requires that portfolio instruments of "money market" funds be valued with reference to market factors, and it would be inconsistent with the provisions of Rule 2a–4 for a "money market" fund to value its portfolio instruments on an amortized cost basis (Investment Company Act Release No. 9786, May 31, 1977).

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security, or transaction or any class or classes of persons, securities, or transactions, from any provision of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicant indicates that its executive management has determined that absent unusual or extraordinary circumstances, the amortized cost method of valuing Applicant's portfolio of money market securities is appropriate and in Applicant's best interests and will reflect the fair value of such securities. Applicant also avers that its executive management is of the view that it will be advantageous to Applicant's shareholders to have the conveniences and advantages of the stable purchase, redemption and repurchase price of $1.00 per share which the amortized cost method of valuing money market portfolio securities would provide. Furthermore, Applicant states that before it utilizes the amortized cost method of valuation its board of directors will determine that, absent unusual circumstances, use of that valuation method is appropriate and in the best interests of Applicant and will reflect the fair value of Applicant's portfolio securities. Thus, Applicant submits that its use of the amortized cost method of valuing its money market portfolio securities, subject to certain conditions to which it agrees, will benefit its shareholders.

VOL 48 ISS 91 MY 10 1983 UMI

If the requested exemption is granted by the Commission, Applicant agrees to adhere to the following conditions:

1. In supervising Applicant's operations and delegating special responsibilities involving management of the portfolio of Applicant to Applicant's investment adviser, Applicant's board of directors—as a particular responsibility within the overall duty of care owed to its shareholders—agrees to establish procedures reasonably designed, taking into account current market conditions and the investment objectives of Applicant, to stabiize Applicant's net asset value per share, as computed for the purpose of distribution, redemption and repurchase, at $1.00 per share.

2. Included within the procedures to be adopted by the board of directors shall be the following:

(a) Review by Applicant's board of directors, when it deems appropriate and at such intervals as are reasonable in light of current market conditions, to determine the extent of deviation, if any, of Applicant's net asset value per share as determined by using available market quotations from the $1.00 amortized cost price per share, and the maintenance of records of such review. To fullfill this condition, Applicant intends to use actual quotations or estimates of market value reflecting current market conditions chosen by its board of directors in the exercise of its discretion to be appropriate indicators of value which may include, among other things: (1) Quotations or estimates of market value of individual portfolio instruments, or (2) values obtained from yield data relating to classes of money market instruments published by reputable sources.

(b) In the event such deviation from the $1.00 amortized cost price per share exceeds ½ of 1 percent, a requirement that the board of directors will promptly consider what action, if any, should be initiated.

(c) When Applicant's board of directors believes the extent of any deviation from Applicant's $1.00 amortized cost price per share may result in material dilution or other unfair results to investors or existing shareholders, it shall take such action, as it deems appropriate, to eliminate or to reduce to the extent reasonably practicable, such dilution or unfair results, which may include: redeeming shares in kind; selling portfolio instruments prior to maturity to realize capital gains or losses, or to shorten the maturity of Applicant's portfolio instruments; withholding dividends; or utilizing a net asset value per share as determined by using available market quotations.

3. Applicant will maintain a dollar-weighted average portfolio maturity appropriate to its objective of maintaining a stable net asset value per share; provided, however, that Applicant will not: (a) Purchase any instrument with a remaining maturity of greater than twelve months, or (b) maintain a dollar-weighted average portfolio maturity which exceeds 120 days. In fulfilling this condition, if the disposition of a portfolio security results in a dollar-weighted average protfolio maturity in excess of 120 days, Applicant will invest its available cash in such a manner as to reduce its dollar-weighted average portfolio maturity to 120 days or less, as soon as reasonably practicable.

4. Applicant will record, maintain, and preserve permanently in an easily accessible place a written copy of the procedures (and any modifications thereto) described in condition 1 above, and will record, maintain and preserve for a period of not less than six years (the first two years in an easily accessible place) a written record of the board of directors' considerations and actions taken in connection with the discharge of its responsibilities as set forth above, to be included in the minutes of the board of directors' meetings. The documents preserved pursuant to this condition shall be subject to inspection by the Commission in accordance with Section 31(b) of the Act, as if such documents were records required to be maintained pursuant to rules adopted under Section 31(a) of the Act.

5. Applicant will limit its portfolio investments including repurchase agreements, to those United States dollar denominated instruments which the board of directors determines present minimal credit risks, and which are of "high quality" as determined by any major rating service or, in the case of any instrument that is not rated, of comparable quality as determined by Applicant's directors.

6. Applicant will include in each of its quarterly reports, as an attachment to Form N–1Q, a statement as to whether any action pursuant to condition 2(c) above was taken during the preceding fiscal quarter and, if any such action was taken, will described the nature and circumstances of such action.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than May 27, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for his/her request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 13206; 812–5520]

Nationwide Life Insurance Co. and Nationwide DC Variable Account; Application

April 29, 1983.

Notice is hereby given, That Nationwide Life Insurance Company ("Nationwide Life"), One National Plaza, Columbus, Ohio 43216, a stock life insurance company organized under the laws of the State of Ohio, and Nationwide DC Variable Account ("DCVA"), a unit investment trust registered under the Investment Company Act of 1940 ("Act") (collectively "Applicants"), filed an application on April 8, 1983 and an amendment thereto on April 27, 1983, for an order amending a prior order of the Commission pursuant to Section 11 of the Act approving the terms of certain offers of exchange. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and are referred to the Act for a statement of the relevant statutory provision.

DCVA was established by Nationwide Life in connection with the sale of certain Group Flexible Fund Retirement Contracts. Purchase payments less applicable charges are allocated at the discretion of the contract owner (or participant if permitted by the retirement plan) to the General Account and/or to one or more series of the DCVA, each of which represents investment in shares of a separate diversified, open-end, management investment company registered under the Act (collectively, the "Eligible Funds"). The Eligible Funds are: Nationwide Fund, Nationwide Money Market Fund, Seligman Growth Fund, Putnam Investors Fund, Inc., Massachusetts Capital Development Fund, Inc. ("MCD"), Massachusetts Financial High Income Trust ("MFHI") and Massachusetts Investors Growth Stock Fund, Inc. Shares of Eligible Funds are sold to the DCVA at net asset value.

Applicants received an order of the Commission on December 23, 1974 (Investment Company Act Rel. No. 8622) granting exemptions from various provisions of the Act and pursuant to Section 11 of the Act approving the terms of certain offers of exchange. Applicants now seek an order of the Commission amending this prior order to allow the addition of three new series to the DCVA: the Fidelity High Income Fund, Fidelity-Equity Income Fund, and Twentieth Century Growth Investors. Applicants propose to permit contract owners (or participants if permitted by the retirement plan) to make two transfers of unit values among the series of the DCVA each calendar year without charge. For each additional transfer, an administrative charge of $5 will be assessed. EAch exchange request must involve either unit value having an aggregate value of at least $1000 or all of that participant's unit value in the series. Upon receipt of an exchange request, Nationwide Life will transfer the amount to be converted in accordance with Rule 22c–1 under the Act. Such transfers will be based on the accumulation unit values of the affected series at the close of business on the day such transfer occurs. The MCD and the MFHI series are an exception to the extent that no more than two exchanges of unit value by a participant into such a series may be made during any calendar year.

Applicants request approval pursuant to Sections 11(a) and 11(c) of the Act to permit the proposed offer of exchange rights described above, where permitted under applicable law and by the retirement plan under which a given contract is issued.

Notice is further given, That any interested person wishing to request a hearing on the application may, not later than May 23, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices and orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[Release No. 13212; 812–5532]

Sun Life Assurance Company of Canada (U.S.), et al.; Application

May 4, 1983.

Notice is hereby given, That Sun life Assurance Company of Canada (U.S.), Sun Life of Canada (U.S.) Variable Account C ("Variable Acount C"), 1 Sun Life Executive Park Wellesley Hills, MA 02181 a separate account registered under the Investment Company Act of 1940 ("Act") as a unit investment trust, and Clarendon Insurance Agency, Inc. 200 Berkely Street, Boston Mass. 02116 (collectively, "applicants") filed an application pursuant to Section 11 of the Act on April 14, 1983 and an amendement thereto on May 2, 1983 for an order of the Commission approving the terms of certain offers of exchange. All interested persons are referred to the application and amendment on file with the Commission for a statement of the facts and representations contained therein, which are summarized below, and are referred to the act for a statement of the relevant statutory provision.

Variable Account C was established for use with respect to certain variable annuity contracts. Assets of Variable Account C are divided into sub-accounts. Each sub-account invests exclusively in shares of one of nine specific mutual funds. In Investment Company Act Release No. 12831 (November 18, 1982), the Commission approved, pursuant to Section 11 of the Act, the terms of offers of exchange of variable accumulation units of one sub-account for variable accumulation units of another, of fixed accumulation units for variable accumulation units and vice versa, and, after the annuity commencement date, of variable units of one sub-account for variable units of another sub-account. Applicants propose to offer exchanges of units of an additional sub-account which invests in Massachusetts Financial Emerging Growth Trust. These exchanges will be made on the basis of relative net asset values without the deduction of any fees or charges.

Applicants request approval pursuant to Sections 11(a) and 11(c) of the Act to permit Applicants to provide the exchange right described above.

Notice is further given, That any interested person wishing to request a hearing on the application may, not later than May 31, 1983, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the addresses stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. Persons who request a hearing will receive any notices or orders issued in this matter. After said date an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delelgated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 19726; File No. SR–MSRB–82–15]

Municipal Securities Rulemaking Board; Order Withdrawing Proposed Rule Change

May 3, 1983.

The Municipal Securities Rulemaking Board ("MSRB") on December 21, 1983, filed with the Commission, pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) ("Act"), and Rule 19b–4 thereunder, a proposed rule change that would have amended MSRB Rule G–12(e)(v)(B), on uniform practice in the delivery of securities. The proposed rule change would have required that certificates of $5,000 par value denominaton be delivered on all transactions of registered securities issued on or after January 1, 1983, and settled prior to January 1, 1985, unless the parties agreed otherwise.

VOL
48
ISS
91
MY
10
1983
UMI

Notice of the proposed rule change, including the terms of substance, was published in Securities Exchange Act Release No. 19384 (December 30, 1982), (48 FR 3066, Jan. 24, 1983). The Commission received three comment letters, all of which opposed the proposed rule change. All three of the commentators said that the increased number of certificates which would have been required by the proposed rule change would have entailed significant expenses.

The MSRB, by letter dated April 25, 1983, notified the Commission that it had determined to withdraw the proposed rule change. After reviewing the comment letters on the proposed rule change, the MSRB determined that the increased burdens which would have been imposed upon issuers, transfer agents, and other market participants, would have exceeded the benefits of the proposed rule change. They also noted that the use of certain automated clearance techniques might help to alleviate some of the clearance difficulties which originally prompted submission of the proposed rule change. Although the MSRB stated that it continues to be concerned that the municipal securities industry may experience clearance delays due to the use of larger denomination certificates, particularly during the period immediately following the effective date of the registration provisions of Tax Equity and Fiscal Responsibility Act of 1982, as amended, they believe that the withdrawal of the proposed rule change is in the best long-term interests of all participants in the municipal securities markets.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change be, and hereby is, withdrawn.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 19727; File No. SR-NSCC-83-4]

Filing and Immediate Effectiveness of a Proposed Rule Change By National Securities Clearing Corporation

The National Securities Clearing Corporation ("NSCC") on April 7, 1983, filed with the Commission a proposed rule change, pursuant to Rule 19b-4 under the Securities Exchange Act of 1934, that modifies NSCC Rule 7, Section 5 by: (1) Expanding the categories of trade data that NSCC can accept from self-regulatory organizations ("SRO's") on behalf of NSCC participants and (2) increasing the number of NSCC systems that can receive that data. Under the proposed rule change, NSCC can accept from other SRO's on behalf of SRO members that also are NSCC participants compared trade data to be included in NSCC's automated clearance and settlement systems, *e.g.*, NSCC's continuous net settlement ("CNS") system. That compared trade data could reflect net securities transactions due to be cleared and settled at NSCC. Previously, NSCC only could accept for inclusion in NSCC's trade comparison operation initial or supplementary trade data from "marketplace regulators," *i.e.*, national securities exchanges and the National Association of Securities Dealers, Inc., or from service bureaus performing back-office functions for NSCC participants. In addition, the proposed rule change clarifies that any report of initial, supplemental or compared trade data that is received under the Rule is deemed by NSCC to be authorized by the NSCC participant on whose behalf the report is made.

In its filing, NSCC explains that the proposal's primary purpose is to facilitate NSCC participants' use of NSCC's CNS system for securities transactions required to be confirmed and affirmed through the National Institutional Delivery System of several registered securities depositories. NSCC believes that the proposed rule change will facilitate the prompt and accurate clearance of securities transactions and will foster cooperation and coordination with persons engaged in the clearance and settlement of securities transactions.

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Securities Exchange Act of 1934 and Rule 19b-4 thereunder. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate the rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Publication of the submission is expected to be made in the **Federal Register** during the week of May 9, 1983. Interested persons are invited to submit written data, views and arguments concerning the submission within twenty-one days from the date of publication in the **Federal Register**. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR-NSCC-83-4.

Copies of the submission, with accompanying exhibits, and of all written comments will be available for public inspection at the Securities and Exchange Commission's Public Reference Room, 450 Fifth Street, NW., Washington, D.C. Copies of the filing will also be available at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

Philadelphia Stock Exchange, Inc.; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

May 2, 1983.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

Potomac Electric Power Company
Common Stock, $10 Par Value (File No. 7-6617)
$2.44 Convertible Cumulative Preferred Series of 1966 (File No. 7-6618)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.[1]

Interested persons are invited to submit on or before May 23, 1983 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this

[1] These securities are currently listed and registered on the Philadelphia Stock Exchange, Inc. ("Phlx"). However, at the request of Potomac Electric Power Company ("Company") the Phlx filed an application on April 28, 1983 to remove the above securities, as well as other issues of the company, from listing and registration on the Exchange. The Phlx has indicated to the Commission staff that it wishes to continue to trade the above securities pursuant to unlisted trading privileges to avoid any lapse in trading.

opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

SMALL BUSINESS ADMINISTRATION

[Application No. 02/02-0463]

County Capital Corp.; Application for License To Operate as a Small Business Investment Company

An Application for a License to Operate as a Small Business Investment Company under the provisions of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 *et seq.*) has been filed by County Capital Corp., 25 Main Street, Southampton, New York 11968, with the Small Business Administration (SBA) pursuant to 13 CFR 107.102 (1982).

The officers, directors and shareholders are as follows:

President, Treasurer, Director 20%
Myron Jaffe, 182 Hungry Habor Road, Valley Stream, New York 11581
Vice President Secretary, Director 20%
Carl A. Weise, 89 Tenth Street, Garden City, New York 11530
Vice President Director 20%
Edward V. Walsh, Jr., 19 St. Paul's Place, Garden City, New York 11530

The Applicant, a New York corporation will begin operations with $500,000 paid-in capital and paid-in surplus, and will conduct its activities primarily in the State of New York.

The Applicant intends to provide financial assistance to small business concerns for their growth, modernization and expansion and will render other management consulting services.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the company under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act of 1958, as amended, and the SBA Rules and Regulations.

Notice is further given that any person may, not later than 15 days from the date of publication of this Notice, submit written comments on the proposed Applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416..

Fook Wah Co., Inc.; Application for a License To Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of Section 301(d) of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 *et seq.*) (Act) been filed by Fook Wah Company, Inc., with the Small Business Administration (SBA), pursuant to 13 CFR 107.102 (1983).

The officers, directors and stockholders of the applicant are as follows:

Director, President, Chairman of the Board; Chief Financial Officer
Ronald F. T. Wong, 540 Darrell Road, Hillsborough, CA 94010
Director and Secretary
Ronald G. Tong, 846 Clayton Street, San Francisco, CA 94117
Director, Vice President General Manager
Vincent M. Chinn, 55 Fallon Place, San Francisco, CA 94133

The Applicant, a California corporation, with its principal place of business at 738 Washington Street, San Francisco, California 94108, will begin operations with $1,006,000 of paid-in capital and paid-in surplus.

The applicant will conduct its activities principally in the State of California.

As a small business investment company under Section 301(d) of the Act, the Applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under Act and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the application include the general business reputation and character of shareholders and management, and the probability of successful operations of the new company in accordance with the Act and Regulations.

Notice is hereby given that any person may, not later than 15 days from the date of publication of this Notice, submit written comments to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this notice will be published in a newspaper of general circulation in San Francisco, California.

[License No. 09/09-0326]

I. K. Capital Loans Co. Ltd.; Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration pursuant to Section 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1983)), under the name of I. K. Capital Loans Company, Ltd., 8601 Wilshire Boulevard, Suite 600, Beverly Hills, California 90211, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958, as amended (the Act), (15 U.S.C. 661 *et seq.*), and the Rules and Regulations promulgated thereunder.

The officers, directors and stockholders of the applicant are as follows:

Director, Chief Financial Officer, Assistant Secretary and Sole Stockholder
Iraj Kermanshahchi, 8601 Wilshire Boulevard, Suite 600, Beverly Hills, California 90211
Director and President
Thomas O. Rockefeller, 900 Lombard Court, Costa Mesa, California 92626
Director, Vice President and Secretary
Albert J. Ashkar, Jr., 8383 Wilshire Boulevard, Suite 900, Beverly Hills, California 90211
Assistant Secretary
Edna Negari, 519 Chalette Drive, Beverly Hills, California 90210

The applicant, a California corporation, with its principal place of business at 8601 Wilshire Boulevard, Suite 600, Beverly Hills, California 90211, will begin operations with $1,020,000 paid-in capital and paid-in surplus.

The applicant will conduct its activities principally in the State of California.

Matters involved in SBA's consideration of the application include the general business reputation and character of proposed managers, and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not later than 15 days from the date of publication of this Notice, submit written comments to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

A copy of this notice will be published in a newspaper of general circulation in Beverly Hills, California.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Dated: May 4, 1983.

Robert G. Lineberry,
Deputy Associate Administrator for Investment.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

[Delegation Order No. 97; Rev. 22]

Delegation of Authority; Chief, Examination Support Section/Staff or Returns Program Manager

AGENCY: Internal Revenue Service, Treasury.

ACTION: Delegation of authority.

SUMMARY: This delegation order is revised to provide for the redelegation of authority to enter into closing agreements concerning internal revenue tax liability to the Chief, Examination Support Section/Staff or Returns Program Manager with respect to agreements concerning the administrative disposition of certain tax shelter cases. The text of the delegation order appears below.

EFFECTIVE DATE: May 4, 1983.

FOR FURTHER INFORMATION CONTACT: J. J. Thomassen OP:EX:I:E, 1111 Constitution Ave., NW., Roon 2406, Washington, D.C. 20224, telephone (202) 566-6466 (Not a toll-free telephone number).

This document does not meet the criteria for significant regulations set forth in paragraph 8 of the Treasury directive appearing in the **Federal Register** for Wednesday, November 8, 1978.

Robert Ackerman,
Acting Director, Office of IRP, Service Center and Support Programs.

Order No. 97 (Rev. 22)

Effective date:

Closing Agreements Concerning Internal Revenue Tax Liability

Pursuant to authority granted to the Commissioner of Internal Revenue by 26 CFR 301.7121-1(a); Treasury Department Order No. 150-32; Treasury Department Order No. 150-36; and Treasury Department Order No. 150-63; subject to the transfer of authority covered in Treasury Department Order No. 221, as modified by Treasury Department Order No. 221-3 (Rev. 2), as revised, this authority is hereinafter delegated.

1. The Chief Counsel is hereby authorized in cases under his/her jurisdiction to enter into and approve a written agreement with any person relating to the Internal Revenue tax liability of such person (or of the person or estate for whom he/she acts) in respect to any prospective transactions or completed transactions if the request to the Chief Counsel for determination or ruling was made before any affected returns have been filed.

2. The Deputy Chief Counsel and the Assistant Commissioner (Examination), are hereby authorized to enter into and approve a written agreement with any person relating to the Internal Revenue tax liability of such person (or of the person or estate for whom he/she acts) for a taxable period or periods ended prior to the date of agreement and related specific items affecting other taxable periods. The Associate Commissioner (Operations) is also authorized to enter into and approve a written agreement with any person relating to the Internal Revenue tax liability of such person (or of the person or estate for whom he/she act) with respect to the performance of his/her functions as the competent authority under the tax conventions of the United States.

3. The Assistant Commissioner (Employee Plans and Exempt Organizations) is hereby authorized to enter into and approve a written agreement with any person relating to the Internal Revenue tax liability of such person (or of the person or estate for whom he/she acts) in cases under his/her jurisdiction, that is, in respect of any transaction concerning empolyee plans or exempt organizations.

4. Regional Commissioners; Regional Counsel; Regional Directors of Appeals; Assistant Regional Commissioners (Examinations); District Directors; Chiefs and Associate Chiefs of Appeals Offices; and Appeals Team Chiefs with respect to his/her team cases, are hereby authorized in cases under their jurisdiction (but excluding cases docketed before the United States Tax Court) to enter into and approve a written agreement with any person relating to the Internal Revenue tax liability of such person (or of the person or estate for whom he/she acts) for a taxable period ended prior to the date of agreement and related specific items affecting other taxable periods.

5. the Associate Chief Counsel (Technical); the Assistant Commissioner (Employee Plans and Exempt Organizations); Regional Commissioners; Regional Counsel; Regional Directors of Appeals; Chiefs and Associates Chiefs of Appeals Offices; and Appeals Team Chiefs with respect to his/her team cases, are hereby authorized in cases under their jurisdiction docketed in the United States Tax Court and in other Tax Court cases upon the request of Chief Counsel or his/her delegate to enter into and approve a written agreement with any person relating to the Internal Revenue tax liability of such person (or of the person or estate for whom he/she acts) but only in respect to related specific items affecting other taxable periods.

6. The Director, Foreign Operations District, is hereby authorized to enter into and approve a written agreement with any person relating to the Internal Revenue tax liability of such person (or of the person or estate for whom he/she acts) to provide for the mitigation of economic double taxation under section 3 of Revenue Procedure 64-54, C.B. 1964-2, 1008, under Revenue Procedure 72-22, C.B. 1972-1, 747, and under Revenue Procedure 69-13, C.B. 1969-1, 402, and to enter into and approve a written agreement providing the treatment available under Revenue Procedure 65-17, C.B. 1965-1, 833.

7. The authority delegated herein does not include the authority to set aside any closing agreement.

8. Authority delegated in this Order may not be redelegated, except that the Chief Counsel may redelegate the authority contained in paragraph 1 to the Associate Chief Counsel (Technical) and to the technical advisors on the staff of the Associate Chief Counsel (Technical) for cases that do not involve precedent issues, the Assistant Commissioner (Examination) may redelegate the authority contained in paragraph 2 of this Order to the Deputy Assistant Commissioner (Examination), the Deputy Chief Counsel may redelegate the authority in paragraph 2 of this Order but not lower than the Deputy Associate Chief Counsel (Litigation), and the Assistant Commissioner (Employee Plans and Exempt Organizations) may redelegate the authority contained in paragraph 3 of this Order to the Deputy Assistant Commissioner (Employee Plans and Exempt Organizations) and to the Technical Advisors on the staff of the Assistant Commissioner (Employee Plans and Exempt Organizations) for cases that do not involve precedent issues; and District Directors may redelegate the authority contained in paragraph 4 of this Order but not below the Chief, Quality Review Staff, or Section Chief, Quality Review Staff, with respect to all matters, and not below the Chief, Examination Support Staff/Section, or Returns Program manager, with respect to agreements concerning the administrative disposition of certain tax shelter cases.

9. Delegation Order No. 97 (Rev. 21), effective October 8, 1982, is hereby superseded.

Dated: 11, April 11, 1983.

James I. Owens,
Deputy Commissioner.

[Delegation Order No. 42; Rev. 19]

Delegation of Authority; Windfall Profit Tax Staff/Section et al.

AGENCY: Internal Revenue Service, Treasury.

ACTION: Delegation of authority.

SUMMARY: This delegation order is revised to provide for the redelegation of authority to sign all consents fixing the period of limitations on assessment or collection to personnel assigned to the Windfall Profit Tax Staff/Section, Grade GS-11, and Automated Collection Branch Managers, Grade GS-9. The text of the Delegation Order appears below.

EFFECTIVE DATE: May 4, 1983.

FOR FURTHER INFORMATION CONTACT: Arthur Aron OP:C:O, Internal Revenue Service, 1111 Constitution Ave. NW., Room 7539, Washington, D.C. 20224, Telephone (202) 566-3131 (Not a toll-free telephone number).

This document does not meet the criteria for significant regulations set fourth in paragraph 8 of the Treasury directive appearing in the **Federal Register** for Wednesday, November 8, 1978.

Robert Ackerman,
Acting Director, Office of IRP, Service Center and Support Programs.

Order No. 42 (Rev. 19)

Effective date: March 7, 1983.

Authority to Execute Consents Fixing the Period of Limitations on Assessment or Collection Under Provisions of the 1939 and 1954 Internal Revenue Codes

1. Pursuant to authority vested in the Commissioner of Internal Revenue by Treasury Department Order No. 120; Order No. 150-2; 26 CFR 301.6501(c)-1; 26 CFR 301.6502-1; 26 CFR 301.6901-1(d); and 26 CFR 301.7701-9; the authority to sign all consents fixing the period of limitations on assessment or collection is delegated to the following officials:

a. Chief Counsel
b. Regional Counsel
c. Regional Directors of Appeals
d. Service Center Directors
e. District Directors

2. This authority may be redelegated but not below the following levels for each activity:

a. Service Centers—Chief, Accounting Branch; Chief, Correspondence and Processing Section; Revenue Officers; Chief, Quality Review Staff; Returns Program Managers; and personnel assigned to the Windfall Profit Tax Staff/Section, Grade GS-11;

b. Collection—Chiefs, Office Branches and Office Groups; Revenue Officers; Chiefs, Technical and Office Compliance Branches and Groups; Revenue Representative Supervisors; and Automated Collection Branch managers, Grade GS-9;

c. Examination—Reviewers, Grade GS-11; Group Managers; Case Managers; Returns Program Managers; Classifiers/Screeners, Grade GS-11; and personnel assigned to the Examination Support Staff/Section, Grade GS-11;

d. Criminal Investigation—Chiefs, Criminal Investigation Divisions, except this authority in streamlined districts is limited to the District Director;

e. Appeals—Appeals Officers;

f. Foreign Operations District—Representatives at foreign posts; Revenue Agents, Tax Auditors, and Special Agents on foreign assignments; and levels b, c, and d, above; and

g. District Employee Plans and Exempt Organizations—Reviewers, Grade GS-11; Group Managers.

3. No authority is delegated under this Order to the District Counsel.

4. Delegation Order No. 42 (Rev. 18), effective March 7, 1983, is superseded.

Dated: April 11, 1983.

James I. Owens,
Deputy Commissioner.
